

COOL & FRESH

With Zanussi you can organise and store all your fresh food. It couples functionality with in-built technology to make sure your food stays in tip-top condition, whenever you need it.

SMART FRESH DESIGN

Zanussi cooling products are designed with convenience in mind! The fresh new smart design with clear internal furniture and freezer drawers makes your food easy to see.

TOTAL NO FROST

Chill out with Zanussi's total no frost technology. In selected fridge freezers the flavours and texture of food is preserved for longer and you can identify what you are looking for more easily, with more efficient food storage and no need to defrost...ever!

FROST FREE

Save time and make those defrosting chores a thing of the past, thanks to Zanussi's automatic defrosting system that keeps your freezer in superb condition throughout the year.

FAST FREEZE

A fast freeze button with electronic timer on all freezers and selected fridge freezers, freezes fresh food quickly and automatically returns the freezer to the preset temperature, meaning you don't have to remember.

DAC-DYNAMIC AIR COOLING

Make better use of the space inside your fridge, as it doesn't matter where you place your food. With its technology, the ZJB9476X offers an even temperature throughout the fridge, making sure your food is always kept at the optimum level.

SUPER COOLING

Switch on before a trip to the supermarket and it will be ready on your return for storing chilled foods safely. The fridge automatically returns to the preset temperature - making life that bit easier.

GLASS SHELVES

Easy to wipe glass shelves prevent any spillages from contaminating other food, and are adjustable for extra storage flexibility. Zanussi aims to optimize and maximise the internal storage capacity to give you more space inside.

ELECTRONIC CONTROLS

For complete peace of mind the ZBB7266 offers a LCD display that is easy to read at a glance, showing that all your food is being stored at the optimum temperature.

ENERGY A

Help the environment and your pocket; A-rated machines mean Zanussi offers a low level of energy consumption, proving that every little helps.

Fridge freezers

ZJB9476X

4 door stainless steel total frost-free combi fridge freezer
