- **THE INFANT RESTRAINT CAN BECOME VERY HOT IF LEFT IN THE SUN.** Always touch the surface of any metal or plastic parts before putting your child in the infant restraint.

## **3.2 Warning for Use With a Stroller**

- **USE ONLY WITH STROLLERS THAT ARE PART OF THE GRACO TRAVEL SYSTEM.** Refer to stroller instruction sheet for details about how to attach the infant restraint to your stroller. If you do not have an instruction sheet, please call toll-free, 1-888-224-6549 to obtain one, or visit our website, [www.gracobaby.com](http://www.gracobaby.com).

### 3.3 Additional Warnings for Use as Carrier

## **WARNING**

- **FALL HAZARD:** Child's movements can slide carrier.  
**NEVER** place carrier near edges of countertops, tables or other high surfaces. Always stay within arms reach whenever carrier is not on floor/ground.  
**BE SURE** handle locks into position before lifting carrier.  
**NEVER** place carrier in the top of a shopping cart.
- **SUFFOCATION HAZARD:** Infant Carrier can roll over on soft surfaces and suffocate child. Never place carrier on beds, sofas or other soft surfaces.
- **STRANGULATION HAZARD:** Child can strangle in loose restraint straps. Always use harness, never leave child in carrier when straps are loose or undone.  
**KEEP STRINGS AND CORDS AWAY FROM CHILD.** Strings and cords can cause strangulation.  
**DO NOT** place carrier near a window where cords from blinds or drapes can strangle a child.  
**DO NOT** hang strings on or over the carrier.  
**DO NOT** place items with a string around a child's neck, such as hood strings, pacifier cords, etc.  
**DO NOT** attach strings to toys.

### 3.4 Height and Weight Limits

## **WARNING**

**FAILURE TO USE INFANT RESTRAINT IN A MANNER APPROPRIATE FOR YOUR CHILD'S SIZE MAY INCREASE THE RISK OF SERIOUS INJURY OR DEATH.**

Your child **MUST** meet all requirements:

- **WEIGHT: 20 lbs. (9 kg) or less**
- **HEIGHT: 26 inches (66 cm) or less**

## 4.0 Infant Restraint Location

### 4.1 Vehicle Seat Requirements

#### **⚠ WARNING**

##### **IMPROPER PLACEMENT OF THE INFANT RESTRAINT INCREASES THE RISK OF SERIOUS INJURY OR DEATH.**

Some seating positions in your vehicle may not be safe for this infant restraint. Some vehicles do not have any seating positions that can be used safely with the infant restraint. If you are not sure where to place the infant restraint in your vehicle, consult your vehicle owner's manual or Graco Children's Products Inc., 1-888-224-6549.

- **Whenever possible, secure the infant restraint in the center position of the seat directly behind the front seats** ¥.

An adult should ride in the rear seat to watch the child. If the driver is the only adult present, a child may need to ride in the front seat. **BUT ONLY** if there is no passenger-side air bag and all of the other vehicle seat and seat belt requirements listed are met.

- **NEVER place this infant restraint in a vehicle seating location that has an air bag** †. See "3.1 Warnings for Use as Infant Restraint", p.14.

- The **VEHICLE** seat must face forward.

- **DO NOT** use infant restraint on vehicle seats with seat backs that will not lock in an upright position. **DO NOT** use seats that can fold down without having to release a lock or latch of some kind. These seats can fly forward and strike the child in a sudden stop or crash.

## 4.2 Vehicle Seat Belt Requirements

### **⚠ WARNING**

**MANY SEAT BELT SYSTEMS ARE NOT SAFE TO USE WITH THE INFANT RESTRAINT. THE VEHICLE SEAT BELT MUST BE DESIGNED TO HOLD THE INFANT RESTRAINT TIGHTLY AT ALL TIMES.**

Pay careful attention to these systems; some of the seat belts that are not safe to use look very much like seat belts that are safe to use. If you are unsure, consult your vehicle owner's manual or Graco Children's Products Inc., 1-888-224-6549.

## 4.2.1 UNSAFE Vehicle Belt Systems

DO NOT use any of the following systems to secure the infant restraint.

- **Lap Belts with Emergency Locking Retractor (ELR)**

This lap belt stays loose and can move until it locks in a crash or sudden stop.

- **Combination Lap/Shoulder Belt with Retractor**

Each strap has a retractor at one end and is attached to the latch plate at the other end.

- **Passive Restraint - Lap Belt with Motorized Shoulder Belt**

- **Passive Restraint - Lap or Shoulder Belt Mounted on Door**

DO NOT use vehicle belts that are attached to the door in any way or that move along a track to automatically surround the passenger when the door is closed.

- **Lap Belts Forward of Seat Crease**

## 4.2.2 SAFE Vehicle Belt Systems

THE FOLLOWING BELT SYSTEMS CAN BE USED WITH YOUR INFANT RESTRAINT, IF the seat location meets all other requirements of these instructions and those in your vehicle owner's manual.

- **Lap Belts - Manually Adjusted**

When buckled, the belt is tightened manually by pulling on the excess belt while pushing down hard on the infant restraint.

- **Lap Belts with Automatic Locking Retractor (ALR)**

The automatic locking retractor will not permit the lap belt to lengthen once it is buckled. Tighten the belt by feeding the belt back into the retractor while pushing down hard on the infant restraint.

- **Combination Lap/Shoulder Belt with Locking Latch Plate**

Once it is buckled, this type of belt has a latchplate that will not allow the lap portion of the belt to loosen. Belt is tightened by pulling hard on the shoulder portion of the vehicle belt while pushing down hard on the infant restraint.

- **Combination Lap/Shoulder Belt with Sliding Latch Plate**

This belt has a latchplate that slides freely along the belt.

This belt **MUST** be converted to prevent movement of the lap portion of the belt. You must use the **locking clip** provided with the infant restraint, unless your vehicle's seat belt can be converted in another way as described in your vehicle owner's manual.

### To Install Locking Clip:

1. Tighten the buckled belt by pushing down hard on the infant restraint and pulling hard on the shoulder belt.
2. While pushing down on infant restraint, pinch the two straps together behind the buckle tongue. Unbuckle the belt without allowing it to slip.
3. Connect lap and shoulder belts with locking clip as shown  and .
4. Rebuckle belt. Check that lap belt does not move by pulling and pushing hard on infant restraint. If belt loosens or lengthens, repeat procedure.

## 5.0 Using Infant Restraint

### 5.1 Positioning Harness Straps

# ⚠ WARNING

**FAILURE TO PROPERLY ADJUST THE HARNESS STRAPS FOR YOUR CHILD INCREASES THE RISK OF SERIOUS INJURY OR DEATH IN THE EVENT OF A SHARP TURN, SUDDEN STOP OR CRASH.** The harness straps must be properly adjusted to fit your child according to the following instructions.

1. Remove infant restraint from base and rotate handle down to sitting position. See “2.3 Removing and Attaching Base” and “2.4 Adjusting Handle”, p. 11.

2. Place child in infant restraint as shown ¥ .

3. Determine which pair of harness slots are **even with or just below your child’s shoulders** | .

### 6. SAFETY CHECK:

After the harness has been completely reinstalled,

- a) **CHECK** that harness straps are not twisted in front or back.
- b) **CHECK** that straps are secure by pulling on them.

## FOR SMALLER BABY:

Use the lower harness slots § (if they are even with or just below your child's shoulders) and the upper strap loops ¶ . The ends of the straps must hang in front of the metal plate as shown in ¶ , not as shown in © .

**CHECK** that the loops are completely within junction plate slots <sup>a</sup> .

**CHECK** that straps are secure by pulling on them.

## FOR LARGER BABY:

Use upper harness slots and the end strap loops « .

**CHECK** that the loops are completely within junction plate slots ¶ .

**CHECK** that straps are secure by pulling on them.

## 5.2 Securing Child in Infant Restraint

### **⚠ WARNING**

Failure to properly secure your child in the infant restraint/carrier increases the risk of serious injury or death from suffocation or falls, or in the event of a sudden stop or crash. Even when used only as a carrier, make sure the harness straps are properly secured.

1. Move infant restraint handle to sitting position (see page 11).

2. Open harness clip by squeezing both sides and unbuckle as shown ¶ .

¶

OR

3. Place your child in the infant restraint as shown in ¶ , not § . Pull the harness straps down over your child.

4. Follow directions for your harness:

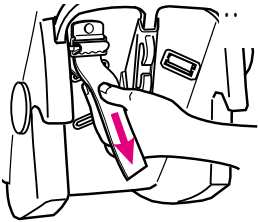

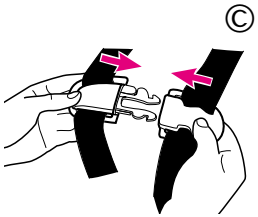

**5.2.1 3-Point Harness: p. 29**

**5.2.2 5-Point Harness: p. 30**

## 5.2.1 3-Point Harness

5. Buckle harness to the latch between child's legs. Make sure that you hear a "click."

**DO NOT use the infant restraint if the harness does not latch in place. Call Graco at 1-888-224-6549.**

6. From the back, pull strap through harness tightener to tighten the straps as shown . **CHECK** that **both** straps are flat and tight on child's shoulders.
7. Snap harness clip pieces together . Position harness clip in middle of chest, level with armpits and away from the neck <sup>a</sup>.

### 8. SAFETY CHECK:

- a) **CHECK** that harness straps are not twisted.
- b) **CHECK** that the harness is snug. You should not be able to insert more than one finger between the harness and your child's shoulder <sup>a</sup>.

## 5.2.2 5-Point Harness

5. Insert the two buckle tongues into the harness buckle on the crotch strap. **Make sure that you hear each tongue click into the buckle.**

**DO NOT** use the infant restraint if the harness does not latch in place. Call Graco at 1-888-224-6549.

6. Snap harness clip pieces together ☹.
7. Pull on harness adjustment strap to tighten straps as shown |. **CHECK** that **both** straps are flat and tight on shoulders.
8. Position harness clip in middle of chest, level with armpits and away from the neck §.
9. **SAFETY CHECK:**

a) **CHECK** that harness straps are not twisted.

b) **CHECK** that the harness is snug. You should not be able to insert more than one finger between the harness and your child's shoulder §.

## 5.3 Installing the Infant Restraint/Base

You must carefully follow the instructions provided by your vehicle manufacturer, in addition to the information in this manual. Be sure you have read and understood section 4, “*Infant Restraint Location*” on p.19-23.

Make sure vehicle is on level ground so that the level indicator, which is attached to the infant restraint, can be used to properly recline the infant restraint

If a front passenger seat is used, slide the vehicle seat rearward as far as possible from the dashboard. If a rear seat is used, make sure the seat in front of it is moved forward enough and is upright enough to allow room for the infant restraint.

1. Remove infant restraint from base, regardless of whether or not you plan on using the base.
2. Place the base © or infant restraint <sup>a</sup> in a rear-facing position in a forward-facing vehicle seat.

3. Thread the seat belt:  
Base and infant restraint

Infant restraint only

4. Buckle the seat belt. Make sure the buckle tongue goes into the correct buckle ♯. **The seat belt should not be twisted or turned.**

5. Tighten the vehicle seat belt. Refer to your vehicle owners manual and the instructions in “4.2.2 SAFE Vehicle Belt Systems”, p. 22-23, on tightening your vehicle belt.

To create a very tight installation, push down hard with your knee or free hand in the middle of the infant restraint or base ↓ and pull and tighten the vehicle belt.

6. Push the infant restraint down into the base and make sure that you hear a “click” § . Pull up on the infant restraint to be sure it is latched securely into the base.

If the infant restraint does not securely latch into the base, the infant restraint provides NO protection for your child.

**DO NOT** use the infant restraint/base if the infant restraint does not securely latch into the base.

## 5.4 Reclining Infant Restraint/Base

For your child's safety, it is important that your infant restraint/base be properly reclined. Attached to the side of your infant restraint is a level indicator to help properly recline the infant restraint/base on the vehicle seat.

### **WARNING**

Failure to properly recline the infant restraint on the vehicle seat increases the risk of serious injury or death.

If the infant restraint is too upright, a child's head may drop forward and cause breathing problems.

If the infant restraint is too reclined, a crash could put too much force on a child's neck and shoulders.

The infant restraint must be properly reclined according to the following instructions.

Check the level indicator. You must look straight on at the indicator.

—If the indicator shows **ONLY** blue, the infant restraint is properly leveled.

—If any orange is showing in the level indicator adjust the recline.

When using the base:

To lower the foot; pull down on the bottom of the foot to the desired setting to adjust the recline ¶ .

To raise the foot; set the base on a flat surface, push in on the fingers on the base and push down on the base to adjust the recline † .

If there is still orange in the level indicator when the foot is completely extended then place a rolled towel under the foot until ONLY blue shows § .

When using only the infant restraint, if there is still orange in the level indicator when the infant restraint is resting on the vehicle seat then place a rolled towel under the infant restraint until ONLY blue shows ¶ .

Readjust the vehicle seat belt as necessary to secure the infant restraint firmly in the vehicle seat.

## Final Safety Check: Every time you drive with your child,

PUSH DOWN on the top of the infant restraint slowly but firmly to make sure the vehicle belt does not lengthen at all and that the vehicle belt is fastened very tightly around the infant restraint/base ☹ .

Holding the infant restraint near the vehicle belt path, TWIST AND PULL the seat forward and to both sides to make sure the vehicle belt does not lengthen or loosen and the infant restraint does not easily move † .

## 6.0 Additional Information

### 6.1 Airplane Use

Install in an airplane the same way as in an automobile. Notify the airline ahead of time that you intend to bring the seat on board.

Use only in forward-facing aircraft seat. Follow the flight attendant's instructions about infant restraint placement. Do not use this infant restraint if the airplane seat belt does not hold the infant restraint tightly.

### 6.2 Cleaning and Maintenance

• **TO REMOVE AND WASH INFANT RESTRAINT PAD**, follow instructions in “5.1 Positioning Harness Straps”, p. 24-26.

On 5-point harness models, push aside the small tab that holds the anchor buckles in place § and pull the anchor buckles out of their indentations. Push a corner of each anchor buckle back into its slot ”.

Carefully remove the seat pad. Machine wash on delicate cycle and drip-dry. **DO NOT USE BLEACH.**

Reverse steps to reinstall seat pad. **Check** that harness system is not twisted, and pull on harness system to be sure harness is securely reinstalled.

- **INFANT RESTRAINT METAL AND PLASTIC PARTS** may be cleaned by wiping with a mild soap and water solution. **DO NOT USE BLEACH.** Use of bleach may weaken plastic parts.
- **HARNESS STRAPS** may be spot cleaned or replaced. **DO NOT IMMERSE THE HARNESS STRAPS IN WATER.** Doing so may weaken the harness straps.
- **BUCKLE** may be cleaned with a damp cloth.
- **DO NOT LUBRICATE** the buckle.
- **DO NOT USE INFANT RESTRAINT** without seat pad.
