IMPORTANT SAFETY INSTRUCTIONS

When using electrical appliances, especially when children are present, basic safety precautions should always be taken, including the following:

READ ALL INSTRUCTIONS **BEFORE USING** KEEP AWAY FROM WATER

DANGER – Any hair dryer is electrically live even when the switch is off. To reduce the risk of death or injury by electric shock:

- 1. ALWAYS UNPLUG APPLIANCE IMMEDIATELY AFTER USING.
- 2. Do not use while bathing or in a shower.
- 3. Do not place or store appliance where it can fall or be pulled into a tub or sink.
- 4. Do not place in, or drop into, water or other liquids.
- 5. If an appliance falls into water, unplug it immediately. Do not reach into the water.

WARNING – To reduce the risk of burns. electrocution, fire, or injury to persons:

- 1. This appliance should never be left unattended when plugged in.
- 2. This appliance should not be used by, on, or near children or by individuals with certain disabilities.
- 3. Use this appliance only for its intended use as described in this manual. Do not use attachments not recommended by the manufacturer.
- 4. Never operate this appliance if it has a damaged cord or plug, if it is not working properly,

- or if it has been dropped into water. Return the appliance to a Conair Service Center for examination and repair.
- 5. Keep the cord away from heated surfaces. **Do not pull.** twist, or wrap line cord around dryer, even during storage.
- 6. Never block the air openings of the appliance or place it on a soft surface, such as a bed or couch, where the air openings may be blocked. Keep the air openings free of lint, hair, and the like.
- 7. Never use while sleeping.
- 8. Never drop or insert any object into any opening.
- 9. Do not use outdoors or operate where aerosol (spray) products are being used or where oxygen is being administered.
- 10. Do not use an extension cord to operate dryer.
- 11. Do not direct hot air toward eves or other heat-sensitive
- 12. Attachments may be hot during use. Allow them to cool before handling.
- 13. Do not place appliance on any surface while it is operating.
- 14. While using the appliance, keep your hair out of it. Keep your hair away from the air inlets.
- 15. Do not use with a voltage converter.

SAVE THESE INSTRUCTIONS

OPERATING INSTRUCTIONS

This appliance is intended for household use only. Use on Alternating Current (60 hertz) only. Standard dryers are designed to operate at 110 to 125 volts AC.

This appliance has a polarized plug (one blade is wider than the other). As a safety feature, this plug will fit in a polarized outlet only one way. If the plug does not fit fully in the outlet, reverse the plug. If it still does not fit, contact a qualified electrician. Do not attempt to defeat this safety feature.

IMPORTANT 1875 WATT OPERATING GUIDE

Use of this dryer on the same circuit or fuse with other electrical products or appliances may trip a 15 amp circuit breaker or blow a 15 amp fuse. NEVER replace the fuse with one rated higher than the capacity of the circuit. Doing so could result in an electrical fire.

Should the appliance go off and the reset button pop up during use, it could indicate a malfunction in the unit. Remove plug from outlet and allow the appliance to cool. Make sure air intake vents are clean. Reinsert plug into outlet.

The appliance should then function normally. If not. return it to an authorized Conair Service Center for evaluation and repair.

SUPER STYLING GUIDE

Your best looks begin with a good haircut that's well maintained. Always treat hair right with superior quality shampoos, conditioners, and finishing products.

DRYING BASICS

- 1. Shampoo and condition hair with products of your choice. Rinse thoroughly. Towel-dry hair to remove excess moisture. Using the dryer along with your styling brush, start at a lower setting and direct hot air through a section of hair at a time. Move dryer steadily across each section so that the hot air passes through hair. Direct airflow at hair, not scalp, Clouds of negatively charged ions will help to reduce static electricity, control frizzy flyaways and contribute to your hair's shine.
- 2. Keep dryer's air intake yents unobstructed and free from hair while drying.
- 3. To avoid over-drying, do not concentrate heat on any one section for an extended length of time. Keep dryer moving as you style.
- 4. For guick touch-ups between shampoos, dampen hair with a mist of water before styling with the drver.
- 5. When using your dryer to create curls and waves, dry hair almost completely on a warmer temperature setting with the snap-on diffuser attachment, then finish styling with cold shot feature to quickly close hair shaft and lock in style.
- 6. Use snap-on/snap-off concentrator attachment for more direct airflow and pinpoint styling.

BODY & VOLUME

To create extra volume, turn head upside down while drving. Position the airflow toward the roots for maximum lift. When hair is drv. toss head back and brush hair into place.

STRAIGHTENING

Work with hair in sections when creating a super-straight look. Using a large round brush (approximately 2" diameter), hold hair taut in each section and bend ends slightly under as you dry.

MAKING WAVES

Tousled, natural-looking waves are easily created by grasping hair at the roots and scrunching between fingertips while drving. For curlier, wavier hair use the diffuser attachment.

select your setting

low/cool	delicate, thin, or easy-to-style hair
low/warm	average to thick or treated hair
high/hot	thick, coarse or hard-to-style hair
cold shot	sets style in place fo all hair types
