# Assembling

## Unpack

Check your product box for the following items:

- Mobile device
- Battery
- Travel adapter (charger)
- User manual

Use only Samsung-approved software. Pirated or illegal software may cause damage or malfunctions that are not covered by your manufacturer's warranty.

- The items supplied with your device may vary depending on the software and accessories available in your region or offered by your service provider.
- You can obtain additional accessories from your local Samsung dealer.
- The supplied accessories perform best for your device.

## Install the SIM card and battery

When you subscribe to a cellular service, you will receive a Subscriber Identity Module (SIM) card, with subscription details, such as your personal identification number (PIN) and optional services.

To install the SIM card and battery,

- 1 If the device is on, press and hold [] and select **Power off** to turn it off.
- 2 Remove the back cover.

-  Be careful not to damage your fingernails when you remove the back cover.

- 3 Insert the SIM card.

-  Place the SIM card into the device with the gold-coloured contacts facing down.
- If you do not insert a SIM card, you can only use your device's non-network services and some menus.

4 Insert the battery.

5 Replace the back cover.

## Charge the battery

Before using the device for the first time, you must charge the battery.

You can charge the device with the provided travel adapter or by connecting the device to a PC with a PC data cable.

Use only Samsung-approved chargers and cables. Unauthorized chargers or cables can cause batteries to explode or damage your device.

When your battery is low, the device will emit a warning tone and display a low battery message. The battery icon  will also be empty and blinking. If the battery level becomes too low, the device will automatically power off. Recharge your battery to continue using your device.

## › Charge with the travel adapter

- 1 Open the cover to the multifunction jack on the side of the device.
- 2 Plug the small end of the travel adapter into the multifunction jack.

**!** Improperly connecting the travel adapter can cause serious damage to the device. Any damage caused by misuse is not covered by the warranty.

- 3 Plug the large end of the travel adapter into a power outlet.

- You can use the device while it is charging, but it may take longer to fully charge the battery.
- While charging, the device may heat up. This is normal and should not affect your device's lifespan or performance.
- If your device is not charging properly, bring your device and the charger to a Samsung Service Centre.

- 4 When the battery is fully charged (the battery icon is no longer moving), unplug the travel adapter from the device and then from the power outlet.

- Do not remove the battery before removing the travel adapter. Doing this may cause damage to the device.

## › Charge with the PC data cable

Before charging, ensure that your PC is turned on.

- 1 Open the cover to the multifunction jack on the side of the device.
  - 2 Plug one end (micro-USB) of the PC data cable into the multifunction jack.
  - 3 Plug the other end of the PC data cable into a USB port on a PC.
-  Depending on the type of PC data cable you are using, it may take some time before charging begins.
- 4 When the battery is fully charged (the battery icon is no longer moving), unplug the PC data cable from the device and then from the PC.

## Insert a memory card (optional)

To store additional multimedia files, you must insert a memory card. Your device accepts microSD™ or microSDHC™ memory cards with maximum capacities of 32 GB (depending on memory card manufacturer and type).

Samsung uses approved industry standards for memory cards, but some brands may not be fully compatible with your device. Using an incompatible memory card may damage your device or the memory card and can corrupt data stored on the card.

- Your device supports only the FAT file structure for memory cards. If you insert a card formatted with a different file structure, your device will ask you to reformat the memory card.
- Frequent writing and erasing of data will shorten the life span of memory cards.
- When you insert a memory card in your device, the file directory of the memory card will appear in the /sdcard folder.

- 1 Remove the back cover.
- 2 Insert a memory card with the gold-coloured contacts facing down.

- 3 Push the memory card in the memory card slot until it locks in place.
- 4 Replace the back cover.

## ➤ Remove the memory card

Before removing a memory card, first unmount it for safe removal.

- 1 In Idle mode, select  → **Settings** → **SD card, USB Mass Storage & phone storage** → **Unmount SD card**.
  - 2 Remove the back cover.
  - 3 Push the memory card gently until it disengages from the device.
  - 4 Pull the memory card out of the memory card slot.
  - 5 Remove the memory card.
  - 6 Replace the back cover.
-  Do not remove a memory card while the device is transferring or accessing information, as this could result in loss of data or damage to the memory card or device.

## › Format the memory card

Formatting your memory card on a PC may cause incompatibilities with your device. Format the memory card only on the device.

- 1 In Idle mode, select  → **Settings** → **SD card, USB Mass Storage & phone storage.** → **Format SD card.**
- 2 Select **Unmount SD card.**
- 3 Select **Format SD card** → **Erase everything.**

 Before formatting the memory card, remember to make backup copies of all important data stored on your device. The manufacturer's warranty does not cover loss of data resulting user actions.

- 4 Select **Mount SD card.**

## Attach a hand strap (optional)

- 1 Remove the back cover.
- 2 Slide a hand strap through the slot and hook it over the small projection.

- 3 Replace the back cover.

# Getting started

## Turn your device on and off

To turn on your device, press and hold [⏻]. If necessary, enter your PIN and select **OK**. Your device will automatically connect to the cellular network.

To turn off your device,

1 Press and hold [⏻].

2 Select **Power off**.

- Follow all posted warnings and directions from official personnel when in areas where the use of wireless devices is restricted, such as airplanes and hospitals.
- To use your device's non-network services only, switch to Airplane mode. Press and hold [⏻] and select **Airplane mode**.

## Use the touch screen

Your device's touch screen lets you easily select items or perform functions. Learn basic actions to use the touch screen.

- To avoid scratching the touch screen, do not use sharp tools.
- Do not allow the touch screen to come into contact with other electrical devices. Electrostatic discharges can cause the touch screen to malfunction.
- Do not allow the touch screen to come into contact with water. The touch screen may malfunction in humid conditions or when exposed to water.

- For optimal use of the touch screen, remove the screen protection film before using your device.
- Your touch screen has a layer that detects small electrical charges emitted by the human body. For best performance, tap the touch screen with your fingertip. The touch screen will not react to touches of sharp tools, such as a stylus or pen.

Control your touch screen with the following actions:

- Tap: Tap once with your finger to select or launch a menu, option, or application.
- Tap and hold: Tap an item and hold it for more than 2 seconds to open a pop-up option list.
- Scroll: Tap and drag your finger up, down, left, or right to move to items on lists.
- Drag and drop: Tap and hold your finger on an item, and then drag your finger to move the item.

- Double-tap: Tap twice quickly with your finger to zoom in or out while viewing photos or web pages.

- Your device turns off the touch screen when you do not use it for a specified period. To turn on the screen, press any key.
- You can also adjust the backlight time. From the application list, select **Settings** → **Sound & display** → **Screen timeout**.

## Lock or unlock the touch screen and keys

You can lock the touch screen and keys to prevent any unwanted device operations.

To lock, press [].

To unlock, turn on the screen by pressing any key and drag  to the right.

## Get to know the idle screen

When the device is in Idle mode, you will see the idle screen. From the idle screen, you can view your device's status and access applications.

The idle screen has multiple panels. Scroll left or right to switch panels. You can add new panels to the idle screen.

► p. 23

### › Add items to the idle screen

You can customize the idle screen by adding shortcuts to applications or items in applications, widgets, or folders. To add items to the idle screen,

1 In Idle mode, press [] → **Add**.

2 Select the item category → an item:

- **Samsung Widgets/Android Widgets:** Add widgets, such as various clocks, photos, favourite contact list, and online services.

- **Shortcuts:** Add shortcuts to items, such as applications, bookmarks, and contacts.
- **Folders:** Create a new folder or add folders for your contacts.
- **Wallpapers:** Set a background image.

Available items may vary depending on the current idle screen mode.

## › Move items on the idle screen

- 1 Tap and hold an item to move.
- 2 Drag the item to the location you want when the item is magnified.

## › Remove items from the idle screen

- 1 Tap and hold an item to remove.  
The item is magnified and the  icon appears on the application area, meaning that the application area at the bottom of the idle screen changes to the trash.

- 2 Drag the item to the trash.
- 3 When the item and the trash bar turn red, release the item.

## › Use shortcuts panel

In Idle mode or while using an application, tap the indicator icons area and drag your finger down to open the shortcuts panel. You can access the network information and the notification list. To hide the list, drag the bottom of the list up.

From the shortcuts panel, you can use the following options:

- **Wi-Fi:** Activate or deactivate the WLAN connection feature. ▶ p. 71
- **Bluetooth:** Activate or deactivate the Bluetooth wireless connection feature. ▶ p. 69
- **Silent:** Activate or deactivate the silent mode.
- **Vibrate:** Activate or deactivate vibration mode.

## ➤ Add or remove panels to the idle screen

You can add or remove panels of the idle screen to organize widgets according to your preferences and needs.

- 1 In Idle mode, press [] → **Edit**.
- 2 Select  to add new panels or  to remove a panel.
- 3 Press [] to return to the idle screen.

## Access applications

To access your device's applications,

- 1 In Idle mode, select  to access the application list.
- 2 Scroll left or right to another application screen.
- 3 Select an application.

- When you use applications provided by Google, you must have a Google account. If you do not have a Google account, you can sign up for a Google account.
  - If you tap and hold an application, it will be added to the Idle screen.
- 4 Press [] to return to the previous screen; Press [] to return to the Idle screen.

Your device has a built-in motion sensor that detects its orientation. If you rotate the device while using some features, the interface will automatically switch to landscape view. To set the interface to keep the orientation when you rotate the device, select **Settings** → **Sound & display** → **Orientation**.

## › Organize applications

You can reorganize the applications in the application list by changing their order or grouping them into categories to suit your preferences and needs.

- 1 In the application list, press [] → **Edit**.
- 2 Tap and hold an application.
- 3 Drag the application to the location you want when the application is magnified.  
You can move an application icon to another main menu screen.
- 4 Press [] to save the order of applications.

## › Access recent applications

- 1 Press and hold [] to open the list of applications you have accessed recently.
- 2 Select an application to access.

## Customize your device

Get more from your device by customising it to match your preferences.

### › Set the current time and date

- 1 In Idle mode, open the application list and select **Settings** → **Date & time**.
- 2 Set the time and date and change other options.

### › Turn on or off the touch tone

In Idle mode, open the application list and select **Settings** → **Sound & display** → **Audible selection**.

### › Adjust the volume of the ringtones

Press the Volume key up or down to adjust the ringtone volume.

## › Switch to the silent mode

To mute or unmute your device, do one of the followings:

- In Idle mode, press [] → **Keypad** or select [, and tap and hold #.
- Open the shortcuts panel from the top of the screen and select **Silent**.
- In Idle mode, press and hold [] and select **Silent mode**.

## › Change your ringtone

- 1 In Idle mode, open the application list and select **Settings** → **Sound & display** → **Phone ringtone**.
- 2 Select a ringtone from the list and select **OK**.

## › Select a wallpaper for the idle screen

- 1 In Idle mode, press [] → **Wallpaper** → an option.
- 2 Select an image.

- 3 Select **Save** or **Set wallpaper**.

Samsung is not responsible for any use of default images or wallpapers provided on your device.

## › Activate animation for switching windows

- 1 In Idle mode, open the application list and select **Settings** → **Sound & display** → **Animation**.
- 2 Select an option from the list.

## › Adjust the brightness of the display

- 1 In Idle mode, open the application list and select **Settings** → **Sound & display** → **Brightness**.
- 2 Drag the slider to adjust the level of brightness.
- 3 Select **OK**.

The brightness level of the display will affect how quickly the device consumes battery power.

## › Set an unlock pattern

You can set an unlock pattern to prevent unauthorised people from using the device without your permission.

- 1 In Idle mode, open the application list and select **Settings** → **Location & security** → **Set unlock pattern**.
- 2 See the on-screen instructions and example patterns and select **Next** (if necessary).
- 3 Draw a pattern by dragging your finger to connect at least 4 dots.
- 4 Select **Continue**.
- 5 Draw the pattern again to confirm.
- 6 Select **Confirm**.

- Once you set an unlock pattern, your device will require the pattern each time you turn it on. If you do not want the device to require the pattern, clear the check box next to **Require pattern in Location & security**.
- If you forget the unlock pattern, bring your device to a Samsung Service Centre to unlock it.
- Samsung is not responsible for any loss of passwords or private information or other damages caused by illegal software.

## › Lock your SIM or USIM card

You can lock your device by activating the PIN supplied with your SIM or USIM card.

- 1 In Idle mode, open the application list and select **Settings** → **Location & security** → **Set up SIM card lock** → **Lock SIM card**.
- 2 Enter your PIN and select **OK**.

Once the PIN lock is enabled, you must enter the PIN each time you turn on the device.

- If you enter an incorrect PIN too many times, your SIM or USIM card will be blocked. You must enter a PIN unlock key (PUK) to unblock the SIM or USIM card.
- If you block your SIM or USIM card by entering an incorrect PUK, bring the card to your service provider to unblock it.

## Enter text

You can enter text by selecting characters on the virtual keypad or by inputting handwriting on the screen.

- 6 In another application, tap and hold the text input field.
- 7 Select **Paste** to insert the text from the clipboard into the text field.

## Download applications from Android Market

Based on the Android platform, your device's functionality can be extended by installing additional applications. Android Market provides you an easy and quick way to shop for games and mobile applications.

- This feature may be unavailable depending on your region.
- You cannot use some applications that use the Auto Focus feature of camera.

### › Search for an application

- 1 In Idle mode, open the application list and select **Market**.
- 2 Select **Accept** when the terms and conditions appears.
- 3 Press [≡] → **Search**.
- 4 Enter a word of an application and select [Q].

- 5 Select an application you want to access.

### › Install an application

- 1 In Idle mode, open the application list and select **Market**.
- 2 Select an item category → an item.
- 3 Select **Install** (for free items) or **Buy** → **OK**.  
If you select **Install**, the item will start downloading immediately.  
If you select **Buy**, you need to enter your credit card information. Follow the on-screen instructions.

### › Uninstall an application

- 1 From the Android Market home screen, press [≡] → **Downloads**.
- 2 Select the item you want to delete.
- 3 Select **Uninstall** → **OK**.

## Download files from the web

When you download files or web applications from the web, your device saves them in a memory card. For checking supported file formats, see “Supported file formats.”

Files you download from the web can include viruses that will damage your device. To lessen your risk, only download files from sources you trust.

Some media files include Digital Rights Management to protect copyrights. This protection may prevent you from downloading, copying, modifying, or transferring some files.

To download files from the web,

- 1 In Idle mode, open the application list and select **Browser**.
- 2 Search for a file or application and download it.

To install applications downloaded from websites other than Android Market, you must select **Settings** → **Applications** → **Unknown sources**.

## Synchronize data

You can synchronize data (Google messages, calendar, and contacts) with various web servers and back up or restore your data.

Once the synchronization is completed, your device stays connected to the web. If any change is made on the web, the updated information will appear on your device and automatically will begin synchronisation, and vice versa.

This feature may be unavailable depending on your region.

### › Set up a server account

- 1 In Idle mode, open the application list and select **Settings** → **Accounts & sync**.

- 2 Select **Add account** → an account type.
- 3 Follow the on-screen instructions to complete the account setup.  
For online community services, such as Facebook or MySpace, enter your user name and password and select **Log in**.

### ➤ **Activate automatic sync**

If you add or edit data in any of the applications (Google Mail, Calendar, and Contacts) on the web, the updated information will appear on your device, and vice versa.

- 1 In Idle mode, open the application list and select **Settings** → **Accounts & sync**.
- 2 Select **Auto-sync** → an account.
- 3 Select the applications you want to synchronize.

To exclude applications from automatic synchronisation, clear the check boxes next to the applications you want.

### ➤ **Synchronize data manually**

- 1 In Idle mode, open the application list and select **Settings** → **Accounts & sync**.
- 2 Select an account.
- 3 Press [≡] → **Sync now**. Your device will start synchronising the data you set for synchronization.

# Communication

## Calling

Learn to use calling functions, such as making and answering calls, using options available during a call or customizing and using call-related features.

### › Make and answer a call

- 2 Enter the complete number you want to dial (country code, area code and phone number), and then select [] to dial the number.

## › Use the headset

By plugging the supplied headset into the device, you can answer calls hands-free:

- To answer a call, press the headset button.
- To reject a call, press and hold the headset button.
- To place a call on hold or retrieve a held call during a call, press and hold the headset button.
- To end a call, press the headset button.

The supplied headset is designed only for your device and may not be compatible with other phones and MP3 players.

## › Use options during a call

You can use the following options while a call is in progress:

- To adjust the voice volume, press the Volume key up or down.
- To activate the speakerphone feature, press [] → **Speaker**.

In noisy environments, you may have difficulty hearing some calls while using the speakerphone feature. For better audio performance, use the normal phone mode.

- To turn off the microphone so that the other party cannot hear you, press [] → **Mute**.
- To listen and talk to the other party via a Bluetooth headset, press [] → **Bluetooth**.
- To place a call on hold or retrieve a held call, press [] → **Hold**.

- To dial a second call, press [☰] → **Add call** and then dial a new number. You must subscribe to the call waiting service to use this feature.
- To answer a second call when a call waiting tone sounds, press [☰] → **Hold current call & answer** to hold the first call. Alternatively, press [☰] → **End current call & answer** to end the first call. You must subscribe to the call waiting service to use this feature.
- To switch between the two calls, press [☰] → **Swap calls**.
- To end the call on hold, press [☰] → **Swap calls** → **End call**.
- To make a multiparty call (conference call), make or answer a second call and press [☰] → **Merge calls** when connected to the second party. Repeat to add more parties. You must subscribe to the multiparty call service to use this feature.

## › View and dial missed calls

Your device will display the missed call icon  when you have missed calls.

Open the shortcuts panel and select a missed call. Select the call from the call log and press [☞] to dial.

## › Use additional features

You can use various other call-related features, such as call diverting or waiting.

### Set call forwarding

Call forwarding is a network feature to send incoming calls to another number that you specify. You can set this feature separately for several conditions when you are not able to answer calls, such as when you are already on the device or when you are outside of the service area.

*I* In Idle mode, open the application list and select **Settings** → **Call settings** → **Call forwarding**.

- 2 Select an option from the list.
- 3 Select a contact or enter a number to which calls will be forwarded.

Your setting will be sent to the network.

3	Scan forward in a file (tap and hold).
4	Pause playback; Select ► to resume playback

### › Share videos

- 1 In Idle mode, open the application list and select **YouTube**.
- 2 Tap and hold a video.
- 3 Select **Share**.
- 4 Select a share option.

### Market

You can download games, ringtones, or other applications from the Android Market.

 This feature may be unavailable depending on your region.

- 1 In Idle mode, open the application list and select **Market**.

2 Search for a file and download it to the device. ► p. 30

# Connectivity

## Bluetooth

Bluetooth is a short-range wireless communications technology capable of exchanging information over a distance of about 10 metres (33 feet) without requiring a physical connection.

You do not need to line up the devices to beam information with Bluetooth. If the devices are within range of one another, you can exchange information between them even if they are located in different rooms.

- Samsung is not responsible for the loss, interception, or misuse of data sent or received via the Bluetooth wireless feature.
- Always ensure that you share and receive data with devices that are trusted and properly secured. If there are obstacles between the devices, the operating distance may be reduced.
- Some devices, especially those that are not tested or approved by Bluetooth SIG, may be incompatible with your device.

### › Turn on the Bluetooth wireless feature

- 1 In Idle mode, open the application list and select **Settings** → **Wireless & networks**.
- 2 Select **Bluetooth** to turn on the Bluetooth wireless feature.

You can also open the shortcuts panel and select **Bluetooth**.

## ➤ Find and pair with other Bluetooth-enabled devices

- 1 In Idle mode, open the application list and select **Settings** → **Wireless & networks** → **Bluetooth settings** → **Scan for devices**.
- 2 Select a device.
- 3 Enter a PIN for the Bluetooth wireless feature or the other device's Bluetooth PIN, if it has one, and select **OK**. Alternatively, select **Pair** to match the PIN between your device and the device.

When the owner of the other device enters the same PIN or accepts the connection, pairing is complete. If the pairing is successful, the device will automatically search for available services.

Some devices, especially headsets or hands-free car kits, may have a fixed Bluetooth PIN, such as 0000. If the other device has a PIN, you must enter it.

## ➤ Send data using the Bluetooth wireless feature

- 1 Select a file or item, such as a contact, memo, task, or media file, from an appropriate application or **My Files**.
- 2 Press [≡] → **Share** or **Send namecard via** → **Bluetooth**.
- 3 Search for and paired with a Bluetooth-enabled device.

## ➤ Receive data using the Bluetooth wireless feature

- 1 In Idle mode, open the application list and select **Settings** → **Wireless & networks** → **Bluetooth settings** → **Discoverable**.  
Your device is visible to other Bluetooth devices for 120 seconds.
- 2 When prompted, enter the PIN for the Bluetooth wireless feature and select **OK** (if necessary).

- 3 Select **Accept** to confirm that you are willing to receive data from the device (if necessary).

Received data is saved to an appropriate application or folder according to its type. For example, a music or sound clip is saved to the sound folder and a contact to the phonebook.

## Wi-Fi

Learn to use your device's wireless networking capabilities to activate and connect to any wireless local area network (WLAN) compatible with the IEEE 802.11 b/g standards.

You can connect to the internet or other network devices anywhere an access point or wireless hotspot is available.

### › Activate the WLAN feature

In Idle mode, open the application list and select **Settings** → **Wireless & networks** → **Wi-Fi**. You can also open the shortcuts panel and select **Wi-Fi**.

An active WLAN running in the background will consume battery power. To preserve battery power, activate the WLAN only when needed.

### › Find and connect to a WLAN

- 1 In Idle mode, open the application list and select **Settings** → **Wireless & networks** → **Wi-Fi settings**. The device will automatically search for available WLANs.
- 2 Select a network under **Wi-Fi networks**.

- 3 Enter a password for the network and select **Done** (if necessary).
- 4 Select **Connect**.

### ➤ **Add a WLAN manually**

- 1 In Idle mode, open the application list and select **Settings** → **Wireless & networks** → **Wi-Fi settings** → **Add Wi-Fi network**.
- 2 Enter the SSID for the network and select the security type.
- 3 Set the security settings depending on the selected security type.
- 4 Select **Save**.

## AllShare

Learn to use the Digital Living Network Alliance (DLNA) service that enables you to share media files between DLNA-enabled devices in your home over a WLAN.

You must first activate the WLAN feature and add a WLAN profile. ► p. 71

### ➤ **Customize DLNA settings for sharing media files**

To allow other DLNA-enabled devices to access media files on your device, you must activate media sharing.

- 1 In Idle mode, open the application list and select **AllShare**.
- 2 Select **Settings**.

- 3 Adjust the following settings to customise the DLNA feature:

Option	Function
Media server name	Enter a name for your device as a media server.
Share media	Turn on video sharing, image sharing or music sharing with other DLNA-enabled devices.
Access point network	Select a connection profile to use for DLNA connections.
Upload from other devices	Set whether or not to accept the upload from other devices.

## ▶ Play your files on another DLNA-enabled device

- 1 In Idle mode, open the application list and select **AllShare**.
  - 2 Select **Play file from my phone on another player**.
  - 3 Select a media category → a file.
  - 4 Select **Add to playlist**.
  - 5 Select the player that will play the media file. Playback begins at the selected player.
  - 6 Control playback using icons of your device.
-  Playback may be buffered, depending on the network connection and the connected server.

## ▶ Play files of one device on the other device

- 1 In Idle mode, open the application list and select **AllShare**.
- 2 Select **Play file from server on another player via my phone**.  
Your device automatically searches for DLNA-enabled devices.
- 3 Select a device as the media server—the one that contains media files.
- 4 Select a media category and a file.
- 5 Select a player—the one that will play the media file.  
Playback begins at the selected player.
- 6 Control playback using icons of your device.

# Tools

## › Delete an alarm

- 1 In Idle mode, open the application list and select **Clock**.
- 2 Press [≡] → **Alarms**.
- 3 Tap and hold an alarm to delete.
- 4 Select **Delete alarm** → **OK**.

## Calculator

Learn to perform mathematical calculations directly on your device like a typical hand-held or desktop calculator.

- 1 In Idle mode, open the application list and select **Calculator**.
- 2 Use the keys that correspond to the calculator display to perform basic mathematical operations.
- 3 Press [≡] → **Advanced panel** to use the scientific calculator.

## My Files

Learn to quickly and easily access all of your images, videos, music, sound clips, and other types of files stored a memory card.

- 1 In Idle mode, open the application list and select **My Files**.
- 2 Select a folder → a file.

To move up one level in the file directory, select **Up**.

In a folder, press [≡] to use the following options:

- To send a file to others via multimedia message, email or the Bluetooth wireless feature, select **Share**.
- To create a new folder, select **Create folder**.
- To delete files or folders, select **Delete**.
- To change the view mode, select **View by**.
- To sort files or folders, select **List by**.

- To use additional features using a file, such as moving, copying or renaming options, select **More**.

## Write and Go

Learn to enter text and send it as a message, upload it to a community website, or save it as a memo or calendar event.

- 1 In Idle mode, open the application list and select **Write and Go**.
- 2 Enter text using the text input panel.
- 3 When you are finished, select one of the options below the text input field.
  - To send a text message with the text, select **Send message**.
  - To upload the text to a community website, select **Update status**.
  -

- To save the text as a memo or calendar event, select **Save**.

- 4 Send a message, log in to a community service to upload the text, or create a memo or event according to the selected option.

# Settings

## Access the Settings menu

- 1 In Idle mode, open the application list and select **Settings**.
- 2 Select a setting category and select an option.

## Wireless & networks

Change the settings for wireless network connections.

### › Airplane mode

Disable all wireless functions on your device. You can use only non-network services.

### › Wi-Fi

Activate the WLAN feature to connect to the internet or other network devices. ► p. 71

### › Wi-Fi settings

- **Wi-Fi:** Turn the WLAN feature on or off.
- **Network notification:** Set the device to notify you when an open network is available.
- **Add Wi-Fi network:** Add WLAN networks.

### › Bluetooth

Activate the Bluetooth feature to exchange information over a distance. ► p. 69

### › Bluetooth settings

- **Bluetooth:** Turn the Bluetooth wireless feature on or off.
- **Device name:** Set a Bluetooth name for your device.

- **Discoverable:** Set your device to be visible to other Bluetooth devices.
- **Scan for devices:** Search for available Bluetooth devices.

## › VPN settings

Set up Virtual Private Network (VPN) server connections.

## › Mobile networks

- **Data roaming:** Set the device to connect another network when you are roaming or your home network is not available.
- **Enable always-on mobile:** use phone for data connection when WI-Fi is unavailable.
- **Access Point Names:** Set up access point names (APNs).
- **Use only 2G networks:** Set the device to connect only to a 2G network to save battery power.
- **Network operators:** Search for available networks and select a network for roaming.

## Call settings

Customize the settings for calling features:

### › Voicemail service

Select your service provider's voicemail service. You can also select other voicemail services if you downloaded applications that support them.

## › Voicemail settings

Enter the number to access the voicemail service. You can obtain this number from your service provider.

## › DTMF Tones

Set short or long DTMF (Dual-tone multi frequency) tones to be sent to access teleservices, such as bank accounts.

## › Call forwarding

Divert incoming calls to another number.

## › Additional settings

- **Caller ID:** Display your caller ID to other parties for outgoing calls.
- **Call waiting:** Allow incoming call alerts when a call is already in progress.

## Sound & display

Change the settings for various sounds on your device and for the display.

- **Silent mode:** Activate Silent mode to mute the device.
- **Ringer volume:** Adjust the volume level for the call ringtone.
- **Media volume:** Set the default volume for music and videos.
- **Phone ringtone:** Select a ringtone to alert you to incoming calls.
- **Phone vibrate:** Set the device to vibrate to alert you to incoming calls.
- **Notification ringtone:** Select a ringtone to alert you to events, such as incoming messages, missed calls, and alarms.

- **Audible touch tones:** Set the device to sound when you touch the keys on the dialler.
- **Audible selection:** Set the device to sound when you select an application or option on the touch screen.
- **Haptic feedback:** Set the device to vibrate when you touch the keys.
- **SD card notifications:** Set the device to sound when a memory card is recognised.
- **Orientation:** Set whether or not to rotate the content automatically when the device is rotated.
- **Animation:** Set the device to display animation when you switch between windows.
- **Brightness:** Set the brightness of the display.
- **Screen timeout:** Set the length of time the device waits before turning off the display's backlight.

## Location & security

Change the settings for securing your device and the SIM or USIM card, and GPS functionality.

- **Use wireless networks:** Set the device to use the wireless networking for checking locations, if supported in an application.
- **Use GPS satellites:** Enable the GPS functionality for checking locations, if supported in an application. You can view locations at street level by using the GPS.
- **Set unlock pattern:** Activate the gesture unlock feature that allows you to unlock the touch screen and keys by drawing a specified character. ► p. 26
- **Require pattern:** Set the device to require the unlock pattern you have set each time you turn it on. By doing this, you can prevent unauthorised people from unlocking the device.
- **Use visible pattern:** Set the unlock pattern to be visible or invisible as you draw it.

- **Use tactile feedback:** Set the device to vibrate when you touch and draw the unlock pattern.
- **Set up SIM card lock:**
  - **Lock SIM card:** Activate or deactivate the PIN lock feature to require the PIN before using the device.
  - **Change SIM PIN:** Change the PIN used to access SIM or USIM data.
- **Visible passwords:** By default, the device displays your password as \* for security. Set the device to display your password as you enter.
- **Use secure credentials:** Use certificates and credentials to ensure secure use of various applications.
- **Install from SD card:** Install encrypted certificates that are stored on a memory card.
- **Set password:** Create and confirm a password for accessing credentials.
- **Clear storage:** Erase the credential contents from the device and reset the password.

## Applications

Change the setting for managing installed applications.

- **Unknown sources:** Select to download applications from any source. If you do not select this option, you can download applications only from Android Market
- **Manage applications:** Access the list of the applications installed on the device and check the application information. To view the applications that are currently running or third-party applications installed additionally, press [☰] → **Filter**.
- **Running services:** View the services you are using and access them to manage.
- **Development:**
  - **USB debugging:** Select to connect your device to a PC by using a PC data cable. This is for application development.

- **Stay awake:** Set the device's screen to stay on while charging the battery.
- **Allow mock locations:** Allow mock locations and service information to be sent to a Location Manager service for testing. This is for application development.
- **Samsung Apps:** Select a network connection (Wi-Fi or packet switched data network) to get application update notification from Samsung Apps.

## Accounts & sync

Change the settings for the auto sync feature or manage accounts for synchronization.

- **Background data:** Select this setting to use the auto sync feature. The auto sync will run in the background without opening applications to synchronize data.
- **Auto-sync:** Set the device to synchronize contact, calendar, and email data automatically.

## Privacy

Change the settings for managing your settings and data.

- **Use My Location:** Set the device to use your current location for Google services.
- **Factory data reset:** Reset your settings to the factory default values and delete all your data.

## SD card, USB Mass Storage & phone storage

Check memory space of memory cards and your device, unmount and format the external SD card.

## Search

Change Google Search settings.

- **Searchable items:** Select the types of items to include in your search.
- **Clear search shortcuts:** Clear the information from recent searches.

## Language & keyboard

Change the settings for text input.

### › Select locale

Select a display language for all menus and applications, and a writing language for all text editors.

### › Swype

- **Language:** Select a language for text input.

You cannot enter text in some languages. To enter text, you should change the writing language to one of the supported languages.

- **Word prediction:** Set the device to predict words according to your input and display word suggestions.
- **Audio feedback:** Turn audio for the Swype keyboard on or off.
- **Vibrate on keypress:** Set the device to vibrate when you touch a key.

- **Enable tip indicator:** Activate the indicator for quick help.
- **Auto-spacing:** Set the device to automatically insert a space between words.
- **Auto-capitalization:** Set the device to automatically capitalize the first letter after a final punctuation mark, such as a period, question mark, or exclamation mark.
- **Show complete trace:** Set how long the trace of your dragging will display on the keyboard.
- **Word choice window:** Set how often the word list will display.
- **Speed vs. accuracy:** Set the balance for the speed and accuracy.
- **Swype help:** Access help information for using the Swype keyboard.
- **Tutorial:** Learn how to enter text faster with the Swype keyboard.
- **Version:** View version information.

## › Samsung keypad

- **Keypad types:** Select the default input method, such as the QWERTY keyboard, traditional keypad, or handwriting screen.
- **Writing language:** Select a language for text input.
- **XT9:** Activate XT9 mode to enter text using Predictive input mode.
- **XT9 advanced settings:** Activate the advanced features of XT9 mode, such as auto completion, auto correction, or auto substitution, and set up your own word list.

- **Keypad sweeping:** Enable the sweeping feature for the keypad input method. You can enter text by sweeping keys instead of tapping.

# Troubleshooting

When you turn on your device or while you are using the device, it prompts you to enter one of the following codes:

Code	Try this to solve the problem:
Password	When the device lock feature is enabled, you must enter the password you set for the device.
PIN	When using the device for the first time or when the PIN requirement is enabled, you must enter the PIN supplied with the SIM card. You can disable this feature by using the <b>Lock SIM card</b> menu.

Code	Try this to solve the problem:
PUK	Your SIM card is blocked, usually as a result of entering your PIN incorrectly several times. You must enter the PUK supplied by your service provider.
PIN2	When you access a menu requiring the PIN2, you must enter the PIN2 supplied with the SIM card. For details, contact your service provider.

## Your device displays "Service unavailable" or "Network error"

- When you are in areas with weak signals or poor reception, you may lose reception. Move to another area and try again.
- You cannot access some options without a subscription. Contact your service provider for more details.

## The touch screen responds slowly or improperly

If your device has a touch screen and the touch screen is not responding properly, try the following:

- Remove any protective covers from the touch screen. Protective covers may prevent the device from recognizing your inputs and are not recommended for touch screen devices.
- Ensure that your hands are clean and dry when tapping the touch screen.
- Restart your device to clear any temporary software bugs.
- Ensure that your device software is upgraded to the latest version.
- If the touch screen is scratched or damaged, take your phone to your local Samsung Service Centre.

## Your device freezes or has fatal errors

If your device freezes or hangs, you may need to close programs or reset the device to regain functionality. If your device is frozen and unresponsive, press and hold the Volume key up and [>] simultaneously for 8-10 seconds. The device will reboot automatically.

If this does not solve the problem, perform a factory data reset.

- In Idle mode, open the application list and select **Settings** → **Privacy** → **Factory data reset** → **Reset phone** → **Erase everything**.
- When the device is turned off, simultaneously press the Volume key up and down, and then press [>]. When an exclamation mark appears, press the Home key to reboot.

## Calls are being dropped

When you are in areas with weak signals or poor reception, you may lose your connection to the network. Move to another area and try again.

## Outgoing calls are not connected

- Ensure that you have pressed the Dial key.
- Ensure that you have accessed the right cellular network.
- Ensure that you have not set call barring for the phone number you are dialing.

## Incoming calls are not connected

- Ensure that your device is turned on.
- Ensure that you have accessed the right cellular network.
- Ensure that you have not set call barring for the incoming phone number.

## Others cannot hear you speaking on a call

- Ensure that you are not covering the built-in microphone.
- Ensure that the microphone is close to your mouth.
- If using a headset, ensure that it is properly connected.

## Audio quality is poor

- Ensure that you are not blocking the device's internal antenna.
- When you are in areas with weak signals or poor reception, you may lose reception. Move to another area and try again.

## When dialing from contacts, the call is not connected

- Ensure that the correct number is stored in the contact list.
- Re-enter and save the number, if necessary.

- Ensure that you have not set call barring for the contact's phone number.

### The device beeps and the battery icon flashes

Your battery is low. Recharge or replace the battery to continue using the device.

### The battery does not charge properly or the device turns off

- The battery terminals may be dirty. Wipe both gold-coloured contacts with a clean, soft cloth and try charging the battery again.
- If the battery will no longer charge completely, dispose of the old battery properly and replace it with a new battery (refer to your local ordinances for proper disposal instructions).

### Your device is hot to the touch

When you use applications that require more power or use applications on your device for an extended period of time, your device may feel hot to the touch. This is normal and should not affect your device's lifespan or performance.

### Error messages appear when launching the camera

Your Samsung mobile device must have sufficient available memory and battery power to operate the camera application. If you receive error messages when launching the camera, try the following:

- Charge the battery or replace it with a battery that is fully charged.
- Free some memory by transferring files to a PC or deleting files from your device.
- Restart the device. If you are still having trouble with the camera application after trying these tips, contact a Samsung Service Centre.

## Error messages appear when launching the FM radio

The FM radio application on your Samsung mobile device uses the headset cable as an antenna. Without a headset connected, the FM radio will be unable to receive radio stations. To use the FM radio, first ensure that the headset is properly connected. Next, scan for and save the available radio stations.

If you still cannot use the FM radio after performing these steps, try accessing your desired station with another radio receiver. If you can hear the station with another receiver, your device may require service. Contact a Samsung Service Centre.

## Error messages appear when opening music files

Some music files may not play on your Samsung mobile device for a variety of reasons. If you receive error messages when opening music files on your device, try the following:

- Free some memory by transferring files to a PC or deleting files from your device.
- Ensure that the music file is not Digital Rights Management (DRM)-protected. If the file is DRM-protected, ensure that you have the appropriate license or key to play the file.
- Ensure that your device supports the file type.

## Another Bluetooth device is not located

- Ensure that the Bluetooth wireless feature is activated on your device.
- Ensure that the Bluetooth wireless feature is activated on the device you wish to connect to, if necessary.
- Ensure that your device and the other Bluetooth device are within the maximum Bluetooth range (10 metres/ 33 feet).

If the tips above do not solve the problem, contact a Samsung Service Centre.

## A connection is not established when you connect the device to a PC

- Ensure that the PC data cable you are using is compatible with your device.
- Ensure that you have the proper drivers installed and updated on your PC.

# Safety and usage information

This safety and usage information should be followed to safely use your device.

## Safety warnings

### Keep your device away from small children and pets

Keep your device and all accessories out of the reach of small children or animals. Small parts may cause choking or serious injury if swallowed.

### Protect your hearing

Excessive exposure to sound at high volumes can cause hearing damage. Always turn the volume down before plugging the earphones into an audio source and use only the minimum volume setting necessary to hear your conversation or music.

### Install mobile devices and equipment with caution

Ensure that any mobile devices or related equipment installed in your vehicle are securely mounted. Avoid placing your device and accessories near or in an air bag deployment area. Improperly installed wireless equipment can cause serious injury when air bags inflate rapidly.

### Handle and dispose of batteries and chargers with care

- Use only Samsung-approved batteries and chargers specifically designed for your device. Incompatible batteries and chargers can cause serious injuries or damage to your device.

- Never dispose of batteries or devices in a fire. Follow all local regulations when disposing of used batteries or devices.
- Never place batteries or devices on or in heating devices, such as microwave ovens, stoves, or radiators. Batteries may explode when overheated.
- Never crush or puncture the battery. Avoid exposing the battery to high external pressure, which can lead to an internal short circuit and overheating.

### **Avoid interference with pacemakers**

Maintain a minimum of 15 cm (6 inches) between mobile devices and pacemakers to avoid potential interference, as recommended by manufacturers and the independent research group, Wireless Technology Research.

If you have any reason to suspect that your device is interfering with a pacemaker or other medical device, turn off the device immediately and contact the manufacturer of the pacemaker or medical device for guidance.

### **Turn off the device in potentially explosive environments**

Do not use your device at refuelling points (service stations) or near fuels or chemicals. Turn off your device whenever directed by warning signs or instructions. Your device could cause explosions or fire in and around fuel or chemical storage and transfer areas or blasting areas. Do not store or carry flammable liquids, gases, or explosive materials in the same compartment as the device, its parts, or accessories.

### **Reduce the risk of repetitive motion injuries**

While using your device, hold the device with a relaxed grip, press the keys lightly, use special features that reduce the number of keys you have to press (such as templates and predictive text), and take frequent breaks.

### **Do not use the device if the screen is cracked or broken**

Broken glass or acrylic could cause injury to your hand and face. Bring the device to a Samsung Service Centre to replace the screen. Damage caused by careless handling will void your manufacturer's warranty.

### **Do not use the device during a thunderstorm**

Your device may malfunction and your risk of electric shock is increased.

## **Safety precautions**

### **Drive safely at all times**

Avoid using your device while driving and obey all regulations that restrict the use of mobile devices while driving. Use hands-free accessories to increase your safety when possible.

### **Follow all safety warnings and regulations**

Comply with any regulations that restrict the use of a mobile device in a certain area.

### **Use only Samsung-approved accessories**

Using incompatible accessories may damage your device or cause injury.

### **Turn off the device near medical equipment**

Your device can interfere with medical equipment in hospitals or health care facilities. Follow all regulations, posted warnings, and directions from medical personnel.

### **Turn off the device or disable the wireless functions when in an aircraft**

Your device can cause interference with aircraft equipment. Follow all airline regulations and turn off your device or switch to a mode that disables the wireless functions when directed by airline personnel.

## Protect the device, batteries and chargers from damage

- Avoid exposing your device and batteries to very cold or very hot temperatures (below 0° C or above 45° C).
- Extreme temperatures can cause the deformation of the device and reduce the charging capacity and life of your device and batteries.
- Prevent batteries from contacting metal objects, as this can create a connection between the + and - terminals of your batteries and lead to temporary or permanent battery damage.
- Never use a damaged charger or battery.

## Handle your device carefully and sensibly

- Do not disassemble your device due to a risk of electric shock.
- Do not allow your device to get wet—liquids can cause serious damage and will change the colour of the label that indicates water damage inside the device. Do not handle your device with wet hands. Water damage to your device can void your manufacturer's warranty.

- Avoid using or storing your device in dusty, dirty areas to prevent damage to moving parts.
- Your device is a complex electronic device—protect it from impacts and rough handling to avoid serious damage.
- Do not paint your device, as paint can clog moving parts and prevent proper operation.
- If your device has a camera flash or light, avoid using it close to the eyes of children or animals.
- Your device may be damaged by exposure to magnetic fields. Do not use carrying cases or accessories with magnetic closures or allow your device to come in contact with magnetic fields for extended periods of time.

## Avoid interference with other electronic devices

Your device emits radio frequency (RF) signals that may interfere with unshielded or improperly shielded electronic equipment, such as pacemakers, hearing aids, medical devices, and other electronic devices in homes or vehicles. Consult the manufacturers of your electronic devices to solve any interference problems you experience.

## Important usage information

### Signal strength

The quality of each call you make or receive depends on the signal strength in your area. Your phone informs you of the current signal strength by displaying a number of bars next to the signal strength icon. The more bars displayed, the stronger the signal. If you're inside a building, being near a window may give you better reception.

### Understand how your phone operates

Your phone is basically a radio transmitter and receiver. When it's turned on, it receives and transmits radio frequency (RF) signals. When you use your phone, the system handling your call controls the power level. This power can range from 0.006 watts to 0.2 watts.

### Allow only qualified personnel to service your device

Allowing unqualified personnel to service your device may result in damage to your device and will void your manufacturer's warranty.

### Ensure maximum battery and charger life

- Avoid charging batteries for more than a week, as overcharging may shorten battery life.
- Over time, unused batteries will discharge and must be recharged before use.
- Disconnect chargers from power sources when not in use.
- Use batteries only for their intended purpose.

### Handle SIM cards or memory cards with care

- Do not remove a card while the device is transferring or accessing information, as this could result in loss of data and/or damage to the card or device.
- Protect cards from strong shocks, static electricity, and electrical noise from other devices.

- Do not touch gold-coloured contacts or terminals with your fingers or metal objects. If dirty, wipe the card with a soft cloth.

### Ensure access to emergency services

Emergency calls from your device may not be possible in some areas or circumstances. Before travelling in remote or undeveloped areas, plan an alternate method of contacting emergency services personnel.

### Correct disposal of this product

The product and its electronic accessories (e.g., charger, headset, USB cable) should not be disposed of with other household waste at the end of their working life. To prevent possible harm to the environment or human health from uncontrolled waste disposal, please separate these items from other types of waste and recycle them responsibly to promote the sustainable reuse of material resources.

### Correct disposal of batteries in this product

The batteries in this product should not be disposed of with other household waste at the end of their working life.

Where marked, the chemical symbols Hg, Cd or Pb indicate that the battery contains mercury, cadmium or lead above reference levels. If batteries are not properly disposed of, these substances can cause harm to human health or the environment.

To protect natural resources and to promote material reuse, please separate batteries from other types of waste and recycle them through your local, free battery return system.

This phone is compliant with RoHS.

## Radio frequency safety

The design of your phone complies with updated NCRP standards described below. In 1991-92, the Institute of Electrical and Electronics Engineers (IEEE) and the American National Standards Institute (ANSI) joined in updating ANSI's 1982 standard for safety levels with respect to human exposure to RF signals. More than 120 scientists, engineers and physicians from universities, government health agencies and industries developed this updated standard after reviewing the available body of research. In 1993, the Federal Communications Commission (FCC) adopted this updated standard in a regulation. In August 1996, the FCC adopted hybrid standard consisting of the existing ANSI/IEEE standard and the guidelines published by the National Council of Radiation Protection and Measurements (NCRP).

### Acknowledging special precautions and Industry Canada notice

This equipment has been tested and found to comply with the limits of a Class B digital device, pursuant to Part

15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation; if this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient / relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.

Consult your dealer or an experienced radio/TV technician for help.

### Specific Absorption Rate (SAR)

The SAR is a value that corresponds to the relative amount of RF energy absorbed in the head of a user of a wireless handset.

The SAR value of a phone is the result of an extensive testing, measuring and calculation process. It does not represent how much RF the phone emits. All phone models are tested at their highest value in strict laboratory settings. But when in operation, the SAR of a phone can be substantially less than the level reported to the FCC. This is because of a variety of factors including its proximity to a base station antenna, phone design and other factors. What is important to remember is that each phone meets strict federal guidelines. Variations in SARs do not represent a variation in safety.

All phones must meet the federal standard, which incorporates a substantial margin of safety. SAR values at or below the federal standard of 1.6 W/kg are considered safe for use by the public.

Maximum measured SAR values for the GT-I5500M are:

**GSM 850**

Head: 0.64 W/kg

Body-worn: 0.71 W/kg

**GSM 1900**

Head: 0.53 W/kg

Body-worn: 0.22 W/kg

**WCDMA 850**

Head: 0.36 W/kg

Body-worn: 0.34 W/kg

**WCDMA 1900**

Head: 1.26 W/kg

Body-worn: 0.36 W/kg

## Owners Record

The model number, regulatory number and serial number are located on a nameplate inside the battery compartment.

Record the serial number in the space provided below. This will be helpful if you need to contact us about your phone in the future.

## › Standard Limited Warranty

**What is Covered and For How Long?** SAMSUNG Electronics Canada Inc. (SAMSUNG) warrants to the original purchaser (“Purchaser”) that SAMSUNG’s Phones and accessories (“Products”) are free from defects in material and workmanship under normal use and service for the period commencing upon the date of purchase and continuing for the following specified period of time after that date:

Phone	1 Year
Batteries	1 Year
Leather Case	90 Days
Holster	90 Days
Other Phone Accessories	1 Year

**What is Not Covered?** This Limited Warranty is conditioned upon proper use of Product by Purchaser. This Limited Warranty does not cover: (a) defects or damage resulting from accident, misuse, abuse, neglect, unusual physical, electrical or electromechanical stress, or modification of any part of Product, including antenna, or cosmetic damage; (b) equipment that has the serial number removed or made illegible; (c) any plastic surfaces or other externally exposed parts that are scratched or damaged due to normal use; (d) malfunctions resulting from the use of Product in conjunction with accessories, products, or ancillary/peripheral equipment not furnished or approved by SAMSUNG; (e) defects or damage from improper testing, operation, maintenance, installation, or adjustment; (f) installation, maintenance, and service of Product, or (g) Product used or purchased outside the United States or Canada.

This Limited Warranty covers batteries only if battery capacity falls below 80% of rated capacity or the battery leaks, and this Limited Warranty does not cover any battery if (i) the battery has been charged by a battery charger

not specified or approved by SAMSUNG for charging the battery, (ii) any of the seals on the battery are broken or show evidence of tampering, or (iii) the battery has been used in equipment other than the SAMSUNG phone for which it is specified.

**What are SAMSUNG's Obligations?** During the applicable warranty period, SAMSUNG will repair or replace, at SAMSUNG's sole option, without charge to Purchaser, any defective component part of Product. To obtain service under this Limited Warranty, Purchaser must return Product to an authorized phone service facility in an adequate container for shipping, accompanied by Purchaser's sales receipt or comparable substitute proof of sale showing the date of purchase, the serial number of Product and the sellers' name and address. To obtain assistance on where to deliver the Product, call Samsung Customer Care at 1-800-SAMSUNG. Upon receipt, SAMSUNG will promptly repair or replace the defective Product. SAMSUNG may, at SAMSUNG's sole option, use rebuilt, reconditioned, or new parts or components when repairing any Product or replace Product with a rebuilt,

reconditioned or new Product. Repaired/replaced leather cases, pouches and holsters will be warranted for a period of ninety (90) days. All other repaired/replaced Product will be warranted for a period equal to the remainder of the original Limited Warranty on the original Product or for 90 days, whichever is longer. All replaced parts, components, boards and equipment shall become the property of SAMSUNG. If SAMSUNG determines that any Product is not covered by this Limited Warranty, Purchaser must pay all parts, shipping, and labor charges for the repair or return of such Product.

**What Are the Limits On SAMSUNG's Liability?** EXCEPT AS SET FORTH IN THE EXPRESS WARRANTY CONTAINED HEREIN, PURCHASER TAKES THE PRODUCT "AS IS," AND SAMSUNG MAKES NO WARRANTY OR REPRESENTATION AND THERE ARE NO CONDITIONS, EXPRESS OR IMPLIED, STATUTORY OR OTHERWISE, OF ANY KIND WHATSOEVER WITH RESPECT TO THE PRODUCT, INCLUDING BUT NOT LIMITED TO:

THE MERCHANTABILITY OF THE PRODUCT OR ITS FITNESS

FOR ANY PARTICULAR PURPOSE OR USE; WARRANTIES OF TITLE OR NON-INFRINGEMENT; DESIGN, CONDITION, QUALITY, OR PERFORMANCE OF THE PRODUCT; THE WORKMANSHIP OF THE PRODUCT OR THE COMPONENTS CONTAINED THEREIN; OR COMPLIANCE OF THE PRODUCT WITH THE REQUIREMENTS OF ANY LAW, RULE, SPECIFICATION OR CONTRACT PERTAINING THERETO.

NOTHING CONTAINED IN THE INSTRUCTION MANUAL SHALL BE CONSTRUED TO CREATE AN EXPRESS WARRANTY OF ANY KIND WHATSOEVER WITH RESPECT TO THE PRODUCT. ALL IMPLIED WARRANTIES AND CONDITIONS THAT MAY ARISE BY OPERATION OF LAW, INCLUDING IF APPLICABLE THE IMPLIED WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE, ARE HEREBY LIMITED TO THE SAME DURATION OF TIME AS THE EXPRESS WRITTEN WARRANTY STATED HEREIN. SOME STATES/PROVINCES DO NOT ALLOW LIMITATIONS ON HOW LONG AN IMPLIED WARRANTY LASTS, SO THE ABOVE LIMITATION MAY NOT APPLY TO YOU. IN ADDITION, SAMSUNG SHALL NOT BE LIABLE FOR ANY DAMAGES OF ANY KIND RESULTING FROM THE

PURCHASE, USE, OR MISUSE OF, OR INABILITY TO USE THE PRODUCT OR ARISING DIRECTLY OR INDIRECTLY FROM THE USE OR LOSS OF USE OF THE PRODUCT OR FROM THE BREACH OF THE EXPRESS WARRANTY, INCLUDING INCIDENTAL, SPECIAL, CONSEQUENTIAL OR SIMILAR DAMAGES, OR LOSS OF ANTICIPATED PROFITS OR BENEFITS, OR FOR DAMAGES ARISING FROM ANY TORT (INCLUDING NEGLIGENCE OR GROSS NEGLIGENCE) OR FAULT COMMITTED BY SAMSUNG, ITS AGENTS OR EMPLOYEES, OR FOR ANY BREACH OF CONTRACT OR FOR ANY CLAIM BROUGHT AGAINST PURCHASER BY ANY OTHER PARTY. SOME STATES/PROVINCES DO NOT ALLOW THE EXCLUSION OR LIMITATION OF INCIDENTAL OR CONSEQUENTIAL DAMAGES, SO THE ABOVE LIMITATION OR EXCLUSION MAY NOT APPLY TO YOU.

THIS WARRANTY GIVES YOU SPECIFIC LEGAL RIGHTS, AND YOU MAY ALSO HAVE OTHER RIGHTS, WHICH VARY FROM STATE TO STATE/PROVINCE TO PROVINCE. THIS LIMITED WARRANTY SHALL NOT EXTEND TO ANYONE OTHER THAN THE ORIGINAL PURCHASER OF THIS PRODUCT AND STATES PURCHASER'S EXCLUSIVE REMEDY. IF ANY

PORTION OF THIS LIMITED WARRANTY IS HELD ILLEGAL OR UNENFORCEABLE BY REASON OF ANY LAW, SUCH PARTIAL ILLEGALITY OR UNENFORCEABILITY SHALL NOT AFFECT THE ENFORCEABILITY FOR THE REMAINDER OF THIS LIMITED WARRANTY WHICH PURCHASER ACKNOWLEDGES IS AND WILL ALWAYS BE CONSTRUED TO BE LIMITED BY ITS TERMS OR AS LIMITED AS THE LAW PERMITS.

THE PARTIES UNDERSTAND THAT THE PURCHASER MAY USE THIRD-PARTY SOFTWARE OR EQUIPMENT IN CONJUNCTION WITH THE PRODUCT. SAMSUNG MAKES NO WARRANTIES OR REPRESENTATIONS AND THERE ARE NO CONDITIONS, EXPRESS OR IMPLIED, STATUTORY OR OTHERWISE, AS TO THE QUALITY, CAPABILITIES, OPERATIONS, PERFORMANCE OR SUITABILITY OF ANY THIRD-PARTY SOFTWARE OR EQUIPMENT, WHETHER SUCH THIRD-PARTY SOFTWARE OR EQUIPMENT IS INCLUDED WITH THE PRODUCT DISTRIBUTED BY SAMSUNG OR OTHERWISE, INCLUDING THE ABILITY TO INTEGRATE ANY SUCH SOFTWARE OR EQUIPMENT WITH THE PRODUCT. THE QUALITY, CAPABILITIES, OPERATIONS, PERFORMANCE AND SUITABILITY OF ANY SUCH THIRD-PARTY SOFTWARE

OR EQUIPMENT LIE SOLELY WITH THE PURCHASER AND THE DIRECT VENDOR, OWNER OR SUPPLIER OF SUCH THIRD-PARTY SOFTWARE OR EQUIPMENT, AS THE CASE MAY BE.

This Limited Warranty allocates risk of Product failure between Purchaser and SAMSUNG, and SAMSUNG's Product pricing reflects this allocation of risk and the limitations of liability contained in this Limited Warranty. The agents, employees, distributors, and dealers of SAMSUNG are not authorized to make modifications to this Limited Warranty, or make additional warranties binding on SAMSUNG. Accordingly, additional statements such as dealer advertising or presentation, whether oral or written, do not constitute warranties by SAMSUNG and should not be relied upon.
