

SHARP SERVICE MANUAL

No. S19W2LC37A37M

LCD COLOR TELEVISION MODEL LC-37A37M

In the interests of user safety (required by safety regulations in some countries) the set should be restored to its original condition and only parts identical to those specified should be used.

OUTLINE

This model is based on the LC-32A37M and partially modified.

For the contents not covered in this Service Manual, accordingly, please refer to the LC-32A37M (SY8U6LC32A37M) Service Manual.

SAFETY PRECAUTION

IMPORTANT SERVICE SAFETY PRECAUTION

- Service work should be performed only by qualified service technicians who are thoroughly familiar with all safety checks and the servicing guidelines which follow:

■WARNING

1. For continued safety, no modification of any circuit should be attempted.
2. Disconnect AC power before servicing.

■BEFORE RETURNING THE RECEIVER

(Fire & Shock Hazard)

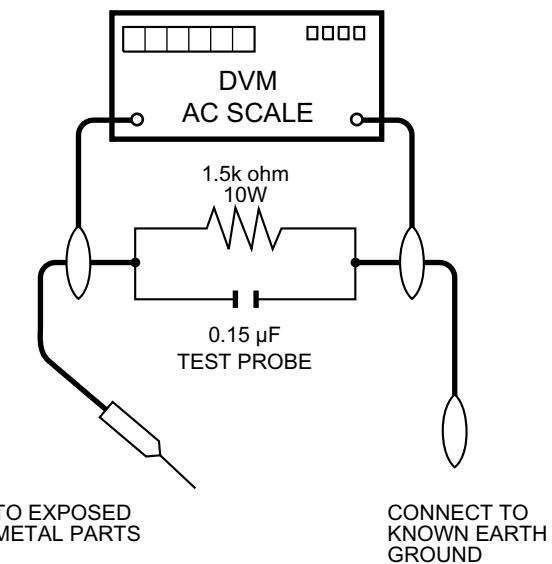

Before returning the receiver to the user, perform the following safety checks:

3. Inspect all lead dress to make certain that leads are not pinched, and check that hardware is not lodged between the chassis and other metal parts in the receiver.
4. Inspect all protective devices such as non-metallic control knobs, insulation materials, cabinet backs, adjustment and compartment covers or shields, isolation resistor-capacitor networks, mechanical insulators, etc.
5. To be sure that no shock hazard exists, check for leakage current in the following manner.
 - Plug the AC cord directly into a 110 ~ 240 volt AC outlet.
 - Using two clip leads, connect a 1.5k ohm, 10 watt resistor paralleled by a 0.15μF capacitor in series with all exposed metal cabinet parts and a known earth ground, such as electrical conduit or electrical ground connected to an earth ground.
 - Use an AC voltmeter having with 5000 ohm per volt, or higher, sensitivity or measure the AC voltage drop across the resistor.

- Connect the resistor connection to all exposed metal parts having a return to the chassis (antenna, metal cabinet, screw heads, knobs and control shafts, escutcheon, etc.) and measure the AC voltage drop across the resistor.

All checks must be repeated with the AC cord plug connection reversed. (If necessary, a non polarized adaptor plug must be used only for the purpose of completing these checks.)

Any reading of 0.74 Vrms (this corresponds to 0.5 mA rms AC.) or more is excessive and indicates a potential shock hazard which must be corrected before returning the monitor to the owner.

SAFETY NOTICE

Many electrical and mechanical parts in LCD color television have special safety-related characteristics.

These characteristics are often not evident from visual inspection, nor can protection afforded by them be necessarily increased by using replacement components rated for higher voltage, wattage, etc.

Replacement parts which have these special safety characteristics are identified in this manual; electrical components having such features are identified by "⚠" and shaded areas in the **Replacement Parts Lists and Schematic Diagrams**.

For continued protection, replacement parts must be identical to those used in the original circuit.

The use of a substitute replacement parts which do not have the same safety characteristics as the factory recommended replacement parts shown in this service manual, may create shock, fire or other hazards.

PRECAUTIONS FOR USING LEAD-FREE SOLDER

■Employing lead-free solder

- “All PWBs” of this model employs lead-free solder. The LF symbol indicates lead-free solder, and is attached on the PWBs and service manuals. The alphabetical character following LF shows the type of lead-free solder.

Example:

Sn-Ag-Cu

Indicates lead-free solder of tin, silver and copper.

Sn-Ag-Cu

Indicates lead-free solder of tin, silver and copper.

■Using lead-free wire solder

- When fixing the PWB soldered with the lead-free solder, apply lead-free wire solder. Repairing with conventional lead wire solder may cause damage or accident due to cracks.

As the melting point of lead-free solder (Sn-Ag-Cu) is higher than the lead wire solder by 40 °C, we recommend you to use a dedicated soldering bit, if you are not familiar with how to obtain lead-free wire solder or soldering bit, contact our service station or service branch in your area.

■Soldering

- As the melting point of lead-free solder (Sn-Ag-Cu) is about 220 °C which is higher than the conventional lead solder by 40 °C, and as it has poor solder wettability, you may be apt to keep the soldering bit in contact with the PWB for extended period of time. However, Since the land may be peeled off or the maximum heat-resistance temperature of parts may be exceeded, remove the bit from the PWB as soon as you confirm the steady soldering condition.

Lead-free solder contains more tin, and the end of the soldering bit may be easily corroded. Make sure to turn on and off the power of the bit as required.

If a different type of solder stays on the tip of the soldering bit, it is alloyed with lead-free solder. Clean the bit after every use of it.

When the tip of the soldering bit is blackened during use, file it with steel wool or fine sandpaper.

- Be careful when replacing parts with polarity indication on the PWB silk.

Lead-free wire solder for servicing

STEREO/BILINGUAL	NICAM: B/G, I, D/K A2 stereo: B/G		
Viewing angles	H : 176° V : 176°		
Audio amplifier	10W x 2		
Speakers	10 x 4 cm 2pcs		
Terminals	Rear	Antenna input	UHF/VHF 75 Ω DIN type
		INPUT 1	HDMI (HDMI input) (480I, 576I, 480P, 576P, 720P/50Hz, 720P/60Hz, 1080I/50Hz, 1080I/60Hz)
		INPUT 2	HDMI (HDMI input) (480I, 576I, 480P, 576P, 720P/50Hz, 720P/60Hz, 1080I/50Hz, 1080I/60Hz)
		INPUT 3	AUDIO in, COMPONENT in (480I, 576I, 480P, 576P, 720P/50Hz, 720P/60Hz, 1080I/50Hz, 1080I/60Hz)
		INPUT 4	AUDIO in, COMPONENT in (480I, 576I, 480P, 576P, 720P/50Hz, 720P/60Hz, 1080I/50Hz, 1080I/60Hz)
		INPUT 5	S-VIDEO in, VIDEO in, AUDIO in
		INPUT 6 (PC input)	15 pin mini D-sub, AUDIO in (common use with INPUT 1) (Ø 3.5 mm jack)
		OUTPUT	AUDIO out
		RS-232C	9 pin D-sub male connector
OSD language	English/Simplified Chinese/Traditional Chinese/Arabic		
Power Requirement	AC 110 - 240 V, 50/60 Hz		
Power Consumption	126 W (0.9 W Standby)		
Dimensions	without stand	916 (W) x 595 (H) x 123 (D) mm	
	with stand	916 (W) x 660 (H) x 255 (D) mm	
Weight	without stand	12.5 kg	
	with stand	14.5 kg	
Operating Temperature	0°C - 40°C		

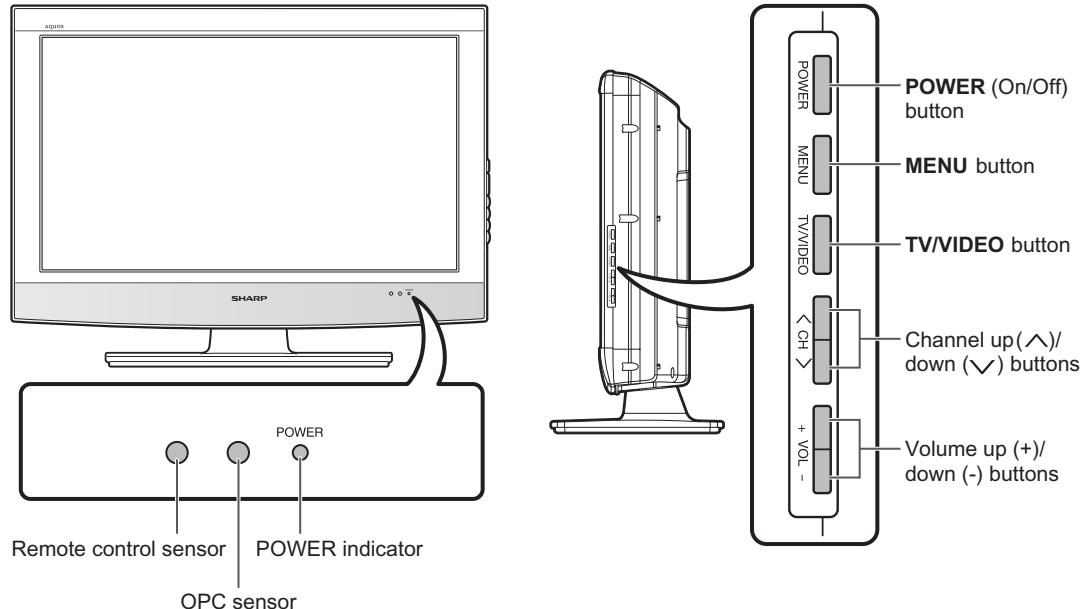

- As a part of policy of continuous improvement, SHARP reserves the right to make design and specification changes for product improvement without prior notice. The performance specification figures indicated are nominal values of production units. There may be some deviations from these values in individual units.

CHAPTER 2. OPERATION MANUAL

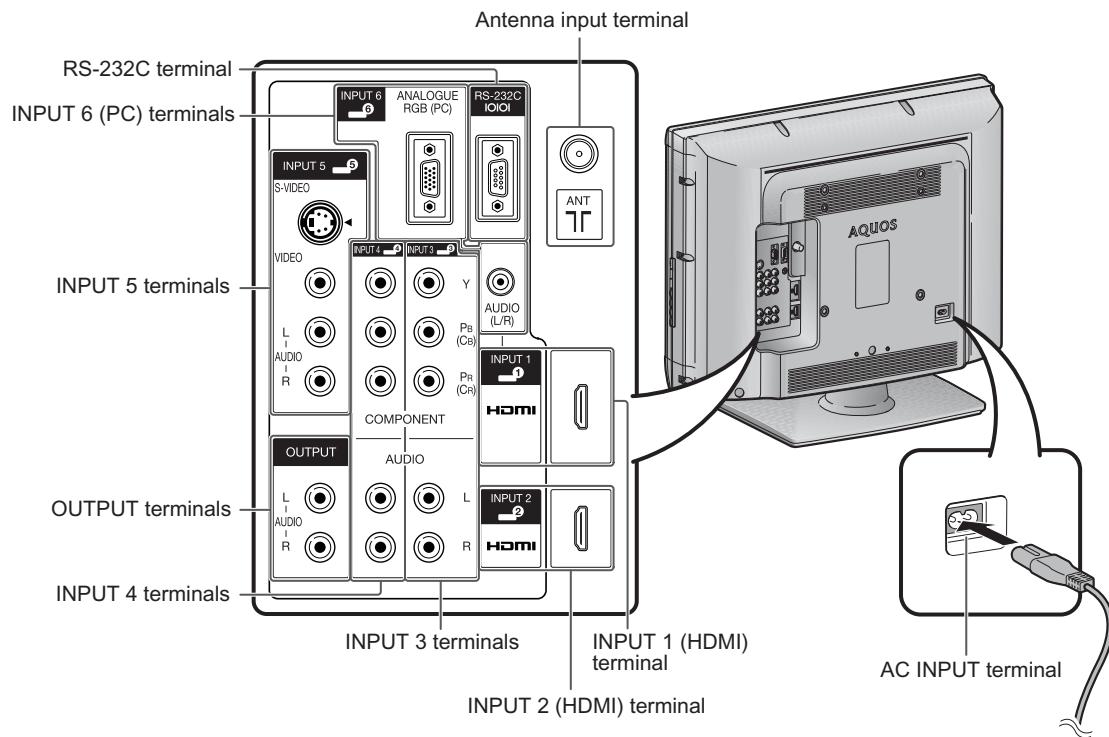

[1] OPERATION MANUAL

1. PARTS NAMES

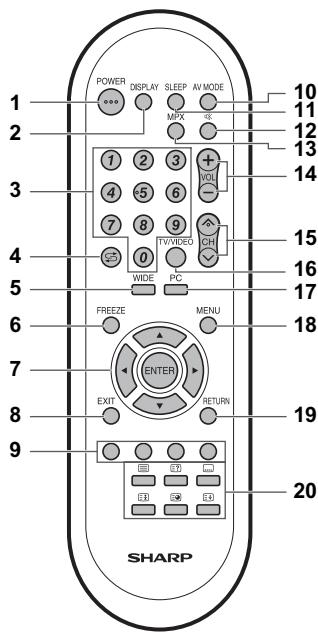

TV (Front/Side)

TV (Rear)

2. REMOTE CONTROL UNIT

1 POWER (STANDBY/ON)

To switch the power on and off.

2 DISPLAY

Display the channel or input information.

3 0 - 9

Set the channel.

TELETEXT mode: Set the page.

4 ⏵ (Flashback)

Press to return to the previous selected channel or external input mode.

5 WIDE

Change the wide image mode.

6 FREEZE

Freeze a motion picture on the screen.

7 ▲ / ▼ / ← / → (Cursor)

Select a desired item on the setting screen.

ENTER

Execute a command.

8 EXIT

Return to the default screen.

9 Colour (Red/Green/Yellow/Blue)

TELETEXT mode: Select a page.

10 AV MODE

Select an audio and video setting.

11 SLEEP

Set the Sleep timer.

0hr.30min. → 1hr.00min. → 1hr.30min.
Off ← 2hr.30min. ← 2hr.00min.

12 ✘ (Mute)

Press → Mutes sound.

Press again → Restores sound.

Mute will be cancelled after 30 minutes. However, the TV will not suddenly output loud sound as the volume level will be set to 0 automatically. Increase the volume level by pressing VOL +.

13 MPX

Select the sound multiplex mode.

14 VOL + / VOL -

Set the volume.

(+) Increase the volume.

(-) Decrease the volume.

15 CH ^ / CH √

TV input mode: Select the channel.

TELETEXT mode: Select the page.

(^) Increase the channel number.

(√) Decrease the channel number.

16 TV/VIDEO (INPUT SOURCE)

Select an input source.

17 PC

Directly select the PC terminal.

18 MENU

Display the menu screen.

19 RETURN

MENU mode: Return to the previous menu screen.

20 ☰ (TELETEXT)

Select the TELETEXT mode. (all TV image, all TEXT image, TV/TEXT image)

☒ (Reveal hidden for TELETEXT)

TELETEXT mode: Display hidden characters.

☒ (SUBTITLE for TELETEXT)

To turn the subtitles on and off.

☒ (Hold)

TELETEXT mode: Stop updating Teletext pages automatically.

Press ☒ again to release the hold mode.

☒ (Subpage)

Display the Teletext subpage directly.

☒ (Top/Bottom/Full)

TELETEXT mode: Set the area of magnification.

3. ATTACHING THE STAND

- Before attaching (or detaching) the stand, unplug the AC cord from the AC INPUT terminal.
- Before performing work spread cushioning over the base area to lay the TV on. This will prevent it from being damaged.

1 Confirm the screws supplied with the TV.

Screws (x4)

(used in step 3)

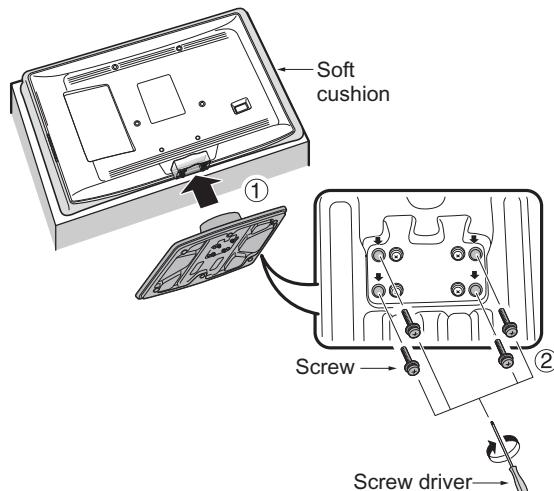

2 Insert the stand base to the stand post on the bottom of the TV. (①)

3 Insert and tighten the 4 screws into the 4 holes on the bottom of the stand base. (②)

NOTE

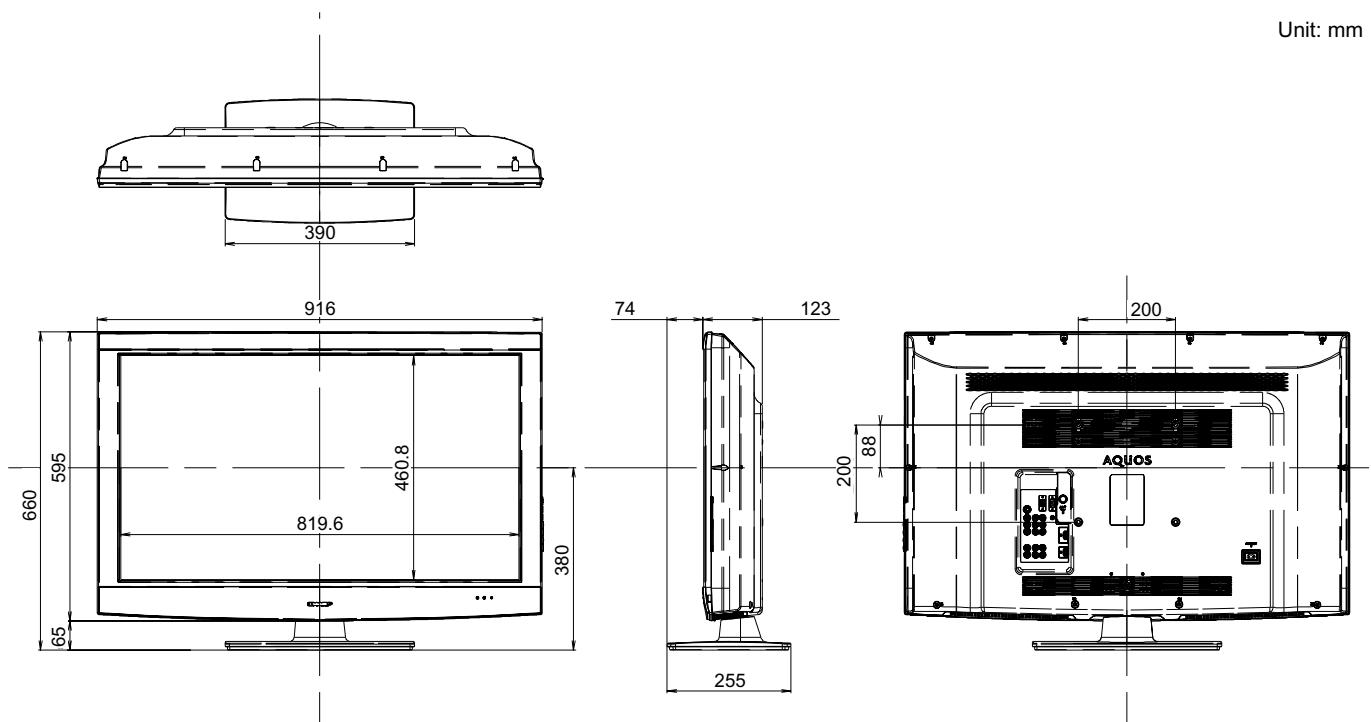

- To detach the stand, perform the steps in reverse order.

CHAPTER 3. DIMENSIONS

[1] DIMENSIONS

Unit: mm

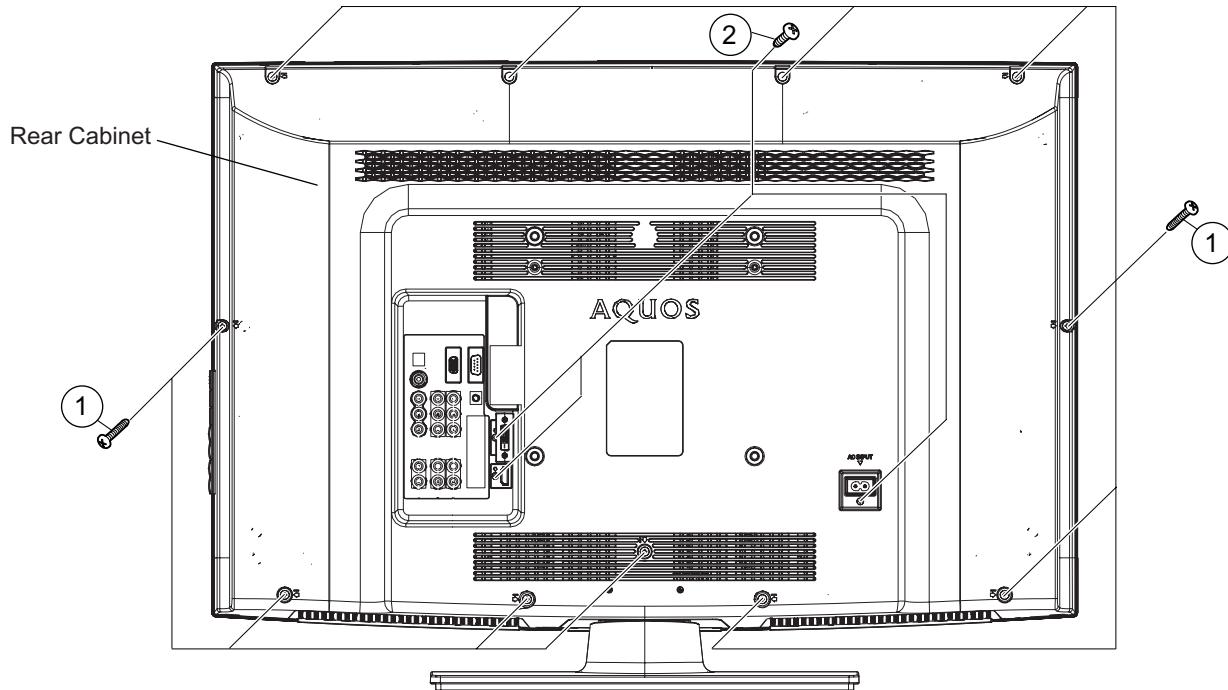

CHAPTER 4. REMOVING OF MAJOR PARTS

[1] REMOVING OF MAJOR PARTS

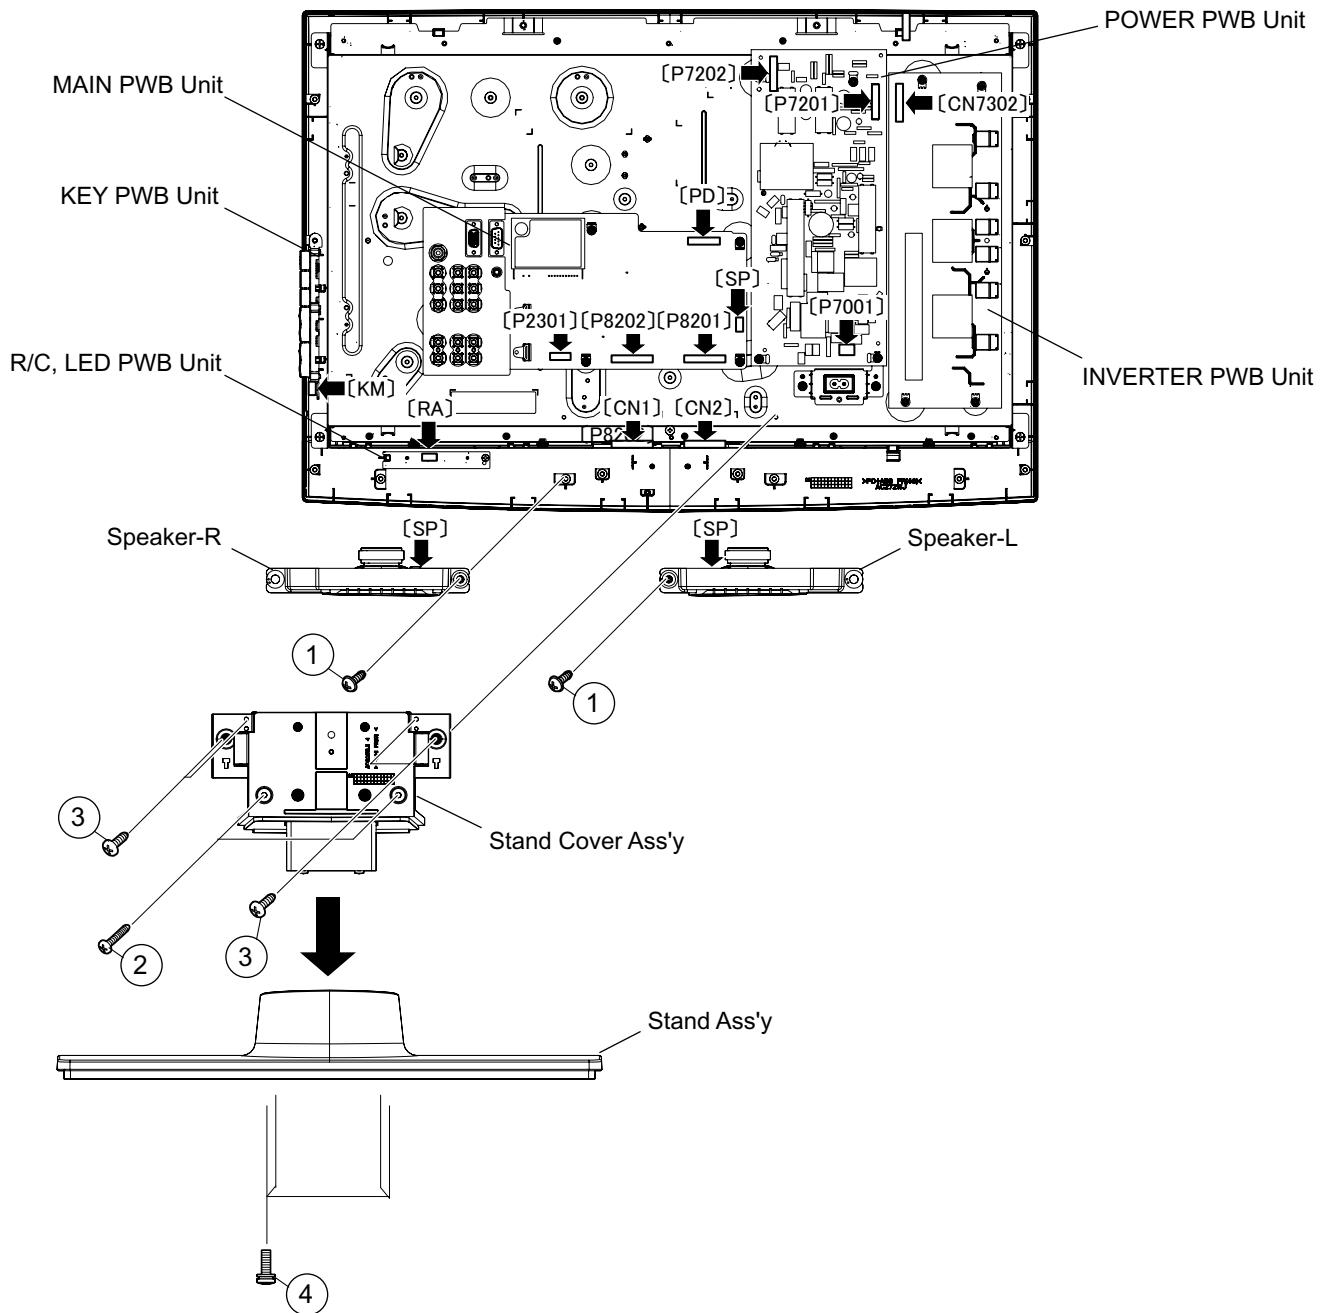

1. REMOVING OF REAR CABINET

1. Remove the 11 screws [1], 3 screws [2] and detach the Rear Cabinet.

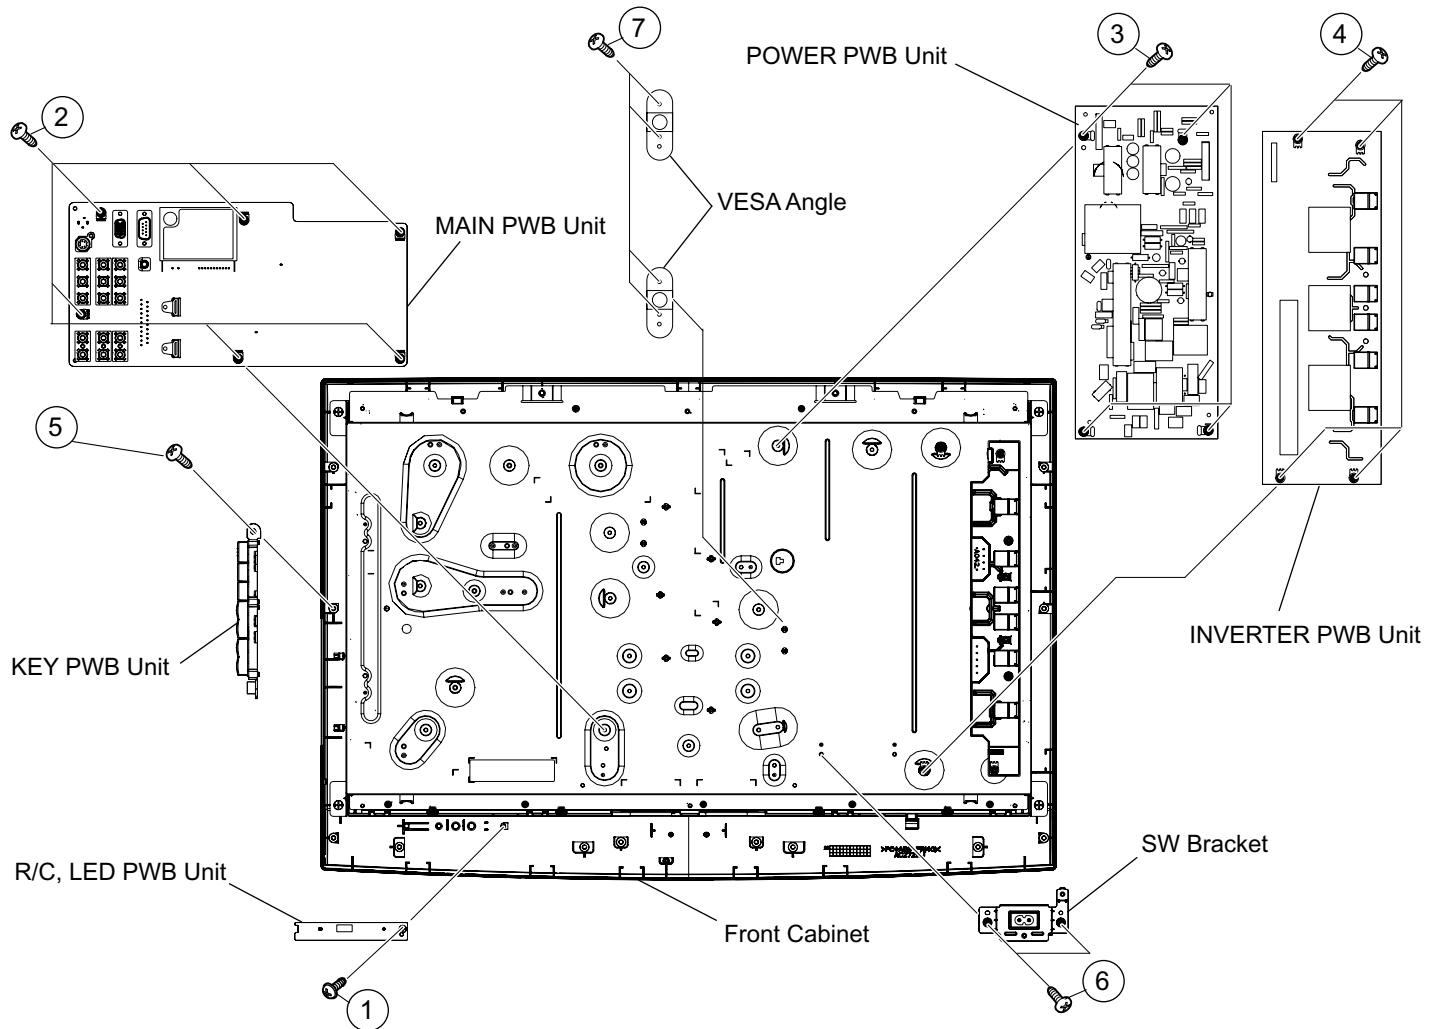

2. REMOVING OF CONNECTORS, SPEAKERS, STAND COVER ASS'Y AND STAND ASS'Y

1. Remove all the connectors from all the PWBS.
2. Remove 2 screws [1] and detach the Speaker-L and Speaker-R.
3. Remove the 2 screws [2], 4 screws [3] and detach the Stand Cover Ass'y.
4. Remove the 4 screws [4] and detach the Stand Ass'y.

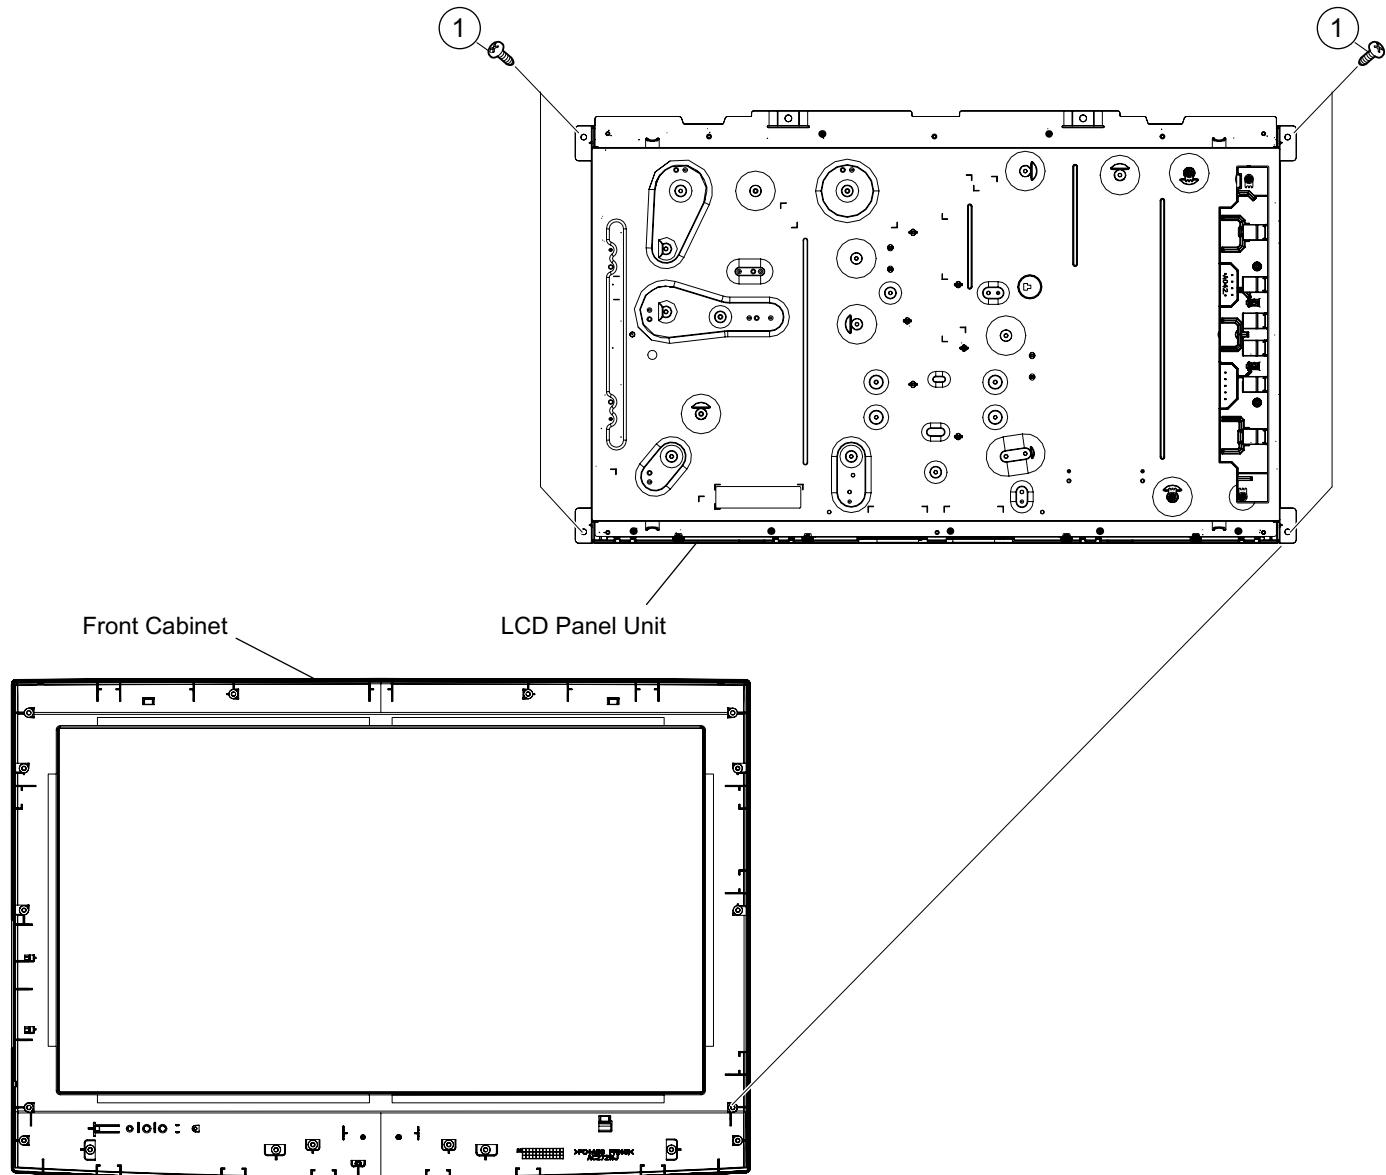

3. REMOVING OF PWB UNITS

1. Remove the 1 screw [1] and detach the R/C, LED PWB Unit.
2. Remove the 6 screws [2] and detach the MAIN PWB Unit.
3. Remove the 4 screws [3] and detach the POWER PWB Unit.
4. Remove the 4 screws [4] and detach the INVERTER PWB Unit.
5. Remove the 1 screw [5] and detach the KEY PWB Unit.
6. Remove the 2 screws [6] and detach the SW Bracket.
7. Remove the 4 screws [7] and detach the VESA Angle.

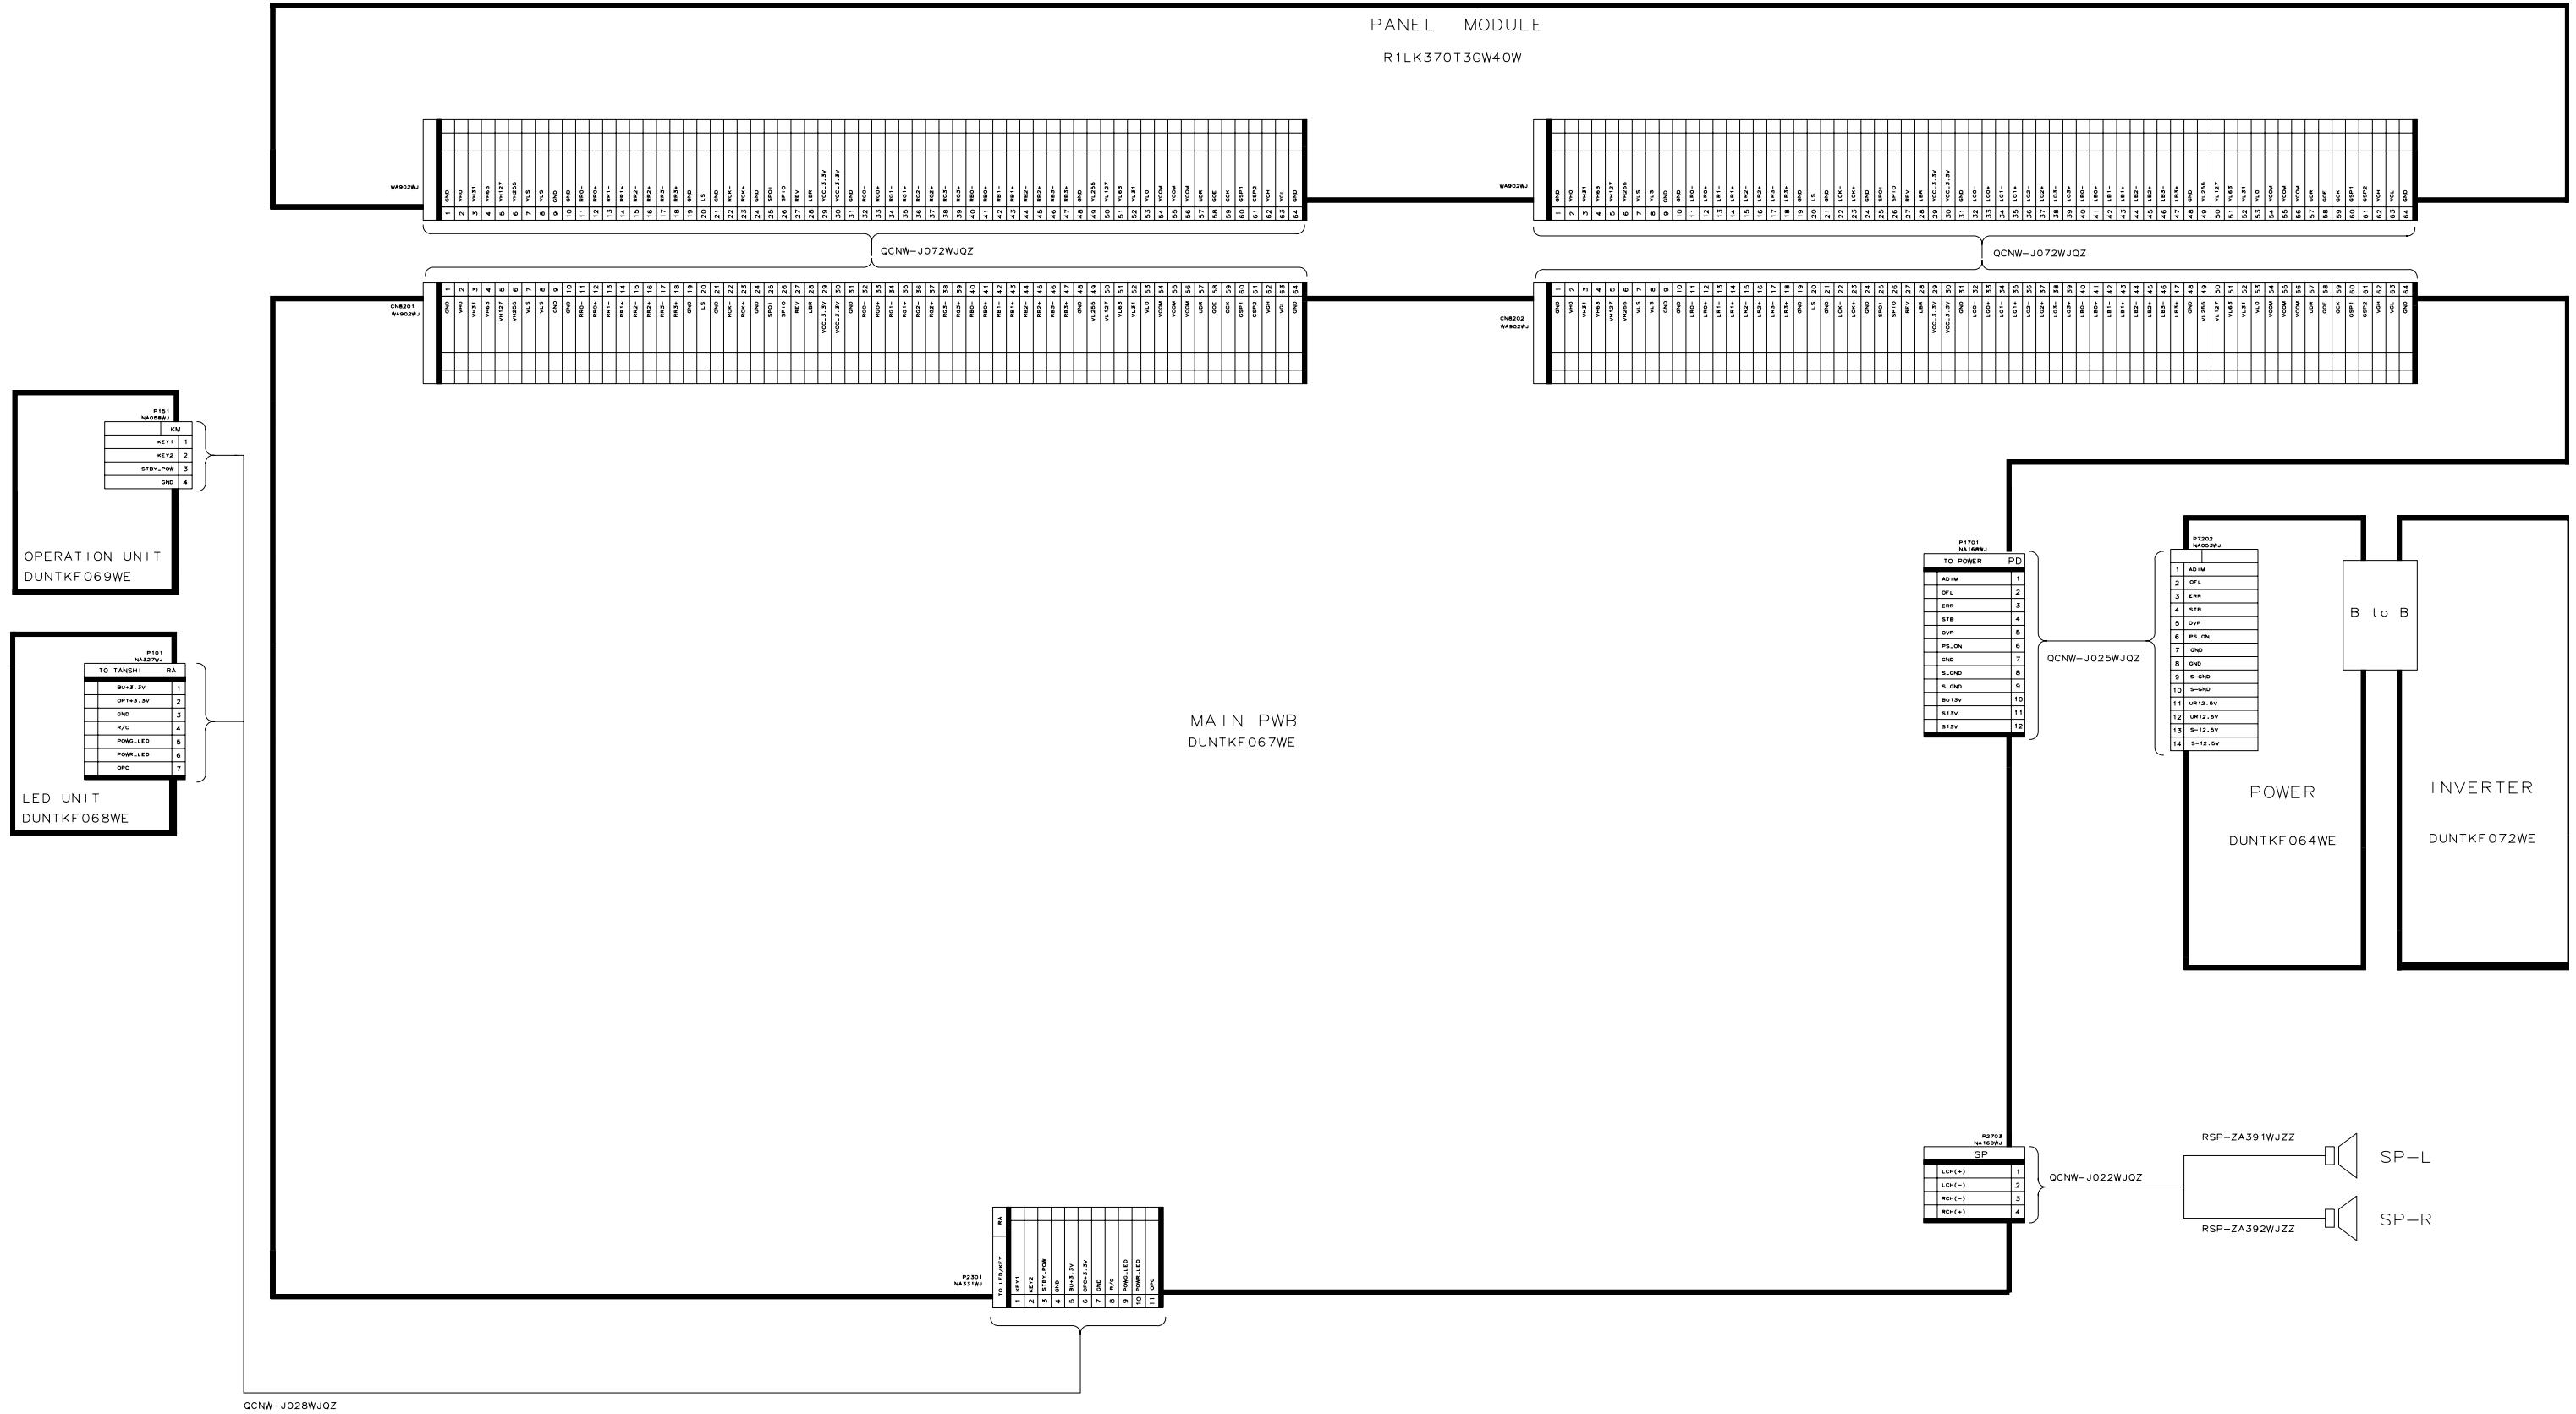

4. REMOVING OF LCD PANEL UNIT

1. Remove the 4 screws [1] and detach the LCD Panel Unit from Front Cabinet.

CHAPTER 7. SCHEMATIC DIAGRAM

[1] SCHEMATIC DIAGRAM

1. DESCRIPTION OF SCHEMATIC DIAGRAM

VOLTAGE MEASUREMENT CONDITION:

1. The voltages at test points are measured on the stable supply voltage of AC 110-240V. Signals are fed by a colour bar signal generator for servicing purpose and the above voltages are measured with a 20k ohm/V tester.

INDICATION OF RESISTOR & CAPACITOR:

RESISTOR:

1. The unit of resistance "Ω" is omitted.
(K=kΩ=1000Ω, M=MΩ).

2. All resistors are ± 5%, unless otherwise noted.
(K= ± 10%, F= ± 1%, D= ± 0.5%)

3. All resistors are 1/16W, unless otherwise noted.

CAPACITOR

1. All capacitors are μF, unless otherwise noted.
(P=pF=μμF).

2. All capacitors are 50V, unless otherwise noted.

CAUTION:

This circuit diagram is original one, therefore there may be a slight difference from yours.

SAFETY NOTES:

1.DISCONNECT THE AC PLUG FROM THE AC OUTLET BEFORE REPLACING PARTS.

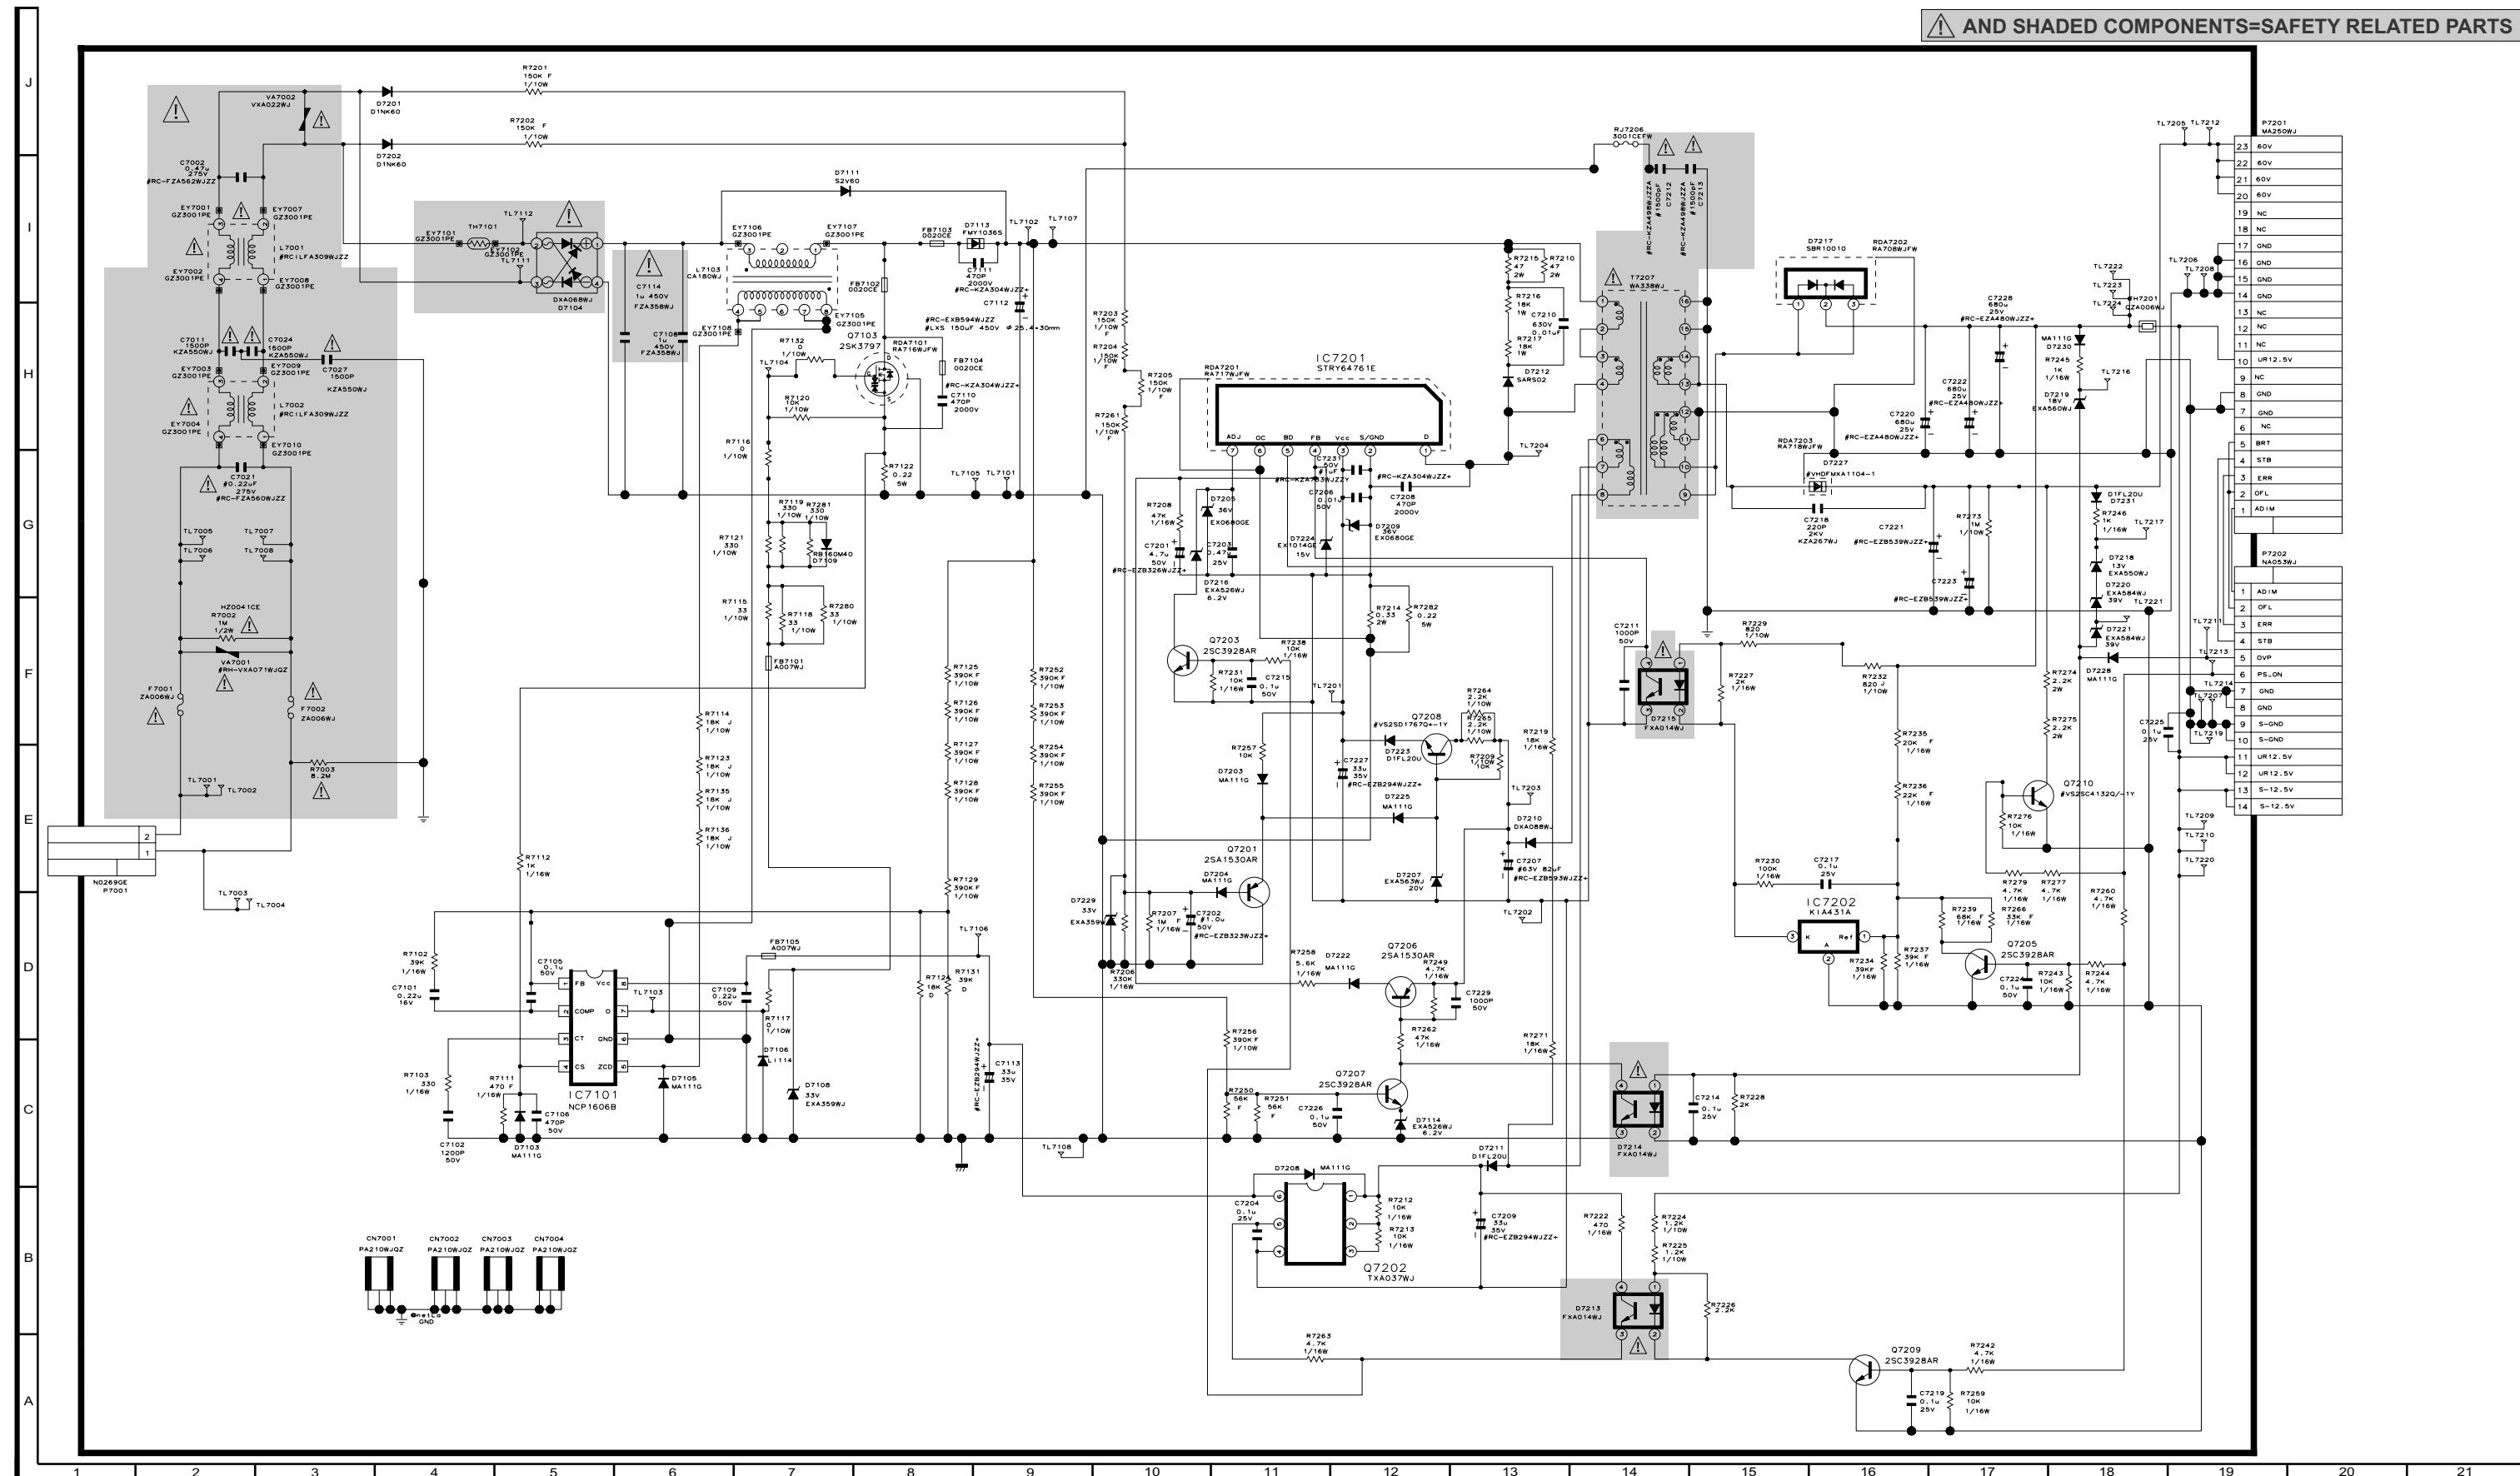

2.SEMICONDUCTOR HEAT SINKS SHOULD BE REGARDED AS POTENTIAL SHOCK HAZARDS WHEN THE CHASSIS IS OPERATING.

IMPORTANT SAFETY NOTICE:

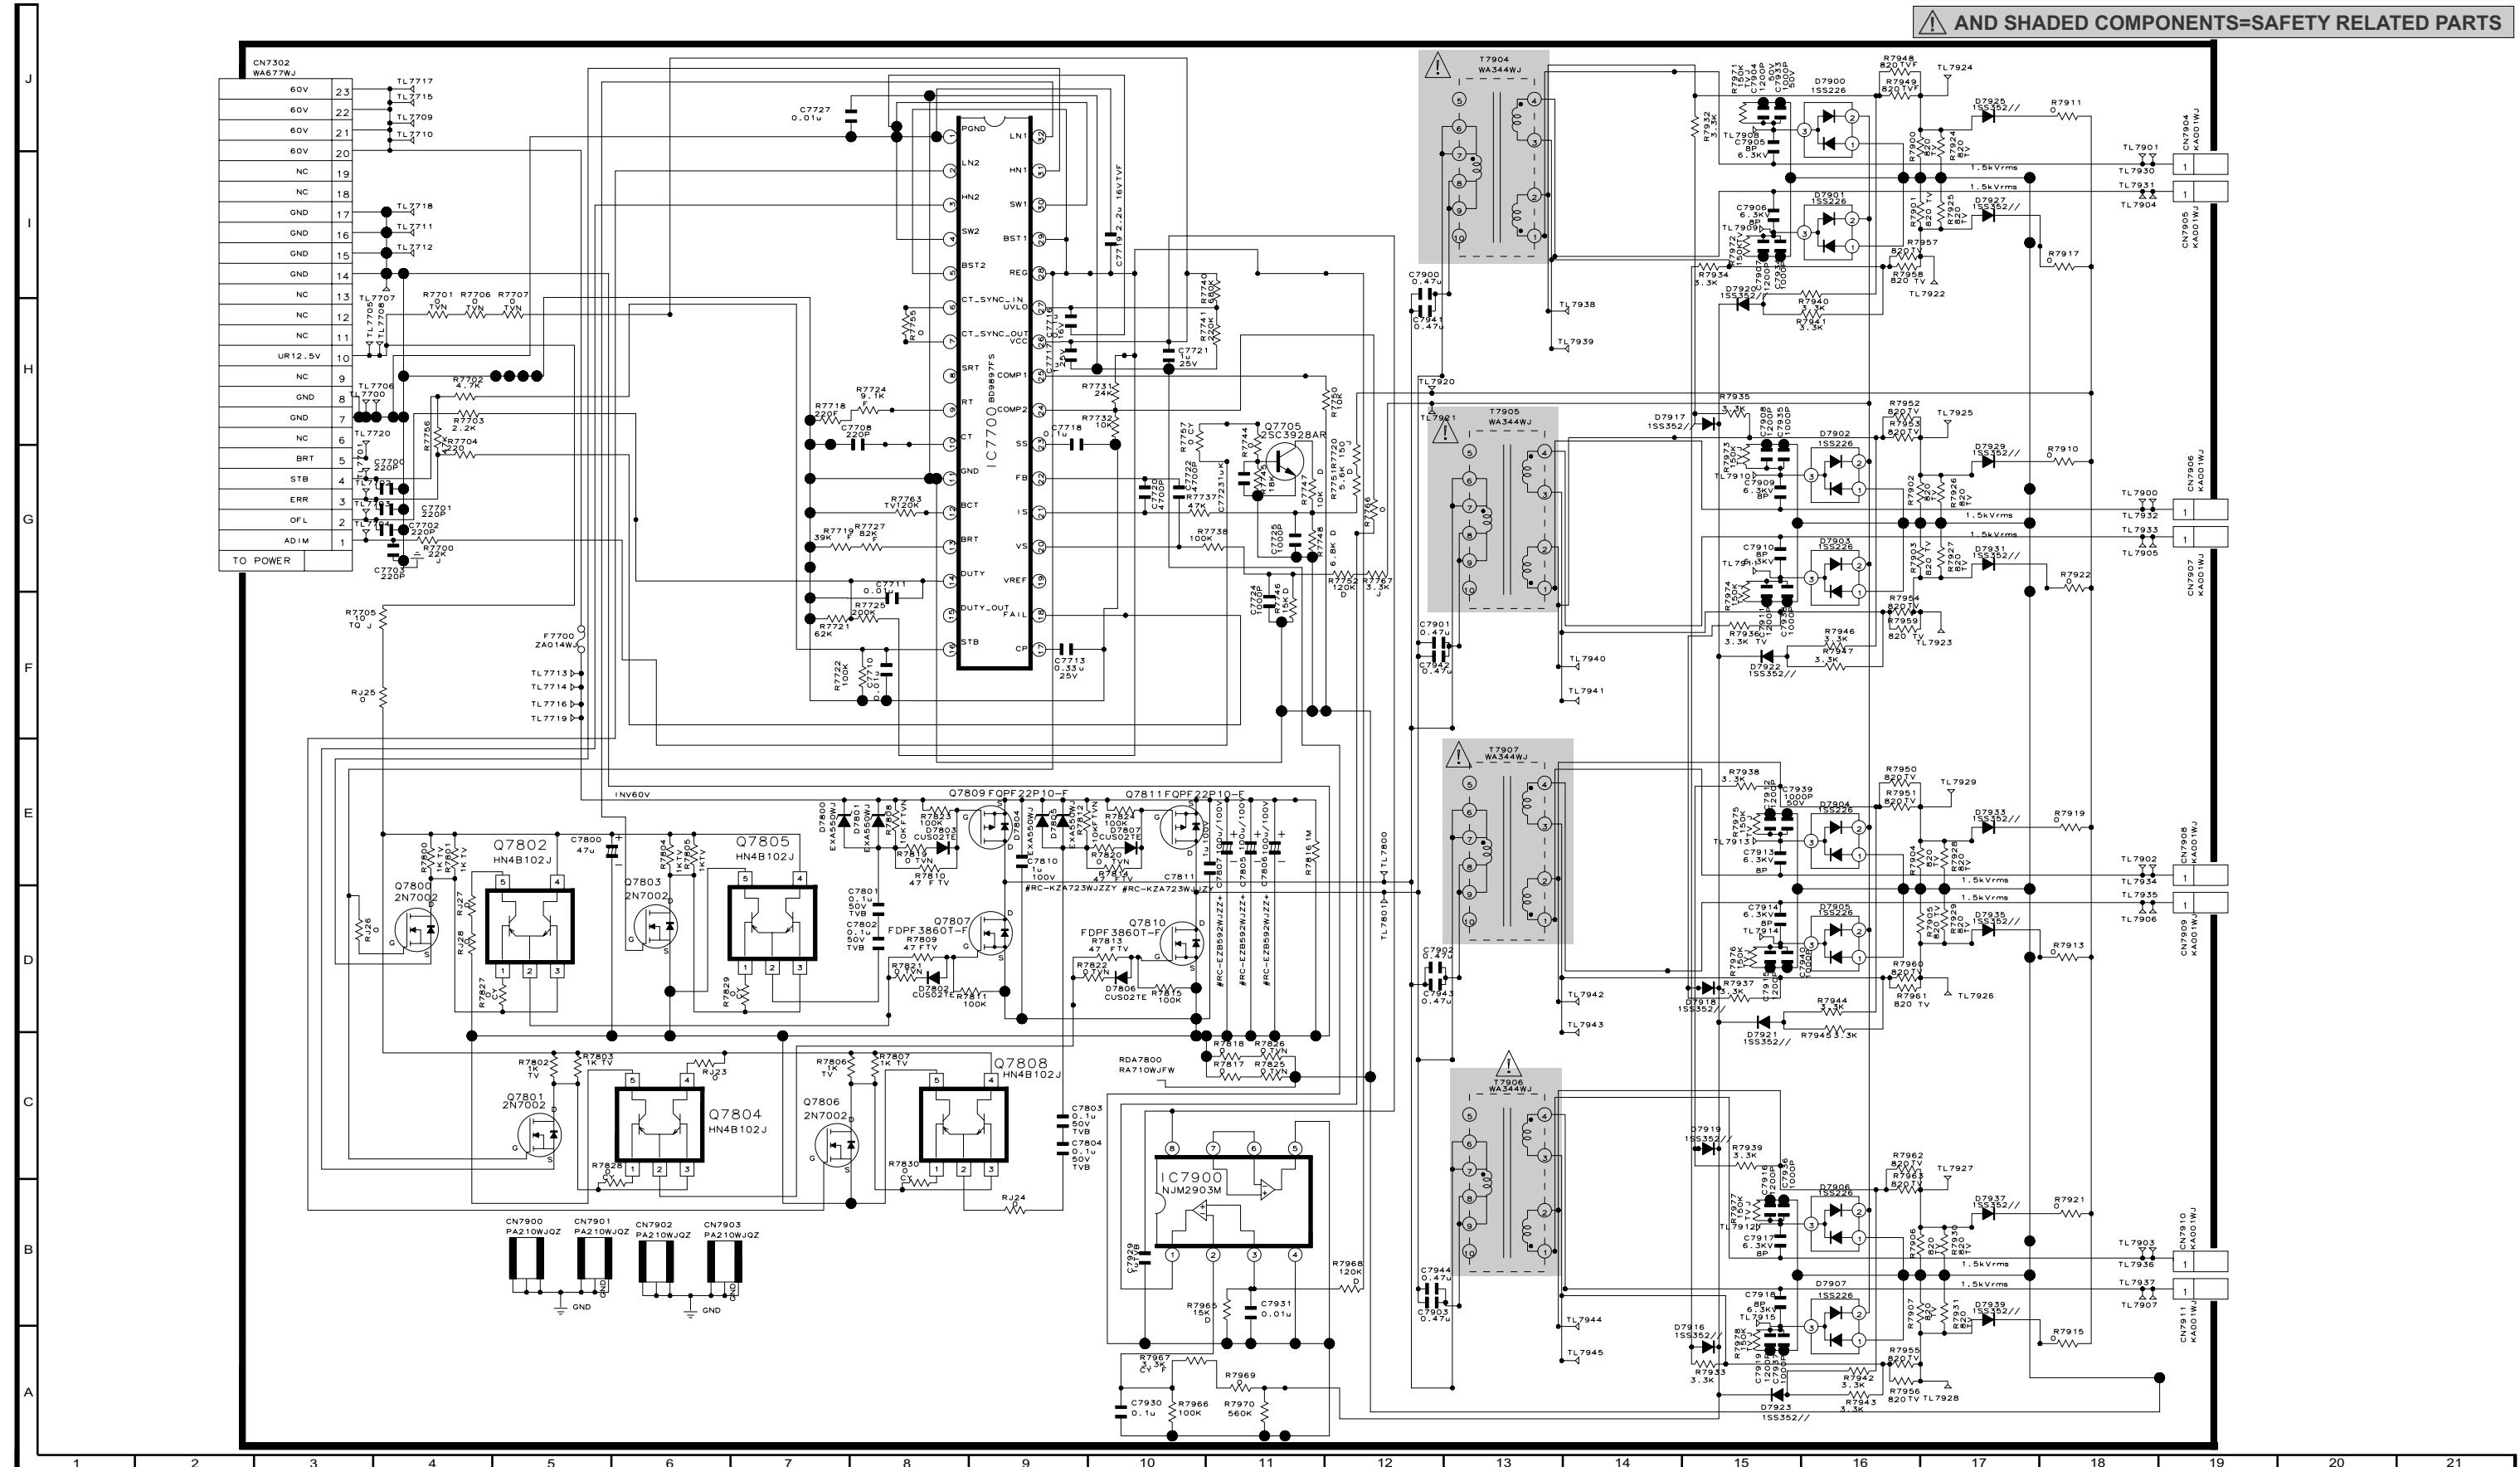

PARTS MARKED WITH "Δ" () ARE IMPORTANT FOR MAINTAINING THE SAFETY OF THE SET. BE SURE TO REPLACE THESE PARTS WITH SPECIFIED ONES FOR MAINTAINING THE SAFETY AND PERFORMANCE OF THE SET.
