

**1 Charging Your Device**

Choose the cable which is compatible with your device. The TYLT® PowerPlant will work with the included Micro-USB cable or any other USB cable you may have on hand.

Open the flex port cover and plug the USB cable into the PowerPlant. Plug the other end of the cable into your device. Press the Power button once to start charging. Hold the Power button for 2 seconds to turn the PowerPlant off.

*Flex port cover.*

If no cable is available, you can use the on-board Lightning charging arm to charge your device. Plug the arm into your device and press the Power button to start charging.

**2 Checking Battery Capacity**

Press and release the Power button.

Note: For accurate results, ensure the PowerPlant is not in use.

- 1 LED = 0 - 20%
- 2 LED = 20 - 50%
- 3 LED = 50 - 80%
- 4 LED = 80 - 100%

**3 Charging Additional Devices**

Use the Lightning charging arm and the USB cable to charge two devices simultaneously.

**4 Charging Your PowerPlant**

Open the flex port cover and plug the micro-USB cable into the micro-USB port. Plug the other end of the micro-USB cable into any USB power source such as a PC, Laptop, USB home or car charger, etc. For fastest charge time, use a USB power source rated at 1 Amp or higher.

While charging, the LEDs will light up in order from one to four. When the PowerPlant is fully charged, all the LEDs will turn off.

You can also charge two devices while charging the PowerPlant.

Note: Devices will start charging when the PowerPlant is 70% charged.  
\*Power supply not included

**Specifications:**

- Battery Cell: Li-ion Polymer
- Battery Capacity: 5,200mAh
- Output Voltage: 4.75 - 5.25V
- Output Current: 2.1A
- Battery Charge Time: 6 - 7 hrs
- Dimensions: 78 x 44 x 33 mm
- Weight: 5.4 Oz.

**Warning:**

- Do not disassemble.
- Do not immerse in water.
- Do not store near a heat source above 120°F.
- Do not short circuit.
