Troubleshooting Navionics Charts in Furuno Plotters

Units with SONAR/RADAR/SOUNDER/FISHFINDER must be set to **FULL MAP** to read the Navionics charts.

- **1650 & 1850 Models:** Press **PLOT** button until the full map is displayed.
- **NavNet Series:** Press **DISP** button for full map screen.

1. Make sure you have the corresponding software version (please direct all software to Furuno at www.furuno.com).
  a. Press **MENU** button
  b. Press **SYSTEM CONFIGURATION** softkey
  c. Press **SYSTEM SETUP** softkey
  d. Press **TEST & CLEAR** softkey
  e. Press **MEMORY I/O TEST** softkey
  f. Press **DISPLAY UNIT TEST** softkey
    i. Read program number line. You will see a 10-digit number, the last 3-digits of this number will indicate the software
      version. For example, a program number of 1950001010 would indicate software version 10.
2. Make sure all info is turned on
  a. Press **MENU BUTTON**
  b. Press **CHART SETUP**
  c. Press **CHART CONFIGURATION**
    i. **TEXT INFO – ON**
    ii. **CHART BORDERS – ON**
    iii. **LIGHT SECTOR INFO – ON**
    iv. **CHART DISPLAY – DETAILED**
    v. **OBJECT INFO – ALL ON**
    vi. **CAUTION & ROUTING DATA – ON**
    vii. **MARINE FEATURES – ON**
    viii. **LAND FEATURES – ON**
    ix. Under the **CONTOUR LINE** section (to the right of the above menu on the soft key section)
      a **SPOT SOUNDINGS – ON**
      b **SAFE CONTOUR – SHADING**
      c **DEPTH CONTOUR - ALL**
