

# Palladio USB Bluetooth 100M

## DESCRIPTION

***New Palladio USB Bluetooth 100M, even more performing.***

Equipped with the new Class 1, Digicom's USB Bluetooth adapter is even more performing! Class 1 means more power, you will be able to reach distances up to 100 meters among devices of this type and up to 10 meters with Class 2 devices.

Palladio USB Bluetooth 100M has new drivers with voice functions; it will be possible to manage headsets and audio gateway.

For example when receiving a call on your Bluetooth phone you can answer with the headsets connected to your PC or you can connect the Bluetooth headset to your PC.

Palladio USB Bluetooth 100M directly connects to the USB port and it is powered by it.

It is supplied with the Mobile Phone Tools Software for the management of SMS, Address Book and GPRS connections of GSM Bluetooth phones (SonyEricsson T39/T68/T610, Nokia 6310, 7650, etc.)
