# BlackBerry Connect

## More devices. More choice.

BlackBerry® Connect™ software is easy to use. It works with the existing applications on your Nokia device to maintain the experience and functionality. There's no need to learn or manage separate programs or adjust to a different screen layout. Before setting up your device with BlackBerry Connect software, be sure to activate an appropriate BlackBerry® data plan and insert your fully charged battery and SIM card. You can refer to your User Guide to help you get started.

### Installing and setting up BlackBerry Connect software

To determine whether BlackBerry Connect software is already installed on your Nokia, go to Tools, select Control Panel and scroll down to **Messaging**. If BlackBerry appears in the list, the software is installed on your device and you can move to Email Setup below.

1. Verify that Nokia PC Suite is installed on your computer.
2. Visit [www.businesssoftware.nokia.com](http://www.businesssoftware.nokia.com) and choose your **Region**, **Operator** and **Phone Model**.
3. Save the .sisx file that is compatible with the software version on your Nokia to your computer.
4. Using Nokia PC Suite, install the .sisx file to your Nokia through Infrared, Bluetooth®, data cable or a memory card
5. Select **Yes** to install the BlackBerry Connect software
6. Read the application information and select **Continue**.

Next, confirm that your Nokia is connected to the BlackBerry network by following the instructions below.

1. Go to **Tools** and select **Control Panel**.
2. Scroll down to **Messaging** and select **BlackBerry**.
3. Under **General**, confirm that **Enable Service** is set to **Yes**.
4. Click **Done**. Once your Nokia is fully connected, the BlackBerry Connect icon appears as a capital 'B' on the home screen.

<sup>1</sup>Requires a memory card reader.

### Choosing your email setup option

Now let's set up your wireless email so you can start sending and receiving messages right away. Depending on your needs, use either the BlackBerry® Internet Service email option or the BlackBerry® Enterprise Server email option as outlined below.

## BlackBerry Internet Service email option:

Use this option to create a new BlackBerry email address for your device or to connect your device with up to eleven existing email addresses.

How to set up your BlackBerry Internet Service email:

1. Open your computer Internet browser and go to your Service Provider's BlackBerry Internet Service web site.
2. If you already have an account, log in with your User ID and Password. If not, choose **Create New Account**.
3. Click **I Agree** if you accept the legal terms and conditions.
4. Enter the **PIN** and **IMEI** for your device. It is found on the device by selecting **Tools, Control Panel, Messaging, BlackBerry** and looking under the **Device Info** tab.
5. Select **Continue**.
6. Choose a User ID and Password and click **Sign Up**.
7. Record your login user ID and password in a safe place.
8. Perform one of the following actions:
  - To associate an existing, supported email address with your Nokia, type the full email address (e.g. yourname@ispname.com) and password into the fields provided. You can add up to ten email addresses this way.
  - To create a new email address for your Nokia (i.e. username@carrier.blackberry.com), select **Create Address**. Your login user ID is the name that will appear before the @ sign in your new BlackBerry email address.
9. Select **Next**.
10. Select **OK**.

To learn more about setting up email addresses or using the email setup web site, select **Help**.

**After you finish:** To log out of the email setup web site, select **Log Out**.

## BlackBerry Enterprise Server email option:

Use this option to associate your device with a Microsoft Outlook® or IBM® Lotus Notes® work email account and to take advantage of advanced wireless data synchronization capabilities.

How to set up your BlackBerry Enterprise Service email:

If your system administrator has provided you with an enterprise activation password, you can set up email using this option by following the instructions below.<sup>1</sup> If you do not have an enterprise activation password, contact your system administrator.

1. Visit [www.businesssoftware.nokia.com](http://www.businesssoftware.nokia.com) and choose your **Region, Operator** and **Phone Model**.
2. Save the BlackBerry Connect Desktop 2.1 .zip file to your computer.
3. Follow the instructions to install the BlackBerry Connect Desktop 2.1.
4. Connect your device to your computer. Nokia PC Suite starts and connects to your device.
5. Open the BlackBerry Connect Desktop.
6. Click the **Advanced** tab.
7. Verify that the **Email** field displays your email address.
8. Click the **General** tab.
9. Click **Connect**.
10. At the prompt, move the mouse to generate an encryption key.
11. Click **Exit**. The BlackBerry Connect software activates automatically.
