## 1. About Easy Reject

### 1.1. What is Easy Reject

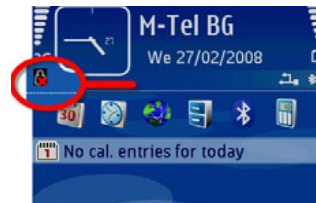

*Pic 1: Inside Easy Reject*

**Easy Reject (ER)** (Picture 1) is a simple, yet powerful tool for filtering incoming phone calls (both voice and video) and SMS messages.

Calls are rejected by sending a “send-busy” reply to the caller. Short messages are filtered and can be viewed in a separate message log in the ER interface. Rejected SMS messages are received without producing any light or sound indication.

Easy Reject (ER) runs in the background. An indicator on your phone's status bar (Picture 2) shows when ER is active.

*Pic 2: The ER indicator on your phone's status bar*

### 1.2. Installation and activation

#### Obtain the installation file

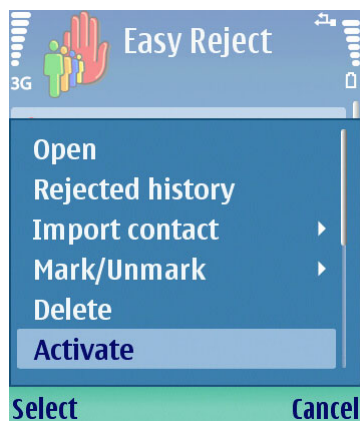

You can do either of the following:

- download Easy Reject from [www.webgate.bg/products/er](http://www.webgate.bg/products/er) to your PC and then connect your mobile phone to transfer the file using USB, infrared, or Bluetooth wireless technology;
- download Easy Reject over the air straight to your phone – you can do this from our mobile catalogue <http://webgate.mobi>

Open the installation file and the on-device installation engine will guide you through the installation process. You can install Easy Reject either on your phone memory or on a memory card.

This product is distributed as a:

*Pic 3: Options > Activate*

### **Trial version**

Easy Reject is offered for download as a full functional trial version limited to 20 rejected calls / SMS messages. After reaching this limit, the application will request a purchase.

### **Licensed version**

Once purchased, the license activates the product and grants unlimited use of Easy Reject. The license is based on the unique IMEI (Device ID) number of your phone and is exclusive to the phone it is purchased for.

For further reference, see the Q&A sections:

[4.3: How can I check my IMEI \(Device ID\) number?](#)

[4.4: How to check whether my Easy Reject is activated / licensed or not?](#)

[4.5: How can I purchase a license?](#)

### **Activate Easy Reject**

You can use the Activate option available from ER main menu (Picture 3) to activate the product. Before you activate the product, make sure you:

- Have purchased a license from the same website where you downloaded the trial.
- Can go online from your phone.

See also [Section 4.6: How can I activate my Easy Reject?](#)

## 2. Main Features and Usage Scenarios

### 2.1. Easy Reject main features

- ER filters incoming calls and short-messages from contacts imported in the ER blacklist. Calls are rejected with a send-busy tone while messages are filtered and stored in the ER Rejected History list.
- ER is active as soon as the application is open and can be set to run on the background. Closing the application deactivates its activity.
- Contacts can be imported in ER in a number of ways: from Phonebook; from Phone Log; Manually. Calls from hidden numbers can be blacklisted as well
- A log of blocked calls and messages is kept on the Rejected History page. You can view rejected calls details and access the content of blocked messages

### 2.2. Easy Reject in action

Here are some situations when you may wish to use Easy Reject:

#### **Action 1.**

##### **Keep a person off your mobile life**

ER will reject calls and will filter short-messages from this contact. You will not be disturbed any more. Calls will be rejected with a send-busy tone and call details are logged in a special Rejected-History list in ER. Messages are filtered with no sound or light indication. Filtered messages can be viewed in the ER interface and restored to your messaging Inbox.

#### **Setup guide:**

- Open Easy Reject
- Select **Options > Import contact**
- Import the contact **from Phonebook or Phone** (call / message) log. You may import it **manually** if you do not have it stored on your phone.

#### **Action 2.**

##### **Stay undercover and don't get disturbed by low priority calls**

You may wish not to pick up the call from a specific contact but you do not intend to call back right now. You have more important matters to concentrate on at this moment and do not wish to be impolite.

Let ER reject the call with a send-busy tone and the caller will not know that you are available to take the call. If the caller sends you an SMS, you can view it in ER Rejected History and call back. Then, you can delete the contact from the ER list and they will not be blacklisted anymore.

**Setup guide:**

- Open Easy Reject
- Select **Options > Import contact**
- Go to **Options -> Rejected History** to view rejected calls details and SMS contents. Delete the contact when you are available to take their calls.

**Action 3.**

**Stop callers whose numbers cannot be retrieved**

You wish to restrict calls from unrecognized / hidden numbers.

**Setup guide:**

- Open Easy Reject
- Select **Options > Import contact > Hidden**

**Action 4.**

**Protect from call & SMS SPAM**

You get a lot of advertisement calls and/or junk SMS. Sometimes, your number can be very similar to another widely advertised and you are showered with enquiries. Insert the number of the sender in ER and you will put this to a stop.

**Setup guide:**

- Open Easy Reject
- Select **Options > Import contact > Manual**
- You can check rejected events in the **Options -> Rejected History** screen. If the entries become too many, you can just clear the whole log from **Options -> Clear Log**.

**Action 5.**

**Get SMS Privacy**

If you need to keep your SMS communication private, you can blacklist this contact and keep the SMS received in the ER Rejected History log. However, note that calls from this person will be rejected as well.

## 2.3. Easy Reject functional advantages

- **An indicator** on your phone's status bar shows when ER is active. The indicator icon changes two states: green indicator (ER is running but no calls/SMS rejected yet); red indicator (ER is running and there are reject actions).
- **System architecture** which makes ER auto-start with switch-on of the phone if you have left it running before switch-off.
- **Message restore** option for filtered short-messages.
- Various **contact import** options
- **Reject call / SMS detail screen** for detail view of the rejected entry

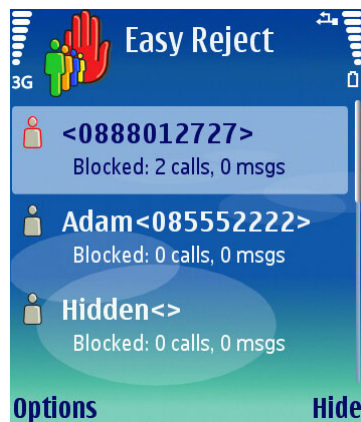

## 3. Using Easy Reject

### 3.1. Start Easy Reject

Pic 4: The ER icon in your Applications menu

### 3.2. Easy Reject Main List

Pic 5: ER Main List

### Accessing Easy Reject

To access Easy Reject

- Open your Applications menu and select **My Own (Applications / Installations\*) > Easy Reject** (Picture 4)

### Turning Easy Reject ON / OFF

Once started, ER always restarts automatically when your phone is switched on. To exit Easy Reject

- Select **Options > Exit**

This command also disables automatic restart.

You need to open Easy Reject manually (from **My Own > Easy Reject**) the next time you wish to use the application.

Picture 5 shows Easy Reject main screen containing the list of blacklisted contacts.

The list indicator colours differentiate between:

- (red colour) Entries with new events
- (grey colour) No new events, all are "read"

The indicator is reset to the "read" state when the new event has been viewed from **Options > Rejected History > Open**

\* Depending on the phone model, the name of the folder may vary

### 3.3. Add contacts: Import from phonebook

*Pic 6: Selected contacts in the Phonebook*

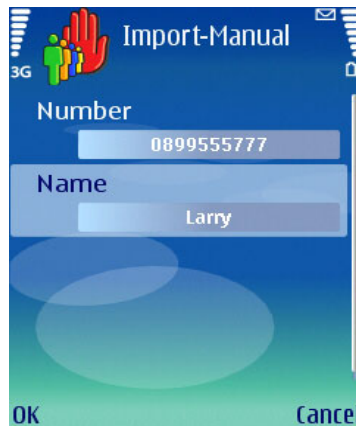

To import one or more contacts from the Phonebook:

1. Select **Options > Import Contact > Phonebook**.
2. Select the contact(s) you wish to import (Picture 6). When ready, click **Done**.

Easy Reject creates a new list item for each phone number. When you have more than one number against a given name, all numbers will be imported as separate list items with the same name.

### 3.4. Add contacts: Manual

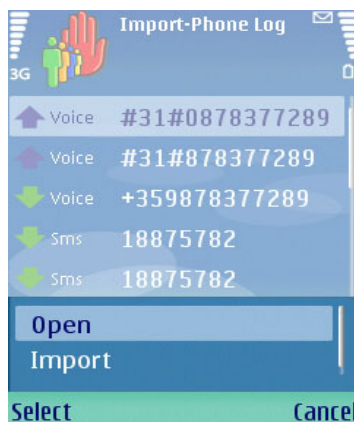

*Pic 7: Manual import*

To add a contact manually:

1. Select **Options > Import Contact > Manual**.
2. Enter a name and a phone number for the desired contact (Picture 7). When ready, select **OK**.

### 3.5. Import contacts from the phone's call and message log

Pic 8: The call and message log with the Options menu

To import a contact from the phone's call and message log:

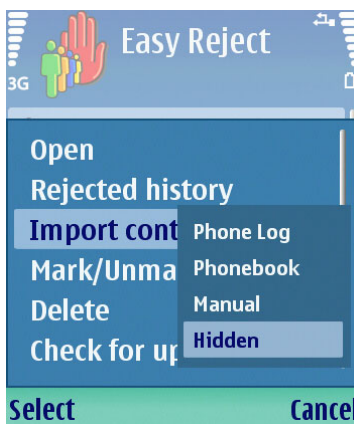

1. Select **Options > Import Contact > Phone Log**.
2. Scroll to the contact you wish to import.
3. Select **Options > Import** (Picture 8).

Repeat the procedure for each contact you wish to import. To exit the call and message log, select **Back**.

For each entry, the log shows whether it was a voice call, a video call, or a message. You can also see if it was incoming, outgoing, or missed. You can view the date and time of each record by clicking the entry, or by selecting **Options > Open**.

### 3.6. Block hidden contacts

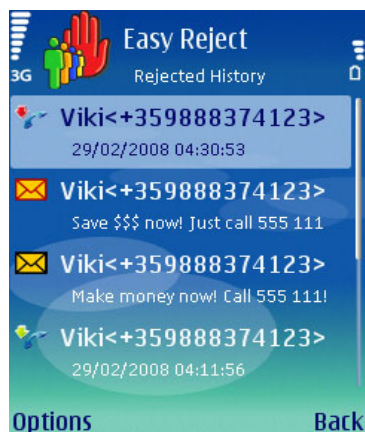

Pic 9: Options > Import Contact> Hidden

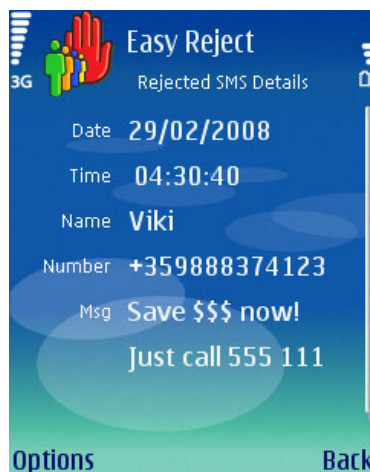

To block hidden contacts,

- Select **Options > Import Contact > Hidden** (Picture 9).

### 3.7. The Rejected History

Pic 10: The Rejected History page

Pic 11: The Rejected entry details page

#### Rejected History list

To view the events (calls and messages) blocked by Easy Reject (Picture 10),

- Select **Options > Rejected History**

The Rejected History page shows for each item on the list:

- Whether it is a call or a message
- The date and time it was logged

You can recognize the new unread entries on this list by the icon. Red-framed icons notify entries that have not been viewed. This way you can easily spot the newest events in the log.

To manually clear the Rejected History log

- (For the whole list) Select **Options > Clear Log** from the Rejected History screen
- (For a specific entry) Highlight the entry and select **Options > Delete**.

Rejected History entries are deleted automatically in 30 days except for the unread entries which are kept in the log until they are read.

#### Rejected entry details

You can open a selected entry in the Rejected History list to view details. To do so

- select **Options > Open**

You can read a blocked message if you open it.

#### Restore blocked message

You can restore blocked messages back to your Inbox. To do so,

- Open a blocked message and select **Options > Restore**.

## 4. Q & A

### 4.1. The blocked call goes to my voice mailbox. Why is this so?

This means that your provider has forced "Divert if Busy" on your device. Please go to Tools > Settings > Call divert and deactivate Divert if Busy.

### 4.2. Does ER block MMS / Business card messages?

No, ER blocks only calls (both voice and video) and SMS messages.

### 4.3. How can I check my IMEI (Device ID) number?

Do any of the following:

- type \*#06# and the IMEI number will appear on your device screen;
- check under the battery on the back of your device.

### 4.4. How to check whether my Easy Reject is activated / licensed or not?

If your Easy Reject is not licensed there will be an **Activate** menu in your application menu list. You can also check the status of the product if you go to **Options > About**.

### 4.5. How can I purchase a license?

You can purchase a license from our e-shop at <http://www.webgate.bg/products/>

### 4.6. How can I activate my Easy Reject?

You need to purchase a license to activate Easy Reject on your phone. When your license is generated, you need to install it on your device in one of the following ways:

Open the application and choose **Activate**

You will need to use your on-device Internet connection to download the license file (approximately 1KB).

A dialog will appear prompting you to choose an access point for your Internet connection. All configured access points are listed. However, the list initially shows only your GPRS and WLAN points (most common) - if you cannot find the desired access point on the list, open the drop-down and replace **GPRS/WLAN access points** with **All access points**.

Or

Copy the URL you receive in the e-mail after purchase and paste it in your PC browser – you will find a download link to your license file which you can manually transfer to your device.
