

DEER CHASER™

Protect your home and family from intrusive deer with the new Deerchaser™. This proprietary technology, developed and field tested by a Ph.D. and author of several books, will gently ward off deer keeping them at a safe distance from those expensive plants and shrubs.

Helps to keep unwanted deer off your property

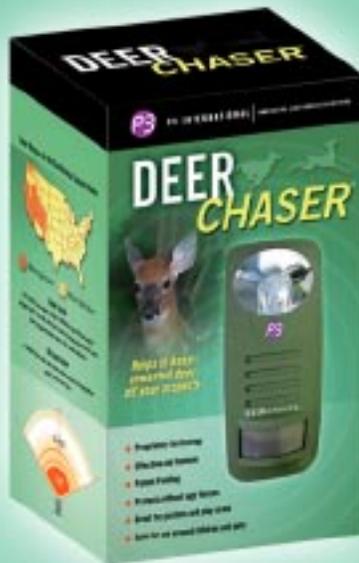

Keeping deer at a safe distance from our plantings is one of the more difficult obstacles that Mother Nature has cast upon us. That, coupled with the fact that deer carry disease-ridden ticks, is the perfect reason for Deerchaser™.

Specifications:

Model	P7840
