Battery Use & Safety

Important: Handle and store batteries properly to avoid injury that came with your phone are recommended for use. or damage. Most battery issues arise from improper handling of Important: Refer to Motorola's warranty for details of coverage and batteries, and particularly from the continued use of damaged batteries. exclusions. DON'Ts

- Don't disassemble, crush, puncture, shred or otherwise attempt to change the form of your battery.
- Don't let the phone or battery come in contact with water. Water can get into the phone's circuits, leading to corrosion. If the phone and/or battery get wet, have them checked by your carrier or contact Motorola, even if they appear to be
- working properly. · Don't allow the battery to touch metal objects. If metal
- objects, such as jewellery, stay in prolonged contact with the
- Don't place your battery near a heat source. Excessive heat can damage the phone or the battery. High temperatures can cause the battery to swell, leak or malfunction. Therefore:
- Do not dry a wet or damp battery with an appliance or heat source, such as a hair dryer or microwave oven.
- Avoid leaving your phone in your car in high temperatures. DOs
- Do avoid dropping the battery or phone. Dropping these items, especially on a hard surface, can potentially cause damage. Do contact your service provider or Motorola if your
- phone or battery has been damaged by being dropped or by high temperatures.

Important: Use Motorola Original products for quality assurance and safeguards. To aid consumers in identifying authentic Motorola batteries from non-original or counterfeit batteries (that may not have adequate safety protection), Motorola provides holograms on its batteries. Consumers should confirm that any battery they purchase has a "Motorola Original" hologram.

Legal and Safety designed for use with your phone. If a replacement is needed, and a Motorola-branded battery is not available, only the type and model

Warning: Use of an improper battery or charger may present a risk of fire, explosion, leakage or other hazard.

Proper and safe battery disposal and recycling: Proper battery disposal is not only important for safety, it also benefits the environment. Consumers may recycle their used batteries in many retail or service provider locations. Additional information on proper disposal and recycling may be found on the Web:

www.motorola.com/recycling

• www.rbrc.org/call2recycle/ (in English only)

Disposal: Promptly dispose of used batteries in accordance with local regulations. Contact your local recycling centre or national recycling organisations for more information on how to dispose of batteries.

Warning: Never dispose of batteries in a fire because they may explode

• Battery Charging

13

Notes for charging your phone's battery:

- When charging your battery, keep it near room temperature. Never expose batteries to temperatures below 0°C (32°F) or above 45°C (113°F) when charging.
- New batteries are not fully charged
- New batteries or batteries stored for a long time may take more time to charge.
- Motorola batteries and charging systems have circuitry that protects the battery from damage from overcharging.
- If your battery is fully discharged, the phone may not display a charging indicator during the first 5~15 minutes whilst charging.

Statement

Specific Absorption Rate

Your model wireless phone meets international guidelines for exposure to radio waves

Your mobile device is a radio transmitter and receiver. It is designed compliance with: not to exceed the limits for exposure to radio waves recommended • The essential requirements and other relevant by international guidelines. These guidelines were developed by the provisions of Directive 1999/5/EC independent scientific organisation ICNIRP and include safety margins • All other relevant EU Directives designed to assure the protection of all persons, regardless of age and health and to account for any variations in measurements

The guidelines use a unit of measurement known as the Specific Absorption Rate (SAR). The ICNIRP SAR limit for mobile devices used by the general public is 2 watts per kilogram (W/kg) and the highest SAR value for this mobile device when tested at the ear is 1.24 W/kg. As mobile devices offer a range of functions, they can be used in other positions, such as on the body as described in this guide. In this case, the highest tested SAR value is 1.26 W/kg. The tests are carried out. The above gives an example of a typical Product Approval Number.

As SAR is measured utilising the mobile device's highest transmitting product's label in the "Search" bar on the Web site. power, the actual SAR of this mobile device while operating is typically • Safety & General Information below that indicated above. This is due to automatic changes to the This section contains important information on the safe and In an aircraft, turn off your mobile device whenever instructed to do

While there may be differences between the SAR levels of various mobile devices and at various positions, they meet the governmental requirements for safe exposure. Please note that improvements to this product model could cause differences in the SAR value for later products; in all cases, products are designed to be within the guidelines. The World Health Organisation has stated that present scientific information does not indicate the need for any special precautions for the use of mobile devices. They note that if you want to reduce your to RF energy. exposure, then you can do so by limiting the length of calls or using a hands-free device to keep the mobile device away from the head and Operational Precautions hody.

RF Energy Interference/Compatibility

Nearly every electronic device is subject to RF energy interference Obey all posted signs when using mobile devices in public areas. from external sources if inadequately shielded, designed or otherwise configured for RF energy compatibility. In some circumstances, your mobile device may cause interference with other devices.

Turn off your mobile device in any location where posted notices air contains chemicals or particles, such as grain dust or metal Caution: Improper treatment or use of batteries may hearing: instruct you to do so.

similar feature, consult airline staff about using it in-flight.

Implantable Medical Devices

using your mobile device, the system handling your call controls the Persons with implantable medical devices should observe the following

- Your mobile device is designed to comply with local regulatory ALWAYS keep the mobile device more than 20 centimetres (8 inches) from the implantable medical device when the mobile device is turned ON.
 - DO NOT carry the mobile device in the breast pocket. Use the ear opposite the implantable medical device to minimise

the potential for interference. Turn OFF the mobile device immediately if you have any reason to

suspect that interference is taking place.

• Let the person you are speaking to know you are driving; if necessary, suspend the call in heavy traffic or hazardous weather conditions Rain sleet snow ice and even heavy traffic can be bazardous

• Do not take notes or look up phone numbers while driving. lotting down a "to do" list or going through your address book takes attention away from your primary responsibility-driving safely.

• Dial sensibly and assess the traffic; if possible, place calls when your car is not moving or before pulling into traffic. If you must make a call while moving, dial only a few numbers, check the road and your mirrors, then continue.

· Do not engage in stressful or emotional conversations that may be distracting. Make people you are talking to aware you are driving and suspend conversations that can divert your attention away from the road.

• Use your mobile device to call for help. Dial 999 or another local emergency number in the case of fire, traffic accident or medical emergencies (wherever wireless phone service is available). • Use your mobile device to help others in emergencies. If you see a road accident, crime in progress or other serious emergency where lives are in danger, call 999 or another local emergency number (wherever wireless phone service is available). as you would want others to do for you.

Call roadside assistance or a special non-emergency wireless assistance number when necessary. If you see a broken-down vehicle posing no serious hazard, a broken traffic signal, a minor traffic accident where no one appears injured or a vehicle you know to be stolen, call roadside assistance or another special non-emergency wireless number (wherever wireless phone service is available)

Read and follow the directions from the manufacturer of your implantable medical device. If you have any questions about using your mobile device with your implantable medical device, consult your
