Breakthrough innovation deliver high quality scans

Do you rely on professional document and image reproduction as a critical part of your business? Perhaps you want to restore cherished memories to their former glory? HP has just the scanner for you.

Built with the latest scanner technology, HP scanners are ideal for reproducing accurate colours and restoring text and photos. And that's good news for reducing the amount of hardcopy you have to handle, as well as preserving memories for future generations.

4800 X 9600 DPI SCAN RESOLUTION¹

When you demand high resolution scanning and won't settle for anything less, the HP Scanjet G4050, G4010 and G3010 Photo Scanners will meet your needs. Enjoy high-definition scans that make impressive reprints with 4800 x 9600 dpi resolution¹.

WORLD'S FIRST 6-COLOUR SCANNER WITH 96-BIT DEPTH COLOUR²

HP scanners equipped with this exclusive technology, scans all images and text with a total of 96 bits per pixel. The result is an unprecedented amount of colour data collected for the scan.

For you, this means less colour error and better image accuracy. Whenever and whatever you're scanning, HP's World's First 6-colour scanners will ensure you get the most realistic photo reproductions.

Dust and scratches

HARDWARE DUST AND SCRATCH REMOVAL WITH INFRARED TECHNOLOGY

With the HP Scanjet G4050 Photo Scanner, restore and rejuvenate slides and negatives as you convert them into digital format. The integrated transparent materials adapter can process sixteen 35 mm slides or 30 negative frames at once. At the same time, it uses infrared technology to detect imperfections due to dust and scratches, and precisely removes them at a touch of a button.
