Features of your Sunbeam EasyClean™ Banquet

Integrated knob and adjustable steam vent

Allows you to accurately control moisture levels during cooking.

High grade non-stick cooking surface

Enables fat-free cooking and easy wipe down cleaning.

Control probe inlet

Pan tilt lever

When the lever is in the lowered position the cooking pan is tilted, forcing juices to collect at one end of the pan. Both hands are then free for basting.

Extra large cooking vessel

The large rectangular frypan (380mm x 292mm) is 78mm deep, ideal for cooking extra large meals or liquid-based dishes.

Trigger release control probe

The probe is thermostatically controlled and incorporates an indicator light that switches off automatically when the selected temperature has been reached, it then cycles on and off to indicate that the temperature is being maintained.

Glass lid

The clear glass lid allows you to monitor the cooking process without lifting the lid and allowing the heat to escape, ensuring the selected temperature is maintained.

Cast-in rectangle element

The rectangle element is completely cast into the heavy duty base providing superior heat distribution.

Temperature setting guide

The following table provides approximate temperatures for each setting on the control probe. Preheat your frypan on setting 7-8, then change to your desired setting.

DIAL SETTING	CELSIUS (approx)	FARENHEIT (approx)	SUGGESTED USES	TEMPERATURE
1	100°C	212°F	Keeping food warm	LOW
2	110°C	230°F		
3	125°C	260°F	Simmering, slow cooking	
4	140°C	285°F		
5	150°C	300°F	Pan frying, roasting	MEDIUM
6	160°C	320°F		
7	175°C	350°F	Shallow frying	
8	185°C	365°F		
9	200°C	390°F	Searing, sealing and baking	HIGH
10	210°C	410°F		

Note: The suggested uses above are provided as a guide only and may require adjustment to suit different foods and individual tastes.

When the dial is set to a low setting, it is normal for food to stop and start bubbling, as the thermostat maintains the selected temperature.

Glass Lid

With the lid in place, the frypan can be used as an oven, giving you the versatility to bake cakes and roast larger pieces of meat. The lid also retains heat and moisture when simmering foods such as casseroles.

Using your EasyClean Banquet

Before the first use: Wash, rinse and dry your frypan and lid. Season the cooking surface by applying a thin coat of cooking oil and rub in with paper towelling.

1. Insert the control probe into the inlet on the frypan.
2. Plug the cord into a 230-240V power outlet and turn the power on.
3. Preheat the frypan on setting 7-8. Then set the control probe dial to the desired temperature setting. Refer to page 4 for the temperature guide.

Note: The light on the control probe will illuminate and will remain on until the set temperature is reached. It will then cycle on and off throughout cooking, as the temperature is maintained by the thermostat. On initial heating of the frypan, it is recommended that the temperature be allowed to cycle (the light cycling on and off) several times. This will help the cooking surface to adjust to a more accurate cooking temperature.

Note: Any discolouration on the cooking surface that may occur will not affect the cooking performance. Do not use metal utensils, these will scratch and damage the non-stick cooking surface. Sunbeam recommends only using heat-proof plastic or wooden utensils to stir food.

Using the pan tilt lever

The pan tilt lever is positioned under the inlet where the Control Probe is inserted. To tilt the frypan, push the lever down. This allows the fat and juices to drain from the food for crisp, low fat cooking. It also makes it easier to baste food and serve sauces or gravy.

Cooking with your EasyClean Banquet

Baking

Your frypan can be used for baking cakes, with deliciously moist results.

1. Preheat the frypan to setting 10, with the lid on.
2. Elevate the cake pan or tray from the base of the frypan using a small wire rack.

Cooking times will be longer than those of a conventional oven.

Basting

The pan tilt lever makes basting easy as it allows the juices to drain to one side of the pan. Reduce the temperature to prevent any fat and juices spattering. Position the pan tilt lever and spoon the juices over the food as desired.

Boiling

Pasta

1. Bring 6 cups of water to the boil on setting 5. Add 1-2 teaspoons of oil to stop the pasta from sticking together.
2. Add 250g (1½ cups) of pasta and cook until tender, for approximately 8-12 minutes.
3. Reduce to a lower setting if the water boils too rapidly.

Note: Cooking times will vary with different types of pasta.

Rice

1. Bring 6 cups of water to the boil on setting 5. Add 200g (1 cup) of rice and position the lid.
2. Cook until tender, approximately 10-12 minutes, and then drain.
3. Reduce to a lower setting if the water boils too rapidly. Stir occasionally so that the rice does not stick.

Browning and Sealing Meat

It is necessary to brown and seal meat in many recipes. Meat retains its juices and the flavours develop after browning and sealing. This also prevents it from sticking when baking or roasting. Preferably use meat that is at room temperature, as this reduces the cooking time.

1. Preheat the frypan to settings 8-9.
2. Brown meat on all sides, with the lid off.
3. After sealing, reduce the temperature to settings 4-5 and replace the lid until the meat is cooked as desired.

Cooking with your EasyClean Banquet continued

Frying

The frypan is ideal for shallow or dry frying. Deep frying is not particularly suitable as the frypan has shallow sides and a greater surface area, which results in heat loss and the possible overflow of oil.

Pan frying: Suitable for eggs, omelettes, bacon, sausages, steaks and chicken pieces. Preheat to settings 5-6 with a little oil to add flavour. Non-stick cooking surfaces do not require a large amount of oil. Steaks should only be turned once during cooking.

Shallow frying: Suitable for vegetable pieces e.g roast pumpkin and potato, and crumbed food. Preheat on settings 6-8 with sufficient oil so that the food is half immersed. Cook food with the lid off.

Sauteéing: Preheat on settings 5-6 with a little oil to add flavour.

Stir frying: Food is cooked quickly, over a high heat and vegetables retain their flavour and crispness. For best results and even cooking, cut food into even sized, smaller pieces.

1. Preheat the frypan on setting 8-9.
2. Slice meat into strips. Coat meat in a little oil and stir-fry in batches until browned. This prevents meat from stewing.
3. Add vegetables and seasoning, stirring continuously. Vegetables which take longer to cook, such as carrots, should be cooked first, adding the other ingredients later. Cook until the vegetables are still slightly crisp. Return the meat back into the pan when the vegetables are almost cooked. The lid can be in position in the last few minutes of cooking.

Roasting

Meat and poultry: The frypan is ideal for roasting meat and poultry, as the meat retains the flavour and juices.

1. Preheat the frypan on setting 8-9. Use only a small amount of oil for less fatty joints and no oil for fattier joints of meat.
2. Brown and seal the meat on all sides and position the lid.
3. After browning, turn the dial to settings 4-5 to cook the meat as desired. Turn meat occasionally during cooking to ensure even cooking.
4. Remove meat from pan and cover with foil. Allow meat to rest for 5-10 minutes, meanwhile you can make a gravy from the juices in the frypan.

Vegetables: Cut into even sized pieces. Add to the frypan 45-60 minutes before serving. For crisper vegetables, remove the meat and increase the heat for the last few minutes of cooking.

Roasting times:

Note: These times are for well done. Reduce the times to suit personal taste.

PORK: 30-40 minutes per 500g after browning.

VEAL: 30-40 minutes per 500g after browning.

LAMB: 25-30 minutes per 500g after browning.

CHICKEN: 30-35 minutes per 500g after browning.

Care and Cleaning

Always turn the power off and remove the plug from the power outlet after use and before cleaning. Allow appliance to cool before cleaning.

Control probe

If cleaning is necessary, wipe over with a damp cloth.

Note: The control probe must be removed before the frypan is cleaned and the control probe inlet must be dried before the frypan is used again.

Important: Do not immerse the control probe in water or other liquid.

Store the control probe carefully. Do not knock or drop it as this can damage the probe. If damage is suspected, return the control probe to your nearest Sunbeam Appointed Service Centre for inspection. Refer to the separate warranty and service centre booklet.

Glass lid

Wash the lid in warm soapy water using a soft sponge, rinse and dry thoroughly. Alternatively, wash the lid in a dishwasher.

To clean interior and exterior surface.

- When cleaning the non-stick coating do not use metal (or other abrasive) scourers. After cleaning, dry the frypan and lid with a soft cloth before storing.
- Wash in hot soapy water or in a dishwasher. Remove stubborn spots with a plastic washing pad or sponge.
- The heating element is totally sealed, making the frypan vessel safe to fully immerse in water, or place in a dishwasher.
- Wash as directed, and re-season the frypan before using again. In some instances this may not remove all the staining.
