

FHB-36B & FHB-48B SERIES FOOD HOLDING BINS

Excalibur®
with **RELI-A-TEMP™**

Model FHB-36B
(Patented)

Prince Castle FHB-Series Full-size Food Holding Bins provide the capacity required for large foodservice operations while performing at peak energy efficiency. These bins are available in both 36" and 48" wide configurations to meet any operational need.

Each unit features two individually controlled holding chambers—upper and lower—each with fluorescent shatterproof lighting to illuminate foods. Each chamber can be uniquely configured with adjustable lane dividers and tilting racks to accommodate any product or groups of products.

New Reli-A-Temp™ infrared heater technology holds sandwich temperatures more consistent within the designated holding time than other types of heating systems. This exclusive heater design spreads the heat evenly over the entire food holding area, eliminating edge drop off. Food is kept at the desired serving temperature, never over cooked.

Constructed of durable stainless-steel and aluminum, the FHB-Series bins are backed by a two-year warranty.

STANDARD FEATURES

- 36" or 48" wide units with separate chambers—upper and lower.
- FHB-36B has a 72 product capacity—12 lanes. FHB-48B has a 96 product capacity—16 lanes.
