NOTICE

THE POWER SUPPLY IS TO BE USED TO RECHARGE THE BATTERY AND NOT TO RUN THE READER.

INFORMATION TO USER

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) This device must accept any interference received, including interference that may cause undesired operation.

This equipment has been tested and found to comply with the limits for Class A Digital Device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures.

- Reorient or relocate the receiving antenna
- Increase the separation between the equipment and receiver
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected
- Consult the dealer or an experienced radio/TV technician for help

Any changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

SPECIFICATIONS

Case:	Polycarbonate ABS
Operating Frequency:	125 kHz and 134.2 kHz
RFID Compatibility:	HDX ISO, FDX-B ISO and EM4002
Reading Distance:	25-35 cm, 10-14 Inches (HDX)
Memory:	30, 000 tags
Communication Ports:	Serial RS232 or optional Bluetooth (Class1, 100m)
Battery:	7.4V Li-ion rechargeable
Power Input:	12 VDC for charging battery
Protection Class:	IP 66
Dimensions:	65 X 10 X 3cm (26 x 4 x 1.2")
Weight:	0.7 kg (1.5 lbs)
Display:	Graphic OLED 128 x 64 pixels
Display Languages:	English, French, Spanish and German
Included in the box:	Quick Start Guide, Reader, LiveTrack® Manager Software, Manuals (on CD), Hand Strap, Serial Cable and 12v DC international power supply.

1.2 Charger/serial connection

- Pin 1 : 12 VDC IN**
- Pin 2 : RS-232 TX data to PC**
- Pin 3 : RS-232 Rx data from PC**
- Pin 4 : N/C**
- Pin 5 : GND**

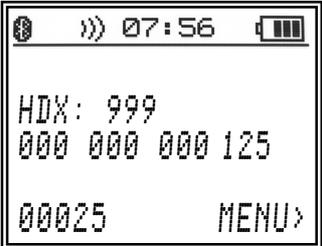

1.3 Indicator icons

- Bluetooth icon:** ON: The Bluetooth circuit is present and on.
OFF: The Bluetooth circuit is off.
- Connection arrows:** The arrows indicate that the Bluetooth is connected.
- RFID icon:** ON: The RFID circuit is on and ready to read.
OFF: The RFID circuit is off.
- Battery icon:** Indicates the battery power left in the reader.

1.4 Main screen

	<p>Turn on the reader by pressing the ON/OFF button.</p> 
	<p>The main screen contains the tag number as well as the counter.</p> <p style="margin-left: 150px;">Tag number</p> <p style="margin-left: 150px;">Counter</p>
	<p>Turn off the reader by pressing the ON/OFF button for 2 seconds.</p> 

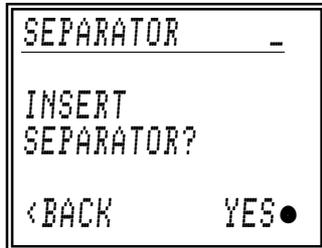

1.5 Menu screen

	<p>Select MENU by pressing the right arrow button.</p> <p style="text-align: center;"></p>
	<p>Navigate in the MENU using the up and down arrow buttons.</p> <p style="text-align: center;"></p> <p>Enter a menu item by pressing the right arrow button or go back by pressing the left arrow button.</p> <p style="text-align: center;"></p>
	<p>Select COUNTER by choosing it from the menu and pressing the right arrow button.</p> <p style="text-align: center;"></p> <p>Reset the counter by pressing the ON/OFF button.</p> <p style="text-align: center;"></p>

Select SEPARATOR by choosing it from the MENU and pressing the right arrow button.

Insert a separator by pressing the ON/OFF button.

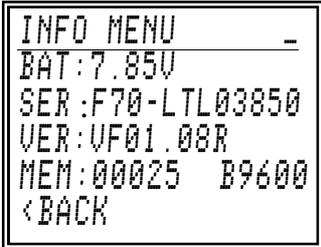

A separator is a fake tag with a 000 000 000 000 000 ID and can be used to separate batches of reads.

The separator will not affect the tag counter but will affect the memory count.

	<p>Select TAG TYPE by choosing it from the ADVANCED MENU and pressing the right arrow button. </p> <p>Choose the tag type FDX/HDX DEC (Decimal, 134,2 kHz), FDX/HDX HEX (Hexadecimal, 134,2 kHz) or Industrial (EM4002, 125 kHz) and then press the left button. </p>
	<p>Select RFID INFO by choosing it from the ADVANCED MENU and pressing the right arrow button. </p> <p>The RFID INFO menu contains the RFID tuning information.</p> <p>Once finished, press the left arrow button. </p>

2. Communications

2.1 Bluetooth Communication

The Bluetooth reader operates as a slave device. Please refer to your master device manual to establish the pairing. The reader does not need a PIN authentication. If your master device needs a PIN authentication, use "**default**". Your master device should provide a COM port after pairing with the reader. Use that virtual COM port to communicate with the reader.

For more detail information, see the "LiveTrack Manager – Software Manual".

2.2 Serial communication

Use the serial cable provided in the kit to connect the reader to a DB-9 serial port.

Configure the serial port at **9600, n, 8, 1** and **no handshaking**.

2.3 Packet description

When an RFID Tag is read, the tag, date, time and site # will be saved in the reader’s memory and will be transmitted via Bluetooth or serial communication.

When a read occurs, the format of the packet being sent by the reader is as follows:

FCCDDDDDDDDDDDAASSMMHHWWDDMMYYTTTTTTT`CR`

***The packet can be modify using the OUTPUT MENU. (See page 16)**

Field	Description
F	Tag Type
	`F` for ISO FDX-B tags `H` for ISO HDX tags `I` for EM4002 tags
CCC	The tag’s country code
D...D	The tag’s unique Identification number
AA...YY	The time and date of the reading

Field description

- AA 2 numbers for the milliseconds
- SS 2 numbers for the seconds
- MM 2 numbers for the minutes
- HH 2 numbers for the hours
- WW 2 numbers for the day of the week ex: Monday = 01 and Sunday = 07
- DD 2 numbers for the day
- MM 2 numbers for the month
- YY 2 numbers for the year

TTTTTTT	The site number
CR	Carriage return - ASCII code 13 (0x0D)

Reliable Traceability
LiveTrack Reader
ISO Compliant Reader

2.4 Scale connection

The LiveTrack reader is compatible with most scale heads on the market today. Including:

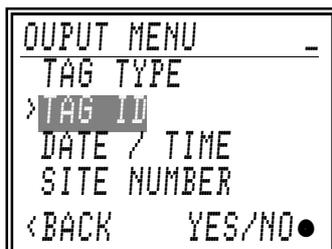

Gallagher
Reliable Scales
Avery Weigh-Tronix
Tru-Test
WW Paul Scales
Digi-Star
Tru-Test
Toledo
Vesta

1. Make sure you have an EID compatible scale (see Manufacturer)
2. Simply configure the scale to receive the EID from the reader (see your Manufacturer's documentation).
3. If you are using a Bluetooth connection, make sure you have a Bluetooth compatible scale and LiveTrack reader.

Serial connection:

Select only the TAG ID from the OUTPUT MENU (see page 16). The menu should look like this when done with the configuration.

Simply plug the communications cable that came with your LiveTrack reader into the input port on your scale.

When reading a tag the EID tag number should appear on your scale, some scales only display a part of the number.
