operation

# · Avoid placing your device and accessories near or in an airbag deployment area. Improperly installed wireless equipment can cause serious injury when airbags inflate rapidly.

#### Do not drop your device or cause impacts to your device

· Your device may be damaged or may malfunction If bent or deformed, your device may be damaged or parts may malfunction.

#### Ensure maximum battery and charger life

- Avoid charging your device for more than a week, as overcharging may shorten battery life. Over time, unused device will discharge and must be recharged before use.
- · Disconnect the charger from power sources when not in use
- Use the battery only for their intended purposes. Leaving batteries unused over time may reduce their lifespan and performance. It may also cause the batteries to malfunction or
- explode, or cause a fire.
- Follow all instructions in this manual to ensure the longest lifespan of your device and battery. Damages or poor performance caused by failure to follow warnings and instructions can void your manufacturer's warranty.
- Your device may wear out over time. Some parts and repairs are covered by the warranty within the validity period, but damages or deterioration caused by using unapproved accessories are not.

Any changes or modifications to your device can void your manufacturer's warranty. If your device needs servicing, take your device to a Samsung Service Centre.

se the device to

- Wipe your device or charger with a towel or an erase
- · Clean the battery terminals with a cotton ball or a towel
- · Do not use chemicals or detergents. Doing so may discolour or corrode the outside the device or may result in electric shock or fire

# Do not use the device for anything other than its intended

Your device may malfunction

#### Avoid disturbing others when using the device in public

Allow only qualified personnel to service your device Allowing unqualified personnel to service your device may result in damage to your device and will void your manufacturer's warranty.

#### Handle SIM cards, memory cards, or cables with care

- When inserting a card or connecting a cable to your device, make sure that the card is inserted or the cable is connected to the proper side
- Do not remove a card while the device is transferring or accessing information, as this could result in loss of data and/or damage to the card or device.
- Protect cards from strong shocks, static electricity, and electrica noise from other devices
- Do not touch gold-coloured contacts or terminals with your fingers or metal objects. If dirty, wipe the card with a soft cloth.
- · Inserting a card or connecting a cable by force or improperly may result in damage to the multipurpose jack or other parts of the

#### Ensure access to emergency services

Emergency calls from your device may not be possible in some areas or circumstances. Before travelling in remote or undeveloped areas, plan an alternative method of contacting emergency services personnel.

#### Protect your personal data and prevent leakage or misuse of information sensitiv

While using your device, be sure to back up important data Samsung is not responsible for the loss of any data

- When disposing of your device, back up all data and then reset your device to prevent misuse of your personal information
- · Carefully read the permissions screen when downloading applications. Be particularly cautious with applications that have access to many functions or to a significant amount of your personal information
- Check your accounts regularly for unapproved or suspicious use.If you find any sign of misuse of your personal information, contact your service provider to delete or change your account information.
- In the event your device is lost or stolen, change the passwords on your accounts to protect your personal informati
- Avoid using applications from unknown sources and lock your de with a pattern, password, or PIN.

#### Do not distribute copyright-protected material

Do not distribute copyright-protected material without the permiss of the content owners. Doing this may violate copyright laws. The manufacturer is not liable for any legal issues caused by the user's illegal use of copyrighted material

#### Malware and viruses

To protect your device from malware and viruses, follow these usage tips. Failure to do so may result in damages or loss of data that may not be covered by the warranty service

- · Do not download unknown applications
- · Do not visit untrusted websites.
- · Delete suspicious messages or email from unknown senders
- · Set a password and change it regularly.
- · Deactivate wireless features, such as Bluetooth, when not in use
- · If the device behaves abnormally, run an antivirus program to check for infection
- Run an antivirus program on your device before you launch newly downloaded applications and files.
- · Install antivirus programs on your computer and run them regularly to check for infection
- · Do not edit registry settings or modify the device's operating system

#### Specific Absorption Rate (SAR) certification information

#### THIS DEVICE MEETS INTERNATIONAL GUIDELINES FOR EXPOSURE TO RADIO WAVES

Your mobile device is a radio transmitter and receiver. It is designed not to exceed the limits for exposure to radio waves (radio frequency electromagnetic fields) recommended by international guidelines. The guidelines were developed by an independent scientific organisation (ICNIRP) and include a substantial safety margin designed to assure the safety of all persons, regardless of age and health.

The radio wave exposure guidelines use a unit of measurement known as the Specific Absorption Rate, or SAR. The SAR limit for mobile devices is 2.0 W/kg.

Tests for SAR are conducted using standard operating positions with the device transmitting at its highest certified power level in all tested frequency bands. The highest SAR values under the ICNIRP guidelines for the device model to the second seco for this device model are:

SAR values for European countries: The SAR values below are only for devices developed for use in European countries

Maximum SAR for this model and conditions under which it was recorded	
Head SAR	0.921 W/kg
Body-worn SAR	0.412 W/kg

During use, the actual SAR values for this device are usually well below the values stated above. This is because, for purposes of system efficiency and to minimise interference on the network, the operating power of your mobile device is automatically decreased when full power eded for the call. The lower the power output of the device, the is not ne ower its SAR value

A body-worn SAR test has been performed on this device at a separation distance of 1.5 cm. To meet RF exposure guidelines during body-worn operation, the device must be positioned at least 1.5 cm av from the body

Organisations such as the World Health Organisation and the US Food and Drug Administration have suggested that if people are concerned and want to reduce their exposure, they could use a hands-free accessory to keep the wireless device away from the head and body during use, or reduce the amount of time spent using the device. For more information, visit www.samsung.com/sar and search for you device with the model number

#### Correct disposal of this product

(Waste Electrical & Electronic Equipment)

 (Applicable in countries with separate collection systems) This marking on the product, accessories or literature indicates that the product and its electronic accessories (e.g. 1-2 charger, headset, USB cable) should not be disposed of with other household waste 

To prevent possible harm to the environment or human health from uncontrolled waste disposal, please separate these items from other types of waste and recycle them responsibly to promote the sustainable reuse of material resources.

Household users should contact either the retailer where they purchased this product, or their local government office, for details of where and how they can take these items for environmentally safe recycling. Business users should contact their supplier and check the terms and conditions of the purchase contract. This product and its electro accessories should not be mixed with other commercial wastes for

This product is RoHS compliant

#### Correct disposal of batteries in this product

(Applicable in countries with separate collection systems) This marking on the battery, manual or packaging indicates that the batteries in this product should not be disposed of with other household waste. Where marked, the chemica 1\_ð symbols Hg, Cd or Pb indicate that the battery contains rcury, cadmium or lead above the reference levels in EC Directiv 2006/66. If batteries are not properly disposed of, these substances can

cause harm to human health or the environment. To protect natural resources and to promote material reuse, please separate batteries from other types of waste and recycle them through your local, free battery return system.

#### **Declaration of Conformity**
