Required Electrical Service

Ground-Fault Circu	Dedicated circuit required, protected with Class A Ground-Fault Circuit-Interrupter (GFCI) or Residual Current Device (RCD):						
Pump/control	220/240 V, 20 A, 50/60 Hz						

Installation Notes

Install this product according to the installation guide.

Floor support under whirlpool must provide for a minimum of 43 lbs/square foot (209 kg/square meter) loading.

Hot water supply should be 70% of capacity or greater. Installations will vary.

If installing a rim-mount faucet, make sure there is no interference with drain overflow and circulating system before drilling any holes. Consult local and national codes for minimum air gap requirements if installing a spout on the faucet deck.

This whirlpool is designed for drop-in installation only. It is not suited for use in a three-wall alcove with an overhead shower.

No change in measurements if connected with drain
