MODEL H6016 CONTROLS

- A. **INPUT:** Connect your guitar here, using a shielded instrument cable with a 1/4" jack.
- B. **VOLUME:** This knob controls the overall volume of the amplifier.
- C. **ACTIVE PARAMETRIC EQUALIZATION:** This 3 band EQ features Low and High frequency shelving EQ filters along with a sweepable mid-frequency network that is adjustable to help reduce feedback. The midrange gain control, when turned toward the "-" direction, operates as a variable frequency notch filter.
- D. **LINE OUTPUT:** A line level output is provided for sending a signal from the pre-amp section to a mixing console for live performance or recording purposes.
- E. **POWER LED:** The power LED illuminates when the power is ON.
- F. **POWER SWITCH:** Turns power ON and OFF.

Caring For Your Amplifier

- DO NOT remove the grounding prong to fit the plug into a two-pronged outlet!
- To keep the amplifier working properly, DO NOT expose it to rain or moisture.
- DO NOT pull or lift the amplifier by the power cord.
- UNPLUG the amplifier before cleaning, and only clean with a damp cloth (no chemicals).
