

# 5" & 8" SKID STEER CHIPPERS

## Turn Your Skid Steer Into A Mobile Workstation

Bear Cat's line of skid steer chippers attach in seconds and are driven solely by your skid steer's hydraulics. They are available in both standard/high flow and high flow models and will make

short work of any troublesome debris. An infinite number of hydraulic feed speeds are available with a simple handle turn.

**Model 74800**

Model	Hydraulics	Feed Opening Size	Chipper Capacity	Feed System	Chipper Disc	Operating Weight (Lbs.)
74500	Standard or high-flow**	5.5"x7"	3"*	hydraulic	20"x1.25" 140 lbs.	1145
74800	High-flow***	9"x9"	5"*	hydraulic	30"x1.25" 275 lbs.	1525

\*Continuous chipping size rating refers to the suggested feeding size of limbs for normal operation

\*\*Standard-flow requires a minimum of 15 gallons per minute (GPM) hydraulic oil flow

\*\*\*High-flow requires a minimum of 25 GPM hydraulic oil flow

The chipper has two mounts, so it can be set to feed in front or to the curb side.

A four-position manual valve easily controls the hydraulic feed roller.

Built-in hydraulic jack makes feed roller maintenance quick and easy.
