PPG460A **Guitar Amplifier**

www.pyleaudio.com

- 1) **Power Switch:** Switches amplifier on/off.
- 2) **Power LED:** Illuminates when power is switched on.
- 3) **Input Jack:** Connect your instrument to this jack.
- 4) **Master:** Adjusts overall volume.
- 5) **Volume:** This sets the volume gain level.
- 6) **Bass:** This control adjusts the low frequency level.
- 7) **Mid:** This control adjusts the middle frequency level.
- 8) **Treble:** This control adjusts the high frequency level.
- 9) **Bass Expander:** Toggles an extra bass effect.
- 10) **Output Jack:** Lets you output a line level signal (non-amplified). Internal speaker is not disabled.
- 11) **Phones:** This is your headphone connection. Inserting the headphones disables the internal speaker (great for practicing).

- 1) **Voltage Selector:** AC 110/220 Volt Selectable Switch.
- 2) **Power Cord:** Connect cord to an AC outlet.

Troubleshooting

Distorted Sound:

Check if the amplifier is overdriven. If it is, you will have to turn the level down.

Check signal source.

Try disabling Bass Expander.

Signal sounds discolored:

Check and adjust the EQ settings.

Ensure you are using quality cables.

Check signal source.

No Sound:

Check connections.

Try a different cable.

Check level on amplifier.

Confirm amplifier is getting a signal.

Make sure nothing is plugged into the Phones jack.

Intermittent Output:

Check connections.

Try a different cable.
