Quick Start Guide

INSTEON® On/Off Module
Models: 2633-422, 2633-432, 2633-442, 2633-522

2633-442 (UK)	2633-522 (Aus/NZ)	2633-432 (Germany)	2633-422 (France)

Install INSTEON On/Off Module
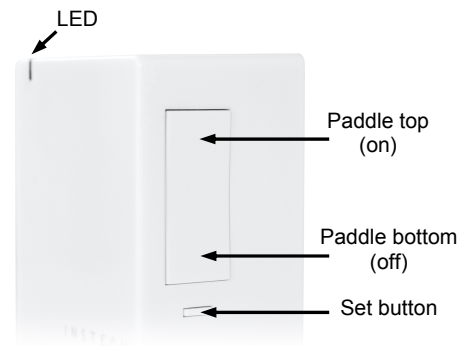

1) Turn on lamp or appliance
2) Unplug lamp/appliance and plug it into On/Off Module receptacle
3) Plug On/Off Module into unswitched wall outlet
   Load will turn on and On/Off Module LED will turn on green

Make On/Off Module a Responder

1) Press and hold controller button until it beeps
   Controller LED will start blinking
2) Tap On/Off Module on (or off if you want the load to turn off when the scene is activated)
3) Press and hold On/Off Module set button until it double-beeps
   Controller will double-beep and its LED will stop blinking
4) Test link by tapping controller button on and off
   Connected load will return to the state set in step #2

Assign an X10 Address

1) Press and hold On/Off Module set button until it beeps
   On/Off Module LED will start blinking green
2) Send the X10 address 3 times (with or without commands)
   Example: A1-A1-A1-AON or A1-AON-A1-AON-A1-AON
   On/Off Module will double-beep and its LED will stop blinking
3) Test by sending X10 on and off commands
   Load will turn on and off
