## 2-1.FEATURES

### **Automatic process from washing to drying.**

Automatic process from washing to drying can be selected easily.

Washing capacity : 8kg/8.5kg/10.1kg(Cotton)/10kg

Drying capacity : 4kg/4.2kg/10.1kg(Cotton)/6kg

### **More economical by Intelligent Wash System**

Intelligent Wash System detects the amount of load and water temperature, and then determines the optimum water level and washing time to minimize energy and water consumption.

### **Direct Drive system**

The advanced Brushless DC motor rotates the Drum directly without belt and pulley.

### **Child-Lock**

The Child-Lock system has been developed to prevent children from pressing any button to change the program during operation.

### **Low noise speed control system**

By sensing the amount of load and balance, evenly distributes load to minimize the spinning noise level.

### **Auto Restart**

Although the washing machine is turned off by a power failure, it restarts automatically in its stopped process when power is supplied again. And it will be the same when the machine unplugged in operation is plugged in again.

---

## 2-2.DETERMINE WASHING TIME BY FUZZY LOGIC

To get the best washing performance optimal time is determined by sensing of water temperature, selected washing temperature and laundry amount.

## 2-3.WATER LEVEL CONTROL

- This model adopts a pressure sensor which can sense the water level in the tub.
- Water supply is stopped when the water level to the preset level, then washing program proceeds.
- Spinning does not proceed until the water in the tub reduces to a certain level.
