Experimental study of thermal incompatibility of concrete components. Proc. Third Int. *Conf. On the durability of Building Materials and components,* n° 3, Espoo (Helsinki) : August 1984. p 510-520.

WEIGLER H. and FISCHER R. (1972)
Influence of high temperature on strength and deformations of concrete. *ACI special Publication*, 1972, Paper SP 34-26, n° 34, vol 1, p 481-493.

VONK R.A. (1992)
Softening of concrete loaded in compression. PhD Dissertation : Eindhoven University of Technology, The Netherlands, 1992. 163p.

YANG B.L., DAFALIAS Y.F. and HERRMANN L.R. (1985)
A bounding surface plasticity model for concrete. *Int. J. Engng. Mech.*, 1985, vol 111, n° 3, p 359-380.

YAZDANI S. and SCHREYER H.L. (1988)
An anisotropic damage model with dilation for concrete. *Mechs. Mater.*, 1988, vol 7, p 231-244.

ZHUKOV V.V. (1980)
Reasons of explosive sapling of concrete by fire. *Scientific Research Institute for Concrete and Reinforced Concrete - Moscow*, 1980, vol 1, p 1-7.

DOCUMENTS REGLEMENTAIRES - NORMES

CEB-FIP (1993)
Model Code 90. Bulletin d'information/Comité Euro-International du Béton. *Colloquium on the CEB-FIP*, n°217, Lausanne (Suisse) : 1993. 65p.

EUROCODE 4 (1994)
Conception et dimensionnement des structures mixtes acier-béton. *P22-391 -Construction mixte acier-béton - Eurocode 4*. Partie 1-1. AFNOR, Paris : Sept 1994, 204 p.

P92-701 (1993)
Résistance au feu des matériaux et éléments de construction. *Règles de calcul – Méthode de prévision par le calcul du comportement au feu des structures en béton.* AFNOR, Paris : 1993, 42p.

RILEM TC 50 FMC RECOMMANDATION (1985)
Determination of the fracture energy of mortar and concrete by means of three-point bend tests on notched beams. *Materials and Structures, 1985, Vol. 18, n° 106 p 285-290*

RILEM TC 129 MHT RECOMMENDATION (1995)
Test methods for mechanical properties of concrete at high temperatures. Part 3 : Compressive strength for service and accident conditions. *Materials and Structures, 1995, Vol. 28, p 410-414*

RILEM TC 129 MHT RECOMMENDATION (1997a)
Test methods for mechanical properties of concrete at high temperatures. Part 1: Introduction. *Saclay (France): CEA, March 1997, 22p.,Draft n°3,Report to comittee TC 129 MH.*

RILEM TC 129 MHT RECOMMENDATION (1997b)
Test methods for mechanical properties of concrete at high temperatures. Part 6: Thermal strain for service and accident conditions. *London: Imperial College, May 1997, 14p.,.Draft n°11, Report to comittee TC 129 MHT.*

RILEM TC 129 MHT RECOMMENDATION (1997c)
Test methods for mechanical properties of concrete at high temperatures. Part 7: Transient creep for service and accident conditions. *London: Imperial College, March 1997, 13p,.Draft n°9, Report to comittee TC 129 MHT.*
