Operating Instructions

Household Juice Extractor
MJ-66PRA

Matsushita Electric Industrial Co., Ltd.

Osaka 542-8588, Japan

Panasonic

Before operating this unit, please read these instructions completely.

SAVE THESE INSTRUCTIONS

IMPORTANT SAFEGUARDS

When using electrical appliances, basic safety precautions should always be followed including the following:

1. READ ALL INSTRUCTIONS BEFORE USE.
2. To protect against risk of electrical shock, do not put Motor Housing in water or other liquid.
3. Close supervision is necessary when any appliance is used by or near children.
4. Unplug from outlet when not in use, before putting on or taking off parts and before cleaning.
5. Avoid contacting moving parts.
6. Do not operate any appliance with a damaged cord or plug or after the appliance malfunctions, or is dropped or damaged in any manner. Return appliance to the nearest authorized service facility for examination, repair or electrical or mechanical adjustment.
7. The use of attachments not recommended or sold by the appliance manufacturer may cause fire, electric shock or injury.
8. Do not use outdoors.
9. Do not let cord hang over edge of table or counter, or touch hot surfaces.
10. Do not overload motor with extra heavy loads.
11. Always make sure Container Cover is clamped securely in place before motor is turned on. Do not unfasten Clamps while juice extractor is in operation.
12. Be sure to turn Switch to OFF position after each use of your juice extractor. Make sure the motor stops completely before disassembling.
13. Do not put your fingers or other objects into the juice extractor Feeder Opening while it is in operation. If food becomes lodged in Feeder Opening, use Food Pusher or another piece of fruit or vegetable to push it down. When this method is not possible, turn the motor off and disassemble juice extractor to remove the remaining food.
14. Always place a bowl, glass or cup under the spout.
15. Never wash the parts in hot water or expose them to excessive heat.
16. Do not wash washable parts in a dishwasher.
17. Do not assemble when there is food residue left around the base of the Strainer or Container.
18. All parts must be clean. Food particles left may cause odors, stains or prevent the Strainer from functioning properly.
19. This appliance is intended for home use only and not for commercial or industrial use.
20. Do not place appliance on or near hot gas or electric range.
21. To disconnect, grip plug and pull from wall outlet. Never pull on cord.
22. Make sure Strainer is completely stopped before removing Cover.
23. Never leave room while appliance is running.
24. This appliance should be used only for its intended use as described in the instruction manual.
25. If the supply cord of this equipment is damaged, it must be replaced by the special cord (Part No. AJAO5R123).
26. The appliance is not intended for use by young children or infirm persons without supervision.
27. Young children should be supervised to ensure that they do not play with the appliance.

IDENTIFICATION OF PARTS AND DISMANTLING

TO DISMANTLE

1. Release Clamps as arrows indicate.
2. Lightly lift up the Container. The Strainer will come with it.
3. Remove the Container Cover.
4. The Strainer can be easily removed from the Container by lifting it out by the edges.
5. Remove the Spout Cover and clean the spout. Be sure to snap the Spout Cover completely back into place before using.
6. After dismantling each part, wash it in cold or lukewarm water except the Motor Housing.

HOW TO USE THE JUICE EXTRACTOR

1. Be sure the Clamps are correctly located and locked in position before using the juice extractor.
2. Place a glass or bowl under the spout.
3. Preparation of fruit and vegetables:
 - Cut large fruit and vegetables into smaller sizes so that they can be easily put into the Feeder Opening.
 - Strawberries, bananas, apricots, etc., are not recommended, as juice will not be as thin as other fruits.
4. Plug the power cord into a convenient electrical outlet. Your juice extractor is ready for use.
5. Press the Switch "ON". Then put the fruit and vegetables into Feeder Opening by using the Food Pusher.

6. After using, the Switch must be turned off and plug should be disconnected.

CIRCUIT BREAKER PROTECTION

When circuit breaker automatically stops motor due to overloading: after 10 second interval, switch off. Unplug. Complete the following instructions, then resume operation. Cut ingredients small enough to fit into feeder opening. Push ingredients into feeder gently; too much force activates circuit breaker.

HOW TO CLEAN THE STRAINER

1. Fill the Bottle with water and attach the Brush Unit as shown. Do not use any other brush. Do not use the Cleaning Brush when there is no water in the Bottle.
2. Place a glass or bowl under the spout and push the Switch "ON".
3. Make sure that the Strainer is turning, then open the Lid and insert the Cleaning Brush.
4. Move the Cleaning Brush back and forth while squirting water from the Bottle. Be sure to insert the shaft completely before pulling it back. Do not switch the power on and off while the Cleaning Brush is inserted, or the Strainer will be damaged.
5. After removing the Cleaning Brush, push the Switch "OFF". And unplug the unit.
6. Clean the Brush Unit after each use. Take the Strainer out after cleaning and rinse it with clean water.

CARE AND MAINTENANCE

1. Disconnect power plug. Rinse each part in cold or lukewarm water only. Never wash any parts in a dishwasher.
2. After rinsing, wipe off the water and let it dry before storing.
3. To clean the Motor Housing, simply wipe with a damp cloth and dry.
 - DO NOT PUT MOTOR HOUSING IN WATER OR OTHER LIQUID.
 - NEVER WASH THE PARTS IN HOT WATER OR EXPOSE THEM TO EXCESSIVE HEAT.
 - DO NOT CLEAN THE PARTS WITH HARSH CLEANERS OR SOLVENTS.

RECIPES

Juices of fruit and most vegetables are surprisingly delicious without any flavoring or mixing. By combining the juices of two or more fresh fruits and vegetables, you concoct your own delicious "vitamin cocktails". Here are just a few of the taste-tempting treats in store for your family.

Apple Juice

After washing, cut large apples into eighths, small apples into quarters. Drop into juice extractor. Looks and tastes best if you serve immediately. If you must wait, add a little lemon juice to retard turning brown. 4 medium-sized apples make 2 ample servings.

Carrot Juice

Wash thoroughly; cut into small pieces; feed into the juice extractor. An excellent source of vitamin A, carrot juice is also a popular drink. An excellent appetizer. Can be mixed with practically all other fruit and vegetable juices to add color and flavor. Ideal for children (and adults, too) who just don't eat vegetables. Approx. 4 large carrots for each cup of juice.

Celery Juice

Wash thoroughly. Feed outside greener stalks into the juice extractor. Here's another drink that is popular alone, and is wonderful in combination with other juices. Adds zip to tomato juice or green pepper juice. Approx. 4 large stalks per cup of juice.

Cucumber Juice

You may peel or not, according to your own taste. (Most prefer juice from peeled cucumbers.) Feed into the juice extractor in small pieces. Serve chilled or over ice. Add to salads. Very popular with almost everyone. Approx. 1 cup of juice to one large cucumber.

Pineapple Juice

Peel and cut into small pieces, then feed into the juice extractor. An excellent drink by itself; also combines well with other juices and nectars. Your family will love pineapple juice, and you'll love knowing it's brimming with vitamins. One pineapple usually yields about 2 cups of juice.
