PIAA BULB DISPLAYS

PIAA SPECIFIC BULB DESIGN FEATURES:

- Metal bond that holds glass securely preventing cracks and leaks
- Heat resistant glass tube
- Welded focus ring assuring proper positioning
- 1-piece filament support for perfect positioning
- XTRA technology for greater output and performance
- 100% quality control testing for perfect performance
- 1-year manufacturer's performance warranty

PIAA

Super Plasma - At 5000 Kelvin, the Super Plasma bulbs offer an unmatched combination of fashion and performance

Super White - Super White Technology approaches the color and intensity of H.I.D. color temperature, 3800 Kelvin

XTRA - Technology that boosts the light from standard wattage to equal a high wattage

Xtreme White - With a 4150 Kelvin color temperature, Xtreme White bulbs give a cool white light output. The closest color yet to H.I.D. This white light gives the driver better color recognition on depth perception and better contrast than conventional halogen lamps

Xtreme White Plus - The blue top coat on the 9000 series bulbs add a slight blue tint to the lamp with no loss of performance. Xtreme White Plus bulbs are whiter, brighter and close to the color of sunlight

Universal Silver Bullet® Kits

- Universal Silver Bullets® can be installed just about anywhere
- Halogen kit includes red, amber and clear lenses
- 3/8"-16 hollow mounting bolt
- The power wire exits the light through the mounting bolt.

The light is grounded through its mount
 Note: L.E.D. kits have clear lenses. The color is emitted by the L.E.D. circuit board.
 Do not wire Halogen Silver Bullets® with red lenses to operate as running lights unless using Kuryakyn™ Mfg/n 4859 (Run, Turn, Brake Controller) excessive heat will result in cracked lenses. 35 watt bulbs should be used only with clear lenses in driving light applications. Excessive heat may damage colored lens coatings
