Turning Your Phone ON and OFF

Turning Your Phone ON

- ▶ To turn your phone on, press and hold .

Once your phone is ON, it displays "Looking for service..." which indicates that your phone is searching for a signal. When your phone finds a signal, it automatically enters standby mode. At this point, you are ready to begin making and receiving calls.

If your phone is unable to find a signal after 15 minutes of searching, a Power Save feature is automatically activated. When a signal is found, your phone automatically returns to standby mode.

In Power Save mode, your phone searches for a signal periodically without your intervention. You can also initiate a search for service by pressing any key (when your phone is turned ON).

Tip: The Power Save feature helps to save your battery power when you are in an area where there is no signal.

Turning Your Phone OFF

- ▶ Press  for two seconds until you see the powering down animation on the display screen.

Your screen remains blank while your phone is off (unless the battery is charging).

Using the Battery

Installing the Battery

Your phone comes with a Li-Ion battery. Follow these steps to install it:

1. Place the battery into the space beneath the antenna with the metal contacts at the bottom, facing downward.
2. Gently press down until it's in place and the battery release latch snaps.

Removing the Battery

To remove your battery, follow these easy steps:

1. Make sure the power is off so that you don't lose any stored numbers or messages.
2. Push the battery release latch up and hold the battery.
3. Then pull it up and out at a 45-degree angle.

Charging the Battery

Your phone comes with a rechargeable battery. You should charge the battery as soon as possible so you can begin using your phone.

Keeping track of your battery's charge is important. If your battery level becomes too low, your phone automatically turns off and you will lose all the information you were just working on. For a quick check of your phone's battery level, glance at the battery charge indicator located in the upper-right corner of your phone's display screen. If the battery charge is getting too low, the battery icon  appears and the phone sounds a warning tone.

Always use an approved travel charger or vehicle power adapter to charge your battery.

Warning! Using the wrong battery charger could cause damage to your phone and void the warranty.

Note: Long backlight settings, searching for service, vibrate mode, and browser use affect the battery's talk and standby times.

Using the Travel Charger

To use the travel charger provided with your phone:

1. Plug the travel charger into a wall outlet.
2. Plug the other end of the travel charger into the side of your phone (with the battery installed).

Charging when your phone is turned on:

The battery icon  appears on the display while charging. The battery icon turns to  when charging is complete.

Charging when your phone is turned off:

The battery icon  appears, and the message "BATTERY CHARGING-Power Off." is shown on the display while charging. When the battery is completely discharged, you may wait for several minutes until the message is shown on the display. The battery icon turns to , and message changes to "CHARGING COMPLETE-Power Off." when charging is complete.

Tip: Be sure to watch your phone's battery level indicator and charge the battery before it runs out of power.

Displaying Your Phone Number

1. Press **Menu** to access the main menu.
2. Highlight **Contacts** and press **Menu**.
3. Highlight **My Phone#** and press **Menu**.

Note: To access the phone's main menu, press **Menu** from standby mode. Menu items may be selected by highlighting them with the navigation key and pressing **Menu**, or you can press the number corresponding to the menu item on your keypad.

Making and Answering Calls

Making Calls

To place a call using your keypad:

1. Make sure your phone is on.
2. Enter a phone number. (If you make a mistake while dialing, press **BACK** to erase one digit at a time. Press and hold **BACK** to erase the entire number.)
3. Press **TALK** or **Speaker** (left softkey).
4. When you're finished, press **END**.

Tip: To redial your last outgoing call, press **TALK** or **Speaker** (left softkey) twice.

Important: When you use your phone to maximize performance, extend the antenna and do not touch the antenna.

Dialing Options

Dialing options are displayed when you press **Options** (right softkey) after entering numbers in the standby mode.

To select an option, highlight it and press **Menu**.

- ▶ **Call** to dial the phone number.
- ▶ **Call:Speaker On** to dial the phone number in speakerphone mode.
- ▶ **Save Phone#** to save the phone number in your Contacts list. (See “Saving a Phone Number” on page 15.)
- ▶ **[H] Hard Pause** to insert a hard pause. (See “Dialing and Saving Phone Numbers With Pauses” on page 16.)
- ▶ **[I] 2-Sec. Pause** to insert a 2-second pause. (See “Dialing and Saving Phone Numbers With Pauses” on page 16.)
- ▶ **Hyphen** to insert a hyphen manually where you like.

Tip: To Speed Dial a phone number, press and hold the appropriate Speed Dial location from 2-9. See page 59 for setting.

This option appears when you enter four or more digits and press **Options** (right softkey).

- ▶ **Find** to display Contacts list entries that ends with the digits you enter. (See “Finding a Phone Number” on page 16.)

This option appears when you enter numbers for Text Messaging and press **Options** (right softkey).

- ▶ **Send Text** to send a text message. See page 112 for details.

Answering Calls

To answer an incoming call:

1. Make sure your phone is on. If your phone is off, incoming calls go to voicemail.
2. Press  or **Speaker** (left softkey) to answer an incoming call. (Depending on your phone's settings, you may also answer incoming calls by pressing any number key. See "Setting Any Key Answer" on page 38 for more information.)

Your phone notifies you of incoming calls in the following ways:

- ▶ The phone rings or vibrates.
- ▶ The LED flashes.
- ▶ The backlight illuminates.
- ▶ The screen displays an incoming call message.
- ▶ If available, the phone number of the caller is displayed.
- ▶ If the phone number is in your Contacts list, the contact's name is displayed.

The following options are also displayed by pressing **Options** (right softkey).

To select an option, highlight it and press .

- ▶ **Answer** to answer the call.
- ▶ **Answer:Speaker** to answer the call in speakerphone mode.
- ▶ **Don't Answer** to hang up the incoming call and return to Web while you are in the Web operation. (This feature appears when Web access is dormant.)
- ▶ **Screen Call** to answer the call by using pre-recorded announcement. (This feature appears when you are in service area or digital roaming area.) See page 87 for setting up.
- ▶ **Quiet Ringer** to mute the ringer. (This feature appears when the ringer is set.)

Note: If your phone is off, incoming calls go to voicemail.

Ending a Call

To disconnect a call when you are finished:

- ▶ Press .

Tip: Time/Date is displayed when you press  while the phone is in use.

Using the Speakerphone

The speakerphone feature lets you hear audio through the speaker and talk without holding the phone. When the speakerphone is activated, use the Side Volume key to adjust the volume.

To turn the speakerphone on during a call:

– or –
Press  (right softkey), highlight **Speaker On**, and press .

To turn the speakerphone off during a call:

- ▶ Press  (left softkey).
– or –
Press  (right softkey), highlight **Speaker Off**, and press .

Changing the Ringer Volume

To change the ringer volume, adjust the Side Volume key when the phone is in standby mode.

Note: To change the ringer volume from the main menu, see “Adjusting the Phone’s Volume Settings” on page 25.

Adjusting Volume During a Conversation

Whether you need to hear more or less of a conversation, adjust the Side Volume key or press the navigation key up or down during a call.

Muting a Call

- ▶ Press  (right softkey), highlight **Mute**, and press .
(When the phone is muted, “Mute” appears on the display.)

To unmute a call:

- ▶ Press  (right softkey), highlight **Unmute**, and press .

Missed Call Notification

When an incoming call is not answered, your phone displays the Missed Call Notification.

To display the Missed Call entry:

- ▶ Press  (right softkey). (To call an entry, highlight the entry you want to call and press .

Calling Emergency Numbers

You can place calls to 911 (dial    and press ) , even if your phone is locked or your account is restricted. Once the dial is made, you will enter Emergency mode.

To select an option, press  (right softkey), highlight it, and press .

Options:

- ▶ **My Phone#** to display your phone number.
- ▶ **Speaker On** to activate speakerphone mode. (If you are in speakerphone mode, the option will appear as **Speaker Off** to deactivate.)
- ▶ **Unlock Phone** to unlock your phone (appears only if the phone is locked).

To exit Emergency mode:

1. Press .
2. Press  (right softkey) to display the options.
 - ▶ **Call 911** to call 911.
 - ▶ **Call 911:Speaker** to call 911 in speakerphone mode.
 - ▶ **My Phone#** to display your phone number.
 - ▶ **Exit Emergency** to exit Emergency mode.
3. Highlight **Exit Emergency** and press .

In-Call Options

During a call, your phone displays menu options by pressing **Options** (right softkey).

To select an option, highlight it and press .

- ▶ **Flash** to answer an incoming Call Waiting call or connect a third party during Three-Way Calling.
- ▶ **Mute** to mute your phone's microphone. Select **Unmute** to reactivate the microphone.
- ▶ **Speaker On** or **Speaker Off** to activate or deactivate speakerphone mode. You can adjust the speakerphone volume using the Side Volume key.

Warning! Due to higher volume levels, do not place the phone near your ear during speakerphone use.

- ▶ **Three-Way Call** to call a third party.
- ▶ **Call History** to access the Call History menu. (See "Managing Call History" on page 52.)
- ▶ **Contacts** to access the Contacts menu. (See "Contacts Directory" on page 55.)

- ▶ **Tools/Extras** to access the Tools/Extras menu. (See Calendar menu instructions on page 63.)
- ▶ **Voice Services** to access the Voice Services menu. (See page 78.)

Note: Flash menu appears in Call Waiting and Three-Way Call. Mute menu does not appear during a 911 call.

End-of-Call Options

To display the following options, press **Options** (right softkey) within 10 seconds after disconnecting a call.

To select an option, highlight it and press .

- ▶ **Call Again** to dial the phone number.
- ▶ **Call:Speaker On** to dial the phone number in speakerphone mode.
- ▶ **Save Phone#** to save the phone number in your Contacts list. **Go to Phone Book** appears when the number is already in your Contacts list. (See "Saving a Phone Number" below.)

Note: The End-of-Call options are not displayed for calls identified as No ID or Restricted.

Saving a Phone Number

Your phone can store up to seven phone numbers in each of 300 Contacts entries. Each entry's name can contain 16 characters. Your phone automatically sorts the Contacts entries alphabetically.

To save a number from the standby mode:

1. Enter a phone number.
2. Press **Options** (right softkey).
3. Highlight **Save Phone#** and press .
4. Select a label by highlighting **Mobile, Home, Work, Pager, Fax, Other, or No Label** and press .
5. Enter a Name and press .
Once you have stored an entry in Contacts list, you are prompted to select the following entry modes:
 - ▶ **New Name** to enter a name directly.
 - ▶ **From Ph. Book** to select a name from the Contacts entry list.
6. Press **Save** (left softkey).

Finding a Phone Number

You can search Contacts list entries for phone numbers that contain a specific string of numbers.

To find a phone number:

1. Enter the last four or more digits of the number and press **Options** (right softkey). The more numbers you enter, the more specific the search becomes.
2. Highlight **Find** and press .
3. The Contacts entry that ends with the digits you entered appears.
4. Highlight your desired entry.
Press  to display the entry details.
Press  to dial.

Dialing and Saving Phone Numbers With Pauses

You can dial or save phone numbers with pauses for use with automated systems, such as voicemail or credit card billing numbers.

There are two types of pauses available on your phone:

- ▶ **Hard Pause** sends the next set of numbers when you press .
- ▶ **2-Sec. Pause** automatically sends the next set of numbers after two seconds.

Note: You can have multiple pauses in a phone number and combine 2-second and hard pauses.

To dial or save phone numbers with pauses:

1. Enter the phone number and press **Options** (right softkey).
2. Highlight either **Hard Pause** or **2-Sec. Pause** and press . Hard Pauses are displayed as a “H” and 2-second pauses as a “T”.
3. Enter additional numbers.
4. To dial the number, press  or **Speaker** (left softkey). (When dialing a number with a hard pause, press  to send the next set of numbers.)
- or -
To save the number in your Contacts list, press **Options** (right softkey), highlight **Save Phone#**, and press .

Dialing From the Contacts Directory

To dial directly from a Contacts entry:

1. Press  to access the main menu.
2. Highlight **Contacts** and press .
3. Highlight **Find/Add Entry** and press .

Shortcut: Press the navigation key right to list entries.

4. Use your navigation key to scroll through the Contacts list and highlight one of the appropriate entries and press .
5. Highlight the number you wish to call.
6. Press **Options** (right softkey) for the menu options.
7. Highlight **Call** or **Call:Speaker On** and press .

Tip: You can also make a call by pressing  or **Call** (left softkey) during step 5 above.

Note: The icon next to each entry represent the Contacts labels (for example, Mobile, Home, Work, etc.). A triangle next to an icon means there is another number for the entry. Press the navigation key right or left to select the desired label/number.

Using One-Touch Speed Dialing

With this feature, you can dial Speed Dial entries using one key press for locations 2-9. (See page 59 for storing a Speed Dial number.)

To use speed dial for voice calls:

- ▶ From standby mode, press and hold the appropriate key for approximately two seconds.
 - or -
- ▶ From standby mode, press the appropriate key and press **TALK** or **Speaker** (left softkey).

The display confirms that the number has been dialed when it shows “Connecting...”.

To use speed dial for 10-4 calls:

- ▶ From standby mode, press the appropriate key then press and hold **10-4**. (See “Setting Speed Dialing for 10-4 Entries” on page 107.)

The display confirms that the number has been dialed when it shows “10-4 calling...”.

Selecting a Character Input Mode

Your phone provides convenient ways to enter words, letters, punctuation, and numbers whenever you are prompted to enter text (for example, when adding a Contacts entry or when sending Email messages).

1. When you display a screen where you can enter text, press **Mode** (right softkey).
2. Select a character input mode, highlight it and press **Mode**.
 - ▶ **T9Word** to enter characters using T9 Text Input (see next page).
 - ▶ **Alphabet** to enter characters by tapping the keypad.
 - ▶ **SYMBOL** to enter symbols.
 - ▶ **NUMBER** to enter numbers.
 - ▶ **PRESET SUFFIX** to enter a preset suffix.
 - ▶ **SMILEYS** to enter smiley pictures.

Entering Characters Using T9 Text Input

T9 Text Input lets you enter text in your phone by pressing keys just once per letter. (To select the **T9Word** mode when entering text, see “Selecting a Character Input Mode” on the previous page.)

T9 Text Input analyses the letters you enter using an intuitive word database and creates a suitable word. (The word may change as you type.) If the word you want does not display after you have entered all the letters, press **Next O** to scroll through additional word selections. To accept a word and insert a space, press **Space#**.

If you make a mistake, press **BACK** to erase a single character. Press and hold **BACK** to delete an entire entry.

Adding a Word to the T9 Database

If a word you want to enter does not display as an option when you are using T9 Text Input, you can add it to the database.

1. Select the **Alphabet** input mode. (See “Selecting a Character Input Mode” on the previous page.)
2. Enter the word using multi-tap text entry. (See “Entering Characters by Tapping the Keypad” on the next page.) Then press the right softkey, highlight **T9Word** and press **Mode**. The word will appear as an option the next time you scroll through options during T9 Text Input.

Entering Characters by Tapping the Keypad

To enter characters by tapping the keypad, select the **Alphabet** mode (see “Selecting a Character Input Mode” on page 18). Press the corresponding key until the desired character appears. By default, the first letter of a word is capitalized and following letters are lowercase.

4. Roaming

Understanding Roaming

Recognizing Icons on the Display Screen

Your phone's display screen always lets you know when you're off the home network and whether your phone is operating in analog or digital mode. The following chart indicates what you'll see depending on where you're using your phone.

Network	Indicator
Digital Home	
Analog Home	
Digital Roaming	
	Digital Roam
Analog Roaming	
	Analog Roam

Roaming on Digital Networks

When you're roaming on digital networks, your call quality and security will be similar to the quality you receive when making calls on the home network. You may not be able to access certain features, such as Web.

Roaming on Analog Networks

When you roam on analog networks, you will experience a similar quality provided by other analog carriers today. Although some features, such as Web, will be unavailable, you can still make and receive calls. You will experience a few differences:

- ▶ You are more likely to experience cross-talk, fade-out, and dropped calls.
- ▶ Some features which are standard on the home network are unavailable.
- ▶ There are security and privacy risks (eavesdropping and cloning) that exist with conventional analog services today.
- ▶ Your battery needs recharging sooner when you use your phone for analog roaming.

Note: If you're on a call when you leave the home network and enter an area where roaming is available (whether digital or analog), your call is dropped. If your call is dropped in an area where you think service is available, turn your phone off and on again to reconnect to the home network.

Note: When using your phone in analog mode, the handset may feel warm. This behaviour is normal for analog operation.

Setting Your Phone's Roam Mode

Your phone allows you to control your ability to roam. By using the **Roaming** menu option, you can determine which signals your phone accepts.

Set Mode

Choose from four different settings on your dual band/tri mode phone to control your roaming experience:

1. Press  to access the main menu.
 2. Highlight **Settings** and press .
 3. Highlight **Roaming** and press .
 4. To select an option, select it and press .
- ▶ **Automatic:** This setting seeks Service. When Service is unavailable, the phone searches for an alternate system.
 - ▶ **Home Only:** This setting allows you to access the home network only and prevents roaming on other networks.
 - ▶ **Digital Only:** This setting forces the phone to seek a digital roaming system.
 - ▶ **Analog Only:** This setting forces the phone to seek an analog roaming system. The previous setting (Automatic, Home Only, or Digital Only) is restored the next time the phone is turned on.

6. Managing Call History

Viewing History

You'll find the Call History feature very helpful. It is a list of the last 20 phone numbers (or Contacts entries) for each calls that you placed, accepted, or missed. Call History makes redialing a number fast and easy. It is continually updated as new numbers are added to the beginning of the list and the oldest entries are removed from the bottom of the list.

1. Press  to access the main menu.
2. Highlight **Call History** and press .
3. Highlight **Outgoing, Incoming, or Missed** and press .

Tip: You can switch the Voice Call history to the 10-4 call history by pressing  (left softkey). To return to the Voice Call history, press  (left softkey).

Call History Options

For additional information and options on a particular call, highlight a Call History entry and press  (right softkey).

- ▶ **Call** to dial the phone number.
- ▶ **Call:Speaker On** to dial the phone number in speakerphone mode.

10. 10-4

10-4 allows you to enjoy quick, two-way, “walkie-talkie-style” communication with your friends, family, and co-workers. You can make 1-to-1 or 1-to-many calls (up to 5 others on the same call) to any other 10-4 user, anywhere on the Network. You can make and receive 10-4 calls when your phone displays .

Setting 10-4 Mode

1. Press  to access the main menu.
 2. Highlight **Settings** and press .
 3. Highlight **10-4** and press .
 4. Highlight **Enable/Disable** and press .
 5. Select **Enable** and press . (The default setting is **Disable**.)
- ▶ **Enable:** Lets you make or receive 10-4 calls any time your phone is not in use.
 - ▶ **Disable:** Disables your phone’s 10-4 service; you will not be able to make or receive 10-4 calls or access your 10-4 contacts.

Preparing Your Phone for 10-4 Service

The first time you use your 10-4 Phone, your phone guides you how to use the 10-4 function.

1. Press  (right softkey) or the 10-4 button on the side of your phone (). (The 10-4 Help message will appear.)
2. Press  (left softkey) to read a brief introduction to 10-4, and press  (left softkey) to continue through the tutorial.

Your phone is now ready to make and receive 10-4 calls.

10-4 Call Alerts

There are several ways your Phone alerts you during 10-4 calls.

When you make or receive a 10-4 call:

- ▶ The phone beeps.
- ▶ The backlight illuminates.
- ▶ The screen displays a 10-4 call message.
- ▶ The other party’s 10-4 number and name (if available) are displayed.
- ▶ The screen displays who has the floor.

The status of a 10-4 call:

- ▶ The Green LED On indicates you have the floor and may speak.
- ▶ The Red LED On indicates another contact has the floor.
- ▶ The LED Off indicates the floor is open. (You can take the floor and speak by pressing and holding .)

Displaying the 10-4 List

- ▶ From standby mode, press **10-4** (right softkey) or the 10-4 button on the side of your phone () to access the 10-4 List.

Selecting Contacts Lists

When your phone displays a 10-4 List, the left softkey is labeled **Go to**. To switch to another contacts list, press the left softkey, highlight your desired list, and press .

- ▶ **Company List/Company Groups** contain company-provided contacts (up to 200 entries). Your company list can only be created and modified by an authorized administrator on the 10-4 server.
You cannot add, edit, or delete Company List items, but you can copy entries to your Personal List/Personal Groups.
- ▶ **Personal List/Personal Groups** contain your personal 10-4 contact names and numbers, separately or in groups. You can create and edit your own Personal List. Your phone can store a total of 200 entries (you may include up to five contacts per group).
- ▶ **Outgoing** shows the last 10 different 10-4 calls you placed.
- ▶ **Incoming** shows the last 10 different 10-4 calls you accepted.
- ▶ **Missed** shows the last 10 10-4 calls you missed.

Tip: You can also select **Enter 10-4#** from **Go to** option to enter a 10-4 number directly. See page 95 for details.

Note: The  icon next to the group name indicates a group.

Making a 10-4 Call (1-to-1 Call)

You can place a 1-to-1 10-4 call by entering a 10-4 number or by selecting a contact from the 10-4 List.

1. Press **10-4** (right softkey) or press  to access the 10-4 List.
2. Press **Go to** (left softkey), highlight the list from which you want to place a call (**Company List, Personal List, Outgoing Calls, Incoming Calls, or Missed Calls**), and press .
3. Highlight the contact you want to call, and press and hold  to place the call and get the floor. (You will see **10-4 calling...** and **Connecting...** followed by **“You have floor.”** You can now begin speaking.)
– or –
Highlight the contact you want to call and press and release  to place the call. (The call will connect as described above, but **“Floor is open.”** will appear on the screen and either you or your contact may press and hold  to take the floor and speak.)
 - ▶ To see an entry’s information, press  during step 3 above.

Note: During a 10-4 call, the **“floor”** is the right to speak. When you see **“Floor is open.”**, the first person to press the 10-4 button () can speak (while holding the button). Only the person who has the floor can speak. The phone beeps if you press the 10-4 button when another contact has the floor.

4. Continue holding  as you speak. When you are finished speaking, release the 10-4 button to allow other contacts to speak. (When the other party takes the floor, you will see the speaker’s name and phone number and the text **“has floor.”**)
5. When you are finished, press .

Note: When neither party has the floor during a 10-4 call, **“Floor is open.”** appears on the display. If no one takes the floor for 20 seconds, the 10-4 call ends automatically.

Tip: If you press  during step 3 above, you can make a standard voice call.

Making a 10-4 Call (Group Call)

13. Safety Guidelines

Maintaining Your Phone’s Peak Performance

- ▶ Try not to hold, bend, or twist the phone’s antenna.
- ▶ Don’t use the phone if the antenna is damaged.
- ▶ Avoid exposing your phone and accessories to rain or liquid spills. If your phone does get wet, turn the power off and immediately remove the battery.

Using Your Phone While Driving

Talking on your phone while driving (or operating the phone without a hands-free device) is prohibited in some jurisdictions. Laws vary as to specific restrictions.

- ▶ Let the person you are speaking to know you are driving; if necessary, suspend the call in heavy traffic or hazardous weather conditions.
- ▶ Do not take notes or look up phone numbers while driving.

Following Safety Guidelines

To operate your phone safely and efficiently, always follow any special regulations in a given area. Turn your phone off in areas where use is forbidden or when it may cause interference or danger.

Using Your Phone Near Other Electronic Devices

Most modern electronic equipment is shielded from radiofrequency (RF) signals. However, RF signals from wireless phones may affect inadequately shielded electronic equipment.

RF signals may affect improperly installed or inadequately shielded electronic operating systems and/or entertainment systems in motor vehicles. Check with the manufacturer or their representative to determine if these systems are adequately shielded from external RF signals. Also check with the manufacturer regarding any equipment that has been added to your vehicle.

Consult the manufacturer of any personal medical devices, such as pacemakers and hearing aids, to determine if they are adequately shielded from external RF signals.

Note: Always turn off the phone in health care facilities and request permission before using the phone near medical equipment.

Turning Off Your Phone Before Flying

Turn off your phone or set your phone to Airplane mode before boarding any aircraft. To prevent possible interference with aircraft systems, Transport Canada regulations require you to have permission from a crew member to use your phone while the plane is on the ground.

Turning Off Your Phone in Dangerous Areas

To avoid interfering with blasting operations, turn your phone off when in a blasting area or in other areas with signs indicating two-way radios should be turned off. Construction crews often use remote-control RF devices to set off explosives.

Turn your phone off when you're in any area that has a potentially explosive atmosphere. Although it's rare, your phone and accessories could generate sparks. Sparks can cause an explosion or fire, resulting in bodily injury or even death. These areas are often, but not always, clearly marked. They include:

- ▶ Any area where it is very humid and with inflammables.
- ▶ Fueling areas such as gas stations.
- ▶ Below deck on boats.
- ▶ Fuel or chemical transfer or storage facilities.
- ▶ Areas where the air contains chemicals or particles such as grain, dust, or metal powders.
- ▶ Any other area where you would normally be advised to turn off your vehicle's engine.

Note: Never transport or store flammable gas, liquid or explosives in the compartment of your vehicle that contains your phone or accessories.

Restricting Children's Access to Your Phone

Your phone is not a toy. Do not allow children to play with it as they could hurt themselves and others, damage the phone or make calls that increase your telephone bill.

Protecting Your Battery

The guidelines listed below help you get the most out of your battery's performance.

- ▶ Use only approved batteries, AC adapters, and chargers. These chargers are designed to maximize battery life. Using other batteries or chargers voids your warranty and may cause damage.
- ▶ In order to avoid damage, charge the battery only in temperatures that range from 0° C to 45° C (32° F to 113° F).
- ▶ Don't store the battery in a high humidity environment.
- ▶ Don't use the battery charger in direct sunlight or in high humidity areas, such as the bathroom.
- ▶ Never dispose of the battery by incineration.
- ▶ Keep the metal contacts on top of the battery clean.
- ▶ Don't attempt to disassemble or short-circuit the battery.
- ▶ Don't store the battery in high temperature areas for long periods of time. It's best to follow these storage rules:

Less than one month:

-20° C to 60° C (-4° F to 140° F)

More than one month:

-20° C to 45° C (-4° F to 113° F)

Disposal of Lithium Ion (Li-Ion) Batteries

For safe disposal options of your Li-Ion batteries, please ensure that disposal of this in accordance with law and regulation.

- ▶ Do not dispose of the battery in fire; the cell may explode.
- ▶ Do not open or puncture the battery; the released electrolyte is corrosive and may cause damage to the eyes and skin.

Special Note: Be sure to dispose of your battery properly. In some areas, the disposal of batteries in household or business trash may be prohibited.

Note: For safety, do not handle a damaged or leaking Li-Ion battery.

Cautions

Any changes or modifications to your phone not expressly approved in this document could void your warranty for this equipment and void your authority to operate this equipment. Only use approved batteries, antennas and chargers. The use of any unauthorized accessories may be dangerous and void the phone warranty if said accessories cause damage or a defect to the phone.

Although your phone is quite sturdy, it is a complex piece of equipment and can be broken. Avoid dropping, hitting, bending or sitting on it.
