**D-Value: 11,0 kN**

© 468570/10-04-2006/1

© 468570/10-04-2006/14

**NL****MONTAGEHANDLEIDING:**

1. Verwijder de vloerbedekking "in de kofferbak" aan weerszijden naast de bandenbak.
2. Boor de deukjes " in de bodemvloer" welke corresponderen met de gaten K en E van de trekhaak ø11mm door. Vergroot de zojuist geboorde gaten alleen aan de kofferbakzijde tot ø23mm.
3. Steek de twee M10x85 bouten door de gaten in contra A en vier M10x100 bouten door de gaten in contra F. Schuif de afstandsbussen over de draadeinden. Let op ! Raadpleeg schets voor de juiste lengte van de bussen.
4. Knip de sleuven aan de onderzijde van de bumper (overeenkomstig fig.1) los en druk de flap naar boven. Verwijder de laatste bout inclusief vulstrip van de rechterbrandstoffank bevestiging.
5. Laat de uitlaat zakken en demonteer het grote hitteschild. Plaats plaat G en zet deze los vast d.m.v. vier moeren M10 inclusief sluitringen.
6. Plaats plaat B en zet deze vast d.m.v. twee moeren M10 inclusief sluitringen. Zet de losgenomen brandstoffankbestiging t.p.v. punt C vast d.m.v. de originele bout. De onder punt vier verwijderde vulstrip wordt niet herplaats.
7. Monteer het kogelhuis inclusief stekkerplaat, sluitringen en zelfborgende moeren.
8. Plaats de trekhaak tussen de zojuist gemonteerde platen G en B en bevestig deze d.m.v. vier bouten M12x35 inclusief veerringen en moeren. Herplaats het hitteschild en zet de losgenomen uitlaat vast. Draai alle bouten en moeren overeenkomstig de tabel vast.

**Voor de montage en demontage van het afneembare kogelsysteem****dient men de bijgesloten handleiding te raadplegen.****BELANGRIJK:**

- \* Voor eventueel noodzakelijke aanpassing(en) "van het voertuig" dient men de dealer te raadplegen.
- \* Indien op de bevestigingspunten een bitumen of anti-dreunlaag aanwezig is, dient deze verwijderd te worden.
- \* Voor de max. toegestane massa, welke uw auto mag trekken, dient u uw dealer te raadplegen.
- \* **Bij het boren dient men er zorg voor te dragen, dat electriciteits-, rem- en brandstofleidingen niet worden geraakt.**
- \* Verwijder "indien aanwezig" de plastik dopjes uit de puntlasmoeren.
- \* Deze handleiding dient na montage bij de voertuigpapieren gevoegd te worden.

**GB****FITTING INSTRUCTIONS:**

1. Remove the floor covering (in the boot) from either side of the tire tray.
2. Drill  $\varnothing$  11 mm holes through the hollows corresponding to holes K and E on the tow bar. Enlarge these holes on the boot side to  $\varnothing$  23 mm.
3. Slide the two M10x85 bolts through the holes in back plate A and the four M10x100 bolts through the holes in back plate F. Slide the spacers over the threads. Take care! Consult the sketch for the correct spacer lengths.
4. Cut out the slots on the underside of the bumper (as shown in fig. 1) and push the flap upwards. Remove the last bolt with spacer strip from the right fuel tank mount.
5. Lower the exhaust and remove the large heat shield. Put plate G in place and attach four M10 nuts with flat washers fingertight.
6. Place plate B and fasten it in place using two M10 nuts with flat washers. Refit the fuel tank mount at point C using the original bolt. The

© 468570/10-04-2006/3

Zur Montage und Demontage des Kugelsystems sollte man die bei-  
gefügte Anleitung zu Rate ziehen.

8. Die Kupplungskegel mit Halterung zwischen den Sobein montieren  
Platten G und B anlegen und mit vier M12x35-Schrauben inkl.  
Federtringen und Multiflex befestigen. Das Hitzeschild widerstandsfähig  
und den gelegten Auspuff wieder befestigen. Alle Schrauben und  
Multiflex laut Tabelle festziehen.

7. Das Kugelgehäuse einschließlich Steckdosenplatte, Unterlegscheiben  
und Selbstsichernde Multiflex montieren.

6. Platte B anlegen und mit zwei M10-Muttern inkl. Unterlegscheiben  
befestigen. Die gesuchte Kraftstoffanbauleitung an Punkt C mit der  
Drehmomentschlüssel befestigen. Der unter Punkt Vier entfernte Fußstiel  
wird nicht wieder angeschraubt.

5. Den Auspuff sacken lassen und das grobe Hitzeschild abmontieren.  
Platte G anlegen und diese mit vier M10-Muttern inkl. Unterlegscheiben  
handfest befestigen.

4. Die Schlitze an der Unterseite der Stoßstange (laut Fig. 1) losschrauben  
und die Klappe nach oben drücken. Die hintere Schraube inkl.  
Füllstift von der rechten Kraftröhrchen-Längse der Hülse.

3. Die zwei M10x85-Schrauben durch die Löcher in Kontur A und die vier  
Distanzschäben über die Gewinde schrauben. Bitte beachten! Schrauen Sie  
die Sehnen gebrochen mit Halterung überinstellen, f1 mm durchbohren.  
Kupplungskegel mit Halterung überinstellen, f1 mm durchbohren.  
Vergroßern.

2. Die Einkehrungen im Boden, die mit den Löchern K und E von der  
Kupplungskegel mit Halterung überinstellen, f1 mm durchbohren.  
Die Sehnen gebrochen mit Halterung nur an der Kofferramme auf f23mm  
vergrößern.

7. Fitt the ball housing, including socket plate, flat washers and self-locking  
nuts.

8. Place the two bar between plates G and B, which have just been fitted.  
and bolts to the values given in the table.

9. Attach the tow bar using four M12x35 bolts with spring washers and  
nuts. Replace the heat shield and refasten the exhaust. Tighten all nuts  
do not overtighten.

10. Remove the insulation material from the contact area of the fitting  
points.

11. Consult your dealer for the maximum torque and ball  
hitch pressure of your vehicle.

12. Remove the insulation material from the contact area of the fitting  
points.

13. The dealer should be consulted for possible necessary adjustment(s).

14. The customer's acceptance prior to completion. Bring instructions  
and information MUST be obtained by the installation engineer of  
the customer's responsibility for any matters arising as a result of  
this miscommunication.

15. Should this installation process entail the cutting of the bumper -  
"of the vehicle", "Do not drill through electrical, brake- or fuel lines".

## HINWEISE:

- \* Für (eine) eventuell erforderliche Anpassung(en) "des Fahrzeugs" ist der Händler zu Rate zu ziehen.
- \* Im Bereich der Anlageflächen muß Unterbodenschutz, Hohlräumkonserverierung (Wachs) und Antidröhnmaterial entfernt werden.
- \* Vor dem Bohren prüfen, daß keine, dort eventuell vorhandene Leitungen beschädigt werden können.
- \* Alle Bohrspäne entfernen und gebohrte Löcher gegen Korrosion schützen.
- \* Entfernen Sie "falls vorhanden", die Plastikkappen von den Punktschweißmuttern.
- \* Für das höchstzulässige Zuggewicht und der erlaubte Kugeldruck Ihres Fahrzeugs ist Ihr Händler zu befragen.
- \* Die Quetschmuttern müssen nach einem späteren lösen der Muttern gegen neue ausgetauscht werden, da ansonsten die Sicherungswirkung nicht mehr garantiert ist!

**F**

## INSTRUCTIONS DE MONTAGE:

1. Retirer le tapis de sol du coffre des deux côtés, près de la caisse des roues.
2. Percer de 11 mm de Ø les encoches dans le plancher du fond correspondant aux trous K et E de l'attache-remorque. Aléser les trous venant d'être percés jusqu'à 23 mm de Ø, du côté du coffre seulement.
3. Faire passer les deux boulons M10x85 dans les trous de la contre-pièce A et les quatre boulons M10x100 dans les trous de la contre-pièce F. Faire glisser les douilles d'écartement par dessus les embouts filetés. Attention ! Consulter le croquis pour la longueur exacte des douilles.
4. Découper les fentes du dessous du pare-chocs (conformément à la fig. 1) et rabattre le rabat vers le haut. Enlever le dernier boulon, bande de calage incluse, de la fixation du réservoir de carburant droit.

5. Laisser descendre l'échappement et démonter le gros bouclier thermique. Positionner la plaque G et la monter, sans serrer, à l'aide de quatre écrous M10, rondelles de blocage incluses.

6. Positionner la plaque B et la fixer à l'aide de deux écrous M10, rondelles de blocage incluses. Fixer l'attache du réservoir de carburant qui a été détachée à l'emplacement du point C à l'aide du boulon d'origine. La bande de calage enlevée au point 4 ne sera pas remise en place.

7. Monter le logement de la rotule y compris la prise électrique, les rondelles de blocage et les écrous autofréinés.

8. Positionner l'attache-remorque entre les plaques G et B venant d'être montées et les fixer à l'aide de quatre boulons M12x35, rondelles groover et écrous inclus. Remettre en place le bouclier thermique et fixer l'échappement qui a été détaché. Serrer tous les boulons et écrous conformément au tableau.

**Pour le montage et le démontage du système à rotule, veuillez consulter la notice ci-jointe.**

## REMARQUE:

- \* Pour une/des adaptations indispensables sur le véhicule, veuillez consulter le concessionnaire.
- \* Enlever la couche de bitume ou d'anti-tremblement qui recouvre éventuellement les points de fixation.
- \* Pour connaître le poids de traction maximum et le poids en flèche sur la rotule autorisée du véhicule, veuillez consulter votre concessionnaire.
- \* **Veiller en perçant à ne pas endommager les conduites de électrique, de frein et de carburant.**
- \* Retirer "si présents" les embouts en plastique des écrous de soudure par point.
- \* Cette notice de montage doit être conservée à bord du véhicule après montage de l'attelage.

Lläs den bifogade handledningens inman kulisystemet moteras och demonteras.

6. Placer pladen B og sæt den fast med to møtrikker M10, inklusiv planskiver. Monter det demonterede benzintankbeslag i punkt C med den originale bolt. Udfyldningsbåndet, som blev nævnt under punkt 4, anvendes ikke længere.

7. Monter kuglehuset, inklusive kontaktplade, planskiver og selvlåsende møtrikker.

8. Placer anhængertrækket mellem de nymonterede plader G og B og monter det med fire bolte M12x35, inklusiv fjederskiver og møtrikker. Sæt varmeskjoldet på plads igen og monter det demonterede udstødningsrør. Spænd alle bolte og møtrikker ifølge tabellen.

**Førend montering eller demontering af kuglesystemet påbegyndes, bør man læse den vedlagte vejledning.**

#### BEMÆRK:

- \* Kontakt forhandleren i forbindelse med eventuelle påkrævede ændring(er) på køretojet.
- \* Undervognsbehandlingen skal fjernes de steder hvor trækket ligger an mod bilen.
- \* Kontakt Deres forhandler for oplysninger om den maksimale trækkraft og det tilladte kugletryk.
- \* **Vær forsigtig ikke at bore i ledninger-,bremse eller benzinslange**
- \* Fjern plasticpropperne "om de findes" fra de punktsvejsede møtrikker.

\* DENNE MONTERINGSVEJLEDNING SKAL MEDBRINGES VED SYN.

### E INSTRUCCIONES DE MONTAJE:

1. Retirar el revestimiento dentro del maletero a ambos lados de la caja de neumáticos.
2. Perforar hasta un diámetro de 11mm las depresiones en el fondo del suelo que corresponden con los orificios K y E del gancho de remolque. Agrandar hasta un diámetro de 23mm estos orificios que se acaban de

\* Si en los puntos de fijación hay una capa de betún o anti-choque hay que quitarla.

\* Consulte a su concesionario para el peso máximo de tracción y la presión de la bola admitida de su vehículo.

#### \* No agujerear cable de eléctrico, tubos de freno o gasolina"

- \* Retirar, si presentes, los capuchones de plástico de las tuercas de soldadura por punto.
- \* Guarde estas instrucciones junto a la documentación del vehículo después del montaje del enganche.

### I ISTRUZIONI PER IL MONTAGGIO :

1. Rimuovere la tappezzeria dal bagagliaio, ad entrambi i lati dell'alloggiamento per la ruota di scorta.

2. Praticare dei fori da ø11 mm nel fondo del bagagliaio, in corrispondenza dei fori K ed E del gancio traino. Ingrandire i fori a ø23 mm, solo dal lato del bagagliaio.

3. Inserire i due bulloni M10x85 nei fori di controdadi A e quattro bulloni M10x100 nei fori dei controdadi F. Inserire le bussole distanziatrici sulle estremità filettate. Attenzione! Consultare il disegno per la giusta lunghezza delle bussole.

4. Tagliare le scanalature nella parte inferiore del paraurti (come indicato in fig. 1) e piegare in su l'ala. Rimuovere l'ultimo bullone, compresa la striscia di riempimento del fermo del serbatoio destro.

5. Fare scendere il tubo di scarico e smontare lo scudo isolante. Posizionare la piastra G e fissarla manualmente mediante quattro bulloni M10, completi di rondelle.

6. Posizionare la piastra B e fissarla con due bulloni M10, completi di rondelle. Fissare il fermo del serbatoio, precedentemente smontato, a livello del punto C, con il bullone originale. La striscia di riempimento rimossa al punto 4 non viene più rimontata.

taladrar únicamente desde el lado del maletero.

3. Introducir los dos tornillos M10x85 a través de los orificios en la contratuerca A y los cuatro tornillos M10x100 a través de los orificios en la contratuerca F. Encajar los tubos distanciadores sobre las roscas. ¡Atención! Consultar el croquis para el largo correcto de los tubos.

4. Cortar las ranuras en el lado inferior del parachoques (de acuerdo a la fig.1) y empuje la aleta hacia arriba. Retirar el último tornillo inclusive tira de remate de la fijación del depósito de combustible derecho.

5. Bajar el tubo de escape y desmontar el gran escudo térmico. Colocar la placa G y fijarla sin apretar del todo usando cuatro tuercas M10 inclusive arandelas planas.

6. Colocar la placa B y fijarla por medio de dos tuercas M10 inclusive arandelas planas. Fijar con el tornillo original a la altura del punto C la fijación del depósito de combustible que se había suelto. La cinta de remate retirada bajo punto cuatro no se vuelve a poner.

7. Montar la caja de la bola inclusive placa enchufe, arandelas planas y tuercas de seguridad.

8. Situar el gancho de remolque entre las placas G y B que se acaban de montar y fijarlo por medio de cuatro tornillos M12x35 inclusive arandelas grover y tuercas. Volver a poner el escudo térmico y fijar el tubo de escape suelto. Apretar todos los tornillos y tuercas conforme los puntos indicados en la tabla.

**Para el montaje y desmontaje del sistema de bola desarmable, consultense las instrucciones adjuntas.**
