

PUTTiT Vaporizer - User Manual, Warranty Information, & FAQ's

1. Remove Mouthpiece Cap to turn the **PUFFiT Portable Vaporizer** "ON"
2. Twist off the **PUFFiT Portable Vaporizer** Top Cap in a counter clockwise motion then place your blend inside the Filling Chamber. (For best results, use only finely grounded dry blend and tightly pack)
3. Set the Desired Temperature by turning the Temperature Wheel on the bottom right side of the **PUFFiT Portable Vaporizer** (Levels 1-8)
4. Activate the Heat Cycle by Pushing Firmly on the **PUFFiT Portable Vaporizer** Top Cap for 2 seconds.
5. Wait for the **PUFFiT Portable Vaporizer** to heat up. The LED will flash Red while Heating for 30 seconds.
6. Take slow, steady breaths for 10-14 seconds. The **PUFFiT Portable Vaporizer** will return to standby mode after 15 seconds.
7. Repeat steps as desired.

Visit www.discreetvape.com/warranty/ to get full details.

ALL THE ANSWERS TO YOUR BURNING PUFFIT™ VAPORIZER QUESTIONS

▶ HOW LONG DOES IT TAKE MY PUFFIT™ VAPORIZER TO HEAT UP?

Heating Time depends on factors such as starting temp, type of blend, and temperature setting but the initial heating cycle should take about 20-30 seconds. Once it is warm it should happen much quicker.

▶ HOW DO I CHARGE MY PUFFIT™ VAPORIZER AND HOW LONG DOES IT TAKE?

Simply plug your PUFFIT™ vaporizer into any standard USB source using the supplied cable. Standard charging time will be about 2.5-3 hours. It will not harm the battery to charge it before a low battery warning! When in doubt... plug it in!

▶ HOW MANY USES WILL I GET BETWEEN CHARGES?

Total uses vary with temperature settings and blend but you should get between 25-30 cycles on a full charge. Do not attempt to use your PUFFIT™ vaporizer while charging. Always remove USB cable before starting a vaporizer cycle.

▶ WHAT DO THE SETTINGS 1-8 MEAN?

This is the temperature setting. Temperature ranges from 120°C (250°F) to 220°C (430°F) refer to the instruction manual for more information.

▶ MY PUFFIT™ VAPORIZER LIGHT IS FLASHING. WHAT DOES IT MEAN?

The flashing LED tells you what your PUFFIT™ vaporizer is doing. The LED indicates low battery, heating, cooling, charging etc. Refer to the instruction manual for a complete explanation.

▶ IS IT NORMAL FOR THE ALUMINUM CAP OVER THE HEAT CHAMBER TO HEAT UP?

Yes. The aluminum cap will get hot with prolonged use. A silicone heat guard is provided to reduce the potential to overheat tender fingers but when in doubt, replace the mouth cap and allow the PUFFIT™ vaporizer to cool!

▶ HOW DO I FILL THE HERB CHAMBER?

Simply remove the aluminum top cap (Gentle twist and lift, DO NOT force it) and lightly pack your favourite blend into the chamber. The best results are achieved with dry, finely ground blend. Never put liquids, gels or concentrates in your PUFFIT™ vaporizer.

▶ HOW DO I CLEAN THE HEAT CHAMBER?

A cotton swab with a little alcohol works very well. DO NOT submerge the PUFFIT™ vaporizer or place it under running water. The screen can be removed for cleaning or replacement using a tooth pick or small tweezers. Never use a knife or other hard sharp object as it can damage the heating chamber.

▶ WHAT ARE THE THREE EXTRA PLASTIC COVERS FOR?

The included mouth piece covers are made of food grade Polypropylene and are meant to provide a clean surface for individual users (Just in case you want to share your vapour but don't want to share your germs). They also prevent contamination of USB socket and temp wheel. They are washable and replaceable. Extras can be purchased from your PUFFIT™ vaporizer retailer.

▶ CAN I USE REGULAR TOBACCO WITH MY PUFFIT™ VAPORIZER?

Pipe tobaccos can be used.

▶ IS THE BATTERY USER REPLACEABLE?

No. The integrated high power Lithium battery is made from the latest, safest technology. With care and regular charging it should last for years! Love your PUFFIT™ vaporizer? Charge it regularly!
