TBX120

The TBX 120 floor-standing grinder with removable mixer tube is fitted with a turbine effect mixing head, which significantly improves the grinding fineness and throughput. The turbo liquidisers are used to mix, liquidise, reduce and emulsify vegetable and fish soups, fruit and vegetable purées, liquid pastries and sauces. These preparations can be carried out directly in the cooking containers or in suitable liquid containers.

FEATURES

- The turbo liquidisers are designed to withstand intensive use in large catering, central kitchens and the food preparation industries.
- Stainless steel is used to withstand the humid atmosphere of the various production environments.
- Height adjustable on installing.
- All models are mounted onto a stainless steel trolley with castors.
- All models can be adapted to all shapes of recipients: cylindrical, rectangular, hemispherical.
- All models have a turbine that gives an accelerated flow of the liquid over the impeller giving greater throughput and finer grinding.
