DIRECTIONS FOR USE GEBRAUCHSANLEITUNG ISTRUZIONI PER L'USO

REPLACEMENT OF LAMPS/ RESET OF TIME COUNTER DAS AUSWECHSELN DER LAMPEN/RÜCKSTELLEN DES ZEITZÄHLERS REPLACEMENT DES LAMPES / REGLAGE DU COMPTEUR DE TEMPS SOSTITUZIONE DELLE LAMPADE / AZZERAMENTO DEL CONTATORE DI DURATA

REPLACEMENT OF FUSE REPLACEMENT DU FUSIBLE SOSTITUZIONE DEL FUSIBILE

REPLACEMENT OF FUSE REPLACEMENT DU FUSIBLE SOSTITUZIONE DEL FUSIBILE

TROUBLESHOOTING

Symptom	Check	Correction
The main lamp does not come on even if the main switch is turned on.	Check if the plug is disconnected.	Plug in correctly.
The fluorescent lamps do not come on even if the curing key is turned on.	Check if the fuse is blown.	Replace the fuse.
Not all the fluorescent lamps illuminate.	Check if the lamps are set into the lamp sockets correctly.	Set the lamps into the lamp sockets correctly.

WARRANTY / REPAIR

SPECIFICATIONS

Power supply	AC120V 60Hz	AC220 / 230V 50Hz
Power consumption	120W 1.6A	120W 0.9A
Lamp rating	27W x 3 pieces	
Fuse	5A x 2 pieces	2A x 2 pieces
Effective turntable space	90mm (dia.) x 70 mm (H)	
Effective room temperature	10 - 30°C (50 - 86°F)	
Dimensions	185mm (W) x 245mm (D) x 275mm (H)	
Weight	10 kgs.	

DISPOSAL OF THE UNIT

LABOLIGHT LV-III

RECOMMENDED USE

Laboratory based curing of visible light-cured dental composites, base materials, etc.

CAUTION

- 1) Do not use only.
- 2) Only use an electrical outlet with ground (earth) connection.
- 3) Locate the unit in a clean, well ventilated, vibration free area away from direct sunlight or other sources of heat.
- 4) When cleaning or changing parts always unplug the unit.
- 5) Ensure that the door is fully closed when the fluorescent lamps are illuminated.
- 6) Do not look directly at the fluorescent lamps while they are illuminated.
- 7) Do not touch the fluorescent lamps during use or for a time after turning off to prevent burns.

IDENTIFICATION OF PARTS

- 1. Door
- 2. Window
- 3. Main Lamp
- 4. Control Box
- 5. Main Switch
- 6. Stop Key
- 7. Curing Key
- 8. Timer Lamp
- 9. Fixation Screws for the curing case
- 10. Fan
- 11. Fuse x 2 pieces
- 12. Reset Switch / Time Counter (built-in)
- 13. Power Cord
- 14. Fluorescent Lamp
- 15. Temperature Sensor
- 16. Thermostat
- 17. Reflector
- 18. Curing Case
- 19. Turntable
- 20. Sliding Stand
- 21. Fluorescent Lamp (3 sets)
- 22. Vinyl Cover (1 piece)
- 23. Rest (2 pieces)
- 24. Small Post (8 pieces)
- 25. Large Post (8 pieces)
- 26. Turntable (2 pieces)

PREPARATIONS

- 1. Fixation of Fluorescent Lamps
- 2. Fixation of Turntable
- 3. Installation of Unit
- 4. Plug in the unit.

DIRECTIONS FOR USE

- 1. Turn on the main switch.
- 2. Open the door to slide the turntable out.
- 3. Slide the turntable back fully into the curing case and close the door.
- 4. Push the curing key according to the curing time required for the resin prosthesis.
- 5. When the irradiation time is reached, the fluorescent lamp will go out.
- 6. When the irradiation time is reached, the fluorescent lamp will go out.

REPLACEMENT OF LAMPS / RESET OF TIME COUNTER

- 1. Turn off the main switch.
- 2. Unplug the unit.
- 3. Make sure the lamps to be replaced are cold.
- 4. Remove the 4 fixation screws on the curing case and pull out the case.
- 5. Push the lamp gently in the direction of Arrow 1 and hold.
- 6. Replace the lamps, referring to " Fixation of Fluorescent Lamps" mentioned as above (Photo 5).
- 7. Insert the curing case at the front. Fix it with the 4 screws.

REPLACEMENT OF FUSE

- 1. Unplug the unit.
- 2. Insert a "minus" (or straight-tipped) screwdriver in a little upward position into the opening of the fuse box on the back of the unit.
- 3. Replace the fuse.

CARE OF THE LABOLIGHT LV-III

- 1. Clean the fluorescent lamps, reflectors and unit exterior.
- 2. Clean the lamps and reflectors whenever they are dirty, otherwise curing performance may be affected.

TROUBLESHOOTING

In case of difficulty, check the following before seeking repair.

Symptom	Check	Correction
The main lamp does not come on even if the main switch is turned on.	Check if the plug is disconnected.	Plug in correctly.
The fluorescent lamps do not come on even if the curing key is turned on.	Check if the fuse is blown.	Replace the fuse.
Not all the fluorescent lamps illuminate.	Check if the lamps are set into the lamp sockets correctly.	Set the lamps into the lamp sockets correctly.

LABOLIGHT LV-III

ANWENDUNGSGEBIET

Nur von zahntechnischem oder zahntechnischem Fachpersonal für die genannten Anwendungsbereiche zu verwenden.

ACHTUNG

- 1) Nur geschlossenen Räumen verwenden.
- 2) Nur geerdete Steckdosen verwenden.
- 3) Das Gerät an einem sauberen, gut gelüfteten, vibrationsfreien Ort, nicht in direktem Sonnenlicht oder in der Nähe anderer Wärmequellen betreiben.
- 4) Vor dem Reinigen oder Auswechseln von Geräteteilen Netzstecker herausziehen.
- 5) Stellen Sie sicher, daß die Klappe richtig geschlossen ist, wenn die Fluoreszenzlampen eingeschaltet wird.
- 6) Nicht direkt in die Fluoreszenzlampen schauen während sie leuchten.
- 7) Die Fluoreszenzlampen während der Betriebs und einige Zeit danach nicht berühren, um Verbrennungen zu vermeiden.

BEZEICHNUNG DER TEILE

- 1. Tür
- 2. Fenster
- 3. Kontrolllampe
- 4. Bedienkonsole
- 5. Hauptschalter
- 6. Stop-Schalter
- 7. Polymersationszeitschalter
- 8. Zeitwahlampen
- 9. Befestigungsschrauben für das Polymersationsgehäuse
- 10. Ventilator
- 11. Sicherung (2 Stück)
- 12. Reset-Schalter/ Zeitzähler (innen)
- 13. Netzkaabel
- 14. Fluoreszenzlampen
- 15. Temperaturfühler
- 16. Thermostat
- 17. Reflektor
- 18. Gerätegehäuse
- 19. Drehteller
- 20. Ausziehtisch
- 21. Fluoreszenzlampen (3 Stück)
- 22. Schutzhülle (1 Stück)
- 23. Träger (2 Stück)
- 24. Stifte, Klein (8 Stück)
- 25. Stifte, groß (8 Stück)
- 26. Drehteller (2 Stück)

VORBEREITUNGEN

- 1. Installation der Fluoreszenzlampen
- 2. Fixation of Turntable
- 3. Installation of Unit
- 4. Plug in the unit.

DIRECTIONS FOR USE

- 1. Turn on the main switch.
- 2. Open the door to slide the turntable out.
- 3. Slide the turntable back fully into the curing case and close the door.
- 4. Push the curing key according to the curing time required for the resin prosthesis.
- 5. When the irradiation time is reached, the fluorescent lamp will go out.
- 6. When the irradiation time is reached, the fluorescent lamp will go out.

REPLACEMENT OF LAMPS / RESET OF TIME COUNTER

- 1. Turn off the main switch.
- 2. Unplug the unit.
- 3. Make sure the lamps to be replaced are cold.

DISPOSAL OF THE UNIT

LABOLIGHT LV-III

ATTENTION

Doit seulement être utilisé par un professionnel tel qu'il est recommandé dans la présente notice.

EMPOI

- 1) N'utiliser qu'en intérieur.
- 2) Utiliser uniquement une connexion électrique avec terre.
- 3) Installer l'unité dans un endroit propre, bien aéré, à l'abri des vibrations, d'exposition directe aux rayons du soleil ou de toute autre source de chaleur.
- 4) Lors du nettoyage ou du remplacement d'une pièce, toujours débrancher l'appareil.
- 5) S'assurer que la porte est parfaitement fermée lorsque les lampes fluorescentes sont allumées.
- 6) Ne pas regarder directement les lampes fluorescentes lorsque celles-ci sont allumées.
- 7) Ne pas toucher les lampes fluorescentes pendant l'utilisation ou peu de temps après extinction afin d'éviter les brûlures.

DESCRIPTION

- 1. Sportello
- 2. Finestra
- 3. Lampada principale
- 4. Lampada principale si accende e si spegne (lampeggia) quando le lampade fluorescenti raggiungono un totale di 200 ore di irraggiamento per indicare che le lampade devono essere sostituite.
- 5. Regolatore di tensione
- 6. Interruttore principale
- 7. Pulsoretti pré-réglés de polymérisation
- 8. Voyant de contrôle de lampe
- 9. Voyant de contrôle des lampes fluorescentes
- 10. Voyant de contrôle de la porte
- 11. Voyant de contrôle de la température
- 12. Voyant de contrôle de la température de la chambre de polymérisation
- 13. Voyant de contrôle de la température de la chambre de polymérisation
- 14. Voyant de contrôle de la température de la chambre de polymérisation
- 15. Voyant de contrôle de la température de la chambre de polymérisation

ATTENZIONE

Prodotto per uso esclusivamente odontoiatrico professionale nelle indicazioni raccomandate.

IMPIEGO RACCOMANDATO

- 1) Utilizzare solamente in ambiente interno.
- 2) Utilizzare esclusivamente una presa elettrica dotata di messa a terra.
- 3) Posizionare l'unità in un'area pulita, ben aerata, priva di vibrazioni e lontana dalla luce solare diretta o da altre fonti di calore.
- 4) Scollegare sempre l'unità dalla presa di corrente prima di pulire o sostituire componenti.
- 5) Assicurarsi che lo sportello sia completamente chiuso quando la lampada fluorescente è accesa.
- 6) Non guardare direttamente le lampade a fluorescenza quando sono accese.
- 7) Non toccare le lampade fluorescenti durante l'uso o per un certo periodo dopo lo spegnimento per evitare ustioni.

COMPONENTI

- 1. Sportello
- 2. Finestra
- 3. Lampada principale
- 4. Lampada principale si accende e si spegne (lampeggia) quando le lampade fluorescenti raggiungono un totale di 200 ore di irraggiamento per indicare che le lampade devono essere sostituite.
