For Your Safety

Product Safety Information

	Read the Safety Information section of this user guide on this page		Do not use while re-fuelling
	Do not use hand-held while driving		This device may produce a bright or flashing light
	Small parts may cause a choking hazard		Do not dispose of it in a fire
	This device may produce a loud sound		Avoid contact with magnetic media
	Keep away from pacemakers and other personal medical devices		Avoid Extreme Temperatures

	Switch off when instructed in hospitals and medical facilities		Avoid any contact with liquid, keep it dry
	Switch off when instructed in aircrafts and airports		Do not attempt to disassemble
	Switch off in explosive environments		Do not rely on this device for emergency communications
			Only use approved accessories

RF Exposure

General Statement on RF Energy

Your mobile device contains a transmitter and a receiver. When it is ON, it receives and transmits RF energy. When you communicate with your device, the system handling your call controls the power level at which your device transmits.

Specific Absorption Rate (SAR)

Your mobile device is a radio transmitter and receiver. It is designed not to exceed the limits for exposure to radio waves recommended by international guidelines. These guidelines were developed by the independent scientific organization ICNIRP and include safety margins designed to assure the protection of all persons, regardless of age and health.

The guidelines use a unit of measurement known as Specific Absorption Rate, or SAR. The SAR limit for mobile devices is 2 W/kg and the highest SAR value for this device when tested at the ear was 1.54 W/kg*. As

mobile devices offer a range of functions, they can be used in other positions, such as on the body as described in this user guide**.

As SAR is measured utilizing the device's highest transmitting power, the actual SAR of this device while operating is typically below that indicated above. This is due to automatic changes to the power level of the device to ensure it only uses the minimum power required to communicate with the network.

* The tests are carried out in accordance with EN 62311, EN 62209-1, IEC 62209-2.

** Please see body worn operation.

Body-worn Operation

Important safety information regarding radio frequency radiation (RF) exposure:

Failure to observe these instructions could result in your RF exposure exceeding the relevant guideline limits.

Limiting Exposure to Radio Frequency (RF) Fields

For individuals concerned about limiting their exposure to RF fields, the World Health Organization (WHO) provides the following advice:

Precautionary measures: Present scientific information does not indicate the need for any special precautions for the use of mobile devices. If individuals are concerned, they might choose to limit their own or their children's RF exposure by limiting the length of calls, or using 'hands-free' devices to keep mobile devices away from the head and body.

Further information on this subject can be obtained online from the WHO fact sheet N°193 at http://www.who.int/mediacentre/factsheets/fs193/en/

Regulatory Information

The following approvals and notices apply in specific regions as noted.

Please find the Declaration of RoHS Compliance, and EC Declaration of Conformity in Appendix.

Distraction

Driving

Full attention must be given to driving at all times in order to reduce the risk of an accident. Using a mobile device while driving (even with a hands free kit) can cause distraction and lead to an accident. You must comply with local laws and regulations restricting the use of wireless devices while driving.

Operating Machinery

Full attention must be given to operating the machinery in order to reduce the risk of an accident.

Product Handling

General Statement on Handling and Use

You alone are responsible for how you use your mobile device and any consequences of its use.

Use of your device is subject to safety measures designed to protect users and their environment.

- Always treat your device and its accessories with care and keep it in a clean and dust-free place.
- Do not expose your device or its accessories to open flames or lit tobacco products.
- Do not expose your device or its accessories to liquid, moisture or high humidity.
- Do not drop, throw or try to bend your device or its accessories.
- Do not use harsh chemicals, cleaning solvents, or aerosols to clean the device or its accessories.
- Do not paint your device or its accessories.

- Do not attempt to disassemble your device or its accessories, only authorized personnel should do so.
- Do not expose your device or its accessories to extreme temperatures, minimum - [5] and maximum + [50] degrees Celsius.
- Please check local regulations for disposal of electronic products.
- Do not carry your mobile device in your back pocket as it could break when you sit down.

Small Children

Do not leave your mobile device and its accessories within the reach of small children or allow them to play with it.

They could hurt themselves or others, or could accidentally damage the device.

Your mobile device contains small parts with sharp edges that may cause an injury or may become detached and create a choking hazard.

Demagnetization

To avoid the risk of demagnetization, do not allow electronic devices or magnetic media close to your device for a long time.

Air Bags

Do not place the device in the area over an air bag or in the air bag deployment area.

Store the device safely before driving your vehicle.

Seizures/Blackouts

The device can produce a bright or flashing light.

Repetitive Motion Injuries

To minimize the risk of RSI when texting or playing games with your device:

- Do not grip the device too tightly.
- Press the buttons lightly.

- Use the special features which are designed to minimize the times of pressing buttons, such as Message Templates and Predictive Text.
- Take lots of breaks to stretch and relax.

Loud Noise

This mobile device is capable of producing loud noises, which may damage your hearing. Turn down the volume before using headphones, Bluetooth stereo headsets or other audio devices.

Device Heating

Your device may become warm during charging and during normal use.

Electrical Safety

Accessories

Use only approved accessories.

Do not connect with incompatible products or accessories.

Take care not to touch or allow metal objects, such as coins or key rings, to contact or short-circuit the battery terminals.

Connection to a Car

Seek professional advice when connecting a mobile device interface to the vehicle electrical system.

Faulty and Damaged Products

Do not attempt to disassemble the device or its accessory.

Only qualified personnel should service or repair the device or its accessory.

If your device or its accessory has been submerged in water, punctured, or subjected to a severe fall, do not use it until you have taken it to be checked at an authorized service center.

Interference

General Statement on Interference

Care must be taken when using the mobile device in close proximity to personal medical devices, such as pacemakers and hearing aids.

Pacemakers

Pacemaker manufacturers recommend that a minimum separation of 15 cm be maintained between a mobile device and a pacemaker to avoid potential interference with the pacemaker. To achieve this, use the mobile device on the opposite ear to your pacemaker and do not carry it in a breast pocket.

Hearing Aids

People with hearing aids or other cochlear implants may experience interfering noises when using wireless devices or when one is nearby.

The level of interference will depend on the type of hearing device and

the distance from the interference source, increasing the separation between them may reduce the interference. You may also consult your hearing aid manufacturer to discuss alternatives.

Medical Devices

Please consult your doctor and the device manufacturer to determine if operation of your mobile device may interfere with the operation of your medical device.

Hospitals

Switch off your wireless device when requested to do so in hospitals, clinics or health care facilities. These requests are designed to prevent possible interference with sensitive medical equipment.

Aircraft

Switch off your wireless device whenever you are instructed to do so by airport or airline staff.

Interference in Cars

Please note that because of possible interference to electronic equipment, some vehicle manufacturers forbid the use of mobile devices in their vehicles unless a hands-free kit with an external antenna is included in the installation.

Explosive Environments

Petrol Stations and Explosive Atmospheres

In locations with potentially explosive atmospheres, obey all posted signs to turn off wireless devices such as other radio equipment.

Areas with potentially explosive atmospheres include fuelling areas, below decks on boats, fuel or chemical transfer or storage facilities, areas where the air contains chemicals or particles, such as grain, dust, or metal powders.

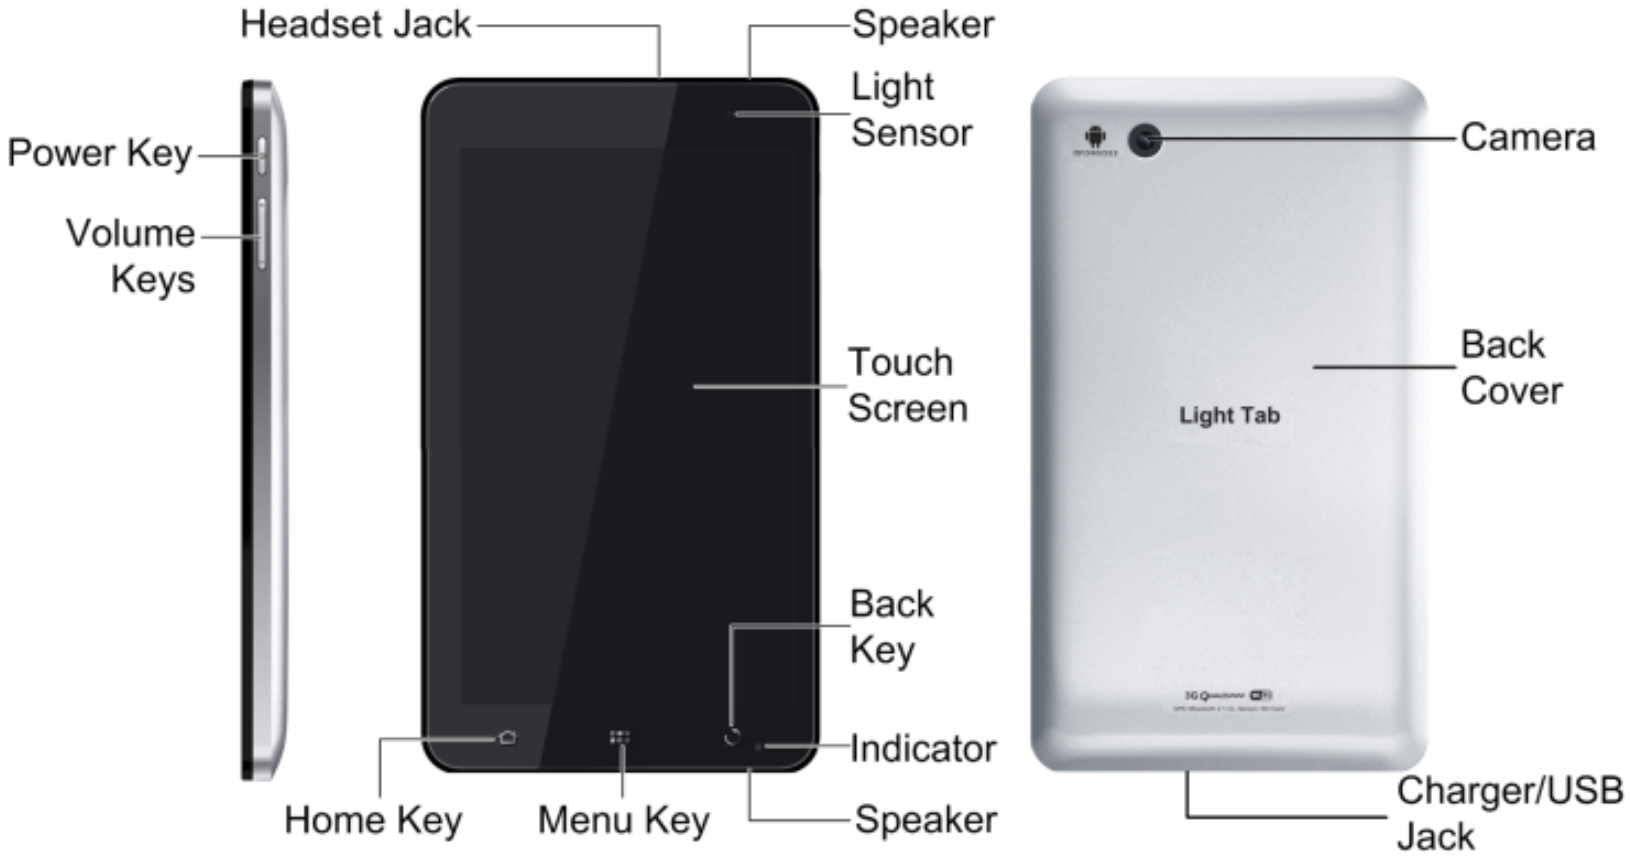
Blasting Caps and Areas

Power off your wireless device when in a blasting area or in areas posted

power off “two-way radios” or “electronic devices” to avoid interfering with blasting operations.

Getting Started

Overview



Key Definition

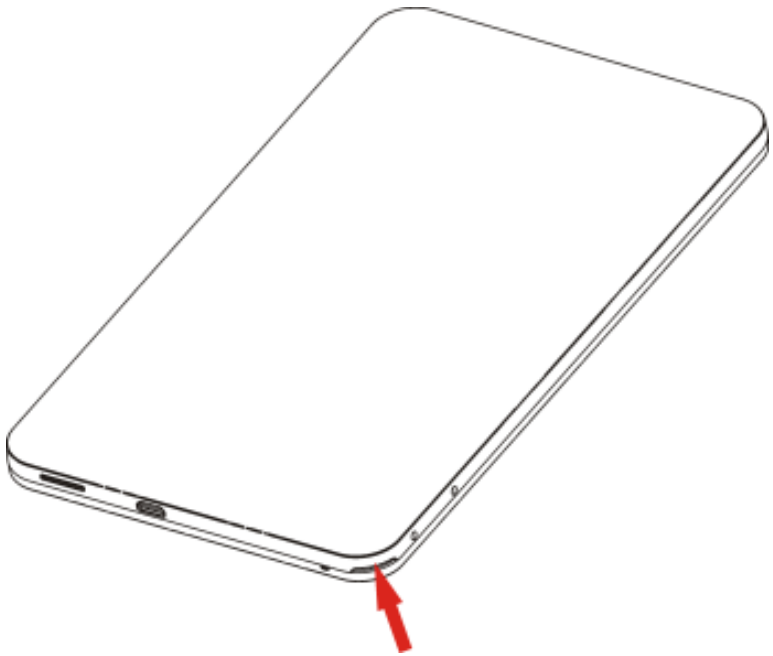
Key	Function
Power Key	Press and hold to power on your FileMate Light. Press to switch to sleep mode. Press to wake up your FileMate Light. **Hold on** for your FileMate Light **options**: Silent mode, Vibration mode or Power off.
Home Key	**Tap** to return to the Home Screen from any screen. **Hold** to see the recently used applications.
Menu Key	**Tap** to get menu options for the current screen.
Back Key	**Tap** to go to the previous screen.
Volume Keys	Use to control the volume Up or Down.

Starting up

How to slot your memory card

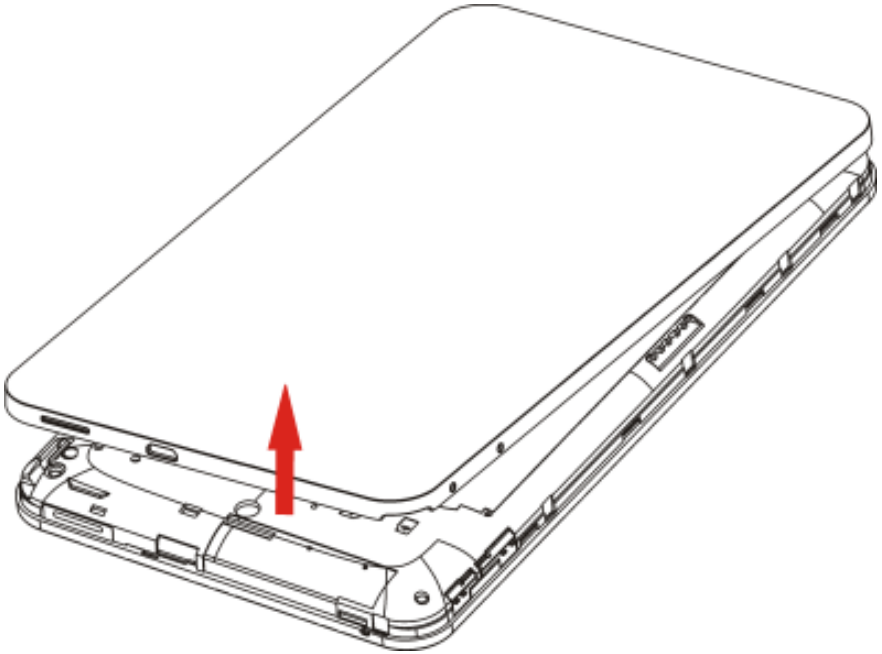
Power off your FileMate Light before installing or replacing the battery or memory card.

1. Remove the back cover.



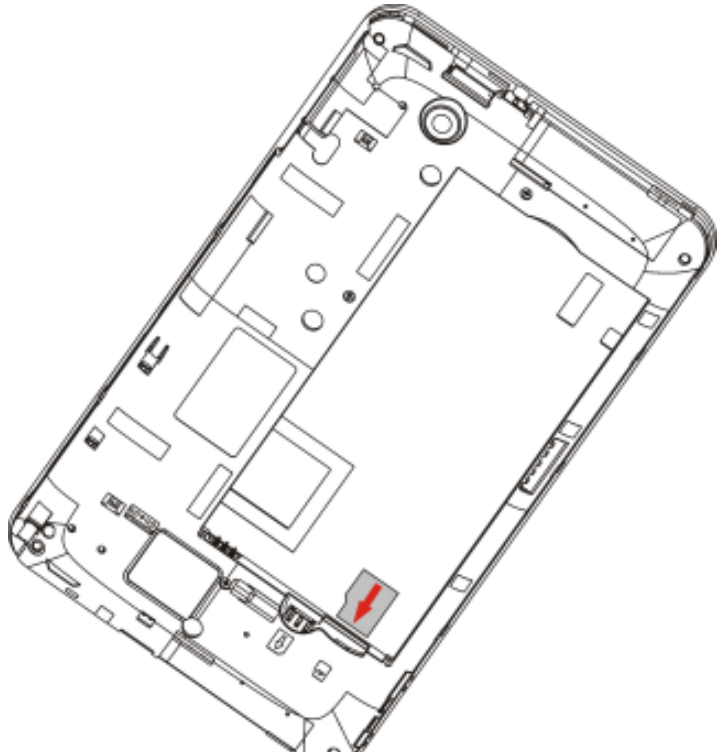
Locate and open the thumb catch on the lower right hand corner (viewed from the back)

Note: Your FileMate Light has been pre-installed with an 8 GB microSD card.



Lift the back cover up to open

2. Insert your memory card into the memory card slot. There is a diagram showing the correct orientation of the card printed above the memory card slot.

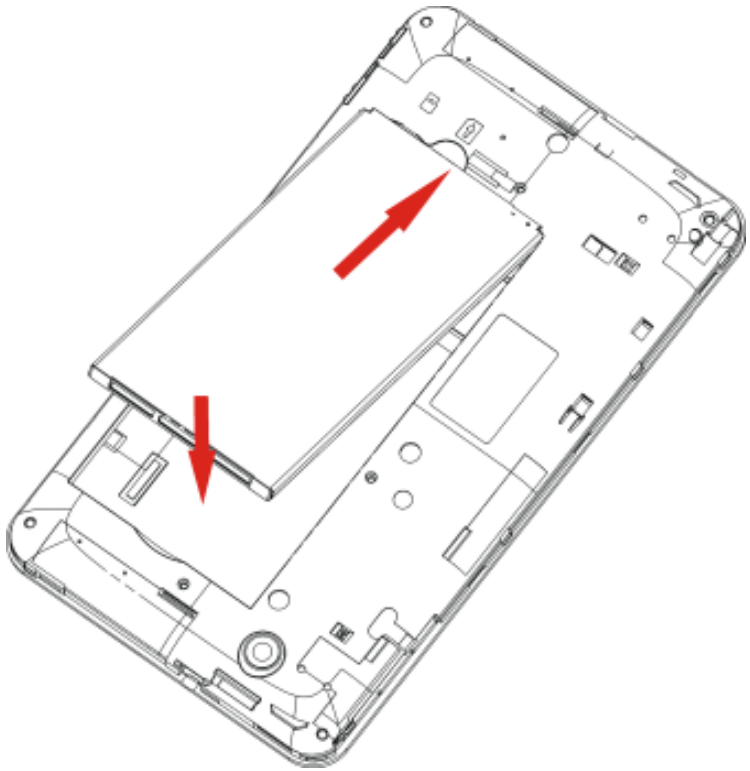


Notes:

microSD logo ( ) is a trade mark of SD Card Association.

How to pop in your battery

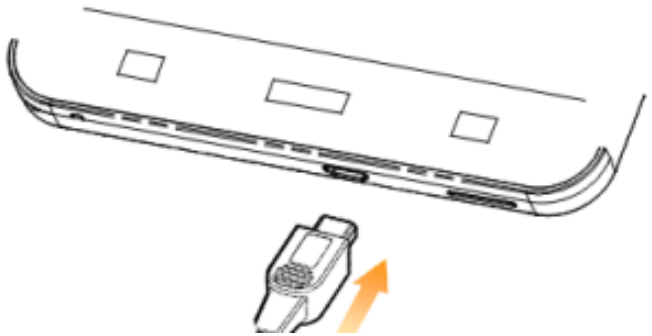
1. Insert the battery with the contacts located against the gold springs.
2. Push the battery down into place.



How to charge your FileMate Light

The new battery is not fully charged. To charge the battery, you need to:

1. Connect the adapter to the charger jack.



2. Connect the charger to a standard AC wall outlet.

   Notes:

   ▸ If the battery is low, there will be a pop-up message on the screen and the indicator light will be red.

   ▸ When you charge your device, the indicator light will change according to the battery level:

Indicator color	Battery level
Red	Battery is very low.
Orange	Battery is low.
Green	Battery is full or partially drained.

▸ If the device is powered on and the battery is charging, the icon will appear on the status bar. When charging is completed, the battery indicator appears on the status bar.

3. Disconnect the charger when the battery is fully charged.

Powering On/Off Your Device

How to power on your device

1. Make sure the battery is inserted.
2. Press and hold the **Power Key** to power on your device.

To power off your device, press and hold the **Power Key** to get the FileMate Light options, select **Power off**, and then tap **OK**.

How to switch your device to sleep mode

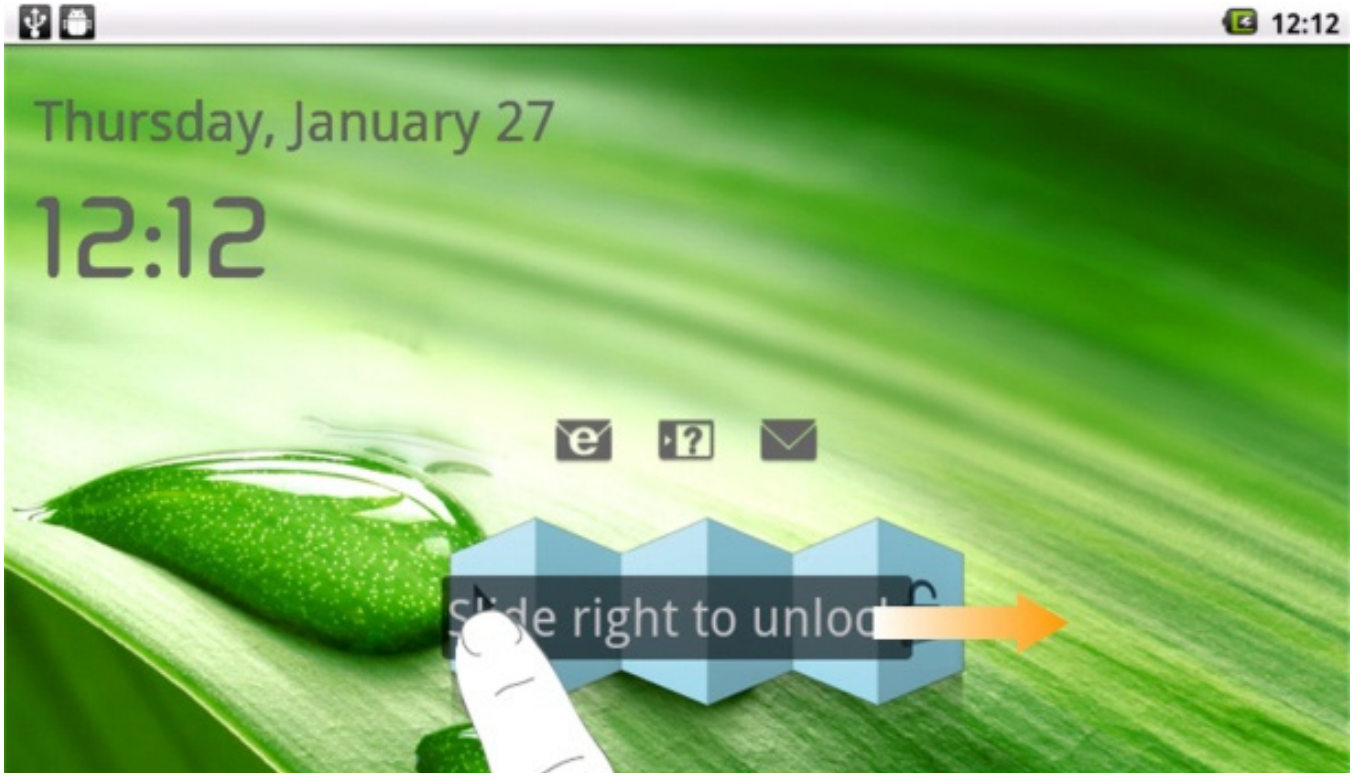
Press the **Power Key.**

Sleep Mode suspends your device to a low-power-consumption state while the display is off to save battery power. Your device also goes into Sleep Mode automatically when you leave it idle after a certain period of time.

How to wake up your device from sleep mode

If your device is switched to sleep mode, you need to wake it up:

1. Press the **Power Key** to activate your screen display.
2. Drag icon to the right.



Notes:

If you have set an unlock pattern for your device (See *Settings -> Security Settings -> Protecting Your FileMate Light with a Screen Lock -> Set the screen unlock pattern*), you need to draw the pattern to unlock your screen.

Getting Around Your Device

Using Finger Gestures

You can use finger gestures to control your device. The controls on your touch screen change dynamically depending on the tasks you are performing.

1. Tap the buttons, icons, or applications to select items or to open applications.
2. Hold a certain item to get available options.
3. Slide on the screen, you can scroll up/down. From Home Screen, you can also slide left/right to browse the extended Home Screen.
4. Drag a certain item to move it or to do some other corresponding operations.

Tips:

Besides using finger gestures to control your device, you can also switch your device screens (such as text input screen, gallery screen, etc.) between portrait or landscape mode by holding the device upright or sideways.

Home Screen

You can add or remove home items in your Home Screen.

Notifications	Displays the reminders and status icons of your device. Flick down to open the notifications panel.
Bars	Shows you which part of the Home Screen

	you are looking at.
Shortcuts & Widgets	Tap to start related applications.
Applications	Tap to open the main menu.

How to extend the Home Screen

Beyond the screen width, the Home Screen extends to provide more space for adding items. Slide your finger to the left or right to get the extended Home Screen.

Customize the Home Screen Wallpaper

To change the wallpaper

1. Tap the **Home Key** to return to the Home Screen.
2. Tap the **Menu Key** and select **Wallpaper**.
3. Select the wallpaper you want to use from **Gallery**, **Live wallpapers**, or **Wallpapers**.
4. Tap **Save** or **Set wallpaper**.

To add a Home Screen item

1. Tap the **Home Key** to return to Home Screen.
2. Slide left or right to find an extended Home Screen where there is space to add an item.
3. Tap the **Menu Key** and select **Add**.
   You can also tap and hold the blank area of the Home Screen to get the **Add to Home screen** shortcut menu.
4. Select an item type and the item you want to add to Home Screen.

To remove a Home Screen item

1. Tap the **Home Key** to return to Home Screen.
2. Tap and hold the item you want to delete until the icon appears on the screen.
3. Drag the item into .

Device Status and Notifications

Device Status

	Battery is very low		Speaker is mute
	Battery is low		Microphone is mute
	Battery is full		GPS is on
	Battery is charging		Receiving location data from GPS
	Vibrate mode		Connected to a Wi-Fi network
	Wired microphone headset		Alarm is set
	Data is syncing		Bluetooth is on

	Speaker is on		Connected to a Bluetooth device

Notifications

	New Mail		New Google Talk message
	New voicemail		Upcoming event
	USB is connected		Song is playing
	Uploading data		Downloading data

How to open the notification panel

From the **Notifications Panel**, you can get the information of calendar events, new messages, and so on. You can open the message, reminder, event notification etc. from the Notification Panel.

1. Tap and hold the notifications bar until appears on the top of the Screen.
2. Drag the downwards.

Tips:

You can also open the **Notifications Panel** from the Home Screen by tapping the **Menu Key > Notifications**.

Applications and Settings Preview

Programs Preview

Your FileMate Light has lots of functions. Tap to get the following programs that are pre-installed on your device.

Applications	Description
Alarm	Enables you to set alarms.
Browser	Enables you to browse the internet.
Calculator	Enables you to perform the basic calculation, such as addition, subtraction, multiplication, division and

Applications	Description
	so on.
Calendar	Enables you to schedule appointments, including meetings and other events.
Camcorder	Enables you to enter camcorder and shoot the video clips you like.
Camera	Enables you to enter the camera screen directly and use the camera features.
Contacts	Enables you to manage the information of your friends and colleagues.
Docs To Go	Enables you to view your documents.
Email	Enables you to enter the Email screen, where you can setup Email, send or receive Emails.
Facebook	Connect to your Facebook friends via the device.
Filer	Enables you to organize and manage your files on

Applications	Description
	your microSD card.
FMRadio	Enables you to search for radio channels, listen to them, and save them on your device.
Gallery	Enables you to organize and manage your multimedia files.
Global Time	Enables you to view the global time.
Gmail	Enables you to access your Gmail account and check your email on your mobile device.
Google Search	Enables you to search web pages, applications or contacts.
Latitude	See your friends' locations and share yours with them.
Maps	Enables you to track your current location, view real-time traffic situations, and receive detailed directions to your destination.

Applications	Description
Market	Enables you to access to useful applications and fun games which you can download and install on your device.
Music	Enables you to browse your audio files and listen to them in the Music player.
Navigation	Enables you to use Google Maps Navigation.
News & Weather	Enables you to check the weather and top news.
Note pad	Enables you to create text notes.
Places	Enables you to find restaurants, ATMs, and other places of interest near you.
Settings	Enables you to adjust the device settings.
Sound Recorder	Enables you to record audio clips.
Stopwatch	Enables you to measure the exact time it takes to do something.

Applications	Description
Talk	Enables you to send and receive instant messages and voice over internet protocol (VOIP), offered by Google Inc.
Task Manager	Enables you to view and manage all the running programs on your device.
Twitter	Enables you to Send tweet to Twitter.com.
Videos	Enables you to browse your video files and watch them in the Videos player.
Voice Search	Enables you to searching or dialing by voice instead of typing.
YouTube	Enables you to watch YouTube videos and upload your own.

Settings Preview

You can adjust the device settings. Tap the **Home Key >** **> Settings**

to view all the settings on your device.

Tips:

You can also tap the **Menu Key > Settings** from the Home Screen.

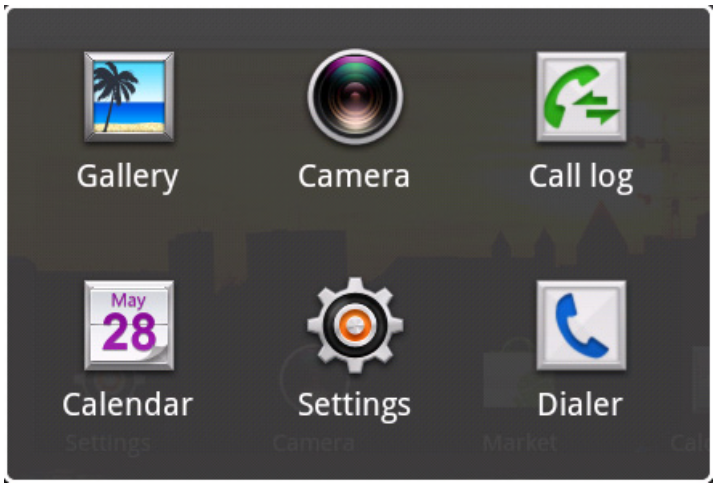
Wireless & networks	Enables you to configure and manage your device's wireless connections, such as Wi-Fi, Bluetooth, mobile networks, and Virtual Private Networks. You can also enable the Airplane mode.
Sound	Enables you to set sound settings, such as ringtones, notifications and so on.
Display	Enables you to set display settings such as screen brightness and so on.
Location & security	Enables you to set the **Screen unlock** pattern, **Passwords**, **Device administration**, or manage the device's **Credential storage**. You can also select the sources to use when determining locations from **My Location**.

Applications	Enables you to manage applications and installation of new programs.
Account & sync	Enables you to manage your account and configure general sync settings.
Privacy	Enables you to configure privacy settings, such as Location, back up Settings, and Personal data.
SD card & device storage	Enables you to check the available memory of the external card and the internal storage.
Search	Enables you to set the search options.
Language & keyboard	Enables you to set the locale (operating system language and region) and text input options.
Voice input & output	Enables you to configure the text-to-speech settings if you have installed a text-to-speech (voice data) application.
Accessibility	Enables you to manage accessibility options.

Date & time	Enables you to set the date, time, time zone, and date/time format. If the network supports, you can also enable automatic time update.
About device	Enables you to view the device status, battery level, and legal information.

How to open recently used applications

1. Tap and hold the **Home Key** from any screen until the following recently used applications interface appears.



2. Tap the application you want to open.

Contacts

Starting to use Contacts

You can add new contacts along with their information.

Contacts are saved in the internal memory. If you store the information in the internal memory, you can fill out more information including Email, Postal address, pictures, Nickname, website, etc.

Tap the **Home Key >** **> Contacts** to enter the Contacts Screen.

Contacts Screen

There are three tabs in the Contacts Screen: **Contacts**, **Favorites**, and **Groups**.

Managing Contacts

Importing/Exporting Contacts

You can import/export contacts from/to memory card.

Import/export contacts from/to memory card

1. Tap the **Menu Key > Import/Export** from the Contacts Screen.
2. Select to import or export contacts from/to microSD card.

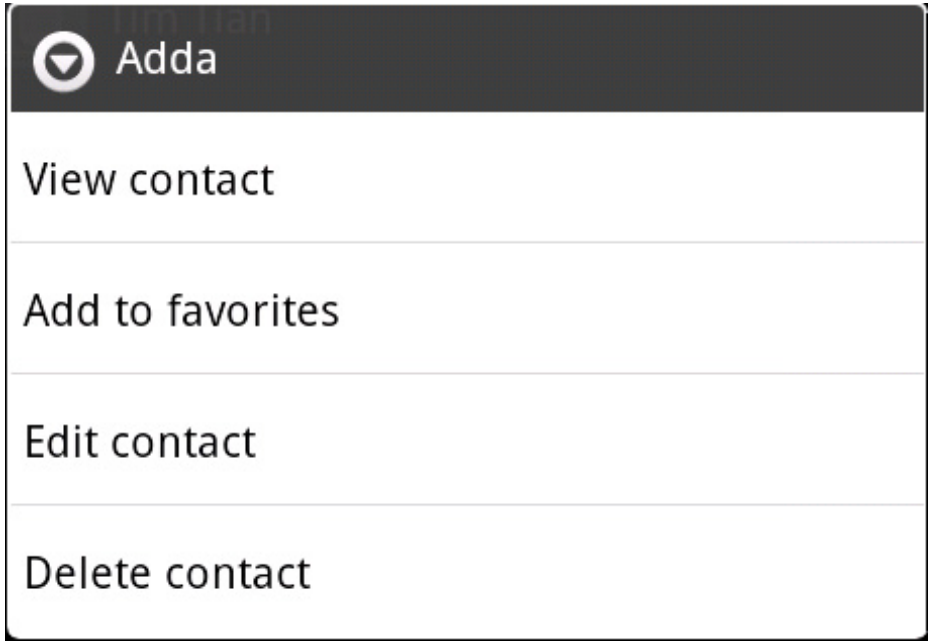
   If you want to import contacts from microSD card, you should have vCard files saved in the microSD card. If there is more than one vCard file, you need to select the vCard file.
3. Tap **OK**.

Creating a Contact

1. Tap the **Menu Key > New contact** from the Contacts Screen.
2. Enter the name and phone numbers. You can also set the Group, Email addresses, IM addresses, Postal addresses, Organizations etc.
3. Tap **Done** to save the contact.

Adding a Contact to Favorites

1. Select the contact you want to add to Favorites from your Contacts Screen.
2. Hold the contact until a shortcut menu appears.



3. Tap **Add to favorites.**

Searching for a Contact

1. Tap the **Menu Key > Search** from the Contacts Screen.
2. Input the contact name you want to search for.

The contacts matched will be listed.

Editing a Contact

1. Select the contact you want to edit from the Contacts Screen.
2. Tap the **Menu Key > Edit contact.**

   Tips:

   You can also edit a contact by holding it in the Contacts Screen and select **Edit contact** from the pop-up shortcut menu.
3. Edit the contact and tap **Done**.

Deleting a Contact

1. Select the contact you want to delete from the Contacts Screen.
2. Tap the **Menu Key > Delete contact.**

   Tips:

   You can also delete a contact by holding it in the Contacts Screen and select **Delete contact** from the pop-up shortcut menu.
3. Tap **OK**.

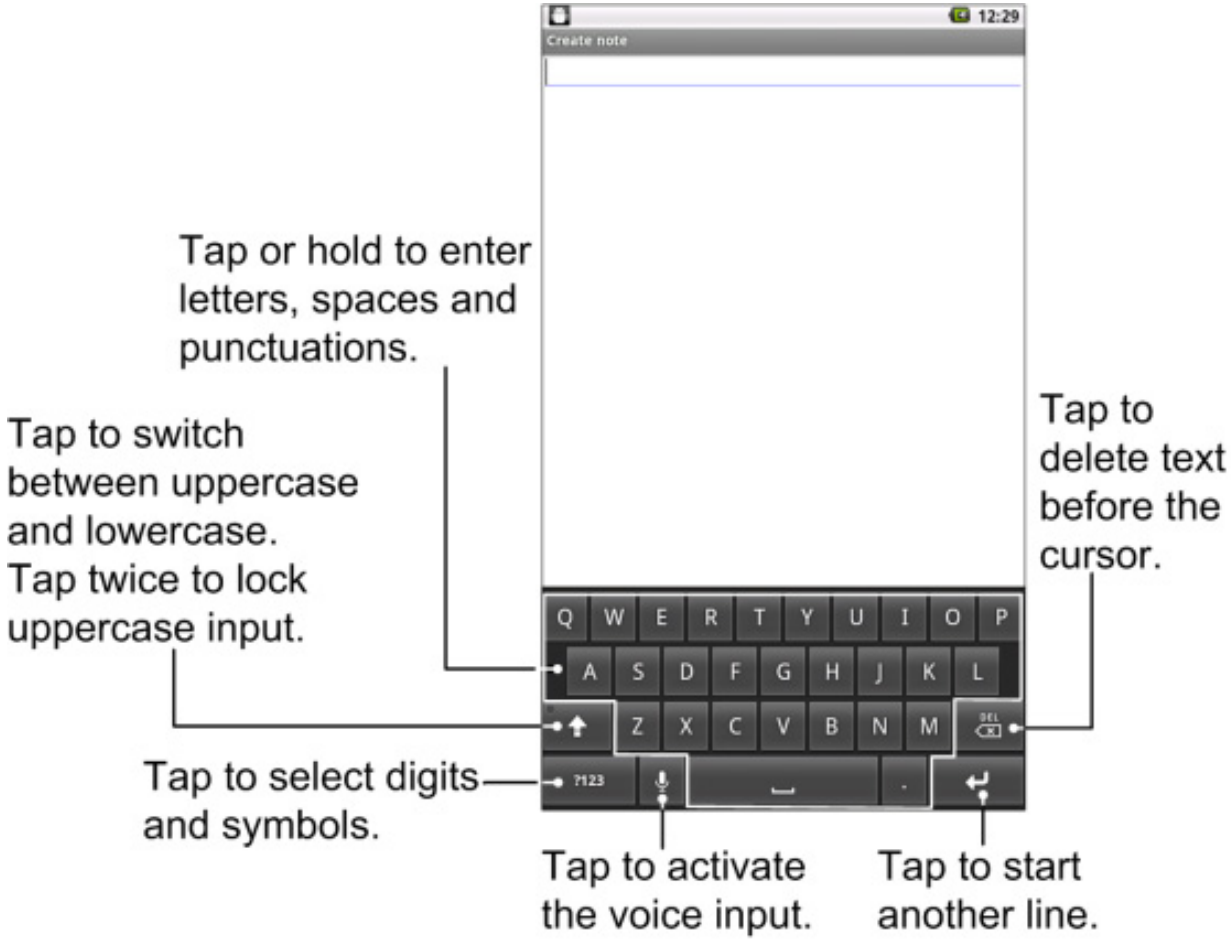
Entering Text

Using the On-screen Keyboard

When you enter a field that needs text or numbers, hold the input box and select **Input method** from the pop-up menu to change input method.

Android Keyboard

Android Keyboard is a keyboard layout similar to a desktop computer keyboard. You can choose to use the landscape orientation of the on-screen keyboard, by turning the FileMate Light sideways.



Tips:

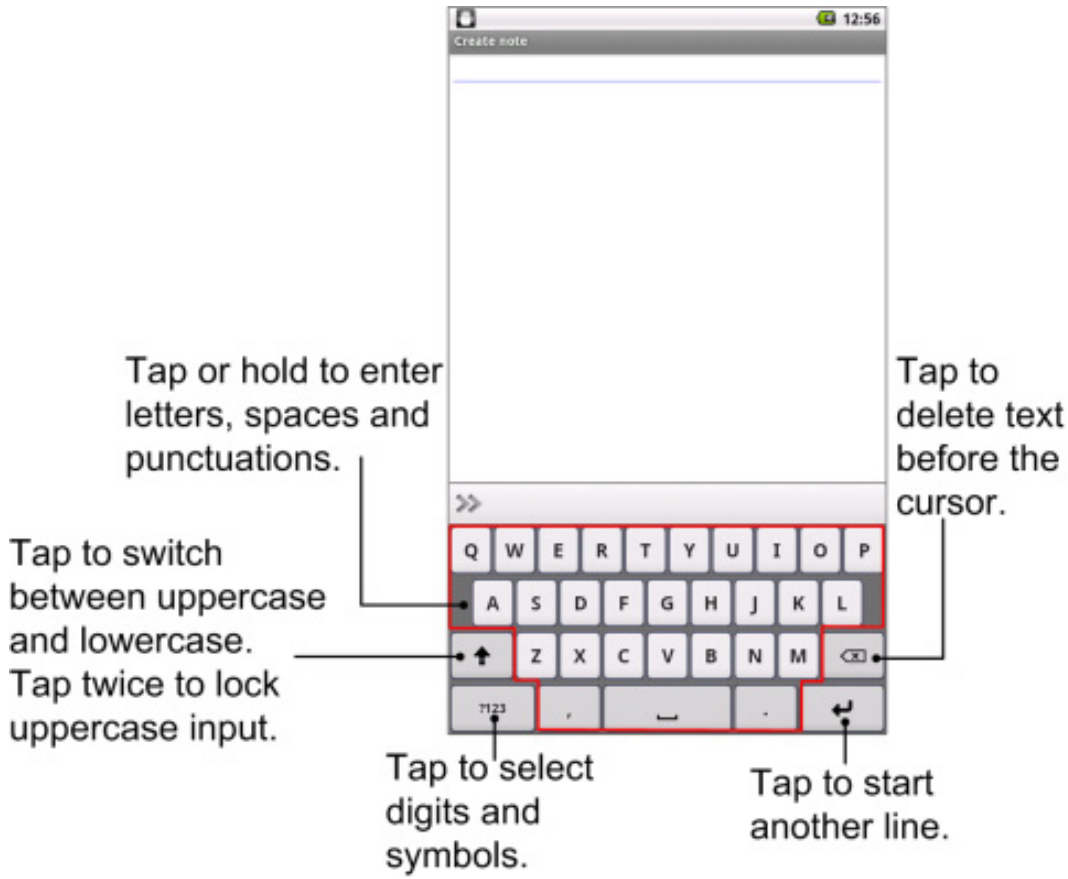
- If you want to use the landscape keyboard, you need to select the **Auto-rotate screen** check box in **Settings > Display**.

XT9 Text Input

XT9 Text Input can speed up text input by replacing the letter tapping/typing motion of input with a tracing gesture where you move your finger from letter to letter without lifting the finger until you reach the end of the word.

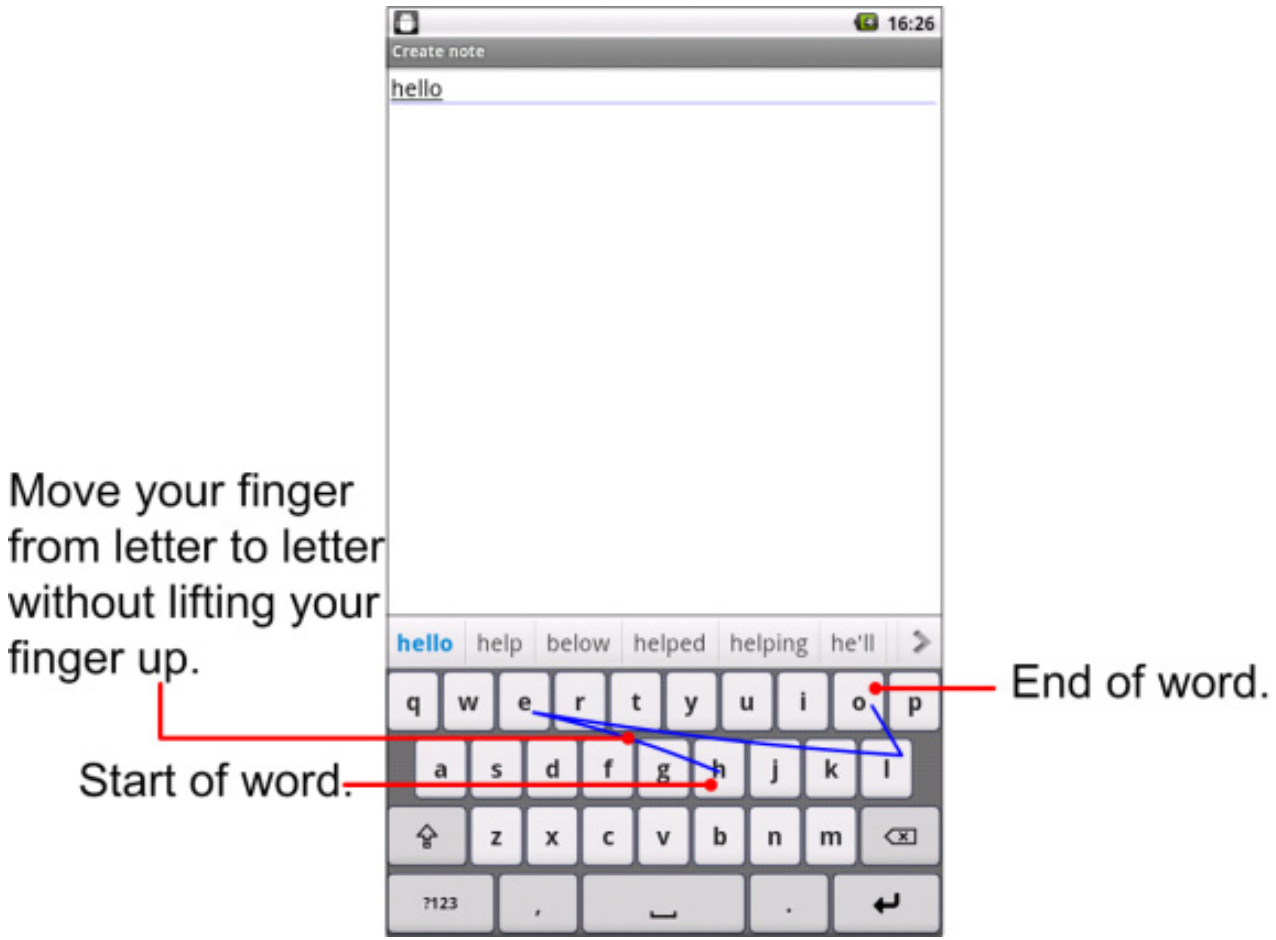
You can select to use one of the three layouts (**Keyboard**, **Reduced keyboard**, **Phone keypad**) of XT9 Text Input Keyboard.

- Keyboard

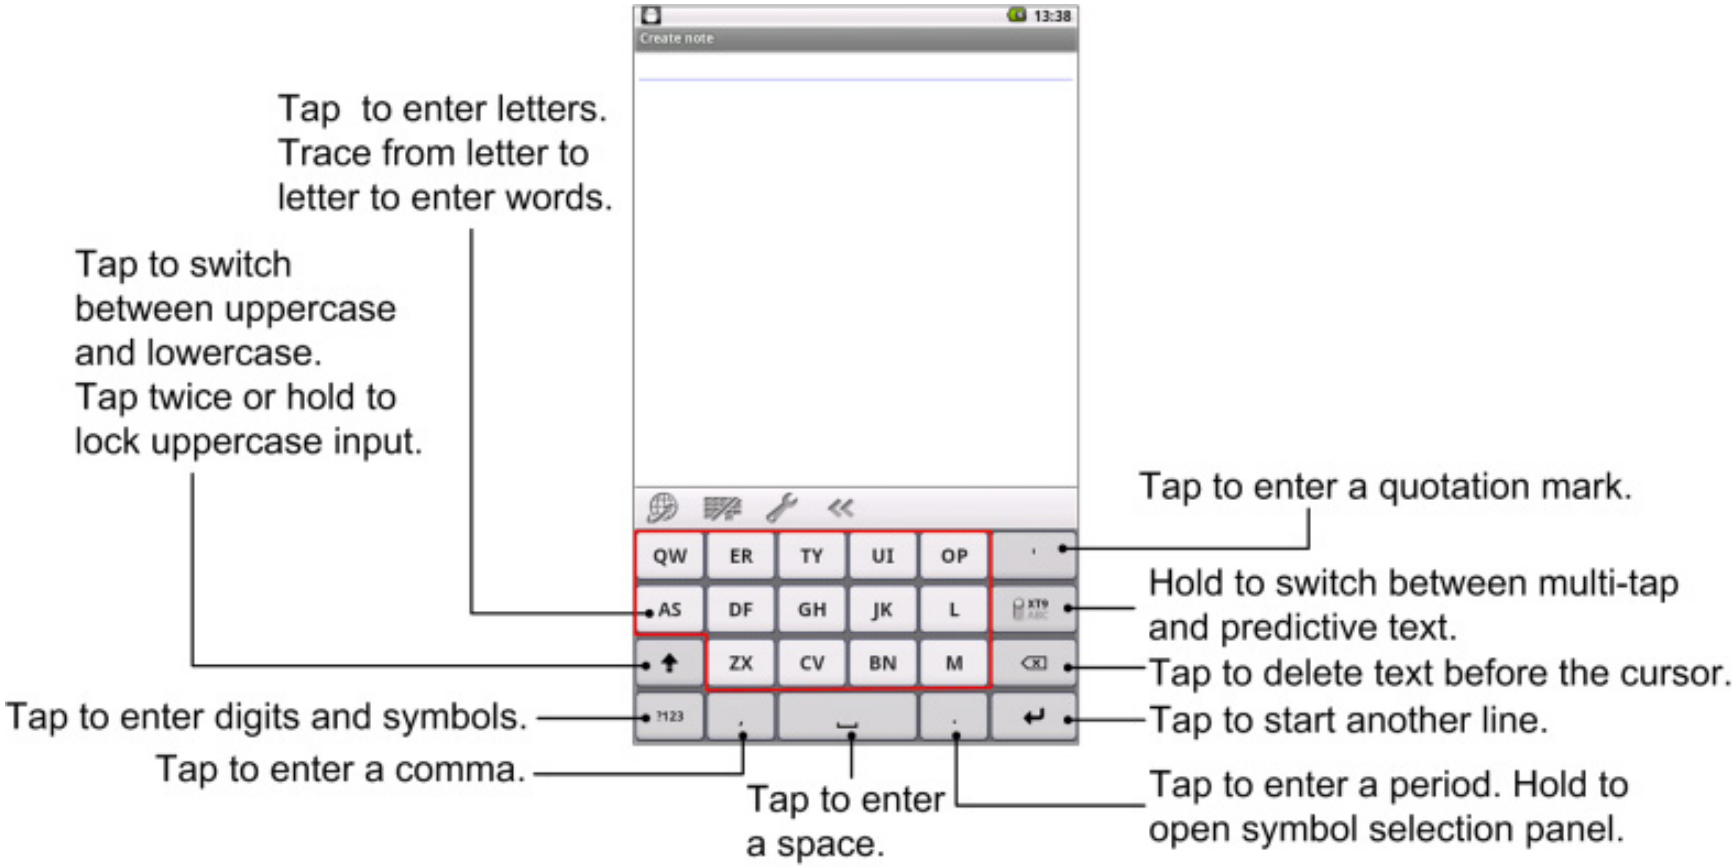


Move your finger from letter to letter to trace a word without lifting the finger until you reach the end of the word.

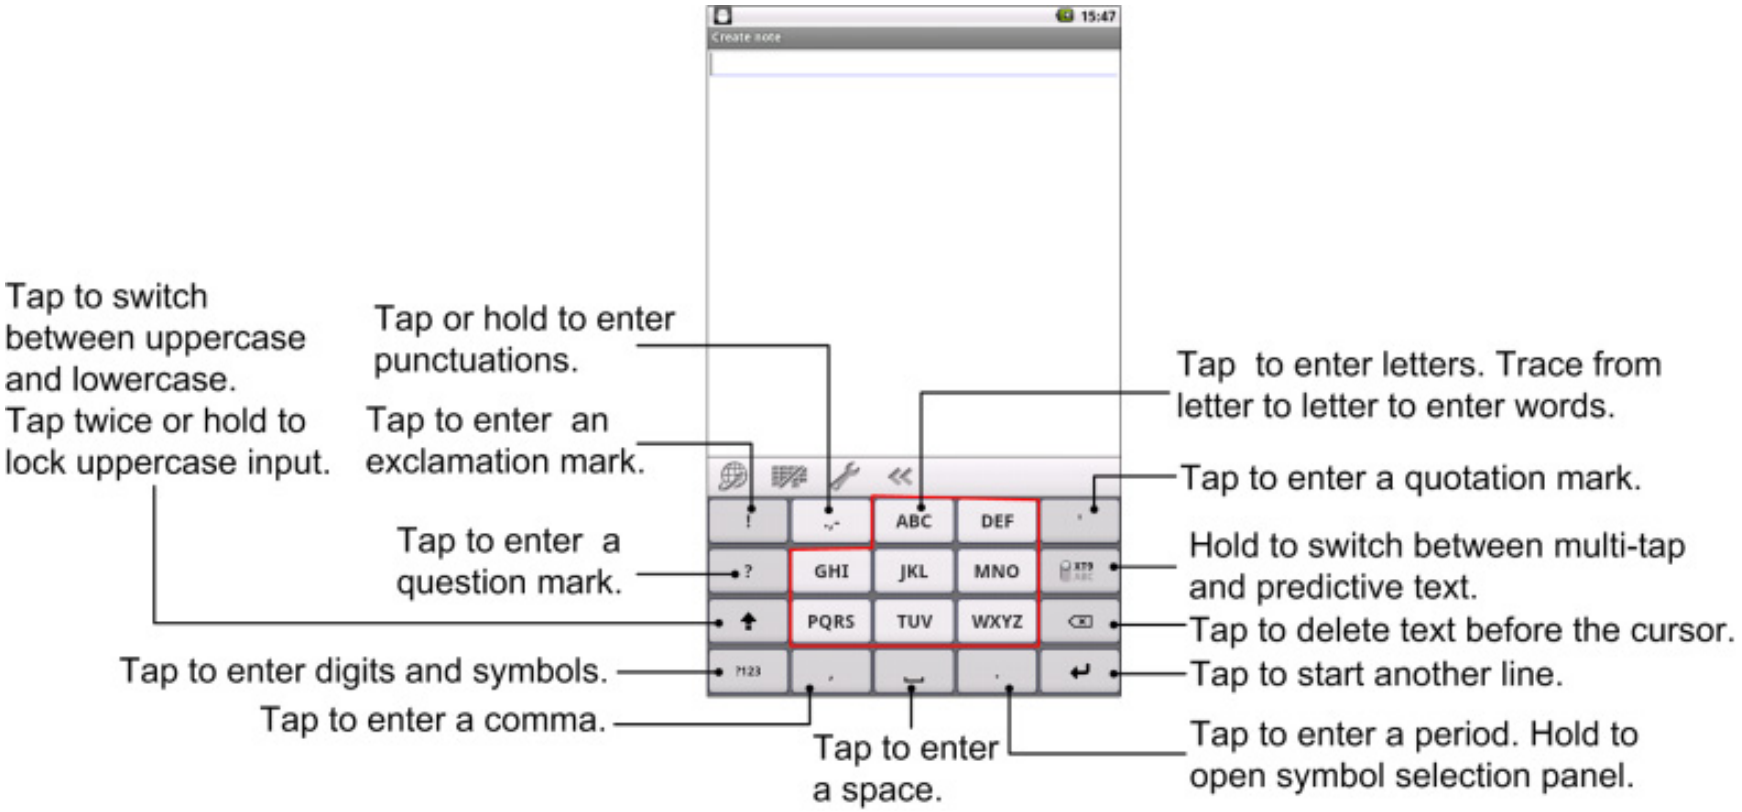
The trace feature is also available in the **Reduced keyboard** layout and **Phone keypad** layout.



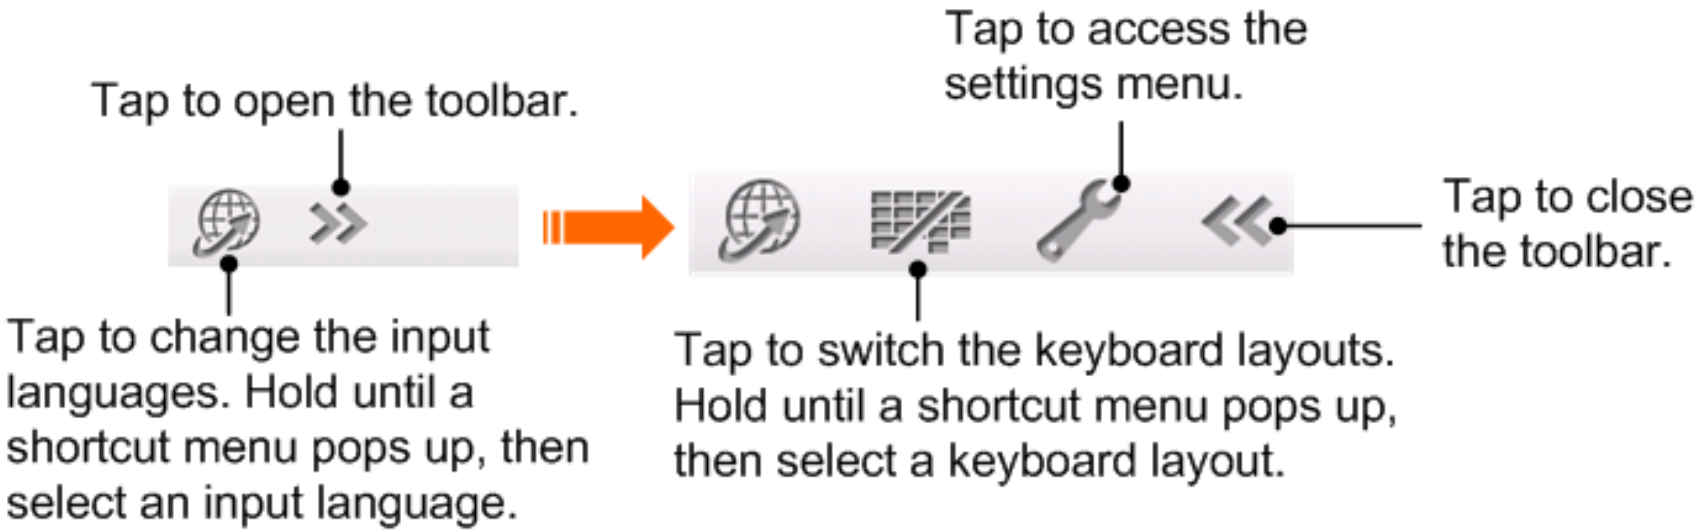
- Reduced keyboard



- Phone keypad



- Using the tool bar



Notes:

The icon is available when more than one language is activated. You can select more input languages by pressing the **Menu Key > Settings > Language & keyboard > XT9 Text Input > Languages and settings** from Home Screen.

Entering Text through the On-screen Keyboard

1. Enter a field that needs text or numbers.
2. Tap or hold the letters on the keyboard to enter your text.

Entering Numbers or Symbols

1. Enter a field that needs text or numbers.
2. Tap 
/

to open the number panel.
3. Select the numbers or symbols.

Touch Input Settings

You can configure the touch input settings by tapping the **Menu Key > Settings > Language & keyboard** from Home Screen.

Select language

Select the language you used.

XT9 Text Input

- **Languages and settings:** Select input languages. Tap a language to set up keyboard layout, word suggestion settings, key input settings, trace input settings, and handwriting input settings.
- **Preferences:** Set up keypress vibration, keypress sound, auto-capitalization, and auto-punctuation.
- **About:** View the XT9 version information.

Android keyboard

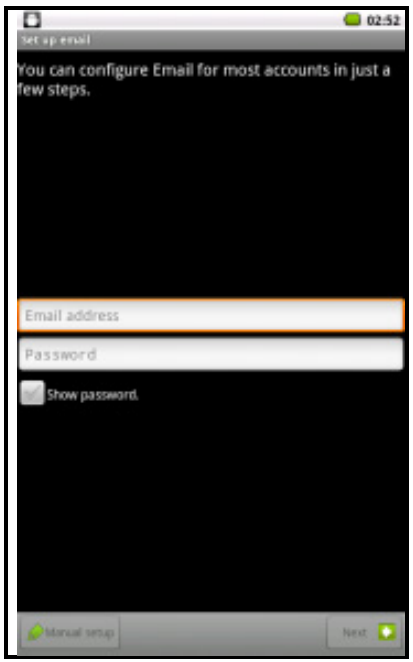
- **Vibrate on keypress**: Enables vibration feedback as you touch on the keyboard.
- **Sound on keypress**: Enables the sound feedback as you touch on the keyboard.
- **Auto-capitalization**: Select the check box to capitalize the fist letter of each sentence automatically.
- **Voice input**: Enables you to input by voice instead of typing.
- **Input languages**: Select the input language.

Using Email

Tap the **Home Key >** **> Email**. You can enter the Email Screen to setup your Email account and exchange Emails.

Creating an Email account

1. Enter your Email address and password, then tap **Next** when you enter the Email Screen for the first time.



2. Select the type of your account and tap **Next.**
3. Edit the incoming server settings and then tap **Next/Next[Check]**.

   If you tap **Next[Check]**, your device will check the incoming server settings and finish the setup automatically. If you are notified that setup could not be finished, you might need to correct some settings to finish it. If there is any problem, please contact your mobile service provider and Email service provider.
4. Edit the outgoing server settings and tap **Next/Next[Check]**.

   If you tap **Next[Check]**, your device will check the outgoing server settings and finish the setup automatically.
5. Set the Email checking frequency, select whether to use this account by default or be notified when Email arrives, and then tap **Next**.
6. Give your account a name and set a name displayed on outgoing message, and then tap **Done**.

Composing and sending an Email

After creating an Email account, you can compose and send Email messages.

1. Tap the **Menu Key > Compose** from the Email Screen.
2. Tap the **To** field and enter the recipient's address.

   When you enter the address, the matching addresses saved in your **Contacts** will be displayed. You can tap the recipient from the list.

   Tips:

   You can also tap the **Menu Key > Add Cc/Bcc** to add recipients.
3. Enter the subject and the content of your Email.
4. Tap **Send**.

Reply to or Forward an Email

1. Open the Email you want to reply to or forward from Email Screen.
2. Tap **Reply** or the **Menu Key > Forward** to reply to/forward the Email.

   You can also tap **Reply all** to reply to all recipients of the Email.

3. Enter the contents/recipients of your Email.
4. Tap **Send**.

Email Settings

Tap the account you want to set from the Email Screen and tap the **Menu Key > Account settings**. You can get the Email settings.

General settings

- **Account name**: Set your account name.
- **Your name**: Set the name displayed on outgoing message.
- **Email address**: View or edit the email address.
- **Use signature**: Select to use signature.
- **Signature**: Edit your signature.
- **Email check frequency**: Set the email checking frequency.
- **Power-saving mode**: Enable the email synchronization time intelligent adjustment.

- **Default account**: Select the check box to send email from this account by default.
- **Sync deleted message**:

Notification settings

- **Email notifications**: Select to be notified in status bar when Email arrives.
- **Select ringtone**: Select the ringtone for incoming Email notification.
- **Vibrate**: Select to be notified by vibration with ringtones when Email arrives.

Server settings

- **Incoming settings**: Set the incoming server settings.
- **Outgoing settings**: Set the outgoing server settings.

Getting Connected

Connecting to the Internet

Your device's networking capabilities allow you to access the Internet.

Ways of Connecting to the Internet

You can use the default connection settings to connect to the Internet through Wi-Fi.

Wi-Fi

Wi-Fi provides wireless Internet access over distances of up to 300 feet (100 meters).

Turn on Wi-Fi

1. Tap the **Home Key >** **> Settings > Wireless & networks.**
2. Select the **Wi-Fi** check box to turn Wi-Fi on.

Add a Wi-Fi network

1. Tap the **Home Key >** **> Settings > Wireless & networks > Wi-Fi settings.**

   The Wi-Fi network names and security settings (open network or secured network) of detected Wi-Fi networks are displayed in the **Wi-Fi networks** section.

2. Tap a network to connect.

   ▸ If you select an open network, you will be automatically connected to the network.

   ▸ If you select a secured network, you will need to input the wireless password.

Check the Wi-Fi network status

You can check the Wi-Fi network status from the status bar and wireless controls.

1. Check the icon in the status bar.

2. Tap the **Home Key >** **> Settings > Wireless & networks > Wi-Fi settings**, then tap the wireless network that the device is currently connected to.

   You can check the network status from the pop-up window.

Using Browser

You can use your Browser to browse most of the websites. Some web pages may not be displayed properly as some specific web page technologies, such as Flash, are not supported by the browser.

Opening Browser

Tap the **Home Key >** **> Browser** to start this function.

Opening Web Pages

In **Browser**, you can open web pages through the following ways.

1. Tap the address bar to enter the website you want to browse, and tap **Go**.
2. Tap the **Menu Key > Bookmarks** and select an item to open.
3. Select an item from **Most visited**/**History** tab of Bookmarks Screen.

Browsing Options

When browsing web pages, you can do some operations.

1. Tap the **Menu Key > Refresh** to refresh the page.
2. Tap the **Menu Key > More** to pop-up more options:
   - **Forward:** Go to the next page.
   - **Add bookmark:** Set the current page as bookmark.
   - **Find on page:** Enter the search item to view the search result.
   - **Select text:** Slide on the page to select the text you want to copy. Your FileMate Light automatically copies the selected text to the clipboard.
   - **Page info:** View the page information.
   - **Share page:** Send the page by **Bluetooth**, **Email**, **Facebook**, **Gmail**, or **Twitter**.
   - **Downloads:** View the download information.
   - **Settings:** Set the browser.

Rotate your device sideways to view the landscape Browser Screen if you select the **Auto-rotate screen** check box in **Display settings** by tapping **Home Key >** **> Settings > Display**.

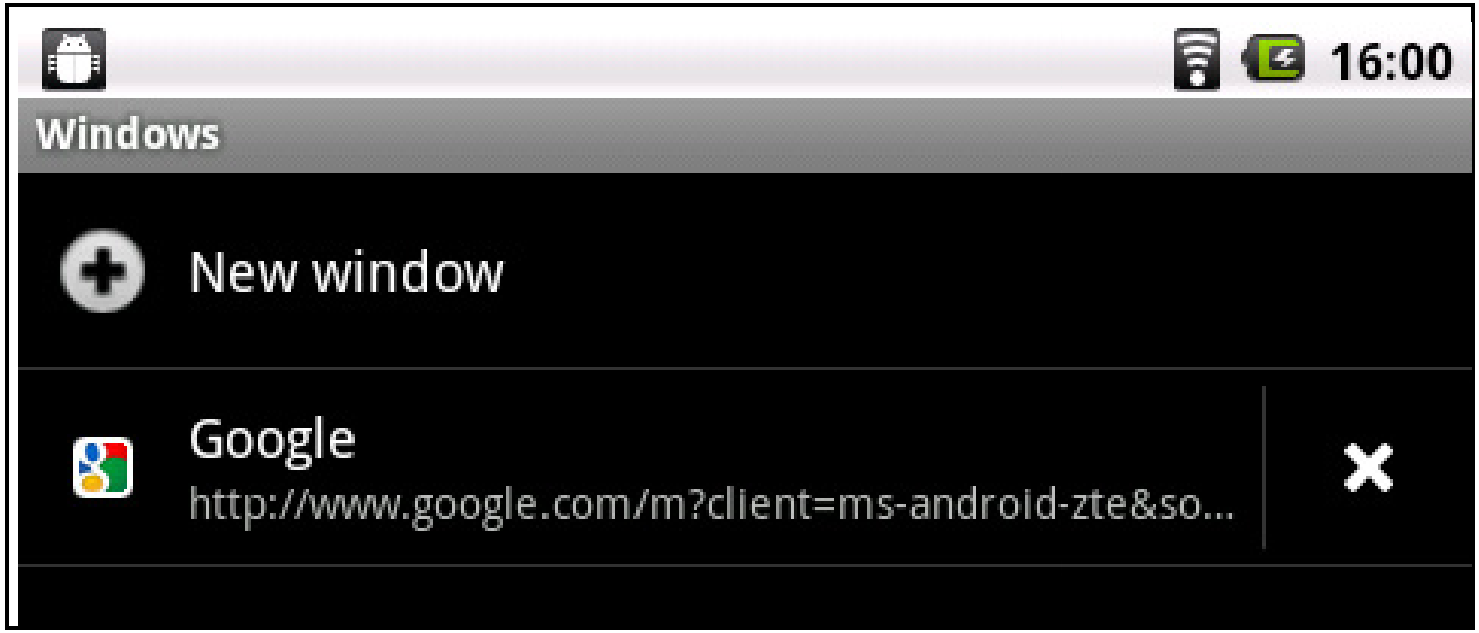
Open a new browser window

1. Tap the **Menu Key > New window** to open a new browser window in browser.
2. Tap the address bar to enter the website you want to browse.

Switch between different browser windows

If you have more than one browser window opened, you can switch between these windows.

1. Tap the **Menu Key > Windows** to view all the windows you opened.



2. Tap the page you want to browse.

Tips:

You can also tap ✕ to close a window.

Open links in web pages

1. Open a web page that contains a link.
2. Tap a link to open the page.

   You can also hold on the link to open the shortcut menu:

- **Open**: Open the web page.
- **Open in new window**: Open the web page in a new window.
- **Bookmark link**: Save the link to your **Bookmarks**.
- **Save link**: Download the linked web page to your FileMate Light.
- **Share link**: Send the link by **Bluetooth**, **Email**, **Facebook**, **Gmail**, or **Twitter**.
- **Copy link URL**: Copy the link to the clipboard.

Download applications from web pages

1. Open a web page that contains an application link.
2. Tap the link or hold on the link and select **Save link** to download the application to your FileMate Light.

Notes:

Downloaded applications are saved in your microSD card.

Using Bookmarks

You can save your frequently-used pages as bookmarks on your FileMate Light.

Add a new bookmark

1. Open a web page.
2. Tap the **Menu Key > Bookmarks.**
3. Tap **Add**.
4. Enter a name of the bookmark and tap **OK**.

Edit a bookmark

1. Open a Browser window.
2. Tap the **Menu Key > Bookmarks.**
3. Select an item you want to edit and hold on it until the shortcut menu pops up.
4. Select **Edit bookmark.**
5. Edit the name or location, and then tap **OK** to save it.

Delete a bookmark

1. Open a Browser window.
2. Tap the **Menu Key > Bookmarks.**
3. Select an item you want to delete and hold on it until the shortcut menu pops up.
4. Select **Delete bookmark** and tap **OK** to confirm the deletion.

Browser Settings

You can set the Browser text size, home page etc. by tapping the **Menu Key > More > Settings** from a browser window.

Page content settings

- **Text size**: Adjust the browser text size.
- **Default zoom**: Set the browser default zoom.
- **Open pages in overview**: Select to show overview of newly opened pages.
- **Text encoding**: Select a text encoding type.

- **Block pop-up windows**: Select to block pop-up windows.
- **Load images**: Select to show the images of web pages.
- **Auto-fit pages**: Select to format the web pages to fit the screen.
- **Landscape-only display**: Display the web pages only in landscape screen orientation.
- **Enable JavaScript**: Select to enable JavaScript.
- **Enable plug-ins**: Select to enable plug-ins.
- **Open in background**: Select to open new windows behind the current one.
- **Set home page**: Select to edit the home page web site.

Privacy settings

- **Clear cache**: Delete all the cached page contents.
- **Clear history**: Clear the browser navigation history.
- **Accept cookies**: Select to allow sites to save and read cookies.
- **Clear all cookie data**: Clear the browser cookies.

- **Remember form data**: Select to remember the data you type in forms for later use.
- **Clear form data**: Clear the saved form data.
- **Enable location**: Select to allow sites to request access to your location.
- **Clear location access**: Select to clear access for all websites.

Security settings

- **Remember passwords**: Select to save usernames and passwords for web sites.
- **Clear passwords**: Clear the saved passwords.
- **Show security warnings**: Select to show warnings if there is a problem with a site's security.

Advanced settings

- **Website settings**: View advanced settings for individual websites. Only available for some websites.
- **Reset to default**: Clear all browser data and reset all settings to default.

Bluetooth

Bluetooth is a short-range wireless communication technology. Wireless devices with Bluetooth capabilities can exchange information within a distance of about 10 meters without any physical connection. The Bluetooth devices must be paired before the communication is performed.

Turning on/off Bluetooth

1. Tap the **Home Key >** **> Settings > Wireless & networks.**
2. Select the **Bluetooth** check box to turn Bluetooth on.

The icon will be displayed in the status bar. If you want to turn Bluetooth off, clear the **Bluetooth** check box.

Notes:

By default, Bluetooth is turned off. If you turn it on, and then turn off your device, Bluetooth is also turned off. When you turn on your device again, Bluetooth turns on automatically.

Making your device visible

Other devices with Bluetooth capabilities can detect your FileMate Light, establish a partnership, or use a Bluetooth service.

1. Tap the **Home Key >** **> Settings > Wireless & networks > Bluetooth settings.**
2. Select the **Bluetooth** check box if needed.
3. Select the **Discoverable** check box to make your device visible.

Change your device name

1. Tap the **Home Key >** **> Settings > Wireless & networks > Bluetooth settings.**
2. Select the **Bluetooth** check box if needed.
3. Tap **Device name.**
4. Enter the name and tap **OK**.

Pair with another Bluetooth device

You can pair your device with another device that has Bluetooth capabilities. Once you do this, the two devices must have Bluetooth turned on but do not need to be visible for you to exchange information between them.

1. Tap the **Home Key >** **> Settings > Wireless & networks > Bluetooth settings.**
2. Tap **Scan for devices.**

   Your FileMate Light will display all reachable Bluetooth devices in the **Bluetooth devices** section.
3. Tap the device you want to pair with.
4. If necessary, type your PIN to pair and tap **OK**.

Tips: The same PIN should be entered on the other device.

Experiencing Multimedia

Camera

Your FileMate Light comes with a 3.2–megapixel camera that lets you capture sharp pictures.

Opening Camera

Tap the **Home Key >** **> Camera** to open the camera.

Notes:

You can switch from the camera to the camcorder quickly: Drag the switch up.

Taking Pictures

Aim the camera at the subject and then tap to take the shot.

▸ Tap the picture at the bottom of right corner (portrait mode) of your Camera Screen to view the picture just captured.

▸ Tap the **Menu Key > Gallery** to view all of your pictures.

Camera Settings

Tap in the camera screen to adjust the camera settings.

- **Focus mode**: Tap to set camera to use its Autofocus feature (**Auto**).
- **Exposure:** Tap to adjust the exposure in the range of **+2** to **-2**.
- **Picture size**: Tap to select the size (in pixels) of your captured pictures.
- **Picture quality**: Tap to adjust the picture quality.
- **Color effect**: Tap to select the picture effect.
- **Select ISO**: Tap to set the ISO level to 100, 200, 400, or 800, or set it back to Auto. Higher ISO numbers are better for taking pictures in low light conditions.
- **Anti Banding**: Select to adjust preview images automatically or for specified AC frequencies, in order to avoid striate previews caused by interference.

- **Saturation**: Tap to adjust the saturation.
- **Contrast**: Tap to adjust the contrast. Higher contrast ratio enables you to easily see the sharp colors of blue, red or green against any black color.
- **Sharpness**: Tap to adjust the saturation.
- **Camera settings**: Restore the camera settings to default.

Tap to select to record location in picture data.

Tap to adjust the white balance. White balance enables the camera to capture colors more accurately by adjusting to the current lighting environment.

Tap **Zoom** to zoom in or zoom out the image.

Camcorder

Camcorder enables you to shoot video clips.

Opening Camcorder

Tap the **Home Key** > **> Camcorder** to open the camcorder.

Notes:

You can switch from the camcorder to the camera quickly:

▸ Drag the switch down.

Shooting Videos

1. Tap to start shooting.
2. Tap to stop shooting.

Notes:

▸ Tap the picture at the bottom of right corner (portrait mode) of your camcorder screen to view the video clip just shot.

▸ Tap the **Menu Key > Gallery** to view all of your video clips.

Video Settings

Tap in the camera screen to adjust the camcorder settings.

- **Color effect**: Tap to select the picture effect.
- **Video quality**: Select the video quality type.
- **Video Encoder**: Select the video encoder type.
- **Audio Encoder**: Select the audio encoder type.
- **Video duration**: Tap to set the video duration.
- **Camera settings**: Restore the camcorder settings to default.

Tap to adjust the white balance. White balance enables the camera to capture colors more accurately by adjusting to the current lighting environment.

Tap to select the video quality.

FM Radio

With the FM Radio, you can search for radio channels, listen to them, and save them on your device. Note that the quality of the radio broadcast depends on the coverage of the radio station in that particular area. The

wired headset works as an antenna, so always connect the headset when using the radio.

Opening FM Radio

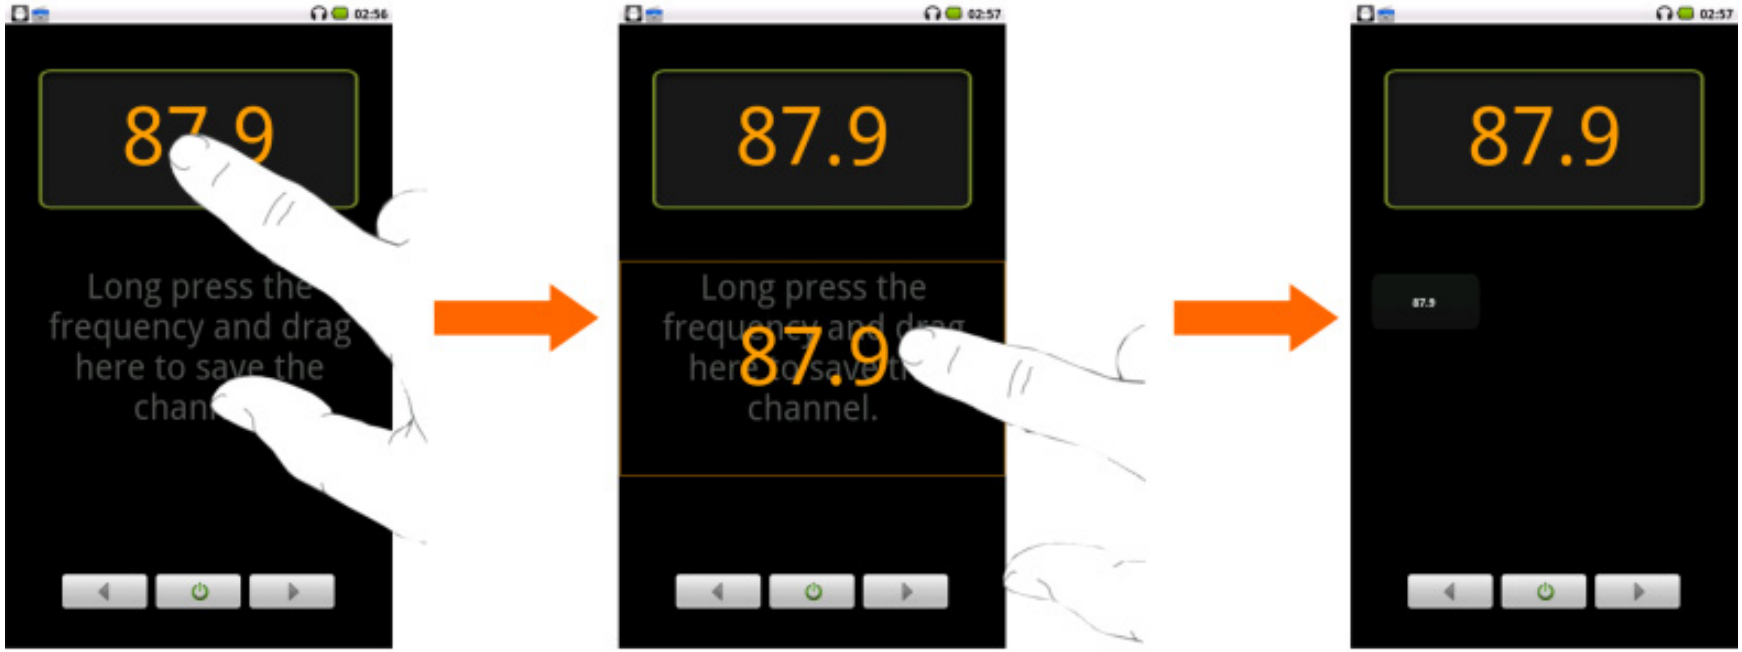
You need to insert a headset to your FileMate Light before opening the FM Radio.

Tap the **Home Key** > **> FM Radio** to open the FM radio.

After opening the FM radio, you will see the icon in the status bar.

Listening to FM Radio

1. Tap or to scan for channels automatically.
2. Tap the **Menu Key > Adjust**, and then tap to fine tune the frequency by +/–0.1 MHz manually.
3. Hold on a frequency until a red box appears on the screen, and then drag it to the box to save the frequency.



4. Press the **Volume Keys** to adjust the volume.
5. Tap the **Menu Key > Sleep** to set the FM radio sleep timer.
6. Tap to turn off the FM radio.

Music

You can play digital audio files from your memory card in Music.

Opening Music

You need to copy the audio files you want to play to your memory card first.

1. Tap the **Home Key** > **> Music** to open Music Screen.
2. Select a file to open.

Playing Music

1. Tap Artists/Albums/Songs/Playlists to get the songs you want to play.
2. Tap a song from the list to start playing.

Notes:

Press the **Volume Keys** to adjust the volume.

Creating Playlists

You can create some playlists to organize your music files.

1. Select a music file you want to add to a new playlist.
2. Tap and hold on the file until a shortcut menu pops up.
3. Tap **Add to playlist.**
4. Tap **New**.
5. Enter the playlist name and tap **Save**.

The playlist is created and the file you selected is added to the playlist.

Managing Your Playlists

1. Tap **Playlists** from the Music Screen to view all playlists.
2. Hold on the playlist you want to play or edit until a shortcut menu pops up.
   i. Tap **Play** to play the playlist.
   ii. Tap **Delete** to delete the playlist.

iii. Tap **Rename** to edit the playlist name.

Add songs to your playlist

1. Open the folder where the song you want to add to a playlist is.
2. Hold on the song until a shortcut menu pops up.
3. Select **Add to playlist.**
4. Select a playlist from the list.

Videos

You can use **Videos** to play your video files.

Opening Videos

Tap the **Home Key >** **> Videos** to open the video player.

Your device will show you all video files saved on your memory card.

Playing Videos

Copy the video file to your memory card before playing it.

1. Tap the video file you want to play from the Videos Screen.
2. Tap on the screen to show the control bar. You can pause, rewind, fast forward, or jump to any part of the video with the time bar.

Gallery

Gallery helps you view pictures and play back videos. For pictures, you can also do some basic editing tasks. For instance, set them as your wallpaper or contact icon, and share with your friends.

Sound Recorder

Sound Recorder enables you to record your voice memos that you can set as ringtone.

Opening Sound Recorder

Tap the **Home Key >** **> Sound Recorder** to open the sound recorder.

Notes: You need to install a memory card to use Sound Recorder.

Record Your Memo

1. Get the microphone near to your mouth.
1. Tap to start recording.
2. Tap to stop recording.
3. Tap to play back the voice recording.
4. Tap **OK** to save the voice recording, or tap **Discard** to discard the recording.

Notes:

You can find your recordings in **Home Key >** **> Music > Playlists > My recordings**.

Google Applications

Signing In to Your Google Account

Signing in to your Google Account enables you to synchronize Gmail, Calendar, web album, and contacts between your device and the web.

1. Tap a Google application, such as **Talk**.
2. Read the instructions and tap **Next**.
3. Tap **Sign in** if you have a Google account. Enter your user name and password, and then tap **Sign in**.

Tap **Create** if you do not have a Google account.

Using Gmail

Gmail is Google's web-based email service. Gmail is configured when you sign in to your Google account. Depending on your synchronization settings, Gmail on your FileMate Light is automatically synchronized with your Gmail account on the web.

Open Gmail

Tap the **Home Key >** **> Gmail.**

Creating and sending an Gmail

1. In the Inbox, press the **Menu Key** and then tap **Compose**.
2. Enter the message recipient's email address in the **To** field. If you are sending the email to several recipients, separate the email addresses with a comma. You can add as many message recipients as you want.
3. Enter the email subject, and then compose your email.
4. After composing your email, tap the **Menu Key > Send**.

Using Google Calendar

Tap the **Home Key >** **> Calendar** to use Google Calendar, Google's time management application. You can use the calendar to schedule appointments, including meetings and other events. Your

appointments will be displayed on the screen as are scheduled. All your appointments are synchronised to your Google account, which enables you to share your schedule, get your entire calendar on the go, and receive Email reminder for your upcoming events.

Using Google Talk

Google Talk is Google's instant messaging program, which enables you to communicate with other people that also use Google Talk.

Opening Google Talk

Tap the **Home Key >** **> Talk.**

Adding a new friend

You can only add people who have a Google account.

1. In the Friends list, press the **Menu Key > Add friend**.
2. Enter the Google Talk instant messaging ID or Google email address of the friend you want to add.

Viewing and accepting an invitation

1. In the Friends list, press the **Menu Key > Invites**.

   All chat invitations you have sent or received are listed on the pending invitations screen.
2. Tap a received pending invitation, and then tap **Accept** or **Decline**.

Starting a chat

1. Tap a friend in the Friends list.
2. Chat with your friend by entering text using the on-screen keyboard.
3. After entering your message, tap **Send**.

Settings

Basic Settings

Setting the Time and Date

1. Tap the **Home Key > Menu Key > Settings > Date & time.**
2. Clear the **Automatic** check box if you want to set time and date by yourself.
3. Configure the time and date settings:

   – Tap **Set date**. Adjust the date, and tap **Set** to save it.

   – Tap **Select time zone** and tap the area where you are.

   – Tap **Set time**. Adjust the time, and tap **Set** to save it.

   – Tap the check box behind **Use 24–hour format** to change the time format.

   – Tap **Select date format** and select the type you like.

Display Settings

By tapping the **Home Key > Menu Key > Settings > Display**, you can configure the display settings, such as brightness, auto-rotate screen, animation, and screen timeout.

Adjust the screen brightness

1. Tap **Brightness**.
2. Adjust the brightness and tap **OK**.

Adjust the delay before the screen turns off

1. Tap **Screen timeout**.
2. Select the time from the list.

Switch the screen orientation automatically

You can select to switch your screen orientation to landscape or portrait mode automatically when rotating your FileMate Light.

Select the **Auto-rotate screen** check box.

Show animation when opening/closing windows

You can select to show an animation when opening or closing windows.

1. Tap **Animation**.
2. Select the animation type you'd like to use.

If you want to disable this function, select **No animations**.

Sound Settings

By tapping the **Home Key > Menu Key > Settings > Sound**, you can configure the sound settings, such as ringtones and notifications.

Set the default notification ringtone

1. Select **Notification ringtone** in **Notifications** section.
2. Scroll the ringtone list and select one to set as the default notification ringtone.
3. Tap **OK** to save.

Switch your device to silent mode

Select the **Silent mode** check box in **General** section.

The silent icon will appear in the status bar.

Switch your device to vibration mode

Tap **Vibrate** and select vibration mode in the **General** section.

If your A100 is already in silent mode, the vibration icon will appear in the status bar.

Enable the haptic feedback

You can get the vibration feedback while pressing the soft keys and on certain UI interfaces if you have enabled haptic feedback.

1. Tap the **Home Key >** **> Settings > Sound.**
2. Select the **Haptic feedback** check box.

Adjust the media, alarm and notification volume

If you want to set the ringer volume, make sure your device is not in silent mode.

1. Tap **Volume** in the **General** section.

2. Adjust the **Media**, **Alarm** and **Notification** volume and tap **OK** to save.

Tips:

You can adjust the ringer volume quickly by pressing the **Volume Keys** from any screen.

Enable the screen selection tones

You can set your FileMate Light to play sound while making a selection by touching the screen.

Select the **Audible selection** check box in the **Feedback** section.

Enable Dolby Mobile

You can enable Dolby Mobile for better sound quality.

When Dolby Mobile is on, you can tap the **Menu Key > Dolby Mobile Settings** to select a music mode when playing the music track.

Language Settings

You can change the system language of your device.

Change the language of your operating system

1. Tap the **Home Key >** **> Settings > Language & keyboard > Select language.**
2. Select a language from the locale list to set it as the system language.

Security Settings

You can protect your device from unauthorized use.

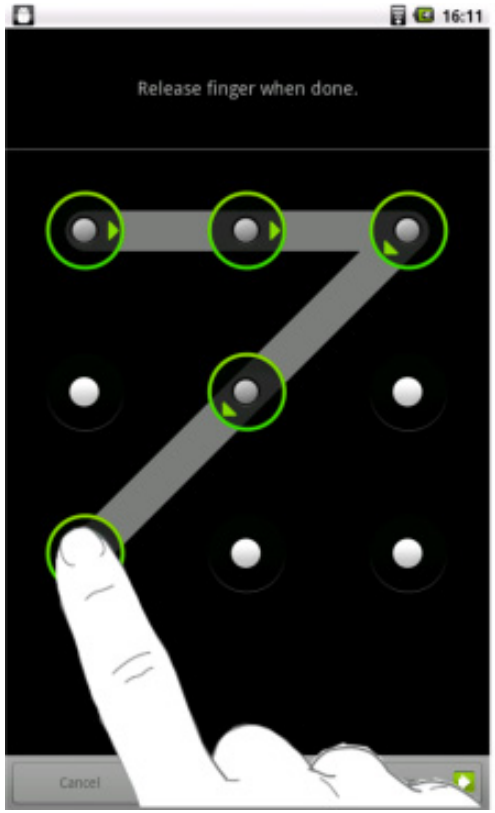
Protecting Your FileMate Light with a Screen Lock

Set the screen unlock pattern

You can protect your FileMate Light from unauthorized use by creating a personal screen unlock pattern.

1. Tap the **Home Key >** **> Settings > Location & security > Set up screen lock**.

2. Tap **Pattern**.
3. Read the instructions and tap **Next**.
4. Watch the example pattern and tap **Next**.
5. Draw your own pattern and tap **Continue**.



6. Draw the pattern again and tap **Confirm**.

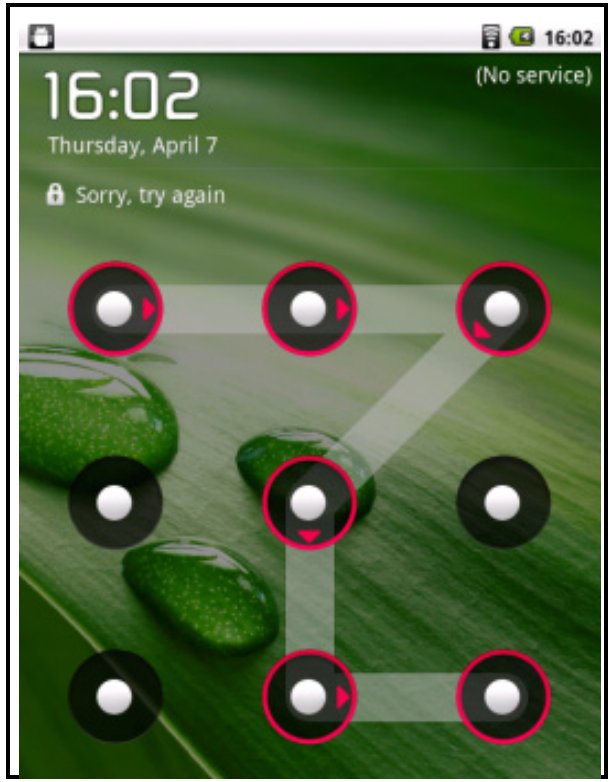
Lock the screen

Press the **Power Key** to lock the screen.

Unlock the screen with a pattern

1. Press the **Power Key**.
2. Draw the pattern you set to unlock the screen.

If you make a mistake, your FileMate Light will ask you to try again.



Setting Up Credential Storage

You can select to allow applications to access secure certificates and other credentials.

Enable secure credentials

1. Tap the **Home Key >** **> Settings > Location & security**.
2. Tap **Set password** to create a password.

   Tips:

   You can also install encrypted certificates from microSD card by tapping **Install from SD card**.

Delete credentials

1. Tap the **Home Key >** **> Settings > Location & security**.
2. Tap **Clear storage** to clear credentials.

Managing Memory

Managing Your Memory Card

View the space information

Tap the **Home Key >** **> Settings > SD card & device storage**.

You can view the **Total space**/**Available space** information in the **SD card** section.

Unmount your memory card

1. Tap the **Home Key >** **> Settings > SD card & device storage**.
2. Tap **Unmount SD card**.

Notes:

The icon will appear in the status bar.

Format your memory card

1. Unmount your memory card.
2. Tap **Format SD card**.
3. Tap **Format SD card** to confirm.

Managing Internal Storage

View the device space information

1. Tap the **Home Key >** **> Settings > SD card & device storage**.

2. Scroll down to view the **Available space** in the **Internal device storage** section.

Reset to factory settings

1. Tap the **Home Key >** **> Settings > Privacy**.
2. Tap **Factory data reset**.
3. Tap **Reset device**.
4. Tap **Erase everything**.

Application Settings

Managing Applications

You can view and manage the applications installed in your device.

View the applications installed in your device

Tap the **Home Key >** **> Settings > Applications > Manage applications**.

Your FileMate Light will show you the applications in a list.

Allow the installation of non-Market applications

1. Tap the **Home Key >** **> Settings > Applications**.
2. Select the **Unknown sources** check box.

Install an application

You can install an application from the Android Market by selecting the item you want to download and tap **Install**.

You can also install a non-Marketing application if you have allowed the installation of it. Make sure that you select an application developed for your device and processor type before installing it.

1. Tap the **Home Key >** **> Filer**, and open the folder where the application you want to install is.
2. Tap the application to start installation.
3. Read the installation instructions that come with the application and follow it to complete the setup.

Remove an application

You can uninstall any application that you have downloaded and installed from Android Market.

1. Tap the **Home Key >** **> Settings > Applications > Manage applications**.
2. Tap the **Downloaded** tab.
3. Tap the application you want to uninstall, then tap **Uninstall**.
4. When prompted, tap **OK** to remove the application from your device.
5. Choose the reason for removing the application, then tap **OK**.

Uninstall third-party applications

1. Tap the **Home Key >** **> Settings > Applications > Manage applications**.
2. Tap on the application you want to remove.
3. Tap **Uninstall**, and tap **OK** to confirm.

Other Settings

Search Settings

You can manage search settings and history by tapping the **Home Key >** **> Settings > Search**.

Google Search Settings

- **Show web suggestions**: Select to show suggestions from Google as you type.
- **Use My Location**: Select to use **My Location** for Google search results and other Google service.
- **Search history**: Select to show personalized search history from your Google Account.
- **Manage search history**: Manage personalized search history with your Google Account.

Searchable Items Settings

When you search for information on your FileMate Light, only the

searchable items will be searched.

Clear shortcuts

Erases the list of previously chosen search results that appear as suggestions below the Google search box.

Speech Synthesis Settings

You can set the text-to-speech options by tapping the **Home Key >** **> Settings > Voice input & output > Text-to-speech settings**. Before you use this function, you should install the voice data.

Other Applications

Alarming

Set alarms

1. Tap the **Home Key >** **> Alarm**.
2. Tap the default alarm set to configure it or tap the **Menu Key > Add alarm** to create a new alarm.
3. Tap one alarm and select the **Turn on alarm** check box to enable alarm. You can edit the alarm items such as **Name**, **Time**, **Repeat**, **Snooze**, **Duration**, **Vibrate**, **Ringtone**, **Volume**, **Volume crescendo**, and **Delay**.

Global Time

Global Time is used to view the time of major cities in the world.

Note pad

Note pad is used to take down some memos.

Calculator

Open Calculator

Tap the **Home Key >** **> Calculator.**

Calculator function introduction

1. Enter a number.
2. Tap +/-/×/÷.
3. Enter another number.
4. Tap =.
5. Tap **CLEAR** to reset the calculator.

Tips:

Tap the **Menu Key > Advanced panel** to use scientific calculation.

Task Manager

You can use **Task Manager** to view and stop running applications.

Stopwatch

1. Tap the **Home Key >** **> Stopwatch**.
2. Tap **Start** to start timing.
3. Tap **Pause** to pause time and tap **Resume** to continue.
4. Tap **Reset** to reset the stopwatch.

News & Weather

You can check the weather and top news stories with **News & Weather.**

1. Tap the **Home Key >** **> News & Weather.**

Maps

You use Maps to find your current location; to view real-time traffic

conditions; to get detailed directions by foot, public transportation, bicycle, or car.

1. Tap the **Home Key >** **> Maps**.
2. Tap the **Search Maps** search box on the top to find the location you need.
3. Tap to find the place you need.

Places

Google Places helps you find all kinds of businesses near you.

1. Tap the **Home Key >** **> Settings > Location & security > Use GPS satellites**.
2. Tap the **Home Key >** **> Places**. Wait while you are being located. Your location, when found, is displayed at the bottom of the screen.
3. Select a business category and the information of that type of business near you will be displayed.
   You can also use the **Find places** search box on the top to find the

business you need.
Note: Tap **Add** to add new business categories.

4. Tap a result you are interested in and check out the details and reviews about that place. You can also see the place on Google Maps, find out how to get there.

Navigation

You can use **Google Navigation** to get turn-by-turn driving directions, both spoken and displayed on your screen.

1. Tap the **Home Key >** **> Settings > Location & security > Use GPS satellites**.
2. Tap the **Home Key >** **> Navigation**. Wait while you are being located.
   Your location, when found, is displayed at the bottom of the screen.

Latitude

Google's Latitude service is a social tool for sharing your location information with selected friends.

If you join Google Latitude, you can view your friends' locations on your maps and share your location and other information with them.

1. Tap the **Home Key >** **> Latitude.**
2. After signing in to your Google account, tap the **Menu Key > Join Latitude** to enable Latitude service.

Each time you launch Maps application, your location will be determined using GPS and your Latitude status will be updated. You can tap the **Menu Key > Latitude** in **Maps** or **> Latitude** to see your status as well as that of your selected friends.

In Latitude, tap the **Menu Key** to refresh the friends' status, see them on Maps, add new friends, or change privacy settings.

Specifications

Main Display dimension, resolution, color space		TFT 800*480 ,260K
Back Camera	Sensor Type	CMOS
	Still Image Capture Resolution	3.2M Pixels
Total internal memory		512MB
Removable memory card		Support microSD card
Maximum Capacity of memory card		32GB

Battery	Capacity	3400mAh
	Standby time	Approx. 300h (subject to network status)
	Voice talk time	Approx. 16h (subject to network status)

EC DECLARATION OF CONFORMITY

CE 1588 !

It is hereby declared that following designated product:

Product Type: Tablet Computer

Model No: 3FMT700A2-8G-R

Complies with the essential protection requirements of the Radio and Telecommunication Terminal Equipment Directive (EC Directive 1999/5/EC) and the Electromagnetic Compatibility Directive (2004/108/EC).
This declaration applies to all specimens manufactured identical to the samples submitted for testing/evaluation.
Assessment of compliance of the product with the requirements relating to the Radio and Telecommunication Terminal Equipment Directive (EC Directive 1999/5/EC) was performed by American TCB (Notified Body No.1588), based on the following standards:

Safety	EN 60950-1:2006
EMC	EN 301 489-1 V1.8.1; EN 301 489-7 V1.3.1; EN 301 489-17 V1.3.2; EN 301 489-19 V1.2.1;EN 301 489-24 V1.4.1; EN 55013:2001+A2:2006;EN 55020:2007;
