

# BOAT TRAILER GUIDE PROTECTORS

**PROTECTS BOAT FROM ROUGH TRAILER GUIDES**

**SLIDES OVER EXISTING GUIDE POLES**

**FLOATS UP WITH WATER HEIGHT**

# BOAT TRAILER GUIDE PROTECTORS

Trailer guide protectors will not only help protect your boat but will enhance the looks, too. These closed cell polyurethane foam and nylon covered pads slip over your existing trailer guide poles to protect from scratches and impact.

## QUALITY IMPACT PROTECTION

Most sport and ski boats are equipped with guide poles attached to the rear sides of the trailer. These poles function as a guide device for the boat when taking it on and off the trailer. The Boat Trailer Guide Protectors simply slide on and fit tightly on the existing guide poles. The Boat Trailer Guide Protectors are designed to float up with the water height to help guide you on boat ramps with steep angles.

**Available in 4 sizes and a wide variety of colors!**
