Model No: EZFF-240, -240TS

***Versatile & Portable...
Keeps cooked
food fresh, hot &
appetizing anywhere.***

Model EZFF-240

Standard Features

- Patented EZ-Insert infra-red tubes
- On/off switch with Pilot Light
- 6-foot cordset
- Models with "TS" suffix feature a Thermal Shelf base

Description

Merco® Portable Food Warmers are manufactured from specially selected aluminum and stainless steel alloys for durability and easy cleaning. Merco's patented EZ-Insert infrared heat tubes offer simple snap-in replacement and produce a wide, even heat pattern for thorough yet gentle warming. The versatile, portable design gives you convenient warming whenever you need it. EZFF-240 and EZFF-240TS models are open on one end for easy access to food. Models with the "TS" suffix feature an insulated heat cable Thermal Shelf base to provide gentle bottom warming. Metal sheath tubes are available at no additional charge. A 6-foot cord set is provided for portability and easy hook up.

Merco® portable Food Warmers will keep cooked food at peak flavor without continued cooking or drying. They make an efficient addition to any food service operation.

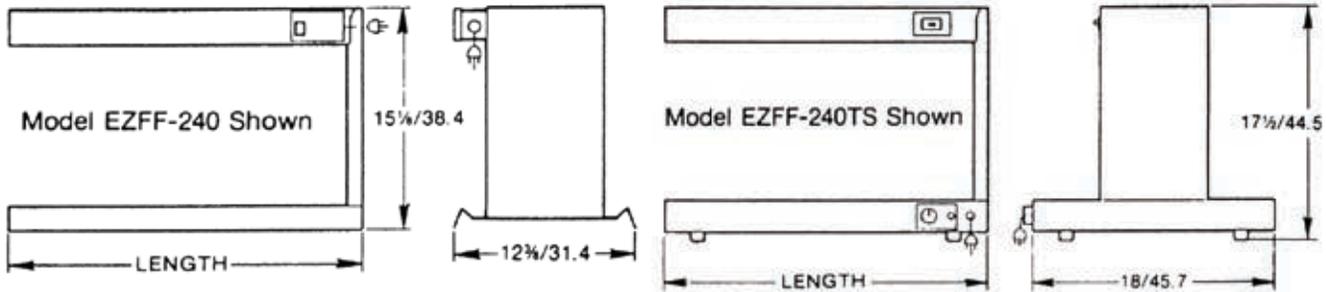

Electrical Requirements

All models are available in 120, 208, or 240 Volts, single phase AC only. If optional incandescent lighting is specified, add 40 watts per linear foot and voltages will be 120, 120/208 and 120/240 VAC.

Portable Food Warmers

Model No: EZFF-240, -240TS

Dimensions (inches/cm)

Bid Specifications for Portable Food Warmers

The Portable Food Warmer shall be Merco® model _____ rated at _____ watts, _____ volts, single phase AC.

Standard equipment shall include:
