

A9 Palm Nailer - A10 Auto Hammer

The A9 Palm Nailer and A10 Automatic Hammer are ultra-light, easy to operate, and can be used anywhere your hand will reach

A9 Palm Nailer

A9 Applications:

For bridging, framing, decking, fencing, rafter bracing, joist hangers, pole barn wood to concrete applications in on-site and manufactured housing. Also industrial applications; furniture frames, crates, pallets, and underwater applications.

Features:

- Drives bulk nails, from 5d to 70d
- Balanced 2.46 lb. weight reduces fatigue
- Operates from 30 to 125 psig
- Drives nails into concrete, cinder blocks, and other hard materials
- Eliminates bent nails
- Depth-of-drive control for precise nail placement

A10 Automatic Hammer

A10 Applications:

For dowel pins, leg glides, formica self-edging, t-molding, and upholstery tack strips in furniture and cabinet applications. Also industrial applications; aluminum window molding, vibrating cores from sand castings, and on-site finish molding.

Features:

- Delivers a single to over 1,000 blows per minute
- Easily adjusts from the slightest tap to heavy impact blows
- Balanced 2.19 lb. weight reduces fatigue
- Interchangeable plastic, steel and aluminum tips for a variety of applications
- Automatically hammers when in contact with work surfaceplate and hardened safety-resist granular abrasion
