BlackBerry Connect
More devices. More choice.

BlackBerry® Connect™ software is easy to use. It works with the existing applications on your Nokia Eseries device to maintain the experience and functionality. There's no need to learn or manage separate programs or adjust to a different screen layout. Before setting up your device with BlackBerry Connect software v4.0, be sure to activate an appropriate BlackBerry® data plan and insert your fully charged battery and SIM card. You can refer to your User Guide to help you get started.

Installing and setting up BlackBerry Connect software

To determine whether BlackBerry Connect software v4.0 is already installed on your device, press the **Menu** button. If the **BlackBerry** folder appears on the **Menu** screen, the software is installed on your device.

1. Verify that Nokia PC Suite is installed on your computer.
2. Visit **www.businesssoftware.nokia.com** and choose your **Region, Operator** and **Phone Model**.
3. Save the **.sisx** file that is compatible with the software version on your device to your computer.
4. Install the **.sisx** file to your device through Infrared[1], Bluetooth®[1], data cable or a memory card.[2]
5. Select **Yes** to install the BlackBerry Connect software.
6. Read the application information and select **Continue**.
7. Select **Yes** to turn on the BlackBerry service.

Next, register your device on the BlackBerry network by following the instructions below.

1. Press the **Menu** button.
2. Select **BlackBerry > Settings**.
3. Select the **Connect** tab.
4. Verify that the option for **BlackBerry service** is set to **On**.
5. Select **Options**.
6. Select **Register now**. Once your device is fully connected, the **BlackBerry Connect** icon appears on the home screen and you will receive a registration message in your inbox.

Choosing your email setup option

Now let's set up your wireless email so you can start sending and receiving messages right away. Depending on your needs, use either the BlackBerry® Internet Service email option or the BlackBerry® Enterprise Server email option as outlined below.

BlackBerry Internet Service email option:

Use this option to create a new BlackBerry email address for your device or to connect your device with up to eleven existing email addresses.

How to set up your BlackBerry Internet Service email:

1. Press the **Menu** button.
2. Select **Media > Services**.
3. Select the **BlackBerry account setup** bookmark.
4. On the email setup web site, select **Create New Account**.
5. If you agree to the legal terms and conditions, select **Yes**.
6. Type the login user ID of your choice for the email setup web site.
7. Type a login password of six or more characters.
8. Record your login user ID and password in a safe place.
9. Select **Next**.
10. Select your language.
11. Perform one of the following actions:
    - To associate an existing, supported email address with your device, type the full email address (e.g. yourname@ispname.com) and password into the fields provided. You can add up to eleven email addresses this way.
    - To create a new email address for your device (i.e. username@carrier.blackberry.com), select **Create Address**. Your login user ID is the name that will appear before the @ sign in your new BlackBerry email address.
12. Select **Next**.
13. Select **OK**.

To learn more about setting up email addresses or using the email setup web site, select **Help**.

After you finish: To log out of the email setup web site, tap **Log Out**.

BlackBerry Enterprise Server email option:

Use this option to associate your device with a Microsoft Outlook®, IBM® Lotus® Notes® or Novell® GroupWise® work email account and to take advantage of advanced wireless data synchronization capabilities.

How to set up your BlackBerry Enterprise Service email:

If your system administrator has provided you with an enterprise activation password, you can set up email using this option by following the instructions below.[3] If you do not have an enterprise activation password, contact your system administrator. To set up BlackBerry Enterprise Server email using the BlackBerry Connect Desktop, refer to your User Guide and follow the instructions.

1. Press the **Menu** button.
2. Select **BlackBerry > Activation**.
3. Type your work email address and the password provided to you by your system administrator.
