CLEAN-THRU™ is scientifically designed and tested to clean and deodorize your garbage disposer. The powerful blue foaming action scrubs away food, grease and odors, cleaning your entire garbage disposer and drain, leaving a pleasant lemon fresh scent. CLEAN-THRU™ is also packed with over 40 billion micro organisms that help break up sludge and solids that build up in septic systems. Waste continually decomposes naturally and safely.

## Instructions

CLEAN-THRU™ is designed for use in properly working disposers.

Start with empty disposer. With disposer off, run a strong stream of hot water into sink for one minute. Reduce hot water to a trickle (not directly into disposer).

### DO NOT OPEN PACKET.

WITH DISPOSER OFF, insert one biodegradable packet completely into disposer. With water still at a trickle, turn on disposer.

(Disposer OFF)

Blue cleaning foam may rise into sink (with double sinks, foam may rise into both sinks). Cleaning action continues as foam retreats into disposer.

Cleaning cycle is complete when cleaning foam entirely disappears from disposer and you hear a swish of water (approx. 3-4 min.). Rinse remaining foam from sink and turn off disposer.
