

Perfection
in design and
performance.

THAT'S BETTER.

Built Strong to Last Long.

It has taken 100 years to reach the point of perfection.
Now you can enjoy all the benefits.

Back in the 1890's, Fredrick Louis Maytag was a 16 year old field hand dreaming of creating safe, labour saving tools to do the work traditionally carried out manually. Today, well over 100 years later, his surname has come to embody all that's best in high quality, hi-tech American design. In the USA, Maytag is the number one brand for laundry. A byword for panache and performance, form and function, elegance and efficiency... the name behind the most desirable range of home appliances, chosen by discerning customers across the whole continent. After a century of inspired advancement and ground breaking innovation, Maytag has reached the highest standard ever - combining time-honoured craftsmanship with outstanding new technology and the ultimate in sophisticated styling. Laundry, dishwashing and refrigeration as you have never known it before.

It's time for you to enjoy all the benefits... with a range of appliances that enhance your home, and perfectly compliment your lifestyle. That's Maytag... that's better.

'Stylish,
smart - with
inspired ideas
for the way
we live'
That's better

THAT'S BETTER

Design classics to suit your style...and your home.

Maytag sets new standards in contemporary home appliances, ushering in a new age of design classics with stunning style and inspirational innovation throughout the range.

From the world's largest capacity dishwasher to a totally new laundry room concept and the very best in refrigeration, Maytag presents you with an outstanding choice of options... perfectly suiting your personal style, the way you live and the way you want your home to look. Maytag is everything you've been looking for, and more. Appliances which reflect your values and perform beyond your expectations, with features that take you to a new level of convenience and style. And all with professional quality throughout, to bring you the highest level of performance, capacity, reliability and durability.

“The Maytag
range answers
all our changing
needs. And
more.’
That’s better

THE RANGE

THE TOTAL LAUNDRY ROOM CONCEPT

Washer MWA 0718FIB, Dryer MTD 07SCFIB, Drying Cabinet DC7171 shown

Maytag reinvents the laundry room with a totally new concept - an integrated yet almost infinitely flexible design, incorporating every element into a stylish, clutter free and ultra-functional multi-purpose module. Washer and dryer, drying cabinet, ironing, storage, and a whole host of hidden helpers... at last, thanks to Maytag, your laundry room can be as stylish and attractive as your kitchen or bathroom.

STYLISH DESIGN, SPACIOUS DISHWASHING

MDW 171TN shown

Now there's a range of dishwashers which perfectly suits your lifestyle. An XXL[†] design with the capacity for 17[†] full place settings in a single load... simply ideal for larger households and dinner parties, yet taking up no more room than a standard dishwasher. Just one of an outstanding range of new-generation dishwashers with clever, functional features, superb performance - and supremely stylish design.

[†] IEC standard testing is carried out with 12 place settings

STUNNING REFRIGERATION INNOVATION

SOV028TB shown

Inspiration in refrigeration... smart, sleek design that's big on features and efficiency. Packed full of clever innovations, the Maytag range of side by side refrigeration units (excluding Trilogy SOVO28TB), uses IntelliSense® technology to make sure fresh food is always at the perfect temperature... delivers chilled water and ice on demand... and gives you easy access to everything in the freezer. That's not just cool. That's Maytag cool.

Washer, dryer, drying cabinet, storage, sorting unit, ironing, all in one.

All you need for the perfect laundry room, all in one stylish space, and all without clutter and mess. The total laundry room concept totally transforms the thinking behind traditional utility rooms... taking all the functions, and more, and combining them in a stunning ultra-modern modular design.

Co-ordinating to perfection, appliances and cabinets come together in perfect harmony of form and function. Sleek and sophisticated looks, open up to reveal a stunning array of smart and innovative ideas. Integrity of design is complemented by impressive performance throughout, from the very latest in washers and dryers to the ultimate in drying cabinets. There's cleverly designed storage space for clean and dirty laundry... and even the ironing board is integrated, sliding out smoothly from its hidden space. This is the complete solution, the laundry room of the future... today.

THE TOTAL LAUNDRY ROOM CONCEPT

'Perfect laundry every time. With none of the clutter.'
That's better

Washer MWA 0718FIB, Dryer MTD 07SCFIB, Drying Cabinet DC7171 shown

All of your laundry, all in one stylish space.

The total laundry room concept takes complete care of every aspect of your laundry... in style. From neatly storing away all that dirty laundry, ready for the wash, through the whole washing and drying cycle - all performed quickly and energy efficiently, yet with uncompromisingly high standards and excellent results for every fabric - through to ironing and storing away again, immaculately clean and ready for use. And there's more, a drying cabinet which, among a host of other functions, offers up to an incredible 16 metres of clothes line space - for gentle fresh air style drying whatever the weather. And storage spaces that mean even the busiest of family homes can feature a laundry room that's not just clutter free and tidy... but also more stylish and smart than ever before. That's better... that's Maytag.

WASH BETTER

Innovative, inventive features combine with the highest standards of design and build to ensure outstanding performance and perfect results, time after time. Advanced, yet easy to use, programming takes real care of every sort of load - while robust, professional build construction and advanced technology ensure that Maytag washers run smoother and last longer.

Washing machine features	P16-17
Choose your washing machine	P18-19

DRY BETTER

Every sort of washed load dries to perfection with Maytag - with dryers featuring a clever butterfly action which reverse tumbles, shortening the cycle time and puts less strain on the dryer. And the ingenious design of our drying cabinets means easy drying for wet clothes, coats and shoes, too - out of sight and with an amazing capacity to cope with all your needs.

FURNITURE

You can customise the total laundry room to suit your personal taste and style - complementing or concealing the appliance with doors in a range of finishes to fit the washers and dryers and fronts for the storage and sorting units. Choose from high gloss white, stainless steel, high gloss black - or match to your own specific décor scheme.

Choose your furniture options	P13
-------------------------------	-----

So much space... and so full of clever features.

With a flexible and versatile array of features, the clever design of the Maytag drying cabinet makes the best use of every square inch of space available. Intelligent design makes all these features easy to adapt and organise for various kinds of laundry, all with the maximum and most efficient drying effect.

'Crease free drying and storage - for an incredible amount of clothes and shoes'
That's better

Flexible and functional
Sometimes it's really helpful to get clothes dry really quickly - and the drying cabinet enables you to do this with no compromise on performance or damage to fabrics. Three gentle heat settings and a four hour timer give you a range of options, with the facility to dry 3.5kg of clothes thoroughly in just 2 hours.

Up to 16m clothesline
With three rows of pull-out hangers, a Maytag drying cabinet provides you with the equivalent of up to 16 metres of clothesline. Your clothes dry naturally with warm air circulating around them, so you get as fresh a result as you would hanging them outside to dry on a breezy, sunny day.

Keep it tidy
With its multiple functions and remarkably large capacity, the Maytag drying cabinet helps you to keep your laundry room tidy and clutter free - taking in everything from standard wash loads to shoes and coats, boots and gloves, all stored and dried neatly through a versatile range of features.

Efficient use of space
The flexibility of the drying cabinet's innovative range of features means that every inch of space is efficiently used - it is endlessly versatile, so you can use the drying space however you want, changing the set up in an instant to cope with whatever you need to dry.

Get organised
The drying cabinet helps you organise your home. There are racks for drying and storing shoes and boots, clothes and linen and other accessories like gloves and hats - all those bits and pieces that otherwise get spread around your house and sometimes seem to go missing!

Dry your clothes gently
The drying cabinet is particularly kind to sensitive fabrics like silk lingerie and cashmere sweaters, drying them gently to perfection with no shrinkage or bobbling. For all those traditional natural fibres and sensitive new materials which can't be tumble dried, it's the perfect solution - now there's no need for that unsightly clothes horse!

STORE BETTER

Drying and storing... out of sight, and out of the way.

Say goodbye to drying clothes draped around the house, the traditional clothes horse and shoes and boots drying in the hall or on radiators - a Maytag drying cabinet takes care of it all, with the equivalent of up to 16 metres of clothesline and a range of racks and hooks. From washed clothes and wet coats to gloves, scarves, hats, shoes and boots, it has an amazing capacity to help you keep your home tidy.

DRYING CABINETS

A look that's complete and co-ordinated

Within the total laundry room concept you have a range of colour and finish options which enable you to create the look you want, to suit your home and your personal preferences. If you prefer your washer and dryer to be concealed behind a door, you can choose from a range of finishes - high gloss white, stainless steel, high gloss black or to match your own specific décor scheme. Full length handles are available with the first three of these options.

FURNITURE

'Matching furniture maintains our design integrity'
That's better

Innovative, intelligent features for superior performance.

The advanced technology and design of Maytag washers means that outstanding performance and results are easy to achieve. Intelligent, intuitive programming takes away all the hassle, and ensures high levels of energy and water efficiency. Put simply, the washer does more of the work for you. This innovative technology is supported by exceptional professional build quality construction, which not only means that your washer is more durable and reliable - it also ensures a quieter and smoother performance, and keeps the washer cleaner and fresher.

Best in class performance

With A+ energy efficiency and low water consumption, Maytag washers are economic and environmentally friendly - while also achieving A standard wash results across all the main fabric types and through 9 special stain programmes. Spin speeds of up to 2000rpm are the fastest in the industry.

Built to professional standards

All our products are built to the same production standards as our professional range. We use more steel and less plastic than other brands, including stainless steel for both the inner and outer drums, and with no rubber bellows there's no leaks and no build up of slime. Maytag's unique Quattro™ construction ensures a better, quieter and smoother performance, and enhances the reliability and durability of your washer.

Ease of use

Maytag washers are available with smooth working 'circle' dial controls, or with all programming information displayed in a single, easy to read and use LCD line. You simply enter the settings you want from left to right. Our Auto Wash feature makes life even easier for you - it chooses the right programme automatically for you.

Key for all washing machine features

Laundry room concept
These models are exclusively designed for the Maytag laundry room concept.

Large load capacity
With larger load capacities of 7kg, Maytag washers enable you to work more efficiently - completing your wash in less loads, which saves time, water and energy.

A+ in energy consumption
Maytag washers are rated A+ for energy according to the European energy standards - which means their energy consumption is 10% lower than A rated machines. By decreasing the energy consumption, you will save money on your electricity bills.

'A' for wash result
Maytag washers are all rated in the top performance category, making them the best in their class for wash results.

'A' for spin speed
The high speed saves energy and time in the drying process. By using 2000rpm in your washer, you decrease the running time and energy consumption in your tumble dryer by approximately 50%, compared to 800rpm.

Time programme
Wash your clothes as efficiently as possible in the time you have available. With this programme, you decide how long you want to spend waiting for the wash to finish. The machine then optimises the wash result within the time chosen, from 30 minutes up to 3 hours. A flexible, smart and time saving feature.

Auto Wash
An intelligent programme which is extremely flexible and convenient - it does the thinking for you. Auto Wash adjusts the water consumption and main wash time depending on the load and chosen temperature. Auto Wash makes life easier for you - and also saves energy since the amount of water and running time is adjusted according to the size of the wash load.

Aqua Stop Water Safety System
Aqua Stop has up to 7 water safety features to avoid leaking or flooding. This includes a super strong but flexible PEX fill hose, covered bottom plate to retain any leaks and an auto system that shuts off the fill valve and pumps out the water when the bottom plate starts to fill with water.

Stain programme
Simply choose the fabric and type of stain from the display menu, and the washer will wash to your specific needs - the optimal programme will automatically be set to achieve the best possible wash result to remove the stain. This programme can be set to 9 different stains (red wine, blood, grass, blueberries, butter, chocolate, coffee/tea, egg, dairy products) on 3 types of materials (cotton, cotton/synthetics, synthetics).

Pro Build
All Maytag washers are built to the same high standards as our professional products - with more steel and less plastic, so they perform better and last longer.

Quattro™
This unique durable standing construction makes Maytag washers more steady and stable than other washing machines, which are suspended inside the outer casing. With Quattro™ construction, the outer drum rests on four supporting power dampers firmly attached to a steel bottom plate. The construction stands inside the machine and spinning at even 2000rpm is virtually free of vibrations.

Super rinse
Rinses 7 times and removes all detergents - perfect solution for those with allergies or sensitive to detergents.

Language options
These machines have 11 different language options for you to choose from.

Drop down door opening
Making it easier to load and unload your washing. Also avoids clothes being dragged out of the machine and falling on the floor when unloading.

Integrated
Integrated models allow you to hide the appliance behind a full height door, and match your surrounding furniture.

Free standing
Freestanding models can be installed without any adjacent furniture or additional doors.

Cast iron rear cable
Maytag washers are stabilised with a robust cast iron rear cable, rather than the standard concrete used by other manufacturers, for sturdier, quieter operation and a longer life span.

Noise level
Maytag washers run smoother and quieter - see individual specifications for noise level db (A) during operation.

SmartSeal™
An intelligent design which enables the door to seal directly to the outer drum - for easy clean and prolonged freshness, year after year and unlike traditional washers with rubber bellows, there's nothing to leak, wear out or replace.

*The above features are only available on certain models in the range. View individual model specifications for more information.

WASH BETTER

Neater. Easier to use. More efficient. And much, much more stylish.

Beautifully proportioned, elegantly designed and smoothly stylish, Maytag washers are available in a range of specifications and finishes to perfectly suit not only your wash requirements - but also your chosen décor scheme, within the total laundry room concept or as part of a standard laundry or utility room. Ease of use and efficiency are of the essence with every Maytag appliance, as are the versatility and effectiveness of the comprehensive range of wash programmes.

All these models integrate with the total laundry room concept, but can also be selected as stand alone appliances.

That's better

Washer MWA 0714FIC shown

Optimum performance with a range of advanced features.

Maytag dryers give your clothes that lovely fresh-air dried feel, with an exceptional range of Auto Dry programmes for you to choose from - and our unique SensiDry programme for delicate fabrics, taking real care of them and preventing shrinkage. We've developed a unique 'butterfly' drying action which is so much more efficient and effective than standard tumble dryers - and which also reduces creasing and the need for ironing. Like all Maytag appliances, our dryers are superbly constructed from the highest quality materials - which means they dry clothes better, for longer.

Butterfly non-stop drying

The unique 'figure eight' butterfly action of Maytag dryers moves the load around gently, non stop and in less time - without the clothes bundling, giving you fresher and faster results which require less ironing. And it puts less strain on the belt and drive system than traditional reverse tumble models - protecting the motor and ensuring a longer lifetime for your dryer.

Auto dry & SensiDry

Intelligent sensors within the dryer adapt the drying programme to optimise the energy and time usage. The SensiDry temperature sensor ensures even drying results, with no concerns about shrinkage of delicate fabrics.

Built to professional standards

All our dryers are built to the same production standards as our professional range. With stainless steel drums, ball bearing suspension and a high quality motor, your dryer runs quieter and smoother - and lasts for longer.

Key for all dryer features

- LRC Laundry room concept**

These models are exclusively designed for the Maytag laundry room concept.
- 7kg Large load capacity**

Maytag dryers have a 7kg capacity - and a 112 litre drum allowing for more space for the laundry to move, ensuring even efficient drying and reduced creasing.
- Double lint filter**

Easy to remove and clean out, this double filter picks up double the amount of lint - preventing it from gathering in the dryer. Less lint means reduced energy consumption and shorter cycle times, whilst keeping your drying load fresher and cleaner - which makes life easier for allergy sufferers. It also enhances the durability of the dryer itself.
- Interior light**

The interior light makes it easier for you to load and unload your dryer. You can clearly see what you are doing - which helps you find that missing sock, each and every time.
- B Energy rating**

According to European labelling standard - saving you money and helping the environment.
- C Airing programme**

The ideal, energy efficient programme for those occasions when you simply want to freshen up your clothes or linen without using heat. Clothes are tumbled in cool air for the time you select.
- Easy clean fan**

Innovative Maytag design makes it easy for you to clean the fan yourself, a job which requires an engineer call out with standard dryers. A clean fan ensures that programme times remain accurate, and energy consumption stays low - as well as prolonging the effective life of the dryer.
- Auto jeans programme**

This programme dries jeans in a special cycle - taking a little longer than a normal dry but giving a great result, even in the pockets and seams.
- Auto synthetic programme**

This programme sets the ideal, lower temperature and drying times for synthetic material garments like shirts and blouses.
- Child safety lock**

Maytag dryers are family friendly too - doors can be opened from the inside and the dryer has to be restarted if the door is opened.
- Noise level**

Maytag dryers run smoother and quieter - see individual specifications for noise level db(A) during operation.
- Anti crease**

Set the dryer to run on low heat and intermittent tumble for 2 hours after the cycle has finished to avoid laundry creasing in a cold static drum.
- Delay start**

1-24 hour delayed start option to maximise off peak electricity.
- Integrated**

Integrated models allow you to hide the appliance behind a full height door and match your surrounding furniture.
- Free standing**

Freestanding models can be installed without any adjacent furniture or additional doors.

* The above features are only available on certain models in the range. View individual model specifications for more information.

US STYLE
MACHINES

More spacious. More efficient. More advanced. And far more attractive.
'Dishwashing has moved on to a new level...'

Now that more and more of us enjoy entertaining at home - with bigger and bigger dinner parties and barbeques - the average dishwasher simply isn't large enough, and tough enough, to cope. Maytag provides the perfect answer, with a stylish XXL¹⁷ dishwasher which takes care of it all for you. Simply load it up with all the plates, glasses and cutlery with up to 17 place settings, and that's the washing up done! The XXL¹⁷ - a big step forward from Maytag for you, and your lifestyle.

STYLISH, SPACIOUS DISHWASHING

Dishwasher MDW 171TN shown

A stylish dishwasher* which takes 17+ place settings, not 12.

With the world's largest load height - an amazing 58cm, packed into a standard height machine which will fit most cabinet units - and a uniquely flexible 4 level rack system, Maytag's new generation XXL¹⁷ dishwasher has an incredible capacity for dirty dishes. With the XXL¹⁷ you can wash larger loads and more place settings than ever before. 17 full place settings - compared to a standard 12 place setting maximum, that's 40% more wash load than any standard dishwasher.

MDW 171TN shown

*In a standard European 60x60cm configuration
†IEC standard testing is carried out with 12 place setting

Fully Integrated Dishwasher

- 4 wash levels with up to 7 different baskets

THE XXL¹⁷

All sorts of features. For all sorts of dishes.

The XXL¹⁷ doesn't just pack more dishes into the same space...it's loaded up with helpful, innovative features too. Like incredible flexibility, with 4 wash levels and 7 separate baskets. Programmes which ensure excellent results, no matter how stubbornly dirty the dishes are – with up to 10 highly effective spray zones including 3 power zones. High levels of energy and water efficiency and professional standard construction means it works super-efficiently, and lasts longer.

'Dishes come out spotless. And the design is immaculate'
That's better

Best in loading height
The 58cm loading height and flexible rack system of the XXL¹⁷ enables you to load plates, serving dishes, racks and oven shelves up to 39cm high - which means you can wash those larger items by machine, and not by hand.

Best in class capacity
With space for 17¹ place settings, rather than the standard 12, the XXL¹⁷ gives you 40% more capacity than other models. Clever Maytag design means it's big on the outside - yet has the same dimensions as a standard dishwasher.
¹IEC standard testing is carried out with 12 place settings

Built to professional standards
Maytag uses far more stainless steel, and far less plastic – making the XXL¹⁷ a stronger, sturdier and cleaner dishwasher than any standard machine on the market. With steel parts throughout, and an all-welded tub construction (rather than the usual folded and glued seams), the XXL¹⁷ is leak proof and gives you a better all-round performance, for longer.

Key for all dishwashing machine features

- 43** **Low noise**
The Maytag dishwasher works smoother and quieter - with a noise level of just 43 db(A) during operation.

auto **Auto time programme**
Set a time and the XXL¹⁷ will automatically select the best programme for that time.

MTW TFS **Daily wash**
This 90-minute programme is ideal to get the best results for a standard daily wash load.

QUICK WASH **Quick wash**
Designed for lightly soiled glass and china, taking approximately 60 minutes.
- ▶▶** **Time saver**
Time saver saves from 30 to 80 minutes on a wash load by shortening the heavy and normal wash. It gives you the same performance but consumes slightly more energy and water.

STEEL **9Steel**
No other dishwashers have so much steel instead of plastic - the container, loading racks, spray pipe, spray arms, strainers, outer base, feet, upper basket fixations and heater included. This is a unique, durable solution you will only find in a Maytag machine - they're built to last longer, and they do.

LEAK PROOF **Leak proof**
AquaSafe™ leak proof construction ensures leak-free dishwashing, with an advanced water safety system encompassing 16 different points. And the tub is all-welded which makes for a stronger construction and leak proof too.
- FlexiRacks**
The XXL¹⁷'s unique, flexible and easy to use 4 level rack system incorporates up to 7 baskets to cater for any and every sort of wash load in a wide range of configurations.

10 **10 spray zones**
The spray system consists of 10 highly efficient spray zones which ensures that the whole load gets completely clean. Two power zones are situated in the lower rack for excellent results even with the dirtiest pots and pans, and a third power zone concentrates on the cutlery.

self clean **Self cleaning filter**
Cleaning the filter after every wash is a chore we all forget, but is essential to good wash performance. The XXL¹⁷ has a self clean system that only requires maintenance every few months.
- Turbo drying**
The XXL¹⁷'s fan-dry system ensures that the load is dry. After the final rinse, moist air from inside the machine mixes with dry air from outside to achieve better drying results.

A **Energy**
Rated in A for energy consumption, cleaning and drying results, according to European labelling standards.

Individual doors
The XXL¹⁷ free-standing models come with a Stainless Steel door fitted. Integrated models can be fitted with an optional Stainless Steel door, or the furniture door of your choice to match your kitchen.
- Kid lock**
The control panel can be locked to prevent children starting the dishwasher or cleaning programme.

Water efficient
The XXL¹⁷ is highly water efficient with a consumption of just 0.58 litres per place setting.

Touch control LCD display
Easy to use, set and read, the LCD display panel is controlled by touch and shows all your options, as well as programme time remaining. It can be set in 11 languages.

24 hour start delay
You can set the washer to delay the start of its programme by up to 24 hours - which means you can make the most of off peak energy deals.

CLEAN BETTER

Endless possibilities - with FlexiRacks™ adapting to cater for any dishwashing load

The XXL¹⁷'s incredible capacity is made possible by clever use of space inside – and an almost infinitely flexible range of racks and baskets. Innovative design uses a 4 rack system with up to 7 baskets. All the racks are flexible, sturdy and made of a durable nylon coated steel. Their mesh is finer than in other dishwashers, which helps to keep dishes and utensils in place. You can also fully extend the lower racks onto the dishwasher door. All of which makes loading easier and far more flexible – whatever the wash load.

Knife basket
At the top, there's a useful knife rack. Placing sharp knives in this basket protects glass, china - and children. It has its own spray system to ensure the knives get really clean.

Exclusive upper rack for XXL¹⁷ only
The upper rack is height adjustable (4 cm), making it possible to provide more space in the lower rack. The upper rack itself is extra high to provide better support for tall glasses and has fold-down wine-glass shelves. It firmly supports egg cups and other small items. There's a china guard to prevent you from placing items that are too tall in the lower rack, whatever height you have it adjusted to.

Exclusive lower rack for XXL¹⁷ only
The lower rack includes up to two cutlery baskets. The larger one has room for easy sorting, and is cleverly designed to enable forks and knives to dry better. It has a high handle to avoid you hurting yourself on sharp objects and to make loading and unloading easier. The smaller extra cutlery basket can be placed inside the larger one - for instance, loaded with smaller spoons, or to separate silver and stainless steel. It is extra flexible - and provides stability for larger plates. The back row of plate holders folds down and divides.

Cutlery baskets

Middle rack
The middle rack is divided into two baskets, for extra flexibility and load capacity. One is for your larger utensils - whisks, knives, spatulas and so on - and the other is for bowls and cups. Both are removable for easy loading and unloading, and can be removed to leave more height in the lower rack.

XXL¹⁷

How FlexiRacks transform your dishwasher for any load...

- More room in middle rack**

Mixed load, upper rack in upper position (19cm) giving you more space in the middle rack. Perfect for breakfast bowls.
- More room in upper rack**

Mixed load, upper rack in lower position (23cm). Adjust the upper rack and make room for rows of smaller plates, more coffee cups or higher glasses.
- Unique new middle rack**

Mixed load, with unique middle rack giving loading a new dimension. Divides into two removable baskets for larger utensils, bowls and cups.
- Taller glasses or vases**

Without one section of middle rack - you can make room for wine, champagne or beer glasses, or flower vases.
- Pots & pans**

Remove middle rack and put larger pots, pans or plates in the lower rack.
- Bowls, trays and cutting boards**

Remove middle rack and put baking equipment like trays, larger bowls and cutting boards in the lower rack.

THE INNOVATIVE FLEXIRACK™

Inspiration and innovation - in refrigeration.

Refrigeration has never been so cool, Maytag takes the fridge freezer to new standards of style and function... with beautiful, elegant design that incorporates a stunning range of features to achieve outstanding performance. This is refrigeration on the grand scale - big, beautiful designs to enhance both your home and your lifestyle. Iced water on tap... fresh, crisp fruit and vegetables... food straight from the fridge... all kept at the ideal temperature, in fridge freezers that are big on capacity - and even bigger on style.

REFRIGERATION INNOVATION

MSS 20 CGI14 shown

Flair, functionality - and an outstanding range of features.

Behind the sleek, smart lines of every Maytag fridge freezer there lies a host of high-tech, helpful and inventive features. Smart, intelligent programming to keep your food and drink looking and tasting better for longer - with light touch controls for easy, accurate temperature management. Five separate cool zones. Neat design ideas like deeper freezer drawers that store even the biggest and most awkward packs - yet slide out effortlessly and smoothly. Adjustable shelves and racks to make the most of every inch of space, and clever spillsaver retaining edges to retain spillage. We've thought of it all for you!

'Clever design means there's so much more inside'
That's better

MSS 20 CIII4 shown

Customise your fridge to your own specification - see page 44-45

NEW In door crisper

Your fruit and vegetables retain their freshness, crispness and goodness for longer with this unique new feature from Maytag. A temperature and humidity controlled pull down compartment extends their life and ensures that you enjoy the fresh flavour for longer. And it's set in the door for easy convenient access, with no bending down to reach it.

In door ice

Unlike traditional icemakers, the ice storage is located in the door freeing up to 20% more usable space in the freezer section. The ice container can also be easily removed so you can serve fresh ice directly at the table or out in the garden.

IntelliSense®

Maytag's advanced IntelliSense® system restores the temperature 5 times faster after the door is opened. This ensures better food conservation, keeping food fresher and looking better for longer.

Key for all refrigeration machine features

Customised design

Selected Maytag refrigeration models can be personally customised to perfectly suit your specific décor design and taste. On model MSS 20 TBBI4 only.

Energy

Maytag refrigeration is the most energy efficient on the market, using up to 25% less energy than Class A appliances, and 45% less than Class B.

Ice and water dispenser

Twin electronic 'paddles' deliver chilled, filtered fresh water and cubed or crushed ice at the touch of a button - with night light illumination that turns off after use.

Water fill spigot

Helping you to fill any height of bottle, glass or jug easily without spilling.

Microban® anti bacterial filter

This advanced antibacterial air filtration system - developed with Microban®, the market leader in antibacterial solutions - helps to reduce unpleasant odours. Fridge air passes through the high-tech filter, trapping and killing airborne micro-organisms - eliminating potentially harmful bacteria, mould, mildew and smells. More effective than contact systems such as liner or gasket anti-bacterials.

Integrated water filter

The cleverly concealed external water filter removes 99.9% of impurities to deliver fresh tasting, healthier water for drinking or ice. It's easy to replace, in seconds - when you are automatically alerted to the need for a new filter by the change indicator.

Child safety lock

The external controls can be locked to prevent children or guests changing the settings.

Multi flow

Multi flow guarantees that cold air is evenly distributed, ensuring optimal temperature at all height levels of the refrigerator. A controlled fan system added to strategically positioned outlets overcomes natural temperature imbalances and precisely distributes the cold air, concentrating the flow where it's most needed. With multi-flow you can preserve food and beverages at a constant temperature throughout all of the shelves.

Auto defrost

The frost free system prevents the build up of frost in both the fridge and the freezer so no need to manually defrost the fridge or freezer.

Zero degree meat container

The lower crisper container can be changed to a zero degree compartment for longer, safer storage of meat or fish.

Black out alert

If there is a power failure when you are away on holiday the display will advise if the freezer temperature reached an unsafe level and advise if you need to throw away the food.

Freezer lights

Unlike traditional freezers, the freezer section on our models is illuminated to make it easier to see the contents inside.

Full height stainless steel bar handles

External full length Stainless Steel bar handles that are easier to grip. Lasting longer compared to other handle designs, they are also a better match for other kitchen furniture and appliances.

Chef's pantry

This full width 'zone' on the SOV028TB model is ideal for storing cheese, meat and other delicate foods which need to be kept in a finely tuned environment, retaining their full flavour and ready for the chef to cook or serve.

REFRIGERATION

COOL BETTER

The ultimate in refrigeration and design.

With Maytag, refrigeration becomes an art form. The style and scale of our fridge freezers is like no other – with big, bold and beautiful designs, incorporating the most advanced technology and the most helpful, clever and sophisticated features. Fridge freezers that make a statement about you, your aesthetics and your personal lifestyle – becoming a focal point in the kitchen, and the envy of your friends and neighbours. This is refrigeration....taken to a whole new level of design and performance.

* Amercian washing machines requires equal water pressure in both the hot and cold inlet hoses. The water pressure must be between 30 and 120psi. The American tumble dryer requires a 30 amp electrical connection and should be vented into rigid metal ducting due to high temperatures.

We at Maytag are constantly working to make our products better. We therefore reserve the right to change designs or specifications without any notice. E&OE.

Looking after your Maytag appliances

We know you'll always want your beautiful Maytag appliance to look its best. We've made that easy for you, not just with intelligent design that makes cleaning and everyday maintenance simple and straightforward, but also by offering a selection of specialist products. Each one has been carefully chosen and tested by Maytag, and we recommend that you use them for the very best results. Just a few minutes tender loving care every now and then will keep your Maytag machine looking fabulous and operating efficiently for many, many years to come.

Customer Service and Warranty

Maytag offers you a dedicated service, guaranteeing quality personal care and attention, meaning that through our sense of difference in superior service, you can enjoy a perfect sense of serenity.

Fridge Cleaner & Defroster

Fridge cleaner: Eliminates marks and food residues leaving a pleasant lemon smell in the fridge or freezer. Its decontaminating formula helps to fight against the risks of listeria. Code : 481281719455 FCS300

Defroster: Eliminates ice deposits in the fridge and the freezer quickly and easily. Protects the ozone layer. Code: 480181700019

Timestrip®

Timestrip® shows how long food has been kept in the freezer under normal freezing conditions (-18°C), ensuring best quality and freshness. Always handy thanks to its magnetic box which you can keep on the freezer door. 25 stickers. Codes: 480181700017

Microban® Antibacterial Filter

Developed by Maytag together with Microban®, the market leader in antibacterial solutions. 100% of the fridge air passes through this high-tech filter. 2 in 1: no odours, no bacteria. For perfect performance of your refrigerator you need to replace it every 6 months. It can be installed only in Maytag refrigerators that have the appropriate technology. Code: 481248048172 ANTF-MIC

Water Filtration Cartridge for Side by Side Refrigerators

Maytag filter cartridge eliminates impurities and sediments, providing better tasting water and drinks, clearer water and translucent ice cubes. Designed to filter 1500 litres, the cartridge has a duration of about 6 months, after which it can be easily replaced. Code: 481281729632 SBS002

Stainless Steel Cream Cleaner

Cleans, protects and shines all stainless steel surfaces by providing a protective coating, which is also water-resistant. The cream also leaves a pleasant lemon fragrance. Codes: 481281719457 SSC300

Stainless Steel & Glass Polish

Unique aerosol polish to clean and shine all stainless steel surfaces: hobs, cooker hoods, ovens, fridges. Also very effective on glass surfaces. Lemon fragrance. Does not damage the ozone layer. Codes: 481281719461 IWC002

Terra Bianca Universal Cleaner Degreaser

The "Terra Bianca" anti-bacterial and non-abrasive formula cleans, polishes and protects all smooth surfaces: chrome, aluminium, stainless steel, gold, silver, copper, tin, brass, enamel, glass, plastic, etc. It comes with its own double-sided sponge: one soft side (yellow) and one scraper side (blue). Perfectly suited for cleaning and degreasing domestic electrical appliances, tiles, taps, cars, boats, caravans, motorbikes, baths, basins, sinks, furniture, work surface, etc...

3M Microfibre Cleaning Cloth

Ideal for cleaning everything in the house without scratching or leaving marks or fluff: work surfaces, stainless steel surfaces, etc. with or without detergent. Lifts and traps dirt, dust particles and grease. Bleach resistant - even non diluted. Machine washable (60-95°C). Codes: 481281729828 MFC001

Dishwasher Deodorizer

Eliminates unwanted smells from your dishwasher, leaving a pleasant lemon perfume. All the unpleasant smells caused by dirty plates, cutlery, and glasses are eliminated. Separate lemon and grapefruit aroma. Works for 60 washes. Non-toxic product. Code: 481281718847 DWD010

Washing Machine and Dishwasher Descaler

Eliminates limescale deposits. Optimises performance and prolongs the life of the appliances. Formula approved by the professionals and 99% biodegradable. Works for 60 washes. Non-toxic product. Code: 481281719427 DES002

24 Dishwasher Tabs All-in-1

24 dishwasher tabs all-in-1, lemon freshness, water soluble pouch, 100% biodegradable. Excellent cleaning results: De-grease your dishes perfectly without damaging them. Remove even hard to shift deposits. Functions: rinse aid, salt, glass protection, anti limescale, efficient at 40°C & eco programme. Formula tested and recommended by Maytag. Code: 481281719293 TAB002

Dishwasher Degreaser

Eliminates grease and food residues and prevents unpleasant smells in the dishwasher. Formula approved by the professionals and 90% biodegradable. Codes: 481281719431 DDG002

Contact Centre

Answers to all your questions.

The Customer Service Contact Centre gives you direct line access to Maytag's specialised operators for everything you need to know about Maytag appliances and their functions. Practical day-to-day help includes information on our products' functions, Authorised Service Partners and Extended Warranties.

Authorised Service

The quality of authorised service.

Authorised repair centres throughout Europe with all technicians trained by Maytag. You can also be assured that only authentic Maytag spare parts are used and that you will enjoy a prompt response every time you use these facilities.

Extended Warranty

Protected for 10 years.

Maytag offers you the option to extend the product warranty by subscribing to one of the Maytag Extended Warranty offers. During this period you can count on trained Maytag technicians and authentic Maytag spare parts. This additional service provides you with a perfect sense of serenity.
