Getting the best from your new rice cooker...

- *Do not keep food warm for longer than two hours*
- *Do not lift the lid during the keep warm period*
- *Rice must be thoroughly washed before using*
- *During cooking, certain varieties of rice may cause a build up of steam within the cooker, resulting in some spitting from the vent and under the lid*
- *On removing the rice from the inner bowl, a small amount of golden coloured rice may be noted on the base of the bowl. This is normal, allow the bowl to cool, fill with warm soapy water and allow to soak which will loosen the rice and make cleaning easier*

The use of any electrical appliance requires the following common sense safety rules.

Primarily there is danger of injury or death and secondly the danger of damage to the appliance. These are indicated in the text by the following two conventions:

WARNING: Danger to the person!

IMPORTANT: Damage to the appliance!

In addition, we offer the following safety advice.

Personal Safety

- Do not touch hot surfaces. Use oven gloves or a cloth when removing lid or handling hot containers as hot steam will escape.
- To protect against fire, electric shock and personal injury, do not immerse cord, plugs, or appliance in water or other liquid.
- Unplug from the socket when not in use, before putting on or taking off attachments, and before cleaning.
- Do not operate any appliance with a damaged lead or plug, or after an appliance has malfunctioned, or has been dropped or damaged in any way. Contact Morphy Richards for advice on examination, repair, or electrical or mechanical adjustment.
- This appliance is not intended for use by persons (including children) with reduced physical, sensory or mental capabilities, or lack of experience and knowledge, unless they have been given supervision or instruction concerning use of the appliance by a person responsible for their safety.

- Always use heat resistant gloves to remove the inner bowl and lid from the cooker.

Location

- Ensure that this appliance is situated out of the reach of children.
- Do not place directly under kitchen wall cupboards when in use as it produces large amounts of steam. Avoid reaching over the steamer when in use.
- Do not use outdoors.

Mains Lead

- The mains lead should reach from the socket to the base unit without straining the connections.
- Do not let the cord hang over the edge of the table or the counter and keep it away from any hot surfaces.
- Do not let the lead run across an open space e.g. between a low socket and table.

Children

- Never allow a child to operate this appliance.
- Children are vulnerable in the kitchen, particularly when unsupervised and if appliances are being used or cooking is being carried out.
- Teach children to be aware of dangers in the kitchen, warn them of the dangers of reaching up to areas where they cannot see properly or should not be reaching.
- Children should be supervised to ensure that they do not play with the appliance.

Other safety considerations

- Do not reheat cooked rice in the cooker.

- The use of attachments or tools not recommended by Morphy Richards may cause fire, electric shock or injury.

- Extreme caution must be used when moving the cooker when it contains hot food, water, or other hot liquids.

- To open, lift the lid off towards yourself but tilted away from you.

- Do not use any parts of this product in a microwave or on any cooking/heated surfaces.

- Do not place on or near a hot gas or electric burner, or in a heated oven.

- Do not wash rice in the pot as it may deform and will affect the cooking process.

- Never use the cooker to boil acid or alkaline foodstuff. Do not leave it in a damp or corrosive environment.

- The use of sharp implements inside the bowl may damage the non-stick coating.

ELECTRICAL REQUIREMENTS

Check that the voltage on the rating plate of your appliance corresponds with your house electricity supply which must be A.C. (Alternating current).

If the socket outlets in your home are not suitable for the plug supplied with this appliance, the plug should be removed and the appropriate one fitted.

WARNING: The plug removed from the mains lead, if severed, must be destroyed, as a plug with a bared flexible cord is hazardous if engaged into a live socket outlet.

Should the fuse in the 13 amp plug require changing, a 13 amp BS1362 fuse must be fitted.

WARNING: This appliance must be earthed.

OPERATION

Before first use

Before using your cooker for the first time, wash and dry the bowl and lid.

Assembly

Assemble as shown **A**.

- Be sure to keep the space between the pot and the heating plate clean and free of water drops, dust, rice grains or any other foreign matter. If not, the cooker's performance will be affected and the element could possibly burn out.
- Do not slant the pot, otherwise it's bottom will not be in full contact with the heating plate and the element may burn out.
- Do not switch the power on until ready to cook.

Cooking rice

- 1 Use the measuring beaker provided to measure the rice, filling level to the top. As a guide, one cup of rice is sufficient for one person, but this will vary according to individual taste.

- 2 Thoroughly wash the rice in several changes of water and drain. Failure to do so may cause poor results and/or a build-up of steam within the cooker. Do not wash the rice in the inner bowl as it may be damaged.
- 3 Transfer the rice to the inner bowl and level the surface. The markings on the inside of the bowl are for measuring the amount of water and are given in litres and cups. Add cold water to the corresponding level marked on the inside of the bowl. For example, to cook 6 cups of rice, place the washed rice into the inner bowl and then fill with water up to the six cup level.
- 4 Place the inner bowl in the cooker, ensuring that there is no rice or any moisture on the outside of the bowl.
- 5 Cover with the lid, ensuring that the vent hole in the lid is situated away from you.
- 6 Plug the cooker into the power supply. The amber pilot will light up.
- 7 Press down the switch and the cooker will start. The blue light will come on and the amber light will go off.

Note: During cooking, it is normal for the lid to rise up slightly and water to bubble around the edge.
- 8 The cooker knows when the food is done by measuring temperature and weight. When the food is done, the main heater will turn off automatically and the cooker will switch into 'keep warm'. The blue light will go out and the amber light will go on to indicate keep warm.

- Minimum capacity is 4 cups, maximum is 10 cups.
- Never fill with water straight from the tap, use the measuring beaker.

IMPORTANT: Do not fill above the top level indicated.

9 Food left to keep warm should not be allowed to dry out and should be stirred occasionally, otherwise it may burn and stick to the bowl. Never leave the cooker on keep warm for more than two hours.

10 Carefully lift the lid and allow any condensation to drip into the cooker. Use the spatula to fluff up the rice. Replace the lid as quickly as possible. Consume the stirred rice within 1 hour. Small quantities (3 to 4 cups) should be consumed immediately.

11 Switch off at the mains and unplug the mains cable. Remove the bowl to serve the food.

- Never take the bowl out of the cooker when it is filled with water.
- We do not recommend cooking packet type savoury rice.

Cooking pasta

1 Use the measuring beaker provided to measure the pasta, filling level to the top. As a guide, 2 or 3 cups of pasta is sufficient for one person, but this will vary according to individual taste.

2 For best results when cooking pasta, fit the special pasta pad **B**.

3 Transfer the pasta to the inner bowl and level the surface. The markings on the inside of the bowl are for measuring the amount of water and are given in litres and cups. Add water to the corresponding level marked on the inside of the bowl. For example, to cook 6 cups of pasta, place the pasta into the inner bowl and then fill with water up to the six cup level.

- Minimum capacity is 4 cups, maximum is 10 cups.
- Never fill with water straight from the tap, use the measuring beaker.

IMPORTANT: Do not fill above the top level indicated.

- 4** Place the inner bowl in the cooker, ensuring that there is no pasta or any moisture on the outside of the bowl.
- 5** Cover with the lid, ensuring that the vent hole in the lid is situated away from you.
- 6** Plug the cooker into the power supply. The amber pilot light will light up.
- 7** Press down the switch and the cooker will start. The blue light will come on and the amber light will go off.

Note: During cooking, it is normal for the lid to rise up slightly and water to bubble around the edge.

8 For all types of pasta, we recommend that you follow the cooking time on the packet plus a further 10 minutes. At the end of the cooking time, you can switch the cooker to 'keep warm' if required. The blue light will go out and the amber light will go on to indicate keep warm.

9 Carefully lift the lid and allow any condensation to drip into the cooker. Use the spatula to stir the pasta which is then ready to eat. Replace the lid as quickly as possible if leaving on keep warm. Consume the pasta within 1 hour.

10 Switch off at the mains and unplug the mains cable. Remove the bowl to serve the food.

- Never take the bowl out of the cooker when it is filled with water.

Tips for best cooking results

- Make sure that the rice and pasta is spread over the whole surface of the bowl to ensure even cooking.
- You may find that for your own personal taste, you need to slightly adjust the amount of water added. For a softer rice or pasta, add a little more water; and for a firmer rice or pasta, a little less water.
- The cooking times may vary according to the quantity and type of rice or pasta cooked.
- A thin crust of rice may form on the base, particularly when cooking Italian or easy-cook type rice, or when cooking smaller quantities. Wiping half a teaspoon of oil over the base may help reduce this forming, but this occurrence is not always preventable.

Before cleaning and maintenance, switch the appliance off and unplug it.

- Wash the bowl and lid in warm soapy water and dry well.
- Wipe the main unit with a damp cloth. Do not use any abrasive or solvent-based cleaner.
- If food has stuck to the bottom of the bowl, allow to soak for a while before washing it.
- Do not immerse the main unit in water, nor pour water into it, only the inner bowl may be immersed in water.
- Ensure the area between the main unit and inner bowl is always clean and free from any rice or pasta particles etc. This is important to ensure proper contact between the two.

IMPORTANT: The brown marks and scratches that may appear after many hours of use are not a problem. We guarantee that the non-stick coating complies with the standards and regulations on materials suitable for contact with food.

Taking care of the bowl
