

GUARDIAN ESCORT™

THE NEW STANDARD

Guardian Escort — It will elevate your standards

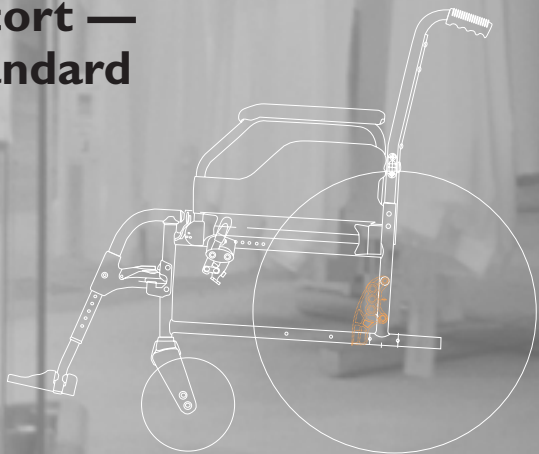

The objective was to create a standard wheelchair combining quality, function and value to elevate the industry standard. We're proud to say the Guardian Escort exceeds these expectations.

First, we started with an innovative design. Then, we put together a talented engineering team to create a chair for the 21st century.

We searched the world for the most technologically advanced materials to create a product with an elegantly simple design AND rugged durability.

Finally, we developed an extremely rigorous test plan that exceeds current regulatory standards to ensure you have a product that surpasses all your expectations of a standard wheelchair.

Guardian Escort — The New Standard

Innovative Design

Technologically Advanced Materials: The proven, high-impact composites provide a scratch-resistant, rust-resistant and extremely durable product that will stand the test of time.

Distinctive Style: The smudge-proof, silver texture finish is durable, easy to clean and improves the look and feel of the chair.

Streamlined Elevating Legrest: Unique elevating legrest design eliminates traditional push rod to deliver long-term performance.

Standard Desk

Traditional Desk

Full Length

The armrest design features a 3-point anchor and toggle release that allow for easy removal and attachment. The armpads also provide a comfortable AND durable solution that eliminates the need to stock both padded and non-padded armrests.

Economical

compact

Options to make storage and transport easier:

- 24" or 12" transport rear wheels
- Space-saving half-folding backrest

User Friendly

- Bi-directional footrests swing in and out for better access in small spaces and easier transfers.
- Self-aligning, swing-away legrests and footrests attach on a single pivot and securely click in place.
- Spring-assisted wheel lock design provides improved user safety during transfers.
- Plush, padded nylon or easy-to-clean vinyl upholstery provides comfort and convenience.

Forward Offset

Rearward Offset

The Guardian Escort offers multiple axle plate options, providing a dynamic chair that can quickly and easily meet the needs of any user:

- Standard Axle Bracket offers two unique positions to improve the maneuverability and stability of the chair.
 - Forward Offset improves maneuverability and wheel access and shortens overall length.
 - Rearward Offset increases the overall stability of the chair.
- Transport Axle Plate Kit converts a Guardian Escort Standard (24" wheels) into a Guardian Escort Transport (12" wheels).
