NOKIA RESERVES THE RIGHT TO REVISE THIS DOCUMENT OR WITHDRAW IT AT ANY TIME WITHOUT PRIOR NOTICE.

The availability of particular products and applications and services for these products may vary by region. Please check with your Nokia dealer for details, and availability of language options.

Export controls

This device may contain commodities, technology or software subject to export laws and regulations from the US and other countries. Diversion contrary to law is prohibited.

The third-party applications provided with your device may have been created and may be owned by persons or entities not affiliated with or related to Nokia. Nokia does not own the copyrights or intellectual property rights to the third-party applications. As such, Nokia does not take any responsibility for end-user support, functionality of the applications, or the information in the applications or these materials. Nokia does not provide any warranty for the third-party applications.

BY USING THE APPLICATIONS YOU ACKNOWLEDGE THAT THE APPLICATIONS ARE PROVIDED AS IS WITHOUT WARRANTY OF ANY KIND, EXPRESS OR IMPLIED, TO THE MAXIMUM EXTENT PERMITTED BY APPLICABLE LAW. YOU FURTHER ACKNOWLEDGE THAT NEITHER NOKIA NOR ITS AFFILIATES MAKE ANY REPRESENTATIONS OR WARRANTIES, EXPRESS OR IMPLIED, INCLUDING BUT NOT LIMITED TO WARRANTIES OF TITLE, MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE, OR THAT THE APPLICATIONS WILL NOT INFRINGE ANY THIRD-PARTY PATENTS, COPYRIGHTS, TRADEMARKS, OR OTHER RIGHTS.

FCC/INDUSTRY CANADA NOTICE

Your device may cause TV or radio interference (for example, when using a telephone in close proximity to receiving equipment). The FCC or Industry Canada can require you to stop using your telephone if such interference cannot be eliminated. If you require assistance, contact your local service facility. This device complies with part 15 of the FCC rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation. Any changes or modifications not expressly approved by Nokia could void the user's authority to operate this equipment.

For your safety

Read these simple guidelines. Not following them may be dangerous or illegal. Read the complete user guide for further information.

SWITCH ON SAFELY

Do not switch the device on when wireless phone use is prohibited or when it may cause interference or danger.

ROAD SAFETY COMES FIRST

Obey all local laws. Always keep your hands free to operate the vehicle while driving. Your first consideration while driving should be road safety.

INTERFERENCE

All wireless devices may be susceptible to interference, which could affect performance.

SWITCH OFF IN HOSPITALS

Follow any restrictions. Switch the device off near medical equipment.

SWITCH OFF IN AIRCRAFT

Follow any restrictions. Wireless devices can cause interference in aircraft.

For your safety

SWITCH OFF WHEN REFUELING

Do not use the device at a refueling point. Do not use near fuel or chemicals.

SWITCH OFF NEAR BLASTING

Follow any restrictions. Do not use the device where blasting is in progress.

QUALIFIED SERVICE

Only qualified personnel may install or repair this product.

ENHANCEMENTS AND BATTERIES

Use only approved enhancements and batteries. Do not connect incompatible products.

WATER-RESISTANCE

Your device is not water-resistant. Keep it dry.

1. General information

About your device

The wireless device described in this guide is approved for use on the EGSM 900 and GSM 1800 and 1900 networks. Contact your service provider for more information about networks.

When using the features in this device, obey all laws and respect local customs, privacy and legitimate rights of others, including copyrights.

Copyright protections may prevent some images, music (including ringing tones), and other content from being copied, modified, transferred, or forwarded.

Remember to make back-up copies or keep a written record of all important information stored in your device.

When connecting to any other device, read its user guide for detailed safety instructions. Do not connect incompatible products.

Warning: To use any features in this device, other than the alarm clock, the device must be switched on. Do not switch the device on when wireless device use may cause interference or danger.

Network services

To use the phone you must have service from a wireless service provider. Many of the features require special network features. These features are not available on all networks; other networks may require that you make specific arrangements with your service provider before you can use the network services. Your service provider can give you instructions and explain what charges will apply. Some networks may have limitations that affect how you can use network services. For instance, some networks may not support all language-dependent characters and services.

Your service provider may have requested that certain features be disabled or not activated in your device. If so, these features will not appear on your device menu. Your device may also have a special configuration such as changes in menu names, menu order, and icons. Contact your service provider for more information.

Enhancements

Practical rules about accessories and enhancements

- Keep all accessories and enhancements out of the reach of small children.
- When you disconnect the power cord of any accessory or enhancement, grasp and pull the plug, not the cord.

- Check regularly that enhancements installed in a vehicle are mounted and are operating properly.
- Installation of any complex car enhancements must be made by qualified personnel only.

Access codes

To set how your phone uses the access codes and security settings, select **Menu > Settings > Security**.

- The security code helps to protect your phone against unauthorized use. The preset code is **12345**. You can change the code, and set the phone to request the code.
- The PIN (UPIN) code, supplied with the SIM (USIM) card, helps to protect the card against unauthorized use.
- The PIN2 (UPIN2) code, supplied with some SIM (USIM) cards, is required to access certain services.
- PUK (UPUK) and PUK2 (UPUK2) codes may be supplied with the SIM (USIM) card. If you enter the PIN code incorrectly three times in succession, you are asked for the PUK code. If the codes are not supplied, contact your service provider.
- The barring password is required when using the **Call barring service** to restrict incoming calls to and outgoing calls from your phone (network service).

General information

- To view or change the security module settings, select **Menu > Settings > Security > Security module settings**.

Configuration setting service

To use some of the network services, such as mobile internet services, MMS, Nokia Xpress audio messaging, or remote internet server synchronization, your phone needs the correct configuration settings. For more information on availability, contact your service provider or the nearest authorized Nokia dealer, or visit the support area on the Nokia website. [See "Nokia support," p. 17.](#)

When you have received the settings as a configuration message and the settings are not automatically saved and activated, **Configuration sett. received** is displayed.

To save the settings, select **Show > Save**. If required, enter the PIN code supplied by the service provider.

Download content

You may be able to download new content (for example, themes) to your phone (network service).

Important: Use only services that you trust and that offer adequate security and protection against harmful software.

For the availability of different services and pricing, contact your service provider.

Software updates

Nokia may produce software updates that may offer new features, enhanced functions, or improved performance. To update the phone software, you need the Nokia Software Updater application and a compatible PC with recent Microsoft Windows operating system, broadband internet access, and a compatible data cable to connect your phone to the PC.

To get more information and to download the Nokia Software Updater application, visit www.nokia.com/softwareupdate or your local Nokia website.

If software updates over the air are supported by your network, you may also be able to request updates through the phone. [See "Software updates over the air," p. 66.](#)

Important: Use only services that you trust and that offer adequate security and protection against harmful software.

Nokia support

Check www.nokia.com/support or your local Nokia website for the latest version of this guide, additional

General information

information, downloads, and services related to your Nokia product.

Configuration settings service

Download free configuration settings such as MMS, GPRS, e-mail, and other services for your phone model at www.nokia.com/support.

Nokia PC Suite

You may find PC Suite and related information on the Nokia website at www.nokia.com/support.

Customer service

If you need to contact customer service, check the list of local Nokia Care contact centers at www.nokia.com/customerservice.

Maintenance

For maintenance services, check your nearest Nokia service center at www.nokia.com/repair.

Digital rights management

Content owners may use different types of digital rights management (DRM) technologies to protect their intellectual property including copyrights. This device uses various types of DRM software to access DRM-protected content. With this device you may be able to access content

protected with WMDRM 10, OMA DRM 1.0, OMA DRM 1.0 forward lock, and OMA DRM 2.0. If certain DRM software fails to protect the content, content owners may ask that such DRM software's ability to access new DRM-protected content be revoked. Revocation may also prevent renewal of such DRM-protected content already in your device. Revocation of such DRM software does not affect the use of content protected with other types of DRM or the use of non-DRM-protected content.

DRM-protected content comes with an associated activation key that defines your rights to use the content. To back up OMA DRM-protected content, use the backup feature of Nokia PC Suite.

If your device has WMDRM protected content, both the activation keys and the content will be lost if the device memory is formatted. You may also lose the activation keys and the content in case the files on your device get corrupted. Losing the activation keys or the content may limit your ability to use the same content on your device again. For more information, contact your service provider.

2. Get started

Install SIM card and battery

Always switch the device off and disconnect the charger before removing the battery.

Get started

For availability and information on using SIM card services, contact your SIM card vendor. This may be the service provider or other vendor.

This device is intended for use with a BL-5C battery. Always use original Nokia batteries. [See "Nokia battery authentication guidelines," p. 100.](#)

The SIM card and its contacts can be easily damaged by scratches or bending, so be careful when handling, inserting, or removing the card.

1. Push the release button (1) to unlock and remove the back cover (2). Remove the battery as shown (3).

2. Open the SIM card holder (4).

Insert the SIM

card (5) with the contact surface facing down into the holder. Close the SIM card holder (6).

3. Observe the battery

contacts (7), and insert the battery (8). Place the upper part of the back cover on the device (9), and close it (10).

Insert a microSD card

Use only compatible microSD cards approved by Nokia for use with this device. Nokia uses approved industry standards for memory cards, but some brands may not be fully compatible with this device. Incompatible cards may damage the card and the device and corrupt data stored on the card.

Get started

1. Switch the phone off, and remove the back cover and the phone battery.
2. Slide the memory card holder to unlock it (1).
3. Open the card holder (2), and insert the memory card into the card holder with the contact surface facing inwards (3).
4. Close the card holder (4), and slide the card holder to lock it (5).
5. Insert the battery, and attach the back cover to the phone.

Charge the battery

Check the model number of any charger before use with this device. This device is intended for use when supplied with power from the AC-8, AC-3 and AC-4 charger.

Warning: Use only batteries, chargers, and enhancements approved by Nokia for use with this

particular model. The use of any other types may invalidate any approval or warranty, and may be dangerous.

For availability of approved enhancements, please check with your dealer. When you disconnect the power cord of any enhancement, grasp and pull the plug, not the cord.

1. Connect the charger to a wall socket.
2. Connect the lead from the charger to the socket on the bottom of your device.

If the battery is completely discharged, it may take a few minutes before the charging indicator appears on the display or before any calls can be made.

The charging time depends on the charger used. Charging a BL-5C battery with the AC-8 charger takes approximately 1 hour while the device is in the standby mode.

Get started

Antenna

Your device has an internal antenna.

Note: As with any other radio transmitting device, do not touch the antenna unnecessarily when the device is switched on. Contact with the antenna affects call quality and may cause the device to operate at a higher power level than otherwise needed. To optimize antenna performance and battery life, avoid contact with the antenna area when operating the device.

Headset

Warning: Listen to music at a moderate level. Continuous exposure to high volume may damage your hearing.

Pay special attention to volume level if you connect any other headsets to the device.

Warning: When you use the headset, your ability to hear outside sounds may be affected. Do not use the headset where it can endanger your safety.

Do not connect products that create an output signal as this may cause damage to the device. Do not connect any voltage source to the Nokia AV Connector.

When connecting any external device or any headset, other than those approved by Nokia for use with this device, to the Nokia AV Connector, pay special attention to volume levels.

Strap

1. Open the back cover.
2. Hook a strap behind the clamp, as shown in the picture, and close the back cover.

Keys and parts

1	Earpiece	2	Display
3	Left selection key	4	Call key
5	Infrared port	6	Navi™ key: hereafter referred to as the scroll key
7	Right selection key	8	End key
9	Keypad	10	Microphone
11	Charger connector	12	Nokia AV Connector (2.5 mm)

13	Mini USB cable connector	14	Volume down key
15	Volume up key	16	Power key
17	Loudspeaker	18	Camera lens

Note: Due to organic material base the color of the cover material may change during the time.

Switch the phone on and off

To switch the phone on or off, press and hold the power key.

If the phone prompts for a PIN or a UPIN code, enter the code (displayed as ****).

The phone may prompt you to set the time and date. Enter the local time, select the time zone of your location in terms of the time difference with respect to Greenwich Mean Time (GMT), and enter the date. [See "Date and time," p. 56.](#)

When you switch on your phone for the first time, you may be prompted to get the configuration settings from your service provider (network service). For more information, refer to **Connect to service provider support**. See ["Configuration"](#), p. 68, and ["Configuration setting service"](#), p. 16.

Standby mode

When the phone is ready for use, and you have not entered any characters, the phone is in the standby mode.

■ Display

1	Signal strength of the cellular network 	
2	Battery charge status 	
3	Indicators	
4	Name of the network or the operator logo	
5	Clock	
6	Display	
7	Function of the left selection key	
8	Function of the Navi key	
9	Function of the right selection key	

You may change the function of the left and right selection key. [See "Left and right selection key," p. 56.](#)

■ **Power saving**

Your phone has a **Power saver** and a **Sleep mode** feature in order to save battery power in the standby mode when no keys are pressed. These features may be activated. [See "Display," p. 55.](#)

■ **Active standby**

The active standby mode displays a list of selected phone features and information that you can directly access.

To switch active standby on or off, select **Menu** > **Settings** > **Display** > **Active standby** > **Active standby mode**.

In the standby mode, scroll up or down to navigate in the list, and choose **Select** or **View**. The arrows indicate that further information is available. To stop navigation, select **Exit**.

To organize and change the active standby mode, select **Options**.

■ **Shortcuts in the standby mode**

To access the list of dialed numbers, press the call key once. Scroll to the number or name, and press the call key to call the number.

To open the web browser, press and hold **0**.

Get started

To call your voice mailbox, press and hold **1**.

Use keys as a shortcut. [See "Dialing shortcuts," p. 34.](#)

■ Indicators

 unread messages

 unsent, canceled, or failed messages

 missed call

 The keypad is locked.

 The phone does not ring for an incoming call or text message.

 The alarm clock is activated.

G/E The phone is registered to the GPRS or EGPRS network.

 A GPRS or EGPRS connection is established.

 The GPRS or EGPRS connection is suspended (on hold).

 A Bluetooth connection is active.

 If you have two phone lines, the second phone line is selected.

 All incoming calls are diverted to another number.

 Calls are limited to a closed user group.

 The timed profile is selected.

Flight mode

Use the flight mode in radio sensitive environments—on board aircraft or in hospitals—to deactivate all radio frequency functions. You still have access to offline games, calendar, and phone numbers. When the flight mode is active,  is shown.

To activate or set up the flight mode, select **Menu > Settings > Profiles > Flight > Activate or Personalise**.

To deactivate the flight mode, select any other profile.

Emergency call in flight mode

Enter the emergency number, press the call key, and select **Yes** when **Exit flight profile?** is displayed.

 **Warning:** With the flight profile you cannot make or receive any calls, including emergency calls, or use other features that require network coverage. To make calls, you must first activate the phone function by changing profiles. If the device has been locked, enter the lock code. If you need to make an emergency call while the device is locked and in the flight profile, you may be also able to enter an official emergency number programmed in your device in the lock code field and select 'Call'. The device will confirm

Get started

that you are about to exit flight profile to start an emergency call.

Keypad lock (keyguard)

To prevent accidental keypresses, select **Menu**, and press * within 3.5 seconds to lock the keypad.

To unlock the keypad, select **Unlock**, and press * within 1.5 seconds. If **Security keyguard** is set to on, enter the security code if requested.

To answer a call when the keypad is locked, press the call key. When you end or reject the call, the keypad automatically locks.

Further features are **Automatic keyguard** and **Security keyguard**. [See "Phone," p. 65.](#)

When the device or keypad is locked, calls may be possible to the official emergency number programmed into your device.

Functions without a SIM card

Some functions of your phone may be used without installing a SIM card, such as music player, radio, games, and data transfer with a compatible PC or another compatible device. Some functions appear dimmed in the menus and cannot be used.

3. Calls

Make a call

You can start a call in several ways:

- Enter the phone number, including the area code, and press the call key.

For international calls, press * twice for the international prefix (the + character replaces the international access code), enter the country code, the area code without the leading 0, if necessary, and the phone number.

- To access the list of dialed numbers, press the call key once in the standby mode. Select a number or name, and press the call key.
- Search for a name or phone number that you saved in **Contacts**. [See "Manage contacts," p. 49.](#)

To adjust the volume in a call, press the volume key up or down.

Incoming call

To answer an incoming call, press the call key. To end the call, press the end key.

To reject an incoming call, press the end key. To mute the ringing tone, select **Silence**.

Dialing shortcuts

First assign a phone number to one of the number keys, 2 to 9. [See "Assign dialing shortcuts," p. 52.](#)

Use a dialing shortcut to make a call in one of the following ways:

- Press a number key, then the call key.
- If **Menu > Settings > Call > Speed dialling > On** is selected, press and hold a number key.

Voice dialing

Make a phone call by saying the name that is saved in the contact list of the phone.

As voice commands are language-dependent, you must select **Menu > Settings > Phone > Language settings > Voice recognition language** and your language before using voice dialing.

Note: Using voice tags may be difficult in a noisy environment or during an emergency, so you should not rely solely upon voice dialing in all circumstances.

1. In the standby mode, press and hold the right selection key or the volume down key. A short tone sounds, and **Speak now** is displayed.

2. Speak the name of the contact you want to dial. If the voice recognition is successful, a list with matches is shown. The phone plays the voice command of the first match on the list. If it is not the correct command, scroll to another entry.

Options during a call

Many of the options that you can use during a call are network services. For availability, contact your service provider.

During a call, select **Options** and from the following options:

Call options are **Mute** or **Unmute**, **Contacts**, **Menu**, **Lock keypad**, **Record**, **Voice clarity**, **Loudspeaker** or **Handset**.

Network options are **Answer** or **Reject**, **Hold** or **Unhold**, **New call**, **Add to conference**, **End call**, **End all calls**, and the following:

- **Send DTMF** — to send tone strings
- **Swap** — to switch between the active call and the call on hold
- **Transfer** — to connect a call on hold to an active call and disconnect yourself
- **Conference** — to make a conference call
- **Private call** — to have a private discussion in a conference call

Write text

Warning: Do not hold the device near your ear when the loudspeaker is in use, because the volume may be extremely loud.

4. Write text

Text modes

To enter text (for example, when writing messages) you can use traditional or predictive text input.

When you write text, press and hold **Options** to toggle between traditional text input, indicated by , and predictive text input, indicated by . Not all languages are supported by predictive text input.

The character cases are indicated by , , and . To change the character case, press #. To change from the letter to number mode, indicated by , press and hold #, and select **Number mode**. To change from the number to the letter mode, press and hold #.

To set the writing language, select **Options** > **Writing language**.

Traditional text input

Press a number key, **2** to **9**, repeatedly until the desired character appears. The available characters depend on the selected writing language.

If the next letter you want is located on the same key as the present one, wait until the cursor appears and enter the letter.

To access the most common punctuation marks and special characters, repeatedly press the number key **1** or press ***** to select a special character.

Predictive text input

Predictive text input is based on a built-in dictionary to which you can also add new words.

1. Start writing a word, using the keys **2** to **9**. Press each key only once for one letter.
2. To confirm a word by adding a space, press **0**.
 - If the word is not correct, press ***** repeatedly, and select the word from the list.
 - If the **?** character is displayed after the word, the word you intended to write is not in the dictionary. To add the word to the dictionary, select **Spell**. Enter the word using traditional text input, and select **Save**.

Navigate the menus

- To write compound words, enter the first part of the word, and press the scroll key right to confirm it. Write the last part of the word, and confirm the word.

3. Start writing the next word.

5. Navigate the menus

The phone offers you an extensive range of functions that are grouped into menus.

1. To access the menu, select **Menu**.
2. Scroll through the menu, and select an option (for example, **Settings**).
3. If the selected menu contains further submenus, select one (for example, **Call**).
4. If the selected menu contains further submenus, repeat step 3.
5. Select the setting of your choice.
6. To return to the previous menu level, select **Back**.
To exit the menu, select **Exit**.

To change the menu view, select **Options** > **Main menu view** > **List** or **Grid**.

To rearrange the menu, scroll to the menu to be moved, and select **Options** > **Organise** > **Move**. Scroll to where

you want to move the menu, and select **OK**. To save the change, select **Done > Yes**.

6. Messaging

You can read, write, send and save text and multimedia messages, e-mail, audio and flash messages. The messaging services can only be used if they are supported by your network or service provider.

Text and multimedia messages

■ Text messages

Your device supports the sending of text messages beyond the limit for a single message. Longer messages are sent as two or more messages. Your service provider may charge accordingly. Characters with accents or other marks, and characters from some language options, take up more space, and limit the number of characters that can be sent in a single message.

An indicator at the top of the display shows the total number of characters left and the number of messages needed for sending.

Before you can send any text or SMS e-mail messages, you must save your message center number. Select **Menu > Messaging > Message settings > Text messages >**

Messaging

Message centres > **Add centre**, enter a name, and the number from the service provider.

■ **Multimedia messages and multimedia plus messages**

A multimedia (MMS) message can contain text, pictures, sound clips, and video clips. A multimedia plus message can also contain any other content, even files not supported by your phone.

Only devices that have compatible features can receive and display multimedia messages. The appearance of a message may vary depending on the receiving device.

The wireless network may limit the size of MMS messages. If the inserted picture exceeds this limit the device may make it smaller so that it can be sent by MMS.

Important: Exercise caution when opening messages. Messages may contain malicious software or otherwise be harmful to your device or PC.

To check availability and to subscribe to the multimedia messaging service (MMS), contact your service provider. You also may download the configuration settings. [See "Nokia support," p. 17.](#)

■ **Create a text message**

1. Select **Menu** > **Messaging** > **Create message** > **Text message**.

2. Enter one or more phone numbers or e-mail addresses in the **To:** field. To retrieve a phone number or e-mail address, select **Add**.
3. For an SMS e-mail, enter a subject in the **Subject:** field.
4. Write your message in the **Message:** field.
5. To send the message, select **Send**.

■ Create a multimedia message

Add text, images, video or sound clips, business cards or calendar notes into different slides and send them as an multimedia message.

1. Select **Menu > Messaging > Create message > Multimedia**.
2. Scroll to a slide and select **Insert** and a content type from the list.
3. Select **Send** and enter one or more phone numbers or e-mail addresses in the **To:** field. To retrieve a phone number or e-mail address, select **Add**.
4. For an SMS e-mail, enter a subject in the **Subject:** field.
5. To send the message, select **Send**.

■ Create a multimedia plus message

1. Select **Menu > Messaging > Create message > Multimedia plus**.
2. Enter recipients, a subject, and text as for a text message.

M e s s a g i n g

3. Select **Insert** and content from the list.
 4. To send the message, select **Send**.
- **Read a message and reply**

Important: Exercise caution when opening messages. E-mail messages or multimedia message objects may contain malicious software or otherwise be harmful to your device or PC.

Your phone issues a notification when a message is received. Press **Show** to display the message. If more than one message was received select a message from the inbox and press **Open**. Use the scroll key to view all parts of the message.

Select **Reply** to create an answer message.

- **Send messages**

Message sending

To send the message, select **Send**. The phone saves the message in the **Outbox** folder, and the sending starts.

Note: The message sent icon or text on your device screen does not indicate that the message is received at the intended destination.

If message sending is interrupted, the phone tries to resend the message a few times. If these attempts fail, the message remains in the **Outbox** folder. To cancel the

sending of the messages in the **Outbox** folder, select **Options > Cancel sending**.

To save the sent messages in the **Sent items** folder, select **Menu > Messaging > Message settings > General settings > Save sent messages**.

Organize your messages

The phone saves received messages in the **Inbox** folder. Organize your messages in the saved items folder.

To add, rename, or delete a folder, select **Menu > Messaging > Saved items > Options**.

E-mail

Access your POP3 or IMAP4 e-mail account with your phone to read, write and send e-mail. This e-mail application is different from the SMS e-mail function.

Before you can use e-mail, you must have an e-mail account and the correct settings. To check the availability and the settings of your e-mail account, contact your e-mail service provider. You may receive the e-mail configuration settings as a configuration message. [See "Configuration setting service," p. 16.](#)

■ Setting wizard

The setting wizard will start automatically if no e-mail settings are defined in the phone.

Messaging

To manage and create e-mail accounts, select **Menu > Messaging > E-mail > Options > Manage accounts.**

■ Write and send an e-mail

You may write your e-mail message before connecting to the e-mail service.

1. Select **Menu > Messaging > E-mail > Write new e-mail.**
2. If more than one e-mail account is defined, select the account from which you want to send the e-mail.
3. Enter the recipient's e-mail address, the subject, and the e-mail message. To attach a file, select **Options > Attach file.**
4. To send the e-mail message, select **Send > Send now.**

■ Read and reply to e-mail

Important: Exercise caution when opening messages. E-mail messages or multimedia message objects may contain malicious software or otherwise be harmful to your device or PC.

1. To download e-mail headers, select **Menu > Messaging > E-mail > Check new e-mail.**
2. To download the complete e-mail message, select **Back > Inboxes,** the account name, the new message, and **Retrieve.**

3. To reply to an e-mail, select **Reply** > **Original text** or **Empty message**. To reply to many, select **Options** > **Reply to all**. Confirm or edit the e-mail address and subject; then write your reply.
4. To send the message, select **Send** > **Send now**.
5. To disconnect from your e-mail account, select **Menu** > **Messaging** > **E-mail** > **Disconnect**. The connection to the e-mail account also automatically ends after some time without activity.

■ Spam filter

The spam filter allows you to put specific senders on a black or white list. Black list sender messages are filtered to **Junk**. Unknown and white list sender messages are downloaded into the account inbox.

To activate and define a spam filter, select **Options** > **Spam filter** > **Settings** in the main e-mail idle screen.

To blacklist a sender, select the e-mail message in the **Inboxes** folder and **Options** > **Blacklist sender**.

Flash messages

Flash messages are text messages that are instantly displayed upon reception.

1. To write a flash message, select **Menu** > **Messaging** > **Create message** > **Flash message**.

Messaging

2. Enter the recipient's phone number, write your message (maximum 70 characters), and select **Send**.

Nokia Xpress audio messages

Create and send an audio message using MMS in a convenient way.

1. Select **Menu > Messaging > Create message > Audio message**. The voice recorder opens.
2. Record your message. [See "Voice recorder," p. 81.](#)
3. Enter one or more phone numbers in the **To:** field, or select **Add** to retrieve a number.
4. To send the message, select **Send**.

Instant messaging

With instant messaging (IM, network service) you can send short text messages to online users. You must subscribe to a service and register with the IM service you want to use. Check the availability of these services, pricing, and instructions with your service provider. The menus may vary depending on your IM provider.

To connect to the service, select **Menu > Messaging > I M** and follow the instructions on the display.

Info messages, SIM messages and service commands

Info messages

You can receive messages on various topics from your service provider (network service). For more information, contact your service provider.

Select **Menu > Messaging > Info messages** and from the available options.

Service commands

Service commands allow you to write and send service requests (USSD commands) to your service provider, such as activation commands for network services.

To write and send the service request, select **Menu > Messaging > Service commands**. For details, contact your service provider.

SIM messages

SIM messages are specific text messages that are saved to your SIM card. You can copy or move those messages from the SIM to the phone memory, but not vice versa.

To read SIM messages, select **Menu > Messaging > Options > SIM messages**.

Voice messages

The voice mailbox is a network service to which you may need to subscribe. For more information, contact your service provider.

To call your voice mailbox, press and hold **1**.

To edit your voice mailbox number, select **Menu > Messaging > Voice messages > Voice mailbox number**.

Message settings

Select **Menu > Messaging > Message settings** to set up your messaging features.

- **General settings** — to set your phone to save sent messages, to allow overwriting of older messages if the message memory is full, and to set up other preferences related to messages
- **Text messages** — to allow delivery reports, to set up message centers for SMS and SMS e-mail, to select the type of character support, and to set up other preferences related to text messages
- **Multimedia msgs.** — to allow delivery reports, to set up the appearance of multimedia messages, to allow the reception of multimedia messages and adverts, and to set up other preferences related to multimedia messages

- **E-mail messages** — to allow e-mail reception, to set the image size in e-mail, and to set up other preferences related to e-mail

7. Contacts

You can save names, phone numbers as contacts in the phone memory and on the SIM card memory and search and recall them to make a phone call or to create a message.

Manage contacts

Select the memory for contacts

The phone memory can save contacts with additional details, such as various phone numbers and text items. You can also save an image, a tone, or a video clip for a limited number of contacts.

The SIM card memory can save names with one phone number attached to them. The contacts saved in the SIM card memory are indicated by .

1. Select **Menu > Contacts > Settings > Memory in use** to select the SIM card, the phone memory, or both for your contacts.
2. Select **Phone and SIM** to recall contacts from both memories. When you save contacts, they will be saved in the phone memory.

Contacts

Save names and numbers

To save a name and phone number, select **Menu > Contacts > Names > Options > Add new contact**.

Add and edit details

The first number you save is automatically set as the default number and is indicated with a frame around the number type indicator (for example, ). When you select a name from contacts (for example, to make a call), the default number is used unless you select another number.

Search for the contact to add a detail, and select **Details > Options > Add detail** and from the available options.

Search for a contact

Select **Menu > Contacts > Names** and scroll through the list of contacts, or enter the first characters of the contact's name.

Copy or move a contact between the SIM card and phone memory

1. Select **Menu > Contacts > Names**.
2. Select the contact to copy or move and **Options > Copy contact** or **Move contact**.

Copy or move several contacts between the SIM card and phone memory

1. Select the first contact to copy or move and **Options** > **Mark**.
2. Mark the other contacts, and select **Options** > **Copy marked** or **Move marked**.

Copy or move all contacts between the SIM card and phone memory

Select **Menu** > **Contacts** > **Copy contacts** or **Move contacts**.

Delete contacts

Search for the desired contact, and select **Options** > **Delete contact**.

To delete all the contacts and the details attached to them from the phone or SIM card memory, select **Menu** > **Contacts** > **Delete all contacts** > **From phone mem.** or **From SIM card**.

To delete a number, text item, or an image attached to the contact, search for the contact, and select **Details**. Scroll to the desired detail, and select **Options** > **Delete** and from the available options.

Create a contact group

Arrange contacts into caller groups with different ringing tones and group images.

Contacts

1. Select **Menu** > **Contacts** > **Groups**.
2. Select **Add** or **Options** > **Add new group** to create a new group.
3. Enter the group name, optionally select an image and a ringing tone, and select **Save**.
4. Select the group and **View** > **Add** to add contacts to the group.

Business cards

You can send and receive a person's contact information from a compatible device that supports the vCard standard.

To send a business card, search for the contact, and select **Details** > **Options** > **Send bus. card**.

When you receive a business card, select **Show** > **Save** to save the business card in the phone memory.

Assign dialing shortcuts

Assign phone numbers to the number keys 2–9 as a shortcut.

1. Select **Menu** > **Contacts** > **Speed dials**, and scroll to a number key.
2. Select **Assign**, or, if a number has already been assigned to the key, select **Options** > **Change**.
3. Enter a number or search for a contact.

8. Call log

To view the information on your calls, select **Menu > Log**.

- **Call log** — to view your recently missed and received calls and dialed numbers chronologically
- **Missed calls, Received calls, or Dialed numbers** — for information about your recent calls
- **Message recipients** — to view the contacts to whom you most recently sent messages
- **Call duration, Packet data counter, or Packet data conn. timer** — to view the general information on your recent communications
- **Message log** — to view the number of sent and received messages

Note: The actual invoice for calls and services from your service provider may vary, depending on network features, rounding off for billing, taxes, and so forth.

Note: Some timers may be reset during service or software upgrades.

9. Settings

Profiles

Your phone has various setting groups called profiles, which you can customize with ringing tones for different events and environments.

Select **Menu** > **Settings** > **Profiles**, the desired profile, and from the following options:

- **Activate** — to activate the selected profile
- **Personalise** — to change the profile settings
- **Timed** — to set the profile to be active until an end time. When the time set for the profile expires, the previous profile that was not timed becomes active.

Themes

A theme contains elements for personalizing your phone.

Select **Menu** > **Settings** > **Themes** and from the following options:

- **Select theme** — Open the **Themes** folder, and select a theme.
- **Theme downloads** — Open a list of links to download more themes.

Tones

You can change the tone settings of the selected active profile.

Select **Menu > Settings > Tones**. You can find the same settings in the **Profiles** menu.

If you select the highest ringing tone level, the ringing tone reaches its highest level after a few seconds.

Display

Select **Menu > Settings > Display** and from the available options:

- **Wallpaper** — to add a background image for the standby mode
- **Active standby** — to activate, organize, and personalize the active standby mode
- **Standby mode font colour** — to select the font color for the standby mode
- **Navigation key icons** — to display the icons of the scroll key shortcuts in the standby mode when active standby is off
- **Screen saver** — to create and set a screen saver
- **Power saver** — to dim the display automatically and to display a clock when the phone is not used for a certain time
- **Sleep mode** — to switch off the display automatically when the phone is not used for a certain time

Settings

- **Font size** — to set the font size for messaging, contacts, and web pages
- **Operator logo** — to display the operator logo
- **Cell info display** — to display the cell identity, if available from the network

Date and time

To change the clock type, time, time zone, and date settings, select **Menu > Settings > Time and date > Time, Date, or Auto-update of date & time** (network service).

When traveling to a different time zone, select **Menu > Settings > Time and date > Time > Time zone** and the time zone of your location in terms of the time difference with respect to Greenwich mean time (GMT) or coordinated universal time (UTC). The time and date are set according to the time zone and enable your device to display the correct sending time of received text or multimedia messages.

For example, GMT -5 denotes the time zone for New York (USA), 5 hours west of Greenwich/London (UK).

My shortcuts

With personal shortcuts you get quick access to often used functions of the phone.

- **Left and right selection key**

To select a function from the list, select **Menu** > **Settings** > **My shortcuts** > **Left selection key** or **Right selection key**.

In the standby mode, if the left selection key is **Go to**, to activate a function, select **Go to** > **Options** and from the following options:

- **Select options** — to add or remove a function
- **Organise** — to rearrange the functions
- **Navigation key**

To assign other device functions from a predefined list to the navigation key (scroll key), select **Menu** > **Settings** > **My shortcuts** > **Navigation key**.

■ **Voice commands**

Call contacts and carry out phone functions by speaking a voice command.

Voice commands are language-dependent. Select **Menu** > **Settings** > **Phone** > **Language settings** > **Voice recognition language** and your language before using voice commands.

To activate a voice command for a function, select **Menu** > **Settings** > **My shortcuts** > **Voice commands**, a feature and a subsequent function.  indicates that the voice command is activated.

To activate the voice tag, select **Add**. To play the activated voice command, select **Play**.

Settings

To use voice commands, see ["Voice dialing"](#), p.34.

To manage the voice commands, scroll to a function, and select **Options** and from the following:

- **Edit** or **Remove** — to rename or deactivate the voice command
- **Add all** or **Remove all** — to activate or deactivate voice commands for all functions in the voice commands list

Connectivity

Your phone provides several features to connect to other devices to transmit and receive data.

■ Bluetooth wireless technology

Bluetooth technology allows you to connect your phone, using radio waves, to a compatible Bluetooth device within 10 meters (32 feet).

This device is compliant with Bluetooth Specification 2.0 + EDR supporting the following profiles: generic access, network access, generic object exchange, advanced audio distribution, audio video remote control, hands-free, headset, object push, file transfer, dial-up networking, SIM access, and serial port. To ensure interoperability between other devices supporting Bluetooth technology, use Nokia approved enhancements for this model. Check with the manufacturers of other devices to determine their compatibility with this device.

There may be restrictions on using Bluetooth technology in some locations. Check with your local authorities or service provider.

Features using Bluetooth technology increase the demand on battery power and reduce the battery life.

Set up a Bluetooth connection

Select **Menu** > **Settings** > **Connectivity** > **Bluetooth** and take the following steps:

1. Select **My phone's name** and enter a name for your phone.
2. To activate Bluetooth connectivity select **Bluetooth** > **On**.  indicates that Bluetooth is active.
3. To connect your phone with an audio enhancement, select **Search for audio enhancements** and the device that you want to connect to.
4. To connect your phone with any Bluetooth device in range, select **Paired devices** > **New**.

Select a device and **Pair**.

Enter a passcode (up to 16 characters) on your phone and allow the connection on the other Bluetooth device.

If you are concerned about security, turn off the Bluetooth function, or set **My phone's visibility** to **Hidden**. Accept Bluetooth communication only from those you trust.

Settings

PC connection to the internet

Use Bluetooth technology to connect your compatible PC to the internet without PC Suite software. Your phone must have activated a service provider that supports internet access, and your PC has to support Bluetooth personal area network (PAN). After connecting to the network access point (NAP) service of the phone, and pairing with your PC, your phone automatically opens a packet data connection to the internet.

■ Infrared

Send and receive data through the phone's infrared (IR) port to or from a IRDA compatible device.

Do not point the infrared (IR) beam at anyone's eye or allow it to interfere with other IR devices. This device is a Class 1 laser product.

Setup an infrared connection

1. To activate the IR port of your phone, select **Menu > Settings > Connectivity > Infrared**.
2. Activate the infrared port of the other IR device.
3. Point the IR ports to each other and ensure that there are no obstructions between.
4. Start the data transfer within 2 minutes after the activation of the IR port. Otherwise, the connection is cancelled and must be started again.

IR connection indicator

- When  is shown continuously, the IR connection is activated, and your phone is ready to send or receive data through its IR port.
- When  blinks, your phone is trying to connect to the other device, or a connection has been lost.

■ Packet data

General packet radio service (GPRS) is a network service that allows mobile phones to send and receive data over an internet protocol (IP)-based network.

To define how to use the service, select **Menu > Settings > Connectivity > Packet data > Packet data connection** and from the following options:

- **When needed** — to set the packet data connection to established when an application needs it. The connection will be closed when the application is terminated.
- **Always online** — to automatically connect to a packet data network when you switch the phone on

You can connect a compatible PC to the phone by Bluetooth or USB data cable and use the phone as a modem. For details refer to Nokia PC Suite. [See "Nokia support," p. 17.](#)

■ Data transfer

Settings

Synchronize your calendar, contacts data, and notes with another compatible device, a compatible PC, or a remote internet server (network service).

Transfer contact list

To copy or synchronize data from your phone, the name of the phone and the settings must be in the list of transfer contacts. If you receive data from another device, the corresponding transfer contact is automatically added to the list, using the contact data from the other device.

Server sync and **PC sync** are the original items in the list.

To add a new transfer contact to the list, select **Menu > Settings > Connectivity > Data transfer > Options > Add contact > Phone sync** or **Phone copy**, and enter the settings according to the transfer type.

To edit or delete a transfer contact, select **Options**.

Data transfer with a compatible device

To connect use Bluetooth wireless technology or a cable connection. The other device must be activated for receiving data.

To start data transfer, select **Menu > Settings > Connectivity > Data transfer** and the transfer contact from the list other than **Server sync** or **PC sync**.

Synchronize from a server

To use a remote internet server, subscribe to a synchronization service. For more information and the settings required for this service, contact your service provider. You may receive the settings as a configuration message. [See "Configuration setting service," p. 16.](#)

To start the synchronization from your phone, select **Menu > Settings > Connectivity > Data transfer > Server sync.**

Synchronizing for the first time or after an interrupted synchronization may take up to 30 minutes to complete.

■ **USB data cable**

You can use the USB data cable to transfer data between the phone and a compatible PC or a printer supporting PictBridge.

To activate the phone for data transfer or image printing, connect the data cable, and select the mode:

- **Nokia mode** — to use the cable for PC Suite
- **Printing & media** — to use the phone with a PictBridge compatible printer or with a compatible PC
- **Data storage** — to connect to a PC that does not have Nokia software and use the phone as a data storage device

To change the USB mode, select **Menu > Settings > Connectivity > USB data cable** and the desired USB mode.

Settings

■ Nokia PC Suite

With Nokia PC Suite you can manage your music, synchronize contacts, calendar, notes, and to-do notes between your phone and the compatible PC or a remote internet server (network service). You may find more information and PC Suite on the Nokia website. [See "Nokia support," p. 17.](#)

Call

Select **Menu** > **Settings** > **Call** and from the following options:

- **Call divert** — to divert your incoming calls (network service). You may not be able to divert your calls if some call barring functions are active. [See "Security," p. 69.](#)
- **Voice clarity** — to enhance speech intelligibility, especially in noisy environments
- **Anykey answer** — to answer an incoming call by briefly pressing any key, except the power key, the left and right selection keys, or the end key
- **Automatic redial** — to make a maximum of 10 attempts to connect the call after an unsuccessful call attempt
- **Speed dialling** — to dial the names and phone numbers assigned to the number keys 2 to 9 by pressing and holding the corresponding number key

- **Call waiting** — to have the network notify you of an incoming call while you have a call in progress (network service)
- **Summary after call** — to briefly display the approximate duration after each call
- **Send my caller ID** — to show your phone number to the person you are calling (network service). To use the setting agreed upon with your service provider, select **Set by network**.
- **Line for outgoing calls** — to select the phone line 1 or 2 for making calls if supported by your SIM card (network service)

Phone

Select **Menu** > **Settings** > **Phone** and from the following options:

- **Language settings** — To set the display language of your phone, select **Phone language**. **Automatic** selects the language according to the information on the SIM card. To set a language for the voice commands, select **Voice recognition language**.
- **Security keyguard** — to ask for the security code when you unlock the keyguard
- **Automatic keyguard** — to lock the keypad automatically after a preset time delay when the phone is in the standby mode and no function has been used.

Settings

- **Welcome note** — to write a note that is shown when the phone is switched on
- **Flight query** — The phone asks every time when it is switched on whether you want to use the flight mode. With the flight mode, all radio connections are switched off.
- **Phone updates** — to receive software updates from your service provider (network service). This option may not be available, depending on your phone. [See "Software updates over the air," p. 66.](#)
- **Operator selection** — Select **Automatic** to set automatically one of the cellular networks available in your area, **Manual** to select a network that has a roaming agreement with your service provider.
- **Help text activation** — to select whether the phone shows help texts
- **Start-up tone** — The phone plays a tone when it is switched on.
- **Confirm SIM service actions** — [See "SIM services," p. 97.](#)

Software updates over the air

Your service provider may send phone software updates over the air directly to your phone (network service). This option may not be available, depending on your phone.

Warning: If you install a software update, you cannot use the device, even to make emergency calls, until the installation is completed and the device is restarted. Be sure to back up data before accepting installation of an update.

Software update settings

To allow or disallow software and configuration updates, select **Menu > Settings > Configuration > Device manager settings > Service provider software updates**.

Request a software update

1. Select **Menu > Settings > Phone > Phone updates** to request available software updates from your service provider.
2. Select **Current software details** to display the current software version and check whether an update is needed.
3. Select **Download phone software** to download and install a software update. Follow the instructions on the display.
4. If the installation was canceled after the download, select **Install software update** to start the installation.

Settings

The software update may take several minutes. If there are problems with the installation, contact your service provider.

Enhancements

This menu and its various options are shown only if the phone is or has been connected to a compatible mobile enhancement.

Select **Menu** > **Settings** > **Enhancements**. Select an enhancement, and an option depending on the enhancement.

Configuration

You can configure your phone with settings that are required for certain services. Your service provider may also send you these settings. [See "Configuration setting service," p. 16.](#)

Select **Menu** > **Settings** > **Configuration** and from the following options:

- **Default configuration settings** — to view the service providers saved in the phone and set a default service provider
- **Activate default in all applications** — to activate the default configuration settings for supported applications

- **Preferred access point** — to view the saved access points
- **Connect to service provider support** — to download the configuration settings from your service provider
- **Device manager settings** — to allow or prevent the phone from receiving software updates. This option may not be available, depending on your phone. [See "Software updates over the air," p. 66.](#)
- **Personal configuration settings** — to manually add new personal accounts for various services and to activate or delete them. To add a new personal account, select **Add new**, or **Options > Add new**. Select the service type, and enter the required parameters. To activate a personal account, scroll to it, and select **Options > Activate** .

Security

When security features that restrict calls are in use (such as call barring, closed user group, and fixed dialling), calls may be possible to the official emergency number programmed into your device.

Select **Menu > Settings > Security** and from the following options:

- **PIN code request** or **UPIN code request** — to request for your PIN or UPIN code every time the phone is switched on. Some SIM cards do not allow the code request to be turned off.

Settings

- **PIN2 code request** — to select whether the PIN2 code is required when using a specific phone feature which is protected by the PIN2 code. Some SIM cards do not allow the code request to be turned off.
- **Call barring service** — to restrict incoming calls to and outgoing calls from your phone (network service). A barring password is required.
- **Fixed dialling** — to restrict your outgoing calls to selected phone numbers if supported by your SIM card. When the fixed dialling is on, GPRS connections are not possible except while sending text messages over a GPRS connection. In this case, the recipient's phone number and the message center number must be included in the fixed dialling list.
- **Closed user group** — to specify a group of people whom you can call and who can call you (network service)
- **Security level** — Select **Phone** to request the security code whenever a new SIM card is inserted into the phone. Select **Memory**, to request the security code when the SIM card memory is selected, and you want to change the memory in use.
- **Access codes** — to change the security code, PIN code, UPIN code, PIN2 code, or barring password
- **Code in use** — to select whether the PIN code or UPIN code should be active

- **Authority certificates** or **User certificates** — to view the list of the authority or user certificates downloaded into your phone. [See "Certificates," p. 95.](#)
- **Security module settings** — to view **Security module details**, activate **Module PIN request**, or change the module PIN and signing PIN. [See "Access codes," p. 15.](#)

Restore factory settings

To reset some of the menu settings to their original values, select **Menu > Settings > Restore factory sett..** Enter the security code.

The names and phone numbers saved in **Contacts** are not deleted.

10. Operator menu

Access a portal to services provided by your network operator. For more information contact your network operator. The operator can update this menu with a service message. [See "Service inbox," p. 93.](#)

11. Gallery

Manage images, video clips, music files, themes, graphics, tones, recordings, and received files. These files are stored in the phone memory or an attached memory card and may be arranged in folders.

Gallery

Copyright protections may prevent some images, music (including ringing tones), and other content from being copied, modified, transferred or forwarded.

Your phone supports an activation key system to protect acquired content. Always check the delivery terms of any content and activation key before acquiring them, as they may be subject to a fee.

Folders and files

To view the list of folders, select **Menu > Gallery**. To view the list of files in a folder, select a folder and **Open**. To view the folders of the memory card when moving a file, scroll to the memory card, and press the scroll key right.

Print images

Your phone supports Nokia XpressPrint to print images that are in the jpeg format.

1. To connect your phone to a compatible printer, use a data cable or send the image by Bluetooth to a printer supporting Bluetooth technology. [See "Bluetooth wireless technology," p. 58.](#)
2. Select the image you want to print and **Options > Print**.

Memory card

Use a memory card to store your multimedia files, such as video clips, music tracks, sound files, images, and messaging data.

Some of the folders in **Gallery** with content that the phone uses (for example, **Themes**) may be stored on the memory card.

Format the memory card

Some supplied memory cards are preformatted; others require formatting. When you format a memory card, all data on the card is permanently lost.

1. To format a memory card, select **Menu** > **Gallery** or **Applications**, the memory card folder , and **Options** > **Format mem. card** > **Yes**.
2. When formatting is complete, enter a name for the memory card.

Lock the memory card

To set a password (maximum 8 characters) to lock your memory card against unauthorized use, select the memory card folder  and **Options** > **Set password**.

The password is stored in your phone, and you do not have to enter it again while you are using the memory card on

Media

the same phone. If you want to use the memory card on another device, you are asked for the password.

To remove the password, select **Options** > **Delete password**.

Check memory consumption

To check the memory consumption of different data groups and the available memory to install new software on your memory card, select the memory card  and **Options** > **Details**.

12. Media

Camera and video

Take pictures or record video clips with the built-in camera.

■ Take a picture

To use the still picture function, select **Menu** > **Media** > **Camera**, or if the video function is on, scroll left or right.

To zoom in and out in the camera mode, scroll up and down or press the volume keys.

To take a picture, select **Capture**. The phone saves the pictures to the memory card, if available, or to the phone memory.

Select **Options** > **Settings** > **Image preview time** and a preview time to display the taken pictures. During the

preview time, select **Back** to take another picture or **Send** to send the picture as a multimedia message.

Your phone supports a picture capture resolution of up to 1200 x 1024 pixels.

■ Record a video clip

To activate the video function, select **Menu** > **Media** > **Video**; or, if the camera function is on, scroll left or right.

To start the video recording, select **Record**; to pause the recording, select **Pause**; to resume the recording, select **Continue**; to stop the recording, select **Stop**.

The phone saves the video clips on the memory card, if available, or in the phone memory.

■ Camera and video options

To use a filter, select **Options** > **Effects**.

To adapt the camera to the light conditions, select **Options** > **White balance**.

To change other camera and video settings and to select the image and video storage, select **Options** > **Settings**.

Media player

View, play, and download files, such as images, audio, video, and animated images; or view compatible streaming videos from a network server (network service).

Media

Select **Menu** > **Media** > **Media player** > **Open Gallery, Bookmarks, Go to address,** or **Media downloads** to select or download media.

Select **Menu** > **Media** > **Media player** > **FF/Rew interval** to set the length of the interval for fast forward or rewind.

Configuration for a streaming service

You may receive the configuration settings required for streaming as a configuration message from the service provider. [See "Configuration setting service," p. 16.](#) You can also enter the settings manually. [See "Configuration," p. 68.](#)

To activate the settings, do the following:

1. Select **Menu** > **Media** > **Media player** > **Streaming sett.** > **Configuration.**
2. Select a service provider, **Default,** or **Personal config.** for streaming.
3. Select **Account** and a streaming service account contained in the active configuration settings.

Music player

Your phone includes a music player for listening to music tracks or other MP3 or AAC sound files that you have downloaded from the web or transferred to the phone with Nokia PC Suite. [See "Nokia PC Suite," p. 64.](#)

Music files stored in the music folder in the phone memory or on the memory card are automatically detected and added to the music library during the startup of the phone.

To open the music player, select **Menu > Media > Music player**.

■ Play music tracks

Warning: Listen to music at a moderate level. Continuous exposure to high volume may damage your hearing. Do not hold the device near your ear when the loudspeaker is in use, because the volume may be extremely loud.

To adjust the volume level, use the volume keys of the device.

Operate the music player with the virtual keys on the display.

When you open **Music player**, the details of the first track on the default track list are shown. To start playing, select .

To pause the playing, select .

To skip to the next track, select . To skip to the beginning of the previous track, select  twice.

Media

To fast forward the current track, select and hold . To rewind the current track, select and hold . Release the key at the position you want.

To stop the music player, press and hold the end key.

■ Music player options

In the music player menu, select from the following options:

- **Show tracks** — to view all available tracks of the active track list and play the desired track. To play a track, scroll to the desired track, and select **Play**.
- **Music library** — to view all available tracks ordered by categories. Select **Update libr.** to refresh the lists. To find track lists generated with the Nokia Music Manager, select **Track lists > My tracks**.
- **Play options** — to select **Random** to play the tracks on the track list in random order. Select **Repeat** to play the current track or the entire track list repeatedly.
- **Media equaliser** — to select or define an equalizer setting
- **Add to Favourites** — to add the current track to the favorite track list
- **Play via Bluetooth** — to connect and play the tracks on an audio accessory using Bluetooth technology
- **Use tone** — to set the currently played music track, for example, as a ringing tone.

- **Send** — to send the current track by a multimedia message or using Bluetooth technology
- **Web page** — to access a web page associated with the currently played track, which is dimmed if no web page is available.
- **Music downloads** — to connect to a web service
- **Memory status** — to view the free and used memory capacity

Radio

The FM radio depends on an antenna other than the wireless device antenna. A compatible headset or enhancement needs to be attached to the device for the FM radio to function properly.

Warning: Listen to music at a moderate level. Continuous exposure to high volume may damage your hearing. Do not hold the device near your ear when the loudspeaker is in use, because the volume may be extremely loud.

To adjust the volume, press the volume keys.

Select **Menu > Media > Radio**.

To use the graphical keys , , , or  on the display, scroll left or right to the desired key, and select it.

■ Tune in to radio stations

Search and save stations

1. To start the search, select and hold  or . To change the radio frequency in 0.05 MHz steps, briefly press  or .
2. To save a station to a memory location, 1 to 9, press and hold the corresponding number key. To save a station to a memory location from 10 to 20, press briefly **1** or **2**, and press and hold the desired number key, **0** to **9**.
3. Enter the name of the radio station.

Select **Options** and from the following.

- **Search all stations** — to automatically search the available stations at your location
- **Set frequency** — to enter the frequency of the desired radio station
- **Station directory** — to access a website with a list of radio stations
- **Save station** — to save the currently tuned in station
- **Stations** — to list and rename or delete saved stations

Change stations

Select  or , or press the corresponding number keys.

Voice recorder

Record speech, sound, or an active call, and save them in **Gallery**.

Select **Menu** > **Media** > **Recorder**. To use the graphical keys , , or  on the display, scroll left or right.

Record sound

1. Select , or during a call, select **Options** > **Record**. While recording a call, all parties to the call hear a faint beeping. To pause the recording, select .
2. To end the recording, select . The recording is saved in **Gallery** > **Recordings**.

Select **Options** to play or send the last recording, to access the list of recordings and to select the memory and the folder to store the recordings.

Equalizer

Adjust the sound when using the music player.

Select **Menu** > **Media** > **Equaliser**.

To activate a predefined set, scroll to one of the equalizer sets and select **Activate**.

Create a personal equalizer set

1. Select one of the last two sets in the list and **Options** > **Edit**.

Push to talk

2. Scroll left or right to access the virtual sliders and up or down to adjust the slider.
3. Select **Save** and **Options** > **Rename** to save the settings with a name.

Stereo widening

Stereo widening creates a wider stereo sound effect when you are using a stereo headset.

To activate, select **Menu** > **Media** > **Stereo widening**.

13. Push to talk

Push to talk (PTT) is a two-way radio service available over a GPRS cellular network (network service).

You can use PTT to have a conversation with one person or with a group of people (channel) having compatible phones. While you are connected to the PTT service, you can use the other functions of the phone.

To check availability, costs, additional features and to subscribe to the service, contact your service provider. Roaming services may be more limited than for normal calls. This feature may not be available, depending on your phone.

For more information about signing up for the PTT services and the usage, contact your service provider.

To connect to the PTT service, select **Menu > Push to talk > Switch PTT on**.

14. Organizer

Alarm clock

To sound an alarm at a desired time.

Set the alarm

1. Select **Menu > Organiser > Alarm clock**.
2. To set the alarm on and to enter the alarm time select **Alarm time**.
3. To issue an alarm on selected days of the week, select **Repeat alarm > On** and the days.
4. Select the alarm tone. If you select the radio as an alarm tone, connect the headset to the phone.
5. Set the snooze time-out and select **Back**.

Stop the alarm

If the alarm time is reached while the device is switched off, the device switches itself on and starts sounding the alarm tone. If you select **Stop**, the device asks whether you want to activate the device for calls. Select **No** to switch off the device or **Yes** to make and receive calls. Do not select **Yes** when wireless device use may cause interference or danger.

Organizer

To stop the alarm, select **Stop**. If you let the phone continue to sound the alarm for a minute or select **Snooze**, the alarm stops for the snooze time-out, then resumes.

Calendar

Select **Menu > Organiser > Calendar**.

The current day has a frame around the number. If there are any notes set for the day, the day is in bold type. To view the day notes, select **View**. To view a week, select **Options > Week view**. To delete all notes in the calendar, select the month or week view, and **Options > Delete all notes**.

To set the date, time, time zone, date or time format, date separator, default view, or the first day of the week, select **Options > Settings**. To delete old notes automatically after a specified time, select **Options > Settings > Auto-delete notes**.

Make a calendar note

Scroll to the date, and select **Options > Make a note** and one of the following note types:  **Meeting**,  **Call**,  **Birthday**,  **Memo**, or  **Reminder**. Fill in the fields.

To-do list

To save a note for a task that you must do, select **Menu** > **Organiser** > **To-do list**.

To make a note if no note is added, select **Add note**; otherwise, select **Options** > **Add**. Fill in the fields, and select **Save**.

To view a note, scroll to it, and select **View**. Select **Options** to delete the selected note and all notes that you have marked as done.

Notes

To write and send notes, select **Menu** > **Organiser** > **Notes**.

To make a note if no note is added, select **Add note**; otherwise, select **Options** > **Make a note**. Write the note, and select **Save**.

Calculator

The calculator in your device provides basic arithmetic and some scientific functions.

Note: This calculator has limited accuracy and is designed for simple calculations.

Organizer

Calculations

1. Select **Menu > Organizer > Calculator**.
2. When **0** is displayed on the screen, enter the first number in the calculation. Press **#** for a decimal point. Scroll to the desired operation or function, and enter the second number. Repeat this sequence as many times as it is necessary.

Currency conversion

1. To perform a currency conversion select **Options > Exchange rate**.
2. Select either of the displayed options. Enter the exchange rate, press **#** for a decimal point, and select **OK**. The exchange rate remains in the memory until you replace it with another one.
3. To perform the currency conversion, enter the amount to be converted, and select **Options > In domestic** or **In foreign**.

Note: When you change the base currency, you must enter new exchange rates because all previously set exchange rates are cleared.

Timers

Countdown timer

1. To activate the countdown timer, select **Menu > Organiser > Timer > Normal timer**, enter the alarm time, and write a note that is displayed when the time expires. To change the countdown time, select **Change time**.
2. To start the timer, select **Start**.
3. To stop the timer, select **Stop timer**.

Interval timer

1. To have an interval timer with up to 10 intervals started, first enter the intervals.
2. Select **Menu > Organiser > Timer > Interval timer**.
3. To start the timer, select **Start timer > Start**.

Stopwatch

You can measure time, take intermediate times, or take lap times using the stopwatch.

Select **Menu > Organiser > Stopwatch** and from the following options:

- **Split timing** — to take intermediate times. To reset the time without saving it, select **Options > Reset**.

Applications

- **Lap timing** — to take lap times
- **Continue** — to view the timing that you have set in the background
- **Show last** — to view the most recently measured time if the stopwatch is not reset
- **View times** or **Delete times** — to view or delete the saved times

To set the stopwatch timing in the background, press the end key.

15. Applications

You can manage applications and games. Your phone may have some games or applications installed. These files are stored in the phone memory or an attached memory card and may be arranged in folders. [See "Memory card," p. 73.](#)

Launch an application

Select **Menu > Applications > Games, Memory card, or Collection**. Scroll to a game or an application, and select **Open**.

To set sounds, lights, and shakes for a game, select **Menu > Applications > Options > App. settings**.

Other available options may include the following:

- **Update version** — to verify that a new version of the application is available for download from the web (network service)
- **Web page** — to provide further information or additional data for the application from an internet page (network service), if available
- **App. access** — to restrict the application from accessing the network

Download an application

Your phone supports J2ME Java applications. Ensure that the application is compatible with your phone before downloading it.

Important: Only install and use applications and other software from trusted sources, such as applications that are Symbian Signed or have passed the Java Verified™ testing.

You can download new applications and games in different ways.

- Select **Menu > Applications > Options > Downloads > App. downloads** or **Game downloads**; the list of available bookmarks is shown.
- Use the Nokia Application Installer from PC Suite to download the applications to your phone.

W e b

For the availability of different services and pricing, contact your service provider.

Your device may have some bookmarks or links preinstalled for or may allow access to sites provided by third parties not affiliated with Nokia. Nokia does not endorse or assume any liability for these sites. If you choose to access them, you should take the same precautions, for security or content, as you would with any internet site.

16. Web

You can access various mobile internet services with your phone browser. Appearance may vary due to screen size. You may not be able to view all details of the internet pages.

Important: Use only services that you trust and that offer adequate security and protection against harmful software.

Check the availability of these services, pricing, and instructions with your service provider.

You may receive the configuration settings required for browsing as a configuration message from the service provider. [See "Configuration setting service," p. 16.](#)

To set a service, select **Menu > Web > Settings > Configuration settings**, and select a configuration and an account.

Connect to a service

To make a connection to the service, select **Menu > Web > Home**; or in the standby mode, press and hold **0**.

To select a bookmark, select **Menu > Web > Bookmarks**. Your device may have some bookmarks or links preinstalled for or may allow access to sites provided by third parties not affiliated with Nokia. Nokia does not endorse or assume any liability for these sites. If you choose to access them, you should take the same precautions, for security or content, as you would with any internet site.

To select the last URL, select **Menu > Web > Last web address**.

To enter an address of a service, select **Menu > Web > Go to address**. Enter the address, and select **OK**.

After you make a connection to the service, you can start browsing its pages. The function of the phone keys may vary in different services. Follow the text guides on the phone display. For more information, contact your service provider.

Appearance settings

While browsing, select **Options** > **Other options** > **Appear. settings**; or in the standby mode, select **Menu** > **Web** > **Settings** > **Appearance settings**. Available options may include the following:

- **Text wrapping** — to select how the text is displayed
- **Alerts** — Select **Alert for unsecure connection** > **Yes** to alert when a secure connection changes to an unsecure connection while browsing.
- **Alerts** — Select **Alert for unsecure items** > **Yes** to alert when a secure page contains an unsecure item. These alerts do not guarantee a secure connection. [See "Browser security," p. 94.](#)
- **Character encoding** — Select **Content encoding** to set the encoding for the browser page content.

Security settings

■ Cache memory

A cache is a memory location that is used to store data temporarily, such as passwords and cookies. If you have tried to access or have accessed confidential information requiring passwords, empty the cache after each use. A cookie is data that a site saves in the cache memory of your phone. Cookies are saved until you clear the cache memory.

To clear the cache while browsing, select **Options > Other options > Clear the cache**. To allow or prevent the phone from receiving cookies, while browsing select **Options > Other options > Security > Cookie settings**; or in the standby mode select **Menu > Web > Settings > Security settings > Cookies**.

■ **Scripts over secure connection**

You can select whether to run scripts from a secure page. The phone supports WML scripts.

While browsing, to allow the scripts, select **Options > Other options > Security > WMLScript sett.**; or in the standby mode, select **Menu > Web > Settings > Security settings > WMLScripts over secure connection > Allow**.

Service inbox

The phone is able to receive service messages sent by your service provider (network service). Service messages are notifications (for example, news headlines) that may contain a text message or an address of a service.

Select **Show** to access the **Service inbox** when you receive a service message. If you select **Exit**, the message is moved to the **Service inbox**.

To access the **Service inbox** later, select **Menu > Web > Service inbox**. To access the **Service inbox** while

W e b

browsing, select **Options** > **Other options** > **Service inbox**. To activate the browser and download the complete message, select the message and **Retrieve**.

To change the service inbox settings, select **Menu** > **Web** > **Settings** > **Service inbox settings** and from the following options:

- **Service messages** — to set whether you want to receive service messages
- **Message filter** — Select **On** to receive service messages only from content authors approved by the service provider.
- **Automatic connection** — Select **On** to automatically activate the browser from the standby mode, when the phone has received a service message. If you select **Off**, the phone activates the browser only after you select **Retrieve** when the phone has received a service message.

Browser security

Security features may be required for some services, such as online banking or shopping. For such connections you need security certificates and possibly a security module, which may be available on your SIM card. For more information, contact your service provider.

To view or change the security module settings, select **Menu > Settings > Security > Security module settings**.

■ Certificates

Important: Even if the use of certificates makes the risks involved in remote connections and software installation considerably smaller, they must be used correctly in order to benefit from increased security. The existence of a certificate does not offer any protection by itself; the certificate manager must contain correct, authentic, or trusted certificates for increased security to be available. Certificates have a restricted lifetime. If "Expired certificate" or "Certificate not valid yet" is shown, even if the certificate should be valid, check that the current date and time in your device are correct.

There are three kinds of certificates: server certificates, authority certificates, and user certificates. You may receive these certificates from your service provider. Authority certificates and user certificates may also be saved in the security module by your service provider.

To view the list of the authority or user certificates downloaded to your phone, select **Menu > Settings > Security > Authority certificates** or **User certificates**.

W e b

During a connection if the data transmission between the phone and the content server is encrypted,  is displayed.

The security icon does not indicate that the data transmission between the gateway and the content server (or place where the requested resource is stored) is secure. The service provider secures the data transmission between the gateway and the content server.

■ Digital signature

You can create digital signatures with your phone if your SIM card has a security module. The digital signature is the same as signing your name to a paper bill, contract, or other document.

To create a digital signature, select a link on a page, for example, the title of the book you want to buy and its price. The text to be signed is shown and may include the amount and date.

Check that the header text is **Read** and that the digital signature icon  is shown. If the digital signature icon does not appear, there is a security breach; do not enter any personal data (such as your signing PIN).

To sign the text, read all of the text first, and select **Sign**. The text may not fit within a single screen. Therefore, make

sure to scroll through and read all of the text before signing.

Select the user certificate you want to use, and enter the signing PIN. The digital signature icon disappears, and the service may display a confirmation of your purchase.

17. SIM services

Your SIM card may provide additional services. You can access this menu only if it is supported by your SIM card. The name and contents of the menu depend on the available services.

For availability and information on using SIM card services, contact your SIM card vendor. This may be the service provider or other vendor.

To show the confirmation messages sent between your phone and the network when you are using the SIM services, select **Menu > Settings > Phone > Confirm SIM service actions**

Accessing these services may involve sending messages or making a phone call for which you may be charged.

18. Battery information

Charging and discharging

Your device is powered by a rechargeable battery. The battery can be charged and discharged hundreds of times, but it will eventually wear out. When the talk and standby times are noticeably shorter than normal, replace the battery. Use only Nokia approved batteries, and recharge your battery only with Nokia approved chargers designated for this device.

If a replacement battery is being used for the first time or if the battery has not been used for a prolonged period, it may be necessary to connect the charger, then disconnect and reconnect it to begin charging the battery.

Unplug the charger from the electrical plug and the device when not in use. Do not leave a fully charged battery connected to a charger, since overcharging may shorten its lifetime. If left unused, a fully charged battery will lose its charge over time.

If the battery is completely discharged, it may take several minutes before the charging indicator appears on the display or before any calls can be made.

Use the battery only for its intended purpose. Never use any charger or battery that is damaged.

Battery information

Do not short-circuit the battery. Accidental short-circuiting can occur when a metallic object such as a coin, clip, or pen causes direct connection of the positive (+) and negative (-) terminals of the battery. (These look like metal strips on the battery.) This might happen, for example, when you carry a spare battery in your pocket or purse. Short-circuiting the terminals may damage the battery or the connecting object.

Leaving the battery in hot or cold places, such as in a closed car in summer or winter conditions, will reduce the capacity and lifetime of the battery. Always try to keep the battery between 15°C and 25°C (59°F and 77°F). A device with a hot or cold battery may not work temporarily, even when the battery is fully charged. Battery performance is particularly limited in temperatures well below freezing.

Do not dispose of batteries in a fire as they may explode. Batteries may also explode if damaged. Dispose of batteries according to local regulations. Please recycle when possible. Do not dispose as household waste.

Do not dismantle or shred cells or batteries. In the event of a battery leak, do not allow the liquid to come in contact with the skin or eyes. In the event of such a leak, flush your skin or eyes immediately with water, or seek medical help.

Nokia battery authentication guidelines

Always use original Nokia batteries for your safety. To check that you are getting an original Nokia battery, purchase it from an authorised Nokia dealer, and inspect the hologram label using the following steps:

Successful completion of the steps is not a total assurance of the authenticity of the battery. If you have any reason to believe that your battery is not an authentic, original Nokia battery, you should refrain from using it, and take it to the nearest authorised Nokia service point or dealer for assistance. Your authorised Nokia service point or dealer will inspect the battery for authenticity. If authenticity cannot be verified, return the battery to the place of purchase.

■ Authenticate hologram

1. When you look at the hologram on the label, you should see the Nokia connecting hands symbol from one angle and the Nokia Original Enhancements logo when looking from another angle.

2. When you angle the hologram left, right, down and up, you should see 1, 2, 3 and 4 dots on each side respectively.

What if your battery is not authentic?

If you cannot confirm that your Nokia battery with the hologram on the label is an authentic Nokia battery, please do not use the battery. Take it to the nearest authorised Nokia service point or dealer for assistance. The use of a battery that is not approved by the manufacturer may be dangerous and may result in poor performance and damage to your device and its enhancements. It may also invalidate any approval or warranty applying to the device.

To find out more about original Nokia batteries, visit www.nokia.com/battery.

Care and maintenance

Your device is a product of superior design and craftsmanship and should be treated with care. The following suggestions will help you protect your warranty coverage.

- Keep the device dry. Precipitation, humidity, and all types of liquids or moisture can contain minerals that will corrode electronic circuits. If your device does get wet, remove the battery, and allow the device to dry completely before replacing it.
- Do not use or store the device in dusty, dirty areas. Its moving parts and electronic components can be damaged.
- Do not store the device in hot areas. High temperatures can shorten the life of electronic devices, damage batteries, and warp or melt certain plastics.
- Do not store the device in cold areas. When the device returns to its normal temperature, moisture can form inside the device and damage electronic circuit boards.
- Do not attempt to open the device other than as instructed in this guide.
- Do not drop, knock, or shake the device. Rough handling can break internal circuit boards and fine mechanics.

Care and maintenance

- Do not use harsh chemicals, cleaning solvents, or strong detergents to clean the device.
- Do not paint the device. Paint can clog the moving parts and prevent proper operation.
- Use a soft, clean, dry cloth to clean any lenses, such as camera, proximity sensor, and light sensor lenses.
- Use only the supplied or an approved replacement antenna. Unauthorized antennas, modifications, or attachments could damage the device and may violate regulations governing radio devices.
- Use chargers indoors.
- Always create a backup of data you want to keep, such as contacts and calendar notes.
- To reset the device from time to time for optimum performance, power off the device and remove the battery.

These suggestions apply equally to your device, battery, charger, or any enhancement. If any device is not working properly, take it to the nearest authorized service facility for service.

Additional safety information

Disposal

The crossed-out wheeled-bin symbol on your product, literature, or packaging reminds you that in the European Union all electrical and electronic products, batteries, and accumulators must be taken to separate collection at the end of their working life. Do not dispose of these products as unsorted municipal waste.

Return the products to collection to prevent possible harm to the environment or human health from uncontrolled waste disposal and to promote the sustainable reuse of material resources. Collection information is available from the product retailer, local waste authorities, national producer responsibility organizations, or your local Nokia representative. For more information, see product Eco-Declaration or country-specific information at www.nokia.com.

Additional safety information

Small children

Your device and its enhancements may contain small parts. Keep them out of the reach of small children.

Operating environment

This device meets RF exposure guidelines when used either in the normal use position against the ear or when

Additional safety information

positioned at least 2.2 centimeters (7/8 inches) away from the body. When a carry case, belt clip, or holder is used for body-worn operation, it should not contain metal and should position the device the above-stated distance from your body.

To transmit data files or messages, this device requires a quality connection to the network. In some cases, transmission of data files or messages may be delayed until such a connection is available. Ensure the above separation distance instructions are followed until the transmission is completed.

Medical devices

Operation of any radio transmitting equipment, including wireless phones, may interfere with the functionality of inadequately protected medical devices. Consult a physician or the manufacturer of the medical device to determine if they are adequately shielded from external RF energy or if you have any questions. Switch off your device in health care facilities when any regulations posted in these areas instruct you to do so. Hospitals or health care facilities may be using equipment that could be sensitive to external RF energy.

■ Implanted medical devices

Manufacturers of medical devices recommend that a minimum separation of 15.3 centimeters (6 inches) should

A d d i t i o n a l s a f e t y i n f o r m a t i o n

be maintained between a wireless device and an implanted medical device, such as a pacemaker or implanted cardioverter defibrillator, to avoid potential interference with the medical device. Persons who have such devices should:

- Always keep the wireless device more than 15.3 centimeters (6 inches) from the medical device when the wireless device is turned on.
- Not carry the wireless device in a breast pocket.
- Hold the wireless device to the ear opposite the medical device to minimize the potential for interference.
- Turn the wireless device off immediately if there is any reason to suspect that interference is taking place.
- Read and follow the directions from the manufacturer of their implanted medical device.

If you have any questions about using your wireless device with an implanted medical device, consult your health care provider.

■ Hearing aids

Some digital wireless devices may interfere with some hearing aids. If interference occurs, consult your service provider.

Vehicles

RF signals may affect improperly installed or inadequately shielded electronic systems in motor vehicles such as electronic fuel injection systems, electronic antiskid (antilock) braking systems, electronic speed control systems, and air bag systems. For more information, check with the manufacturer, or its representative, of your vehicle or any equipment that has been added.

Only qualified personnel should service the device or install the device in a vehicle. Faulty installation or service may be dangerous and may invalidate any warranty that may apply to the device. Check regularly that all wireless device equipment in your vehicle is mounted and operating properly. Do not store or carry flammable liquids, gases, or explosive materials in the same compartment as the device, its parts, or enhancements. For vehicles equipped with an air bag, remember that air bags inflate with great force. Do not place objects, including installed or portable wireless equipment in the area over the air bag or in the air bag deployment area. If in-vehicle wireless equipment is improperly installed and the air bag inflates, serious injury could result.

Using your device while flying in aircraft is prohibited. Switch off your device before boarding an aircraft. The use of wireless teledevices in an aircraft may be dangerous to

A d d i t i o n a l s a f e t y i n f o r m a t i o n

the operation of the aircraft, disrupt the wireless telephone network, and may be illegal.

Potentially explosive environments

Switch off your device when in any area with a potentially explosive atmosphere, and obey all signs and instructions. Potentially explosive atmospheres include areas where you would normally be advised to turn off your vehicle engine. Sparks in such areas could cause an explosion or fire resulting in bodily injury or even death. Switch off the device at refuelling points such as near gas pumps at service stations. Observe restrictions on the use of radio equipment in fuel depots, storage, and distribution areas; chemical plants; or where blasting operations are in progress. Areas with a potentially explosive atmosphere are often, but not always, clearly marked. They include below deck on boats, chemical transfer or storage facilities and areas where the air contains chemicals or particles such as grain, dust, or metal powders. You should check with the manufacturers of vehicles using liquefied petroleum gas (such as propane or butane) to determine if this device can be safely used in their vicinity.

Emergency calls

Important: Wireless phones, including this device, operate using radio signals, wireless networks, landline

Additional safety information

networks, and user-programmed functions. Because of this, connections in all conditions cannot be guaranteed. You should never rely solely on any wireless device for essential communications like medical emergencies.

To make an emergency call:

1. If the device is not on, switch it on. Check for adequate signal strength.

Some networks may require that a valid SIM card is properly inserted in the device.

2. Press the end key as many times as needed to clear the display and ready the device for calls.
3. Enter the official emergency number for your present location. Emergency numbers vary by location.
4. Press the call key.

If certain features are in use, you may first need to turn those features off before you can make an emergency call. Consult this guide or your service provider for more information.

When making an emergency call, give all the necessary information as accurately as possible. Your wireless device may be the only means of communication at the scene of an accident. Do not end the call until given permission to do so.

CERTIFICATION INFORMATION (SAR)

This mobile device meets guidelines for exposure to radio waves.

Your mobile device is a radio transmitter and receiver. It is designed not to exceed the limits for exposure to radio waves recommended by international guidelines. These guidelines were developed by the independent scientific organization ICNIRP and include safety margins designed to assure the protection of all persons, regardless of age and health.

The exposure guidelines for mobile devices employ a unit of measurement known as the Specific Absorption Rate or SAR. The SAR limit stated in the ICNIRP guidelines is 2.0 watts/kilogram (W/kg) averaged over 10 grams of tissue. Tests for SAR are conducted using standard operating positions with the device transmitting at its highest certified power level in all tested frequency bands. The actual SAR level of an operating device can be below the maximum value because the device is designed to use only the power required to reach the network. That amount changes depending on a number of factors such as how close you are to a network base station. The highest SAR value under the ICNIRP guidelines for use of the device at the ear is 0.82 W/kg.

Use of device accessories and enhancements may result in different SAR values. SAR values may vary depending on

A d d i t i o n a l s a f e t y i n f o r m a t i o n

national reporting and testing requirements and the network band. Additional SAR information may be provided under product information at www.nokia.com.
