Bass Cabinet

Ampeg SVT-610HLF 6x10 Bass Cabinet

Your Ampeg SVT-610HLF 6x10 Bass enclosure is a high-quality two-way speaker cabinet suitable for all sizes of venues.

The cabinet features heavy duty recessed handles, an industrial strength grip bar, and heavy duty rear wheels. Skid rails are placed on the back of the enclosure to protect it while loading in and out of venues. (Place a foot against one of the rails when tilting the cabinet back to roll it.)

The Speakon® and 1/4" jacks are wired in parallel, allowing easy daisy chaining from one speaker to another. Each of the jacks may be used as an input or a through connection.

Speakon® connectors are recognized as the standard for professional installations, assuring a secure, permanent connection that won't corrode, vibrate loose or be easily tampered with. The 1/4" jacks are convenient. However, the Speakon® jacks are recommended when using power amplifiers over 150 watts, for permanent installations, or for the "first" speaker among a number of daisy chained speakers.

Speakon® to 1/4" Wiring Diagram:
