

PART NAMES AND FUNCTIONS

OPERATING INSTRUCTION
Scaling. Operating instruction of the scale lever.

At the first use, push down on the scale lever for 3 times.
And then, push down on the lever again to measure the rice.

- When the rice scale is empty, you can't measure correctly.
- ※ This rice dispenser is not based on the Measurement system.
- ※ When just after replenishing the rice, measurement is not accurate. (Same as when the quantity of remaining rice are little.)
- Release the scale lever after pushing down on it fully.
When continuously using, wait for couple seconds after pushing down on the lever.
- ※ When removing the rice from the rice recepticle to another container, a small amount of rice might remain because of electrostatic influence.

Can't push down on the scale lever.

This is because rice sticks inside the rice scale. Please remove the upper lid to make the inside empty. Then push down on the scale lever several times to remove the stucked rice.

When replenishing the rice

Use remaining old rice by priority.

When emptying the rice dispenser.

Push down on the scale lever several times to empty inside.

CLEANING INSTRUCTION

- Do not use Thinners, Cleanser, Scrubbing brush, Chemical dust cloth, Bleach, and Alcohol for cleaning. It would be damaged and caused discolor.
- Do not use the Dish Dryer to dry Upper board, Lid, and Rice recepticle. It causes the transformation.

Outside

Use the soft cloth with warm water that thinned detergent, and then wiped off with dried cloth enough.
※ Use a synthetic detergent only. (for dishes and cookers.)

Inside

Clean inside with soft cloth once in several times when replenishing new rice.
If rice worm crawling, wash inside the rice scale with water by pshuing down on the scale lever several times.
※ Do not use any detergents to wash inside the rice dispenser.
※ Do not immerse in water.

After washing with water

- ※ Dry the rice dispenser enough by leaving it about a day.
If you fill the rice though it's still wet, it would go moldy or discolor.
- ※ Without regular maintaining, rice would be mischiefed. By maintaining regulary, rice dispenser can be kept cleanly and sanitary.
