

## PR-D15

### FM-Stereo RDS (RBDS) / AM Digital Tuning Portable Receiver

Color

Gray

Built on the chassis of the extremely popular PR-D5, the PR-D15 continues Sangean's commitment to building radio's to high quality manufacturing standards complete with excellent sound performance, to provide ultimate portability in one light, yet elegantly designed and powerful radio. Whether in your home, outside in your back-yard or for time at the beach, the versatility and performance of the PR-D15 makes it the best AM / FM digital radio on the market, second to none.

#### LCD Display with Radio Broadcast Data System (RBDS (US) / RDS (Europe) and Battery Power Indicator.

An easy-to-read LCD display shows you text with not only the station ID and time, but also the song name and artist. The segment-style LCD screen is backlit which makes it visible even across a room when lit.

#### Convenient Radio Functions

The DSP Tuning System provides exact, fade-free FM reception, while a 200mm Ferrite AM antenna bar allows exceptionally strong AM reception, providing you the best AM reception you have ever heard. Ten Memory Presets for 5 AM or 5 FM station selection are available and you can fill your presets using Auto Seek, which finds your active stations automatically through electronic tune control.

#### Tone control (Bass & Treble)

Provides quick easy adjustment if listening to either music or talk radio. Gives the ability to achieve best voice clarity, especially when using AM radio.

#### Outstanding Audio Performance

With dual 2.5" special stereo speakers the PR-D15 is an extremely powerful and loud radio built into a light and portable package.

#### Alarm by Radio or Humane Wake-Up System (HWS) Buzzer.

Wake to your favorite choice of FM / AM station or--if you must--a classic buzzer alarm. The HWS Buzzer is a gradual alarm feature that gently raises the alarm volume, so it's not too jarring or abrupt.

#### Advanced Technology for ECO Design

The PR-D15 has the unique distinction of operating on Ni/MH, or standard "C" size alkaline batteries. While the unit is plugged in and not utilizing the rechargeable batteries; it recharges the batteries as long as you leave the switch into the rechargeable Ni/MH position.

#### Loudness On/ Off

If listening to the PR-D15 in an office setting, at home or in any location where it is at a lower volume level, the PR-D15 can compensate the bass (lower frequencies) and treble (higher frequencies) providing a rich sound quality.

#### Snooze timer function

When you have those mornings when you just cannot get out of bed, the PR-D15 has a handy snooze timer function that has the flexibility of being able to be set for 5/10/15/20 minute increments, depending on how much time you can afford to "sleep-in" .

#### Ultimate Portability and Versatility

The PR-D15 has a folding carrying handle for easy transportation making it easy to "grab and go".

With standard AC power or (6) C-size batteries or (6) NiMH batteries, the PR-D15 is powered up and ready to go, no matter what environment you are in. (Batteries not included) .

#### Convenient Auxiliary Input

The PR-D15 offers additional audio flexibility as you can connect an external audio device such as an iPhone, Droid, iPod, MP3 or CD player using the 3.5mm Stereo Aux-in socket.

#### Main Features

- Rechargeable with (6) Ni/MH batteries and charging LED Indicator. (Batteries not included)
- Folding Carrying Handle
- Tone Control (Bass & Treble)
- Loudness On / Off
- Sleep & Snooze Timer
- Battery Power Indicator
- Excellent Reception and Stereo Audio Performance
- DSP Tuning System with Fine Tuning with 1 kHz Steps
- 10 Memory Presets (5 FM, 5 AM)
- Auto Station Seek
- Alarm by Radio or Humane Wake-Up System (HWS) Buzzer.
- Stereo/Mono Selector Switch
- 3.5mm Aux-in Socket & Headphone Jack
- DC Adapter Input Jack with DC adaptor included
- 200mm Ferrite AM Antenna Bar to Allow Best AM Reception
- Radio Broadcast Data System (RBDS / RDS) with text function
- Large Easy to Read Backlit LCD
