Lil' Kawasaki™

Owner's Manual with Assembly Instructions

Please read this manual and save it with your original sale's receipt.

For Model 76921

Tools needed for assembly: Phillips Screwdriver, Hammer, and Slotted Screwdriver (not included).

Use only with a Power Wheels® 6 Volt (4.0 Amp/Hr.) Battery, Power Wheels® 25 Amp Fuse
and Power Wheels® 6 Volt (4.0 Amp/Hr.) Charger (all included).

A

Important Information

- Your new vehicle requires adult assembly. Please set aside at least 45 minutes for assembly.
- You must charge your battery for 18 - 30 hours **before you use your vehicle for the first time**. We recommend that you start charging your battery before beginning assembly. Please see Battery Charging beginning on page 6 for detailed instructions.
- Read this manual carefully for important safety information and operating instructions before using your vehicle. Please keep this manual for future reference as it contains important information.
- This vehicle is designed for use: on grass, asphalt and other hard surfaces; on generally level terrain; and by children 12 - 36 months of age.
- Make sure children know and follow these rules for safe driving and riding:
 - always sit on the seat.
 - always wear shoes.
 - only 1 (one) rider at a time.
- To prevent damaging the motors and gears, do not tow anything behind the vehicle or overload it. Do not exceed the maximum weight capacity of 40 lb. (18 kg).
- If you have any questions about your Power Wheels® vehicle, please call our toll-free service lines at **1-800-348-0751** from 8 AM to 6 PM (EST) Monday through Friday. Trained customer service representatives are available to take your call in English or French. Habla Español? Si usted tiene alguna pregunta ó necesita asistencia llame gratis **1-800-348-0755** para los Estados Unidos. Tenemos representantes que hablan español para atender su llamada.
- For your convenience, Power Wheels® maintains an Authorized Service Center Network with more than 400 authorized service centers nationwide. Our authorized service centers will repair or replace parts under warranty at no extra charge, and can perform non-warranty repairs for a minimal charge. Please see the Authorized Service Center list beginning on page 22 to find the authorized service center nearest you, or call **1-800-348-0751**.
- Please complete and return the enclosed Registration Card today, or call **1-800-348-0751** to register your vehicle by phone.

B

Warnings and Cautions

ELECTRICAL HAZARD

WARNING

- Battery can fall out and injure a child if vehicle tips over. Always use battery clamp.
- **PREVENT FIRE**
 - Do not bypass a Power Wheels® fuse. It is a safety device.
 - Use only a Power Wheels® 25 Amp fuse.
 - Never modify the electrical system. Alterations could cause a fire resulting in serious injury and could also ruin the electrical system.
 - Use of the wrong type battery, fuse or charger could cause a fire or explosion resulting in serious injury.
 - Use of Power Wheels® components in products other than Power Wheels® vehicles could cause overheating, fire or explosion.
- The battery must be handled by adults only. The battery is heavy and contains sulfuric acid (electrolyte). Dropping the battery could result in serious injury.
- Never allow children to charge the battery. Battery charging must be done by adults only. A child could be injured by the electricity involved in charging the battery.
- Never lift or carry the battery by the wires or connector. This can damage the battery and possibly cause a fire resulting in serious injury. Lift and carry the battery by the case only.
- Read the safety instructions on the battery.
- Examine the battery, charger and their connectors for excessive wear or damage each time you charge the battery. If damage or excessive wear is detected, do not use the charger or the battery until you have replaced the worn or damaged part.
- **HOT** motors. Handle carefully.

RIDING HAZARD

WARNING

- **Prevent Injuries and Deaths**
 - Direct Adult Supervision Required
 - Keep Children Within Safe Riding Areas.
These areas must be:
 - away from swimming pools and other bodies of water to prevent drownings
 - generally level to prevent tipovers
 - away from steps, driveways, roads and alleys.

CAUTION

- In the unassembled state, this package contains small parts. Adult assembly is required.
- Use the charger in dry locations only.

C

Parts

- If you experience a problem with this product, or are missing a part, please call us at **1-800-348-0751**, rather than return this product to the store.
- Please identify all parts before assembly and save all packaging material until assembly is complete to ensure that no parts are discarded.
- Metal parts have been coated with a lubricant to protect them during shipment. Wipe all metal parts with a paper towel to remove any excess lubricant.

IMPORTANT! Some parts were placed under the seat for shipment. Unlock the seat lock fastener, using a slotted screwdriver to rotate the lock fastener $\frac{1}{4}$ turn to the unlocked position . Lift the seat to access the battery compartment.

Cap Nut - 4*

Washer - 2

#10 x $\frac{7}{8}$ " Screw - 2

#8 x $\frac{3}{4}$ " Screw - 3

All Shown Actual Size

*For your convenience, an extra cap nut and an extra 25 amp fuse are included.

D

Parts Diagram

IMPORTANT! Some parts were placed under the seat for shipment. Unlock the seat lock fastener, using a slotted screwdriver to rotate the lock fastener $\frac{1}{4}$ turn to the unlocked position \ominus . Lift the seat to access the battery compartment.

Note: Some parts shown are assembled on both sides of the vehicle.

ELECTRICAL HAZARD **WARNING**

- Battery can fall out and injure a child if vehicle tips over. Always use battery clamp.
- **PREVENT FIRE**
 - Do not bypass a Power Wheels® fuse. It is a safety device.
 - Use only a Power Wheels® 25 Amp fuse.
 - Never modify the electrical system. Alterations could cause a fire resulting in serious injury and could also ruin the electrical system.
 - Use of the wrong type battery, fuse or charger could cause a fire or explosion resulting in serious injury.
 - Use of Power Wheels® components in products other than Power Wheels® vehicles could cause overheating, fire or explosion.
- The battery must be handled by adults only. The battery is heavy and contains sulfuric acid (electrolyte). Dropping the battery could result in serious injury.
- Never allow children to charge the battery. Battery charging must be done by adults only. A child could be injured by the electricity involved in charging the battery.
- Never lift or carry the battery by the wires or connector. This can damage the battery and possibly cause a fire resulting in serious injury. Lift and carry the battery by the case only.
- Read the safety instructions on the battery.
- Examine the battery, charger and their connectors for excessive wear or damage each time you charge the battery. If damage or excessive wear is detected, do not use the charger or the battery until you have replaced the worn or damaged part.

 **CAUTION**

Use the charger in dry locations only.

Important Notes

- **Your new battery must be charged for at least 18 hours before you use it in your vehicle for the first time.**
- We recommend that you start charging your battery before beginning assembly of your new vehicle.
- The battery must be upright while charging.
- The charger is not a toy.
- Do not short circuit the battery.
- The battery must be removed from your vehicle for the initial charge in order to complete assembly. You do not need to remove the battery from the vehicle to recharge it.
- Before charging the battery, examine the battery case for cracks and other damage which may cause sulfuric acid (electrolyte) to leak during the charging process. If damage is detected, do not charge the battery or use it in your vehicle. Battery acid is very corrosive and can cause severe damage to surfaces it contacts.
- Do not charge the battery on a surface which could be damaged by the acid contained inside the battery. Take precautions to protect the surface on which you charge your battery.
- Use only a Power Wheels® 6 volt charger (4.0 Amp/Hr.) and 25 amp fuse to charge your Power Wheels® rechargeable 6 volt battery (4.0 Amp/Hr.).
- If your battery is old and will not accept a full charge, do not leave it in the vehicle. Always remove a dead battery from the vehicle.

Battery Charging

IMPORTANT! The battery must be removed from your vehicle for the initial charge in order to complete assembly. You do not need to remove the battery from your vehicle to recharge it.

- Using a Phillips screwdriver, loosen the screws in the battery clamp. Remove the battery clamp from the vehicle body.
- Remove the Power Wheels® 6 Volt (4.0 Amp/Hr.) battery from the battery compartment.

- Insert a 25 amp fuse into the battery.

Note: The top of the fuse will not be flush with the top of the battery when properly installed.

- Plug the charger connector into the battery connector.

- Plug the charger into a standard 120 volt wall outlet.
Note: If power flow to the wall outlet is controlled by a switch, make sure the switch is "ON".
- **Before first time use, charge the battery for at least 18 hours.** Never charge the battery longer than 30 hours.
- Recharge the battery for at least 14 hours after each use of your vehicle. Do not charge the battery longer than 30 hours.
- Once the battery is charged, disconnect the charger connector from the battery connector. Unplug the charger from the wall outlet. The battery is now charged and is ready to be installed in your vehicle. Please see "Battery Installation" on page 14 for detailed battery installation instructions.

F

Assembly

IMPORTANT! Some parts were placed under the seat for shipment. Unlock the seat lock fastener, using a slotted screwdriver to rotate the lock fastener $\frac{1}{4}$ turn to the unlocked position . Lift the seat to access the battery compartment.

WARNING

Children can be harmed by small parts, sharp edges and sharp points in the vehicle's unassembled state, or by electrical items. Care should be taken in unpacking and assembly of the vehicle. Children should not handle parts, including the battery, or help in assembly of the vehicle.

1

- Apply label #13 to the recessed circle on each front wheel, as shown. Please see "Label Decoration" on page 13 for application guidelines.

2

- Turn the front wheels over.
- Fit a wheel bushing into the rectangular opening in each front wheel.

3

- Turn the vehicle body upside down.
- Fit the steering linkage onto the fork on the front of the vehicle body. Make sure the center axle is toward the rear of the vehicle.

4

- Fit a washer onto one end of the front axle.
- Slide the front wheel, bushing side first, onto the front axle.

Assembly

- Slide a round bushing onto the front axle and press it into the center of the front wheel.
- Fit a cap nut onto the end of the front axle.
- Tap the cap nut with a hammer to secure it on the front axle.
- Repeat assembly steps 4 and 5 to assemble the other front wheel to the other side of the front axle.

- Insert the connector end of the handlebar wire harness into the rectangular opening in the handlebar.
- Feed the handlebar wire harness through the handlebar.
- Push firmly on the button end of the handlebar wire harness to snap it into the rectangular opening.

- Turn the handlebar upside down.
- Align the handlebar wire harness with the guides on the underside of the handlebar.
- Push firmly on the handlebar wire harness near each of the guides to secure the wire in the underside of the handlebar.

- Position the handlebar upright.
 - Fit a handgrip onto each end of the handlebar.
- Hint:** If the handgrips are difficult to slide onto the handlebar, moisten the handgrips with warm water before fitting them onto the handlebar.

Assembly

9

- Apply labels #7 and #8 to the handlebar, as shown.

10

- Wipe the steering column with a paper towel to remove any dirt or oils.
- Fit the steering column bushing onto the straight end of the steering column.

11

- Position the vehicle body upright.
- Insert the curved end of the steering column through the rectangular opening in the vehicle body.
- Rotate the steering column bushing $\frac{1}{4}$ turn and fit it into the rectangular opening in the vehicle body.

12

- Turn the vehicle body on its side.
- Insert the curved end of the steering column into the hole in the steering linkage. **Make sure the steering column is positioned between the guides on the underside of the vehicle body.**

10

Assembly

- Position the vehicle body upright.
- While fitting the handlebar onto the end of the steering column, insert the end of the handlebar wire harness through the hole in the front of the vehicle body.
- Fit a cap nut onto the end of the steering column.
- Tap the cap nut with a hammer to secure it on the end of the steering column.

- Turn the vehicle body on its side.
- Fit a cap nut on the end of the steering column.
- Tap the cap nut with a hammer to secure it on the end of the steering column.

- Insert the wire connector on the main wire harness through the large opening in the center of the vehicle body.
- Plug the main wire harness connector and the handlebar wire harness connector together.

- Position the vehicle body upright.
- Fit the front tabs on the grille into the slots in the front of the vehicle body **A**. Press firmly to snap the front tabs into the slots.
- Press firmly on the middle of the grille to snap the middle tabs into the slots **B**.
- Press firmly near the back of the grille to snap the back tabs into the slots **C**.

Assembly

- Fit the footrest to the peg on the underside of the vehicle body.

- Insert three #8 x 3/4" screws through the battery compartment in the vehicle body and into the footrest.

Note: If you have already charged your Power Wheels® 6 Volt (4.0 Amp/Hr.) battery for at least 18 hours, you may want to install it in the battery compartment before assembling the seat to your vehicle. Please refer to the Battery Installation section beginning on page 14 for instructions.

- Insert the tabs on the front of the seat into the slots in the vehicle body.
- Press down on the back of the seat to snap the tabs on the back of the seat into the slots in the vehicle body.
- Using a slotted screwdriver turn the lock fastener a quarter turn to lock seat into place.
- Once the seat is assembled to the vehicle body, use a slotted screwdriver to rotate the lock fastener 1/4 turn to the locked position (Ⓢ).
- To unlock the lock fastener, use a slotted screwdriver to rotate the lock fastener 1/4 turn to the unlocked position (Ⓢ).

IMPORTANT! Remember to keep the lock fastener locked at all times to prevent children from accessing the vehicle battery.

G

Label Decoration

Proper label application will help to keep the labels looking their best! When applying labels, keep the following guidelines in mind:

- Wash your hands before applying the labels.
- Before applying the labels, wipe the surface of the vehicle with a clean, dry cloth to remove any dust or oils.
- Place the labels exactly as shown in the illustrations.
- For best results, avoid repositioning a label once it has been applied to the vehicle.
- **After applying a label, rub the label firmly with a clean, dry cloth to make sure the label is adhered to your vehicle. Start at the center of a label, and smooth towards the outer edges to remove air bubbles.**

H

Battery Installation

IMPORTANT! Use only a Power Wheels® 6 Volt (4.0 Amp/Hr.) battery with a Power Wheels® 25 amp fuse installed. Use of any other battery or fuse will damage your vehicle. Make sure that you charge the battery for at least 18 hours using the enclosed Power Wheels® 6 Volt charger before operating your vehicle for the first time. Charge the battery for at least 14 hours after each use of the vehicle. Never charge the battery longer than 30 hours. Failure to follow these instructions may damage your battery and will void your warranty.

- To unlock the lock fastener, use a slotted screwdriver to rotate the lock fastener $\frac{1}{4}$ turn to the unlocked position .
- Push firmly on one of the back fenders while pulling up on the same side of the back of the seat to release the tab on the seat from the slot in the vehicle body.
- Repeat this procedure on the other side of the seat.
- Lift the seat to remove it from the vehicle body.

- Using a Phillips screwdriver, loosen the screws in the battery clamp. Remove the battery clamp from the vehicle body.
- Place the Power Wheels® 6 Volt (4.0 Amp/Hr.) battery upright in the battery compartment. Make sure the battery connector extends toward the rear of the vehicle.
- Make sure a Power Wheels® 25 amp fuse, in good condition, is installed in the battery.

- Position the battery clamp over the battery with the ends of the battery clamp aligned with the screw holes in the vehicle body.
- Insert two #10 x $\frac{7}{8}$ " screws through the ends of the battery clamp and into the vehicle body.
- Tighten the screws with a Phillips screwdriver. Do not over-tighten.

- Plug the battery connector into the motor harness connector.

Note: If the battery connector will not plug into the motor harness connector, turn it over and try again! Do not force the battery connector into the motor harness connector.

- Re-assemble the seat to the vehicle body. (See assembly step 19 on page 12.)

IMPORTANT! Always remember to keep the lock fastener locked at all times to prevent children from accessing the battery.

I Battery Care and Disposal

Battery Care and Disposal

Care

If a battery leak develops, avoid contact with the leaking acid and place the damaged battery in a plastic bag. See information below for proper disposal.

If acid comes in contact with skin or eyes, flush with cool water for at least 15 minutes and call a physician.

If acid is internally ingested, give water, milk of magnesia or egg whites immediately. Never give emetics or induce vomiting. Call a physician.

- Charge a new battery for at least 18 hours before first use. Never charge the battery longer than 30 hours. Overcharging or undercharging the battery may shorten battery life and decrease vehicle running time.
- After the first charge, recharge the battery for at least 14 hours after each use. Never charge the battery longer than 30 hours. Charge the battery after each use, regardless of how long the vehicle was used.
- The battery must be upright while charging.
- Do not allow the battery to run down completely before charging.
- Charge the battery before storing the vehicle.
- Charge the battery at least once per month, even if the vehicle has not been used.
- Leaving the battery in a discharged condition will ruin it.
- Always remove an exhausted battery from the vehicle. Battery leakage and corrosion can damage the vehicle.
- Do not store the battery on a surface which could be damaged by the acid contained inside the battery. Take precautions to protect the surface on which you store the battery.
- Do not store the battery in temperatures above 75° F or below -10° F.
- Prevent the battery from moving freely inside the battery compartment. **Always use the battery clamp to secure the battery in the battery compartment.**
- Examine the battery, charger and their connectors for excessive wear or damage each time you charge the battery. If damage is detected, do not use the charger or the battery until you have replaced the worn or damaged part.

Disposal

- Your Power Wheels® battery is a sealed lead-acid battery. It must be recycled or disposed of in an environmentally sound manner.
- Do not dispose of a lead-acid battery in your regular, household trash. The incineration, landfilling or mixing of sealed lead-acid batteries with household trash is prohibited by law in most areas.
- Return exhausted batteries to a federal or state approved lead-acid battery recycler, such as a Power Wheels® authorized service center, or a local seller of automotive batteries. For the service center location nearest you, please call 1-800-348-0751. Contact your local waste management officials for other information regarding the environmentally sound collection, recycling and disposal of lead-acid batteries. If you live in the State of Florida or Minnesota, it is prohibited by law for anyone to throw away lead-acid batteries in the municipal waste stream.

J

Caring For Your Vehicle

- Check all screws, cap nuts and their protective coverings regularly and tighten as required. Check plastic parts on a regular basis for cracks or broken pieces.
- During snowy or rainy weather, the vehicle should be stored inside or under a protective cover. Remember to charge the battery at least once per month while your vehicle is not in regular use.
- Avoid operating the vehicle in wet or snowy conditions, and do not spray the vehicle with a hose. Do not wash the vehicle with soap and water. Water or moisture in the motors or electrical switches can cause them to corrode, and could cause switch or motor failure.
- Avoid operating the vehicle on sand, loose dirt or gravel. Sand, loose dirt or gravel in the motors or electrical switches can cause them to jam, and could cause switch or motor failure.
- The vehicle can be wiped with a soft, dry cloth. For a shiny finish, you can wipe plastic parts with a non-wax furniture polish applied to a soft-cloth. Do not use automotive wax. Do not use soap and water or spray the vehicle with a hose.
- To ensure that your vehicle stays in good operating order, we recommend that you periodically have your vehicle checked by a Power Wheels® authorized service center. See page 22 for the list of authorized service centers or call **1-800-348-0751** for the location of the authorized service center nearest you.

RIDING HAZARD

WARNING

Prevent Injuries and Deaths

- Direct Adult Supervision Required
- Keep Children Within Safe Riding Areas

These areas must be:

- away from swimming pools and other bodies of water to prevent drownings
- generally level to prevent tipovers
- away from steps, driveways, roads and alleys.

Teach Safety Rules to Children

While children can quickly develop the skill necessary to drive this vehicle, it is important to remember that their judgment skills are still very immature. Unsupervised driving by children can lead to serious injury. Before children use this vehicle, an adult should carefully evaluate the driving area as well as the children's skill level and ability to drive this vehicle safely. Children are not always able to recognize or anticipate hazards, even when they have been taught about them. **THERE IS NO ACCEPTABLE SUBSTITUTE FOR DIRECT ADULT SUPERVISION.**

Teach appropriate safety rules to your child before allowing operation of this vehicle. These rules should also be reviewed with neighborhood children or other playmates who want to drive this vehicle.

Riding Rules

Make sure children know and follow these rules for safe driving:

1. Always sit on the seat.
2. Always wear shoes.
3. Only 1 (one) rider at a time. A child who is not sitting on the seat or who is standing on the vehicle could fall off, cause a tip-over or block the driver's view. A child could be seriously injured.
4. Do not allow any child to drive the vehicle in the street or near moving (motorized) vehicles.
5. Do not allow any child to drive near bodies of water (such as pools or creeks), obstructions (such as furniture, low tree limbs or play equipment), or drop-offs (such as stairs or decks).
6. Do not allow any child to drive the vehicle in the dark. A child could encounter unexpected obstacles and have an accident. Operate the vehicle only in the daytime or a well-lit area.

Use vehicle on generally level ground ONLY!

7. Do not allow your child to drive on sloped or inclined surfaces. **Restrict your child's driving to generally level ground ONLY!**
8. Do not allow your child to drive down or across a steep slope.
 - The vehicle may gain unsafe speed, even if the button is released to stop.
 - The vehicle may tilt and tip over.
 - The wheels could lose traction, causing the vehicle to slip.
9. Do not allow your child to drive up steep inclines. The motor may stop and the vehicle could roll backwards at an unsafe speed.
10. Never put anything near any moving parts. Rotating parts such as motors, gear boxes and wheels can snag fingers, hair, etc., causing serious injury. Do not allow operation of the vehicle when it is on its side or in an upside-down position.
11. Do not operate the vehicle near flammable vapors (gasoline, paint thinner, acetone, liquid wax, etc.). The vehicle's electrical switches, like most electrical switches, emit an internal spark when first turned on or turned off. The presence of flammable liquids or vapors could cause an explosion or a fire. Keep all flammable products in tightly sealed containers and away from the vehicle.
12. Do not allow a child to operate the vehicle without direct adult supervision. To prevent unsupervised use of the vehicle, disconnect the motor harness from the battery when the vehicle is not in use.

L

How to Operate Your Vehicle

Your vehicle can be used either as a motorized vehicle or as a free-wheeling foot-to-floor vehicle. It has been pre-assembled at the factory for free-wheeling fun and converts easily for use as a motorized vehicle simply by switching the selector lever located under the seat.

Motorized Use

- Remove the seat.
- Press the handlebar button and **at the same time** switch the selector lever to the MOTORIZED position.
- Re-assemble the seat.
- Follow the instructions for "Motorized Use" on this page.

Motorized Use

- Seat your child on the vehicle, with both hands on the handgrips and both feet on the footrests.
- Press the handlebar button. The vehicle moves forward at a maximum of 2 mph.
- Help your child practice steering to learn how far and how quickly to turn the handlebar.

Free-Wheeling Fun!

- Remove the seat.
- Bend the tab on the motor cover toward the front of the vehicle while switching the selector lever to the FREE-WHEEL position.
- Re-assemble the seat.
- Seat your child on the vehicle with both hands on the handgrips and watch your child go!

M

Problems and Solutions Guide

IMPORTANT! If you experience a problem with your vehicle, first check the Problems and Solutions Guide below. If you still experience a problem, please contact Power Wheels® Consumer Relations, toll-free at **1-800-348-0751** between 8 AM and 6 PM (EST) Monday through Friday. Or, contact your local Power Wheels® authorized service center. For the location nearest you, please refer to the Authorized Service Center list beginning on page 22.

Problem	Possible Cause	Solution
Vehicle does not run	Undercharged battery	Charge the battery. A new battery should have been charged for at least 18 hours before using the vehicle for the first time. After first-time use, recharge the battery for at least 14 hours after each use. Never charge the battery longer than 30 hours.
		Check all connectors. Make sure the battery connector is tightly plugged into the charger connector, and that the charger is plugged into the wall.
		Make sure power flow to the wall outlet is "ON".
	Charger is not working	There is no sure way to tell if your charger is working unless you have a volt meter. If you suspect there is a problem with your charger, contact your local Power Wheels® authorized service center. They can test your charger for you.
	Wrong type or improperly installed fuse	Make sure that the battery has a properly installed Power Wheels® 25 amp fuse before charging. Do not substitute parts.
	Blown fuse	Make sure that the fuse in the battery is in good condition. Replace a blown fuse with a Power Wheels® 25 amp fuse. Do not substitute parts.
	Loose wire or loose connectors	Check all wires and connectors. Make sure the battery connector is tightly plugged into the motor harness connector, and that there are no loose wires around the motor.
	Dead battery	If your battery is old or if you have not followed Battery Care instructions, your battery may be dead. If you are unsure whether or not the battery is dead, you can have it tested at your local Power Wheels® Authorized Service Center.
	Electrical switch damage	The electrical switches can become corroded due to exposure to water or moisture, or can jam due to loose dirt, sand or gravel. Contact your local Power Wheels® Authorized Service Center for diagnosis and repair.
Motor damage	Contact your local Power Wheels® Authorized Service Center for diagnosis and repair.	
Selector lever in FREEWHEEL position	Make sure the selector lever under the seat is set to the MOTORIZED position.	
Vehicle was running but suddenly stopped	Loose wire or loose connectors	Check all wires and connectors. Make sure the battery connector is tightly plugged into the motor harness connector, and that there are no loose wires around the motor.
	Wrong type or improperly installed fuse	Make sure that the battery has a properly installed Power Wheels® 25 amp fuse installed before charging. Do not substitute parts.
	Blown fuse	Make sure that the fuse in the battery is in good condition. Replace a blown fuse with a Power Wheels® 25 amp fuse. Do not substitute parts.

Problems and Solutions Guide

Problem	Possible Cause	Solution
Vehicle was running but suddenly stopped (cont.)	Vehicle is overloaded	Make sure you do not overload the vehicle by allowing more than 1 rider at one time, by exceeding the 40 lbs. (18 kg) maximum weight capacity, or by towing objects behind the vehicle.
	Driving conditions are too stressful	Use only on generally level ground. Extreme temperatures can also affect run time.
Short run time	Undercharged battery	Charge the battery. A new battery should have been charged for at least 18 hours before using the vehicle for the first time. After first-time use, recharge the battery for at least 14 hours after each use. Never charge the battery longer than 30 hours.
		Check all wires and connectors. Make sure the battery connector is tightly plugged into the charger connector, and that the charger is plugged into the wall.
		Make sure power flow to the wall outlet is "ON".
	Overcharged battery	Do not charge the battery longer than 30 hours. If you suspect that your battery is damaged as a result of overcharging, contact your local Power Wheels® Authorized Service Center. They can test your battery for you.
	Battery is old and will not accept full charge	Even with proper care, a rechargeable battery does not last forever. Average battery life is 1 to 3 years depending on vehicle use and use conditions. Do not substitute parts.
	Wrong type or improperly installed fuse	Make sure that the battery has a properly installed Power Wheels® 25 amp fuse before charging. Do not substitute parts.
	Driving conditions are too stressful	Use only on generally level ground. Extreme temperatures can also affect run time.
Vehicle runs sluggishly	Undercharged battery	Charge the battery. A new battery should have been charged for at least 18 hours before using the vehicle for the first time. After first-time use, recharge the battery for at least 14 hours after each use. Never charge the battery longer than 30 hours.
		Check all connectors. Make sure the battery connector is tightly plugged into the charger connector, and that the charger is plugged into the wall.
		Make sure power flow to the wall outlet is "ON".
	Battery needs charging	Be sure to charge the battery after each use.
	Wrong type or improperly installed fuse	Make sure that the battery has a properly installed Power Wheels® 25 amp fuse installed before charging. Do not substitute parts.
	Battery is old and will not accept full charge	Even with proper care, a rechargeable battery does not last forever. Average battery life is 1 to 3 years depending on the vehicle use and use conditions. Replace the battery with a Power Wheels® 6 Volt (4 Amp/hr.) battery. Do not substitute parts.
	Vehicle is overloaded	Make sure you do not overload the vehicle by allowing more than 1 rider at one time, exceeding the 40 lbs. (18 kg) maximum weight capacity, or by towing objects behind the vehicle.
	Driving conditions are too stressful	Use only on generally level ground. Extreme temperatures can also affect run time.

Problems and Solutions Guide

Problem	Possible Cause	Solution
Sometimes the vehicle doesn't run, but other times it does	Loose wire or connector	Check all wires around the motor and all connectors to make sure they are tight.
	Motor or electrical switch damage	Contact your local Power Wheels® Authorized Service Center for diagnosis and repair.
When the handlebar button is pressed, the vehicle won't run without a push	Loose wire or connector	Check all wires around the motor and all connectors to make sure they are tight.
	"Dead Spot" on motor	Contact your local Power Wheels® Authorized Service Center for diagnosis and repair.
Vehicle constantly blows fuses	Wrong type of fuse used	Your vehicle requires a Power Wheels® 25 amp fuse in the battery. Make sure the Power Wheels® 25 amp fuse is properly installed in the battery. Do not substitute parts.
Loud clacking or grinding noise from motor-gearbox	Broken gears	Contact your local Power Wheels® Authorized Service Center for diagnosis and repair.
Charger gets warm during use	It is normal for some chargers to get warm during use and is not reason for concern. Some chargers do not get warm during use.	No action required.
		If your charger does not get warm during use, it does not mean that it is not working properly.
Battery makes a sizzling or gurgling noise when charging	It is normal for some batteries to make noise and swell slightly while charging and is not reason for concern. Some batteries do not make noise or swell while charging.	No action required.
		If your battery does not make noise or swell slightly during charging, it does not mean that it is not accepting the charge.

If, after reviewing the Problems and Solutions Guide, the vehicle still fails to operate, please contact your nearest Authorized Service Center (see page 22) or contact Power Wheels® Consumer Relations toll-free at **1-800-348-0751**.

Hint: For faster service when calling Consumer Relations, completely charge the battery before calling and have the following available by the phone:

- vehicle,
- vehicle model number (see sticker on underside of vehicle body),
- vehicle production run number (see sticker on underside of vehicle body),
- Phillips screwdriver, slotted screwdriver and needle-nose pliers with plastic or rubber handles,
- an extra Power Wheels® 25 amp fuse is helpful.

N

Bumper-to-Bumper* Limited Warranty

***One year limited warranty from the date of purchase on the Power Wheels® vehicle.**

Six month limited warranty on 6 volt battery.

For the original purchaser, this one year limited warranty covers the Power Wheels® ride-on vehicle (purchased from Power Wheels®) against defects in materials and workmanship. The six month limited warranty applies only to the 6 volt battery included by Power Wheels® with the original purchase of the vehicle.

This warranty covers normal use and does not cover the Power Wheels® vehicle or battery if it has been damaged by unreasonable use, neglect, accident, abuse, misuse, improper service or other causes not arising out of defects in materials or workmanship. Evidence of any attempt at consumer repair will void this warranty.

THIS WARRANTY DOES NOT COVER, AND IS INTENDED TO EXCLUDE, ANY LIABILITY ON THE PART OF POWER WHEELS®, WHETHER UNDER THIS WARRANTY OR IMPLIED BY LAW, FOR ANY INDIRECT OR CONSEQUENTIAL DAMAGES FOR BREACH OF WARRANTY. SOME STATES DO NOT ALLOW THE EXCLUSION OR LIMITATION, SO THIS LIMITATION MAY NOT APPLY TO YOU.

Should you need service or assistance with your vehicle during the warranty period, **do not return the vehicle to the store.** Power Wheels® has provided a nationwide network of authorized service centers. Please refer to the list in this manual. Power Wheels® is continually expanding our Authorized Service Center Network. If there is not an authorized service center in your area, please call Consumer Relations for information, **1-800-348-0751**.

THIS WARRANTY GIVES YOU SPECIFIC LEGAL RIGHTS, AND YOU MAY ALSO HAVE OTHER RIGHTS WHICH MAY VARY FROM STATE TO STATE.

PLEASE SAVE YOUR ORIGINAL SALES RECEIPT.

Authorized Service Centers

We are continually expanding our Authorized Service Center Network. Please check this listing for the Authorized Service Center nearest you. If there is not one in your area, please call Power Wheels® Consumer Relations at 1-800-348-0751.

IMPORTANT!

DO NOT use this vehicle for the first time until you have charged the battery for 18 hours.

Remember to...

- ✓ Insert a 25 amp fuse (included) into the battery.
- ✓ Charge the battery immediately after each use.
- ✓ Charge the battery once a month during storage, even if the vehicle has not been used.

Failure to follow these instructions will permanently damage your battery and void your warranty. Please refer to the Battery Care Section in this manual for more information.

DO NOT Return your Vehicle to the Store !

If you are missing parts or need assistance, please call us toll-free:
