

Vx 670 Accessories

Custom Solutions To Go

VeriFone's Vx 670 is the world's smallest, lightest, all-in-one wireless payment device — putting powerful payment capabilities in the palm of your hand. Now, restaurants, bars, delivery services, car rental companies, and other businesses on the go can choose from a complete menu of accessories to create complete solutions for any need.

Vx 670 accessories are part of VeriFone's unique Purpose-Inspired Design, where the best ideas come from you and your requirements. Choose from our standard or full-featured charging base; dongles to simplify transaction processing and connections with ECRs and peripherals; convenient clip-on holster for hands-free carside and tableside service; carrying case for protection against bumps and hard knocks; and an efficient car charger.

Best of all, you can rely on the same quality in our accessories that VeriFone is known for in all our solutions. Count on the Vx 670 and our wide selection of accessories to hand you the competitive advantage you want.

V^x 670 Accessories

Standard base — Ideal for sharing the V^x 670 within a hectic environment. Just drop and go. The base provides continuous charging, and the device will always be right where it belongs when a server or clerk needs it.

Full-featured base — Get drop-and-go convenience while continuously charging your V^x 670 and an optional spare battery. Two USB ports provide easy serial or dial communications with optional dongles.

Dongles — Need to connect to an electronic cash register (ECR)? Want dial back-up for clearing and settlement? These dongles work with USB-to-serial connections for ECRs and peripherals, and USB-to-dial for a reliable telco interface.

Hands-free holster — In a hospitality environment, servers never have enough hands. The V^x 670 nestles neatly in this clip-on holster until the server is ready to hand it over to the customer for quick and easy payment.

Carrying case — Provides added protection for demanding environments such as delivery and stadium vending. The device remains in the case, while clear plastic over the keys ensures it is protected under all conditions.

Car charger — For businesses that are always on the road, this handy car charger plugs into the front of the device to keep the battery fully charged and allows you to run the device on the power in your vehicle.
