Table of Tables.....	83

DRAFT

1. Introduction

The ISO Reliability Requirements are made up of two criterions:

- The Local Capacity Requirements (LCR), and
- The California Energy Commission (CEC) Peak Demand Forecast

The LCR is an annual number that is constant for all hours in the year, and is specific to the Local Capacity Area (LCA). The CEC Peak Demand forecast is an hourly number that varies monthly and is applicable to the California ISO Balancing Authority Area (BAA). From these two requirements the Resource Adequacy program is created. There are two categories of market participants that meet these requirements:

- Load (the Resource Adequacy plan), and
- Generation (Supply plan)

However, due to jurisdictional differences the Resource Adequacy plans for the load are broken down into two additional categories:

- RA Plans for California Public Utilities Commission (CPUC) Jurisdictional market participants
- RA Plans for non-California Public Utilities Commission (non-CPUC) Jurisdictional market participants,

1.1 Resource Adequacy Plans

Resource Adequacy Plans identify the specific resources that the Load Serving Entity (LSE) is relying on to satisfy its forecasted monthly peak Demand and Reserve Margin for the relevant reporting period. For a non-CPUC Load Serving Entity, the annual and monthly Resource Adequacy Plans must be submitted pursuant to the schedule set forth in Exhibit A-2 found in the Reliability Requirements BPM. For CPUC Load Serving Entities, the annual and monthly Resource Adequacy Plans must be submitted pursuant to the schedule established by the CPUC.

1.2 Supply Plans

Supply Plans are an integral element in the resource adequacy process, as they represent the primary means of informing CAISO of the capacity that is designated for resource adequacy purposes for a specified month. Supply Plans are essentially a monthly verification and confirmation by Scheduling Coordinators for Resource Adequacy Capacity of the information contained in Resource Adequacy Plans submitted by Scheduling Coordinators for LSEs. The Supply Plan confirms that a Scheduling Coordinator is committed to scheduling and/or Bidding the Resource Adequacy Capacity that has been reported to CAISO. The Supply Plan establishes the formal business commitment between the CAISO and Resource Adequacy Resources by confirming the status of the resource as Resource Adequacy Resource.

1.3 Purpose of User Guide

The user guide gives an overview of the RA program and describes, in detail, how to use the IRR application. This document will help the SC to understand how to **Upload** and **Download** the RA and Supply plans, check the **Status**, and decipher error and warning messages related to plan and cross validation.

2. Terms, Acronyms, and Definitions

Term	Acronym	Definition
Availability Assessment		The monthly process of determining actual availability for the SCP resources.
Availability Assessment Hours		A pre-defined set of hours in each month corresponding to the operating periods when high demand conditions typically occur and when the availability of Resource Adequacy Capacity is most critical to maintaining system reliability.
Availability Incentive Payments		A Resource Adequacy Resource subject to Section 40.9.4 whose availability calculation under Section 40.9.4.2 is more than two and a half percent (2.5 %) above the monthly Availability standard will be eligible for an Availability Incentive Payment for the month calculated as outlined in Section 40.9.6.3.
Enterprise Data Repository	EDR	This application supports market monitoring and various corporate reporting needs by saving data from various applications in a centralized data repository.
Historical Qualifying Capacity Resource	HQC	A resource whose Qualifying Capacity is determined using historical output data.
Integrated Forward Market	IFM	The pricing run conducted by the CAISO using SCUC in the Day-Ahead Market, after the MPM-RRD process, which includes Unit Commitment, Ancillary Service procurement, Congestion Management and Energy Procurement based on Supply and Demand Bids.
ISO Reliability Requirements	IRR	This application validates, maintains, and reports on Resource adequacy information.
Master File		This application maintains reference data for Market Participants, Resources, Contracts, etc. for use by Market Participants and downstream applications.

Term	Acronym	Definition
Net Qualifying Capacity	NQC	Qualifying Capacity reduced, as applicable, based on: (1) testing and verification; (2) application of performance criteria; and (3) deliverability restrictions. The Net Qualifying Capacity determination shall be made by the CAISO pursuant to the provisions of this CAISO Tariff and the applicable Business Practice Manual.
Non Resource Specific System Resource	NRSSR	A system resource external to the ISO balancing authority area and is considered as an import or a tie resource.
Residual Unit Commitment	RUC	The process conducted by the CAISO in the Day-Ahead Market after the IFM has been executed to ensure sufficient Generating Units, System Units, System Resources and Participating Loads are committed to meet the CAISO Forecast of CAISO Demand.
Resource Adequacy Availability Management Tool	RAAM	RAAM is a secure server based web application.
Resource Adequacy Compliance Year		The calendar year in which RA activities are conducted.
Resource -Specific System Resource	RSSR	System Resources identified by a specific Resource ID.
Scheduling & Logging for ISO of California	SLIC	A logging application that allows Market Participants to notify the ISO when a Generating Unit's properties change due to physical problems. Users can modify the maximum and minimum output of a unit, as well as the ramping capability of the unit.
Settlements and Market Clearing	Settlements	The Settlements acronym refers to a collection of applications comprised of Settlements, Dreams, Market Clearing, etc. Collectively, these applications settle the ISO markets, processing and creating Settlement Statements and Invoices.

3. Monthly Plan Processing

3.1 Monthly Process Flow Diagram

The overall process diagram is shown in Figure 1 below.

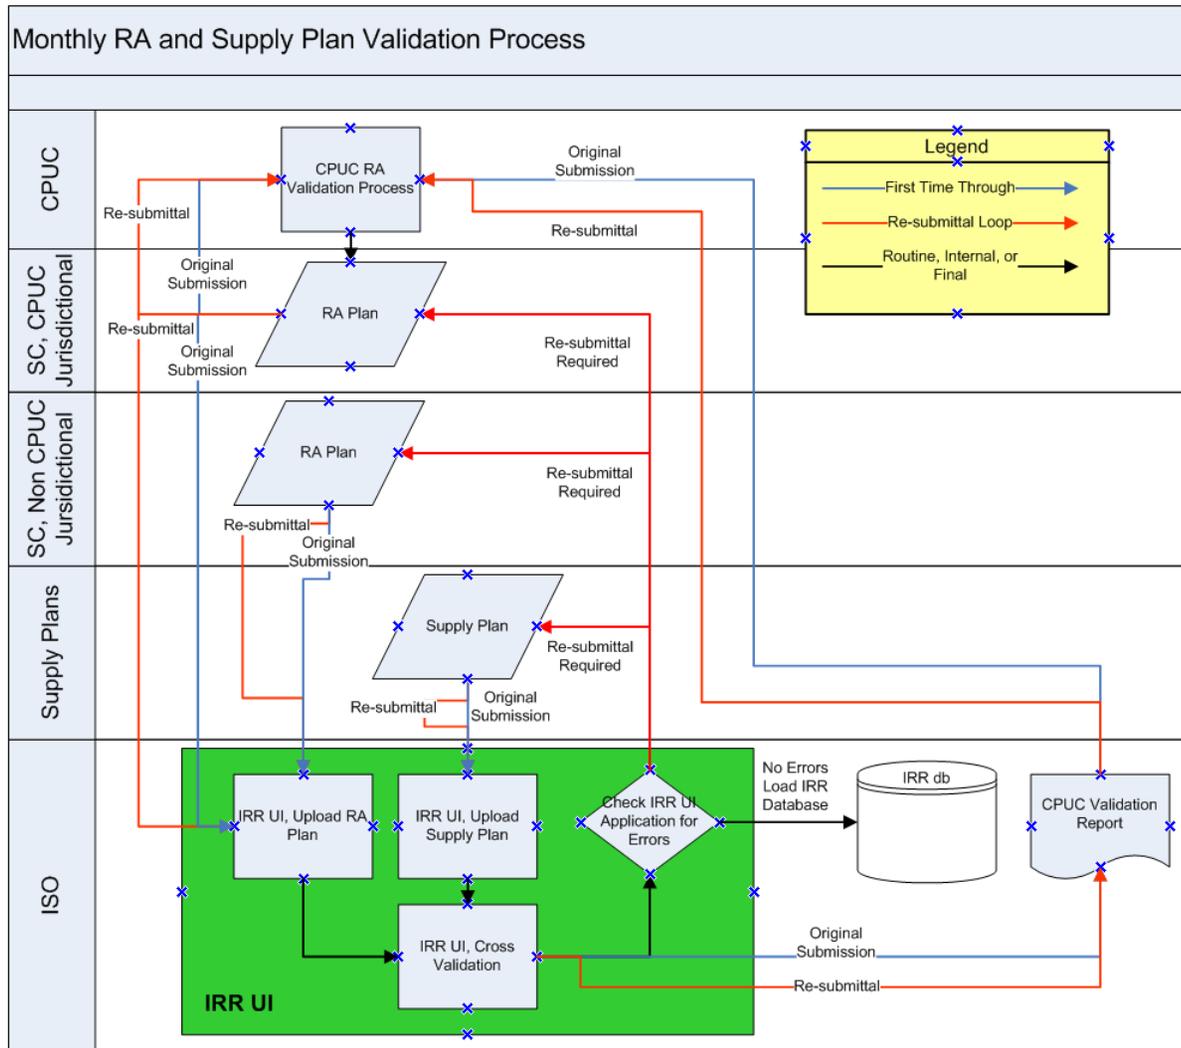

Figure 1: Monthly RA Plan and Supply Plan Validation Process Diagram.

3.2 Monthly Plan Due Date

The RA and Supply plans are all due the last business day of the month, two months prior to the RA Compliance Month. This submittal timeline is depicted in Figure 2 below.

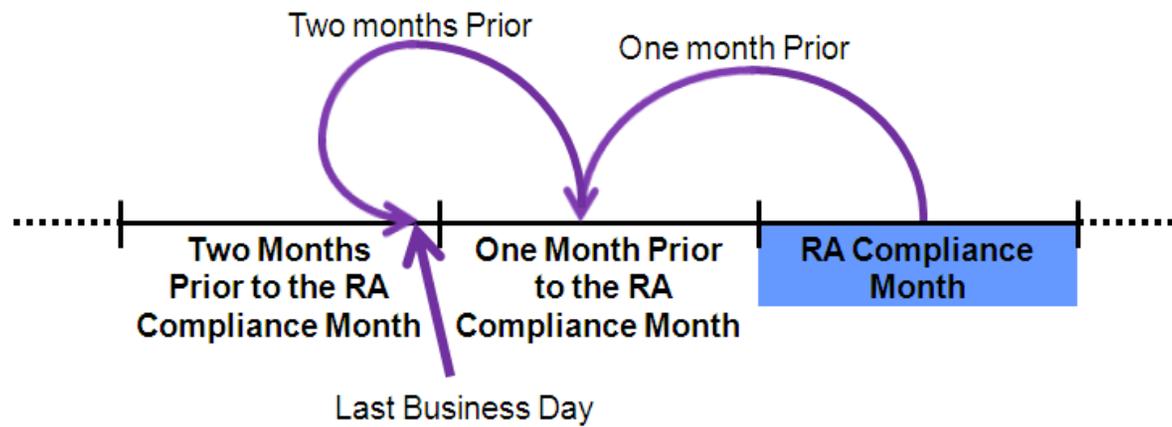

Figure 2: RA Plan and Supply Plan Submittal Timeline.

3.3 Monthly RA Processing Timeline

Once the data is loaded into the IRR system the required processing time is as follows:

- 3 Business days to run the first cross validation,
- 10 Calendar days for re-submittal,
- 3 Business days to run the second cross validation, and
- 2 Business days to load the data into production

The deadline for all plans to be in production is by the 23rd of each month. The first cross validation, re-submittal, second cross validation, and production loading due dates for the 2012 compliance year are outlined in Table 1 below.

RA Compliance Month	Plan Due Date	1st Cross Validation		Re-submittal Due		2nd Cross Validation		Load into Production	
		3 Business Days		10 Calendar Days		3 Business Days		2 Business Days	
Dec - 2011	Mon 10/31/2011	Thu 11/3/2011		Sun 11/13/2011		Wed 11/16/2011		Fri 11/18/2011	
Jan - 2012	Wed 11/30/2011	Mon 12/5/2011		Thu 12/15/2011		Tue 12/20/2011		Thu 12/22/2011	
Feb - 2012	Fri 12/30/2011	Wed 1/4/2012		Sat 1/14/2012		Wed 1/18/2012		Fri 1/20/2012	
Mar - 2012	Tue 1/31/2012	Fri 2/3/2012		Mon 2/13/2012		Thu 2/16/2012		Mon 2/20/2012	
Apr - 2012	Wed 2/29/2012	Mon 3/5/2012		Thu 3/15/2012		Tue 3/20/2012		Thu 3/22/2012	
May - 2012	Fri 3/30/2012	Wed 4/4/2012		Sat 4/14/2012		Wed 4/18/2012		Fri 4/20/2012	
Jun - 2012	Mon 4/30/2012	Thu 5/3/2012		Sun 5/13/2012		Wed 5/16/2012		Fri 5/18/2012	
Jul - 2012	Thu 5/31/2012	Tue 6/5/2012		Fri 6/15/2012		Wed 6/20/2012		Fri 6/22/2012	
Aug - 2012	Fri 6/29/2012	Wed 7/4/2012		Sat 7/14/2012		Wed 7/18/2012		Fri 7/20/2012	
Sep - 2012	Tue 7/31/2012	Fri 8/3/2012		Mon 8/13/2012		Thu 8/16/2012		Mon 8/20/2012	
Oct - 2012	Fri 8/31/2012	Wed 9/5/2012		Sat 9/15/2012		Wed 9/19/2012		Fri 9/21/2012	
Nov - 2012	Fri 9/28/2012	Wed 10/3/2012		Sat 10/13/2012		Wed 10/17/2012		Fri 10/19/2012	
Dec - 2012	Wed 10/31/2012	Mon 11/5/2012		Thu 11/15/2012		Tue 11/20/2012		Wed 11/21/2012	
Jan - 2013	Fri 11/30/2012	Wed 12/5/2012		Sat 12/15/2012		Wed 12/19/2012		Fri 12/21/2012	

Table 1: IRR Processing Deadlines for the 2012 Compliance Year.

3.4 Monthly Template Locations

There are different RA templates required based on the type of plan being loaded and on the market participants jurisdiction. The hyperlinks below direct to the respective templates for the 2012 RA compliance year. Market Participants should begin using these for the January 2012 compliance month.

RA Template for CPUC Jurisdictional

<http://www.cpuc.ca.gov/NR/rdonlyres/0D9C3804-348F-4E73-9C87-0435304F9920/0/Final2012SystemRATemplate.xls>

RA Template for non-CPUC Jurisdictional

<http://www.caiso.com/Documents/Stakeholder%20teleconference%20Aug%2031,%202011/ProposedISOResourceAdequacyPlanTemplate.xls>

Supply Plan Template

<http://www.caiso.com/Documents/Stakeholder%20teleconference%20Aug%2031,%202011/ProposedISOSupplyPlanTemplate.xls>

4. NRS-RA Subset of hours reporting for RA compliance year 2012

4.1 NRS-RA reporting today through December 31, 2011

Through December 31, 2011 only one value can be entered for the entire month. The change beginning in compliance year 2012 only applies to Non Resource Specific (NRS) resources that have sold Resource Adequacy (RA) capacity denoted as “NRS-RA” resources.

Table 2 provides an example of the current data entry structure for two NRS-RA capacity resources. Please note that the table below is an example only, and is not in the exact format of the actual RA and Supply templates as columns are not represented here that are included in those templates. Special instructions are provided in the templates section of this user guide.

Contract	Resource ID	RA (MW)	Capacity Effective Start Date (mm/dd/yyyy)	Capacity Effective End Date (mm/dd/yyyy)
DTIM1	TIMD_ABC789_I_UC_010203	10.00	10/1/2011	10/31/2011
DTIM2	TIMD_ABC123_I_UC_010203	50.00	10/1/2011	10/31/2011

Table 2: Example of the Current Data Entry Structure for Two NRS-RA Capacity Resources.

A graphical representation of a given resource's monthly RA capacity values under the current structure can be found in Figure 3. This graphic is not an exact replication of the capacity in Table 2 and is provided as an illustration only.

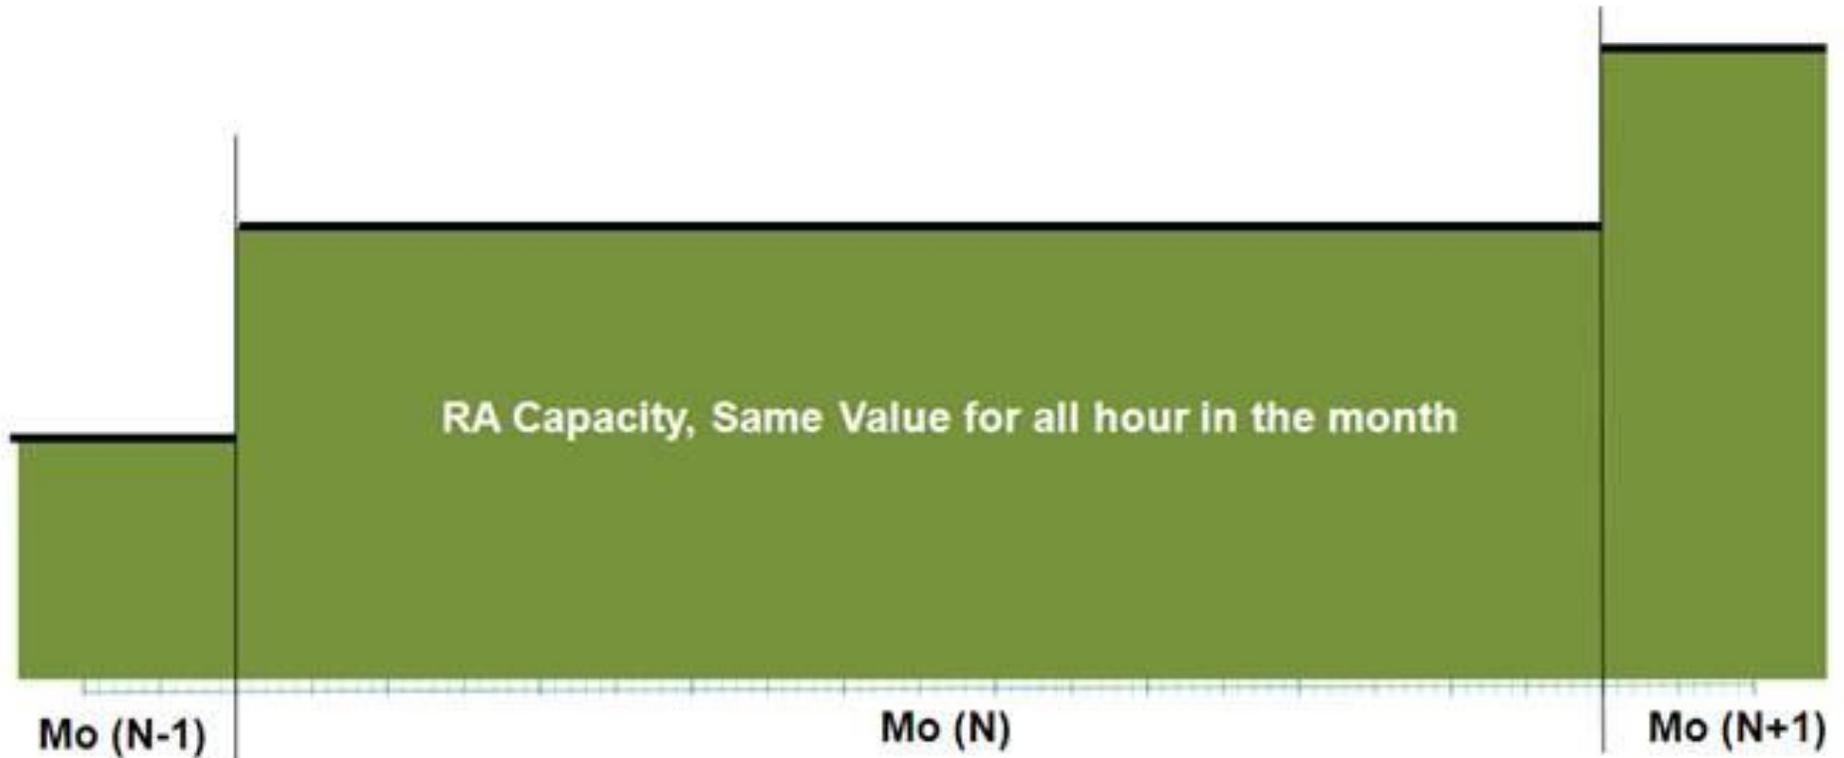

Figure 3: Illustration of the Monthly RA Capacity Values for a Given Resource under the Current Structure.

4.2 NRS-RA reporting beginning January 1, 2012

Remember this change only applies to NRS-RA resources.

Starting with the January 2012 RA compliance month (data to be submitted into the new IRR Application starting November 21, 2011), subset of hours will be implemented for NRS resources that have sold RA capacity, i.e., NRS-RA subset of hours. Subset of hours is where the intertie (NRS) resource has sold capacity that is not under contract for all hours in the month. The SC would enter the capacity that it is under contract as it varies based on their obligations. Therefore, multiple values can be entered over the month. Both the time and the capacity may vary. Time can span from short periods (a few hours) to longer periods (a few days) as long as the start time is at the beginning of an hour (XX:00:00) and the end time is at the end of an hour (XX:59:59). However, the data in the monthly plans can only be for the specific RA month; that is, the start date and time and end date and time must correspond with the current RA month and cannot span multiple months.

Table 3 provides an example of the data entry format for two NRS-RA resources with Subset of Hours capacity beginning in January 2012. Please note that the table below is an example only, and is not in the exact format of the actual RA and Supply templates as columns are not represented here that are included in those templates. Special instructions are provided in the templates section of this user guide.

Contract	Resource ID	RA (MW)	Capacity Effective Start Date (mm/dd/yyyy hh:mm:ss)	Capacity Effective End Date (mm/dd/yyyy hh:mm:ss)
DTIM1	TIMD_ABC789_I_UC_010203	10.00	10/01/2011 09:00:00	10/01/2011 20:00:00
DTIM1	TIMD_ABC789_I_UC_010203	10.00	10/05/2011 09:00:00	10/05/2011 20:00:00
DTIM1	TIMD_ABC789_I_UC_010203	8.00	10/10/2011 09:00:00	10/10/2011 20:00:00
DTIM1	TIMD_ABC789_I_UC_010203	9.00	10/15/2011 06:00:00	10/20/2011 22:00:00
DTIM1	TIMD_ABC789_I_UC_010203	10.00	10/22/2011 09:00:00	10/22/2011 22:00:00
DTIM1	TIMD_ABC789_I_UC_010203	10.00	10/24/2011 09:00:00	10/24/2011 20:00:00
DTIM1	TIMD_ABC789_I_UC_010203	7.00	10/26/2011 06:00:00	10/26/2011 22:00:00
DTIM1	TIMD_ABC789_I_UC_010203	10.00	10/28/2011 09:00:00	10/28/2011 22:00:00
DTIM2	TIMD_ABC123_I_UC_090807	50.00	10/04/2011 05:00:00	10/12/2011 20:00:00
DTIM2	TIMD_ABC123_I_UC_090807	25.00	10/14/2011 07:00:00	10/21/2011 21:00:00
DTIM2	TIMD_ABC123_I_UC_090807	40.00	10/23/2011 04:00:00	10/27/2011 23:00:00
DTIM2	TIMD_ABC123_I_UC_090807	30.00	10/28/2011 11:00:00	10/28/2011 13:00:00
DTIM2	TIMD_ABC123_I_UC_090807	50.00	10/30/2011 02:00:00	10/31/2011 15:00:00

Table 3: Example of the Future Data Entry Structure for Two NRS-RA Resources with Subset of Hours Capacity.

A graphical representation of a given resource's monthly RA capacity values under the new subset of hours RA contract structure can be found in Figure 4. This is not an exact replication of the capacity in Table 3 and is provided as an illustration only.

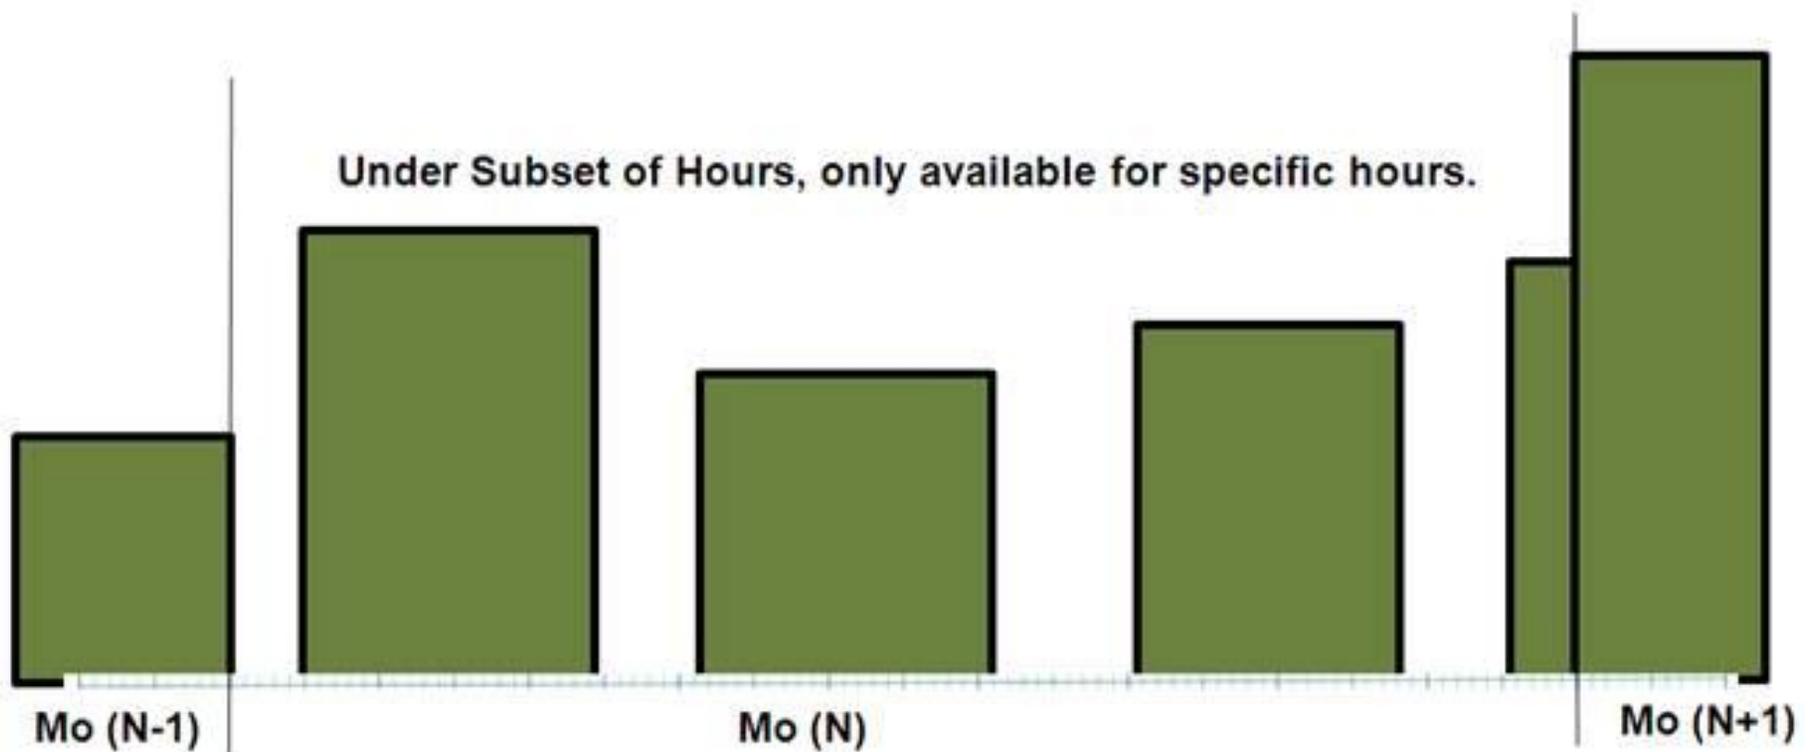

Figure 4: Illustration of the Monthly RA Capacity Values for a Given Resource under the New Subset of Hours RA Contract Structure.

4.3 NRS-RA Cross Validation beginning January 1, 2012

As a result of the Subset of Hours implementation for the NRS resources that have sold RA capacity the need for hourly detail in both the RA and Supply Plans is required. This requirement applies to all plan types that have Subset of Hours NRS-RA resources:

- RA Template for CPUC Jurisdictional
- RA Template for non-CPUC Jurisdictional
- Supply Plan Template

Figure 5 below shows an example of a cross validation between an RA plan and a Supply plan for NRS-RA resources that are using Subset of Hours' contracts. In the example, the resources have the same capacities, but are over different time frames. Therefore, this would fail during cross validation.

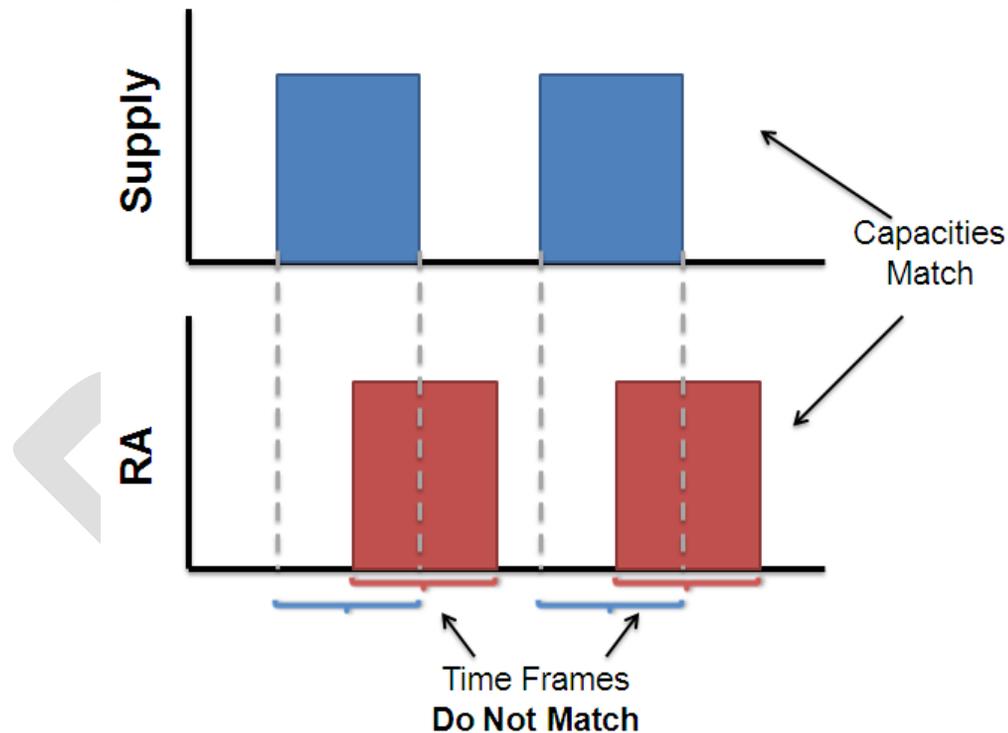

Figure 5: Example of a Cross Validation between RA and Supply Plans for NRS-RA Resources that are using Subset of Hours Contracts.

4.4 Standard Capacity Product (SCP) and Subset of Hours for NRS-RA

With subset of hours the five (5) availability assessment Hours will not be changing. The five SCP availability assessment hours are outlined in Table 4.

Month	Hour Ending	Exclusions
January through March and November through December	HE 17 - 21	Saturday, Sunday and federal holidays
April through October	HE 14 - 18	

Table 4: SCP Availability Assessment Hours.

Resources that do not have RA during the five (5) availability assessment hours will not participate in SCP during these hours. Figure 6 below provides an example of an NRS-RA that will only be participating in SCP for two (2) of the five (5) availability assessment hours.

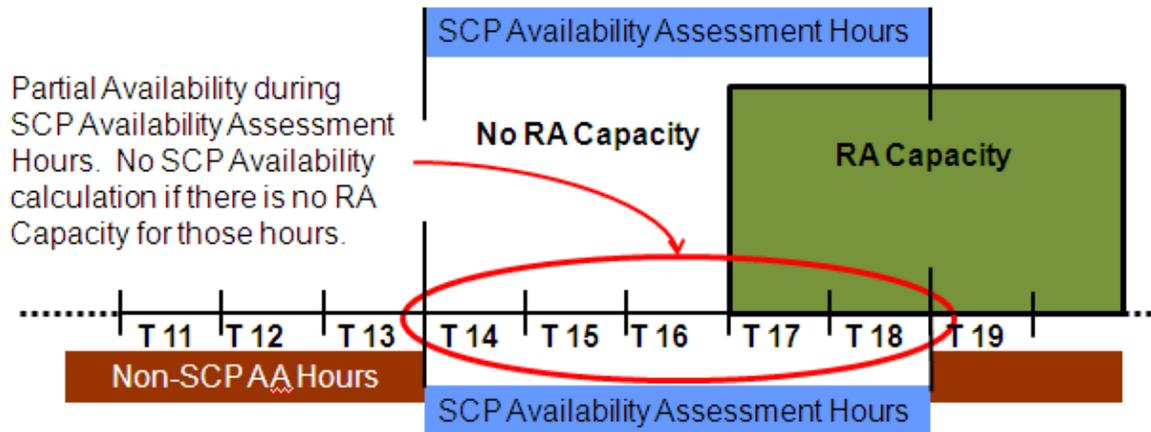

Figure 6: Example of an NRS-RA Resource Participating in SCP for Two of the Five Availability Assessment Hours.

5. NRS-RA Bid Options IRDT

There are five (5) possible scenarios for the priority ranking of pricing fields in the intertie resource data template (I-RDT). Table 5 gives the definitions from the I-RDT of the pricing fields used in bid prioritization.

Master File Field Name (RDT Field Name)	Definition	Parameter and/or Enumeration
MIN_HR_BLK_LIM (Minimum Hourly Block Limit (1-24 hours))	Represents the maximum number of consecutive Trading Hours that an Intertie resource can be bid in, if a Minimum Hourly Block is specified in the Bid.	Must be a whole number from 1 to 24.
NEGO_RANK_LMPM (Negotiated Rate Option)	A method of calculating Generated Bids based on a negotiation with the CAISO or the Independent Entity.	Rank 1, 2 or null
PRC_RANK_LMPM (LMP Option)	A method of calculating Generated Bids based on Locational Marginal Prices.	Rank 1 or null
GMC_RANK_LMPM (Price Taker Option)	A method of calculating Generated Bids based on a price taker value of zero plus an estimate of the Grid Management Charge.	Rank 1, 2, or null

Table 5: I-RDT Definitions of the Pricing Fields used in Bid Prioritization.

The five possible scenarios for the ranking of Generated Bid Fields in the intertie resource data template are:

- Scenario 1, if there is nothing selected (all fields are blank or null) the default will be GMC_RANK_LMPM, (Price Taker + GMC), there is no second or third option.
- Scenario 2, Selected GMC_RANK_LMPM, (Price Taker + GMC), there is no second or third option.
- Scenario 3, Selected NEGO_RANK_LMPM, (NEGO), there is no second or third option.
- Scenario 4, Selected PRC_RANK_LMPM, (LMP), then there must be a second selection, in this scenario it is GMC_RANK_LMPM (Price Taker + GMC).
- Scenario 5, Selected PRC_RANK_LMPM, (LMP), then there must be a second selection, in this scenario it is NEGO_RANK_LMPM (Negotiated).

These combinations are depicted below in Table 6.

	LMP	Price Taker	Negotiated
Scenarios	PRC_RANK_LMPM	GMC_RANK_LMPM	NEGO_RANK_LMPM
1			
2		1	
3			1
4	1	2	
5	1		2

Table 6: Five Possible Scenarios for the Ranking of Pricing Fields in the I-RDT.

DRAFT

6. NRS-RA Supply Plan Import Allocation validation beginning January 1, 2012

All Supply plans with NRS-RA resources are validated against their Import Allocation. The RA capacity can be less than or equal to the Import Allocation; otherwise, the plan will fail validation. Figure 7 depicts the different scenarios that may occur during the import allocation validation.

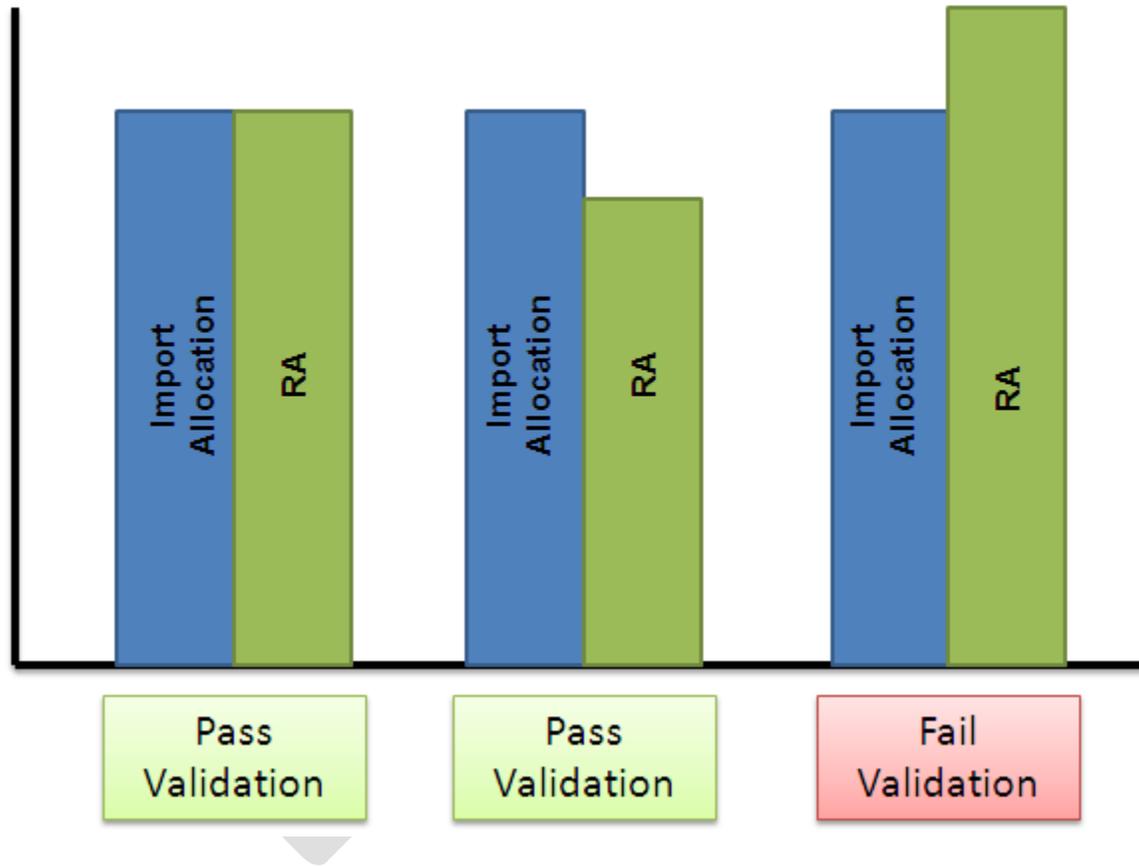

Figure 7: Possible Scenarios for the Supply Plan Import Allocation Validation.

7. NRS-RA beginning January 1, 2012 SIBR Rules

Scheduling Infrastructure Business Rules (SIBR) will be changing to reflect the automatic bid generation for NRS-RA resources. The text here is designed to provide a high level overview of what SIBR will be doing in putting in bids for NRS-RA resources. This is in no way an exhaustive description of SIBR, or how it works. In addition, this does not include information on IFM and RTN.

Basic rules of how SIBR Inserts Bids:

- Outages are not considered in SIBR, they are handled in IFM (Day Ahead) and RTN (Real Time) systems.
- In the Day Ahead
 - The Bid is capped at the RA Capacity,
 - Outages are ignored by SIBR, and
 - The IFM uses the availability in SLIC.
- In Real Time
 - The Bids are capped at the RUC award,
 - Outages are ignored by SIBR, and
 - The RTN uses the availability in SLIC.

From these basic rules there are four (4) examples of their application:

- Example 1, Day Ahead market without Outages,
- Example 2, Day Ahead market with Outages,
- Example 3, Real Time market without Outages, and
- Example 4, Real Time market RUC award greater than RA.

In the examples below, there is a difference between a SIBR bid that is extended to RA (for DA) or RUC (for RT) and a bid that is filled in or bid at the RLC amount.

- **Extended Bid** uses the bid price to extend the bid to the RA (for DA) or RUC (for RT) and the RLC (IRDT) information is not considered.
- Filling in a Bid (**Bid at RLC**) uses the RLC bid priority from the IRDT to fill in the bid to the RA capacity for DA or RUC capacity for RT.

7.1 NRS-RA SIBR Example 1: Day Ahead Market without Outages

Figure 8 provides an example of the actions taken by SIBR in the Day Ahead market without outages. In this scenario, the RA capacity is 50 MW and the Availability is above 50 MW.

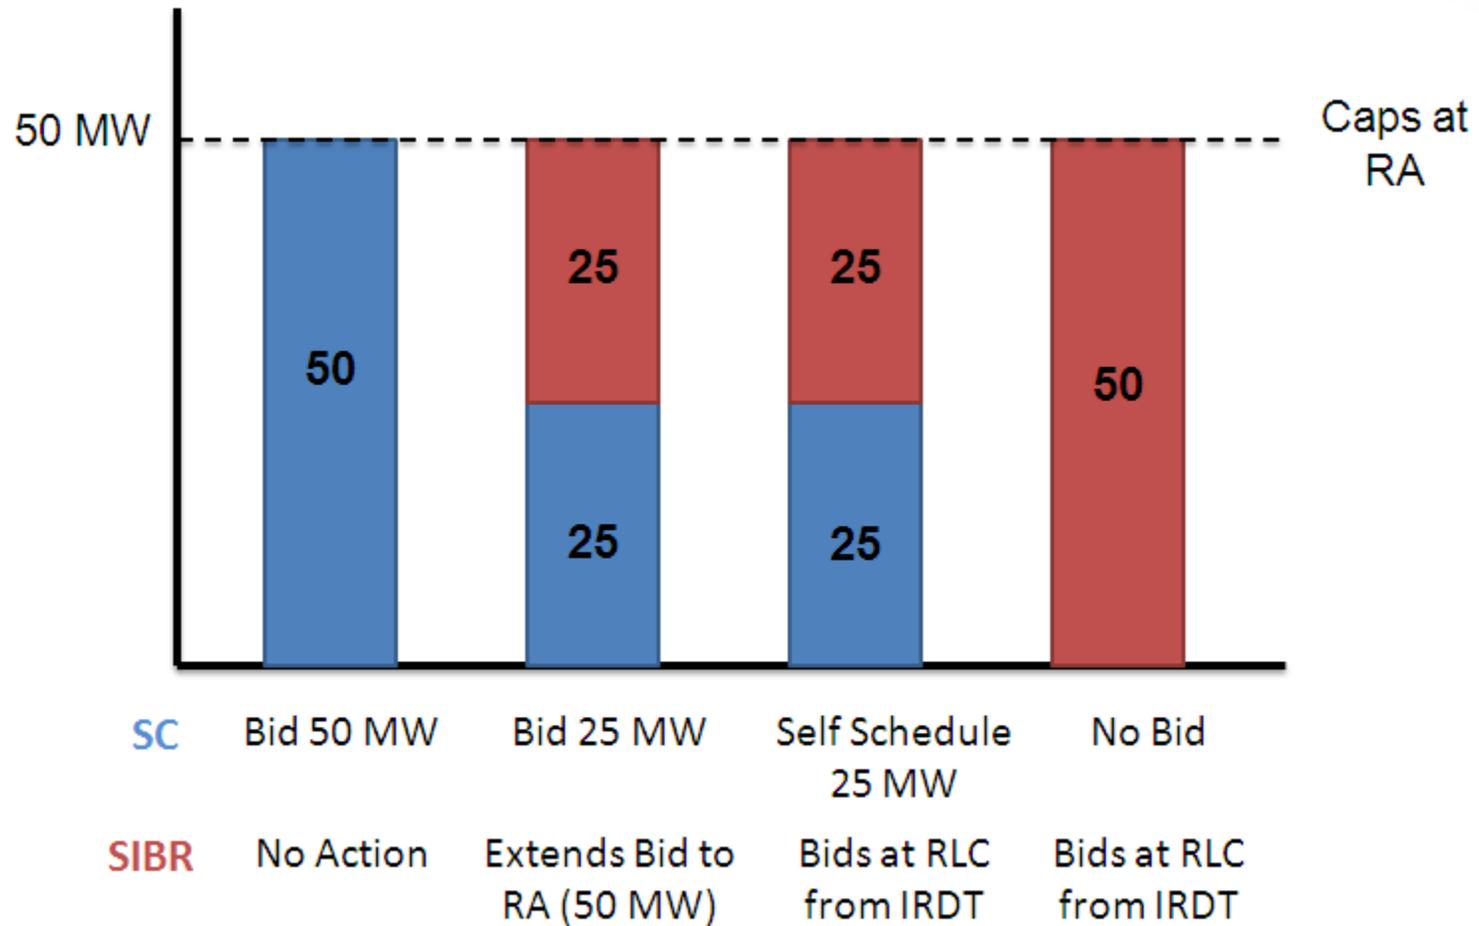

Figure 8: Example of NRS-RA SIBR Actions in Day Ahead Market without Outages.

7.2 NRS-RA SIBR Example 2: Day Ahead Market with Outages

Figure 9 provides an example of the actions taken by SIBR in the Day Ahead market with outages. In this scenario, the RA capacity is 50 MW and the Availability is 10 MW due to the outage.

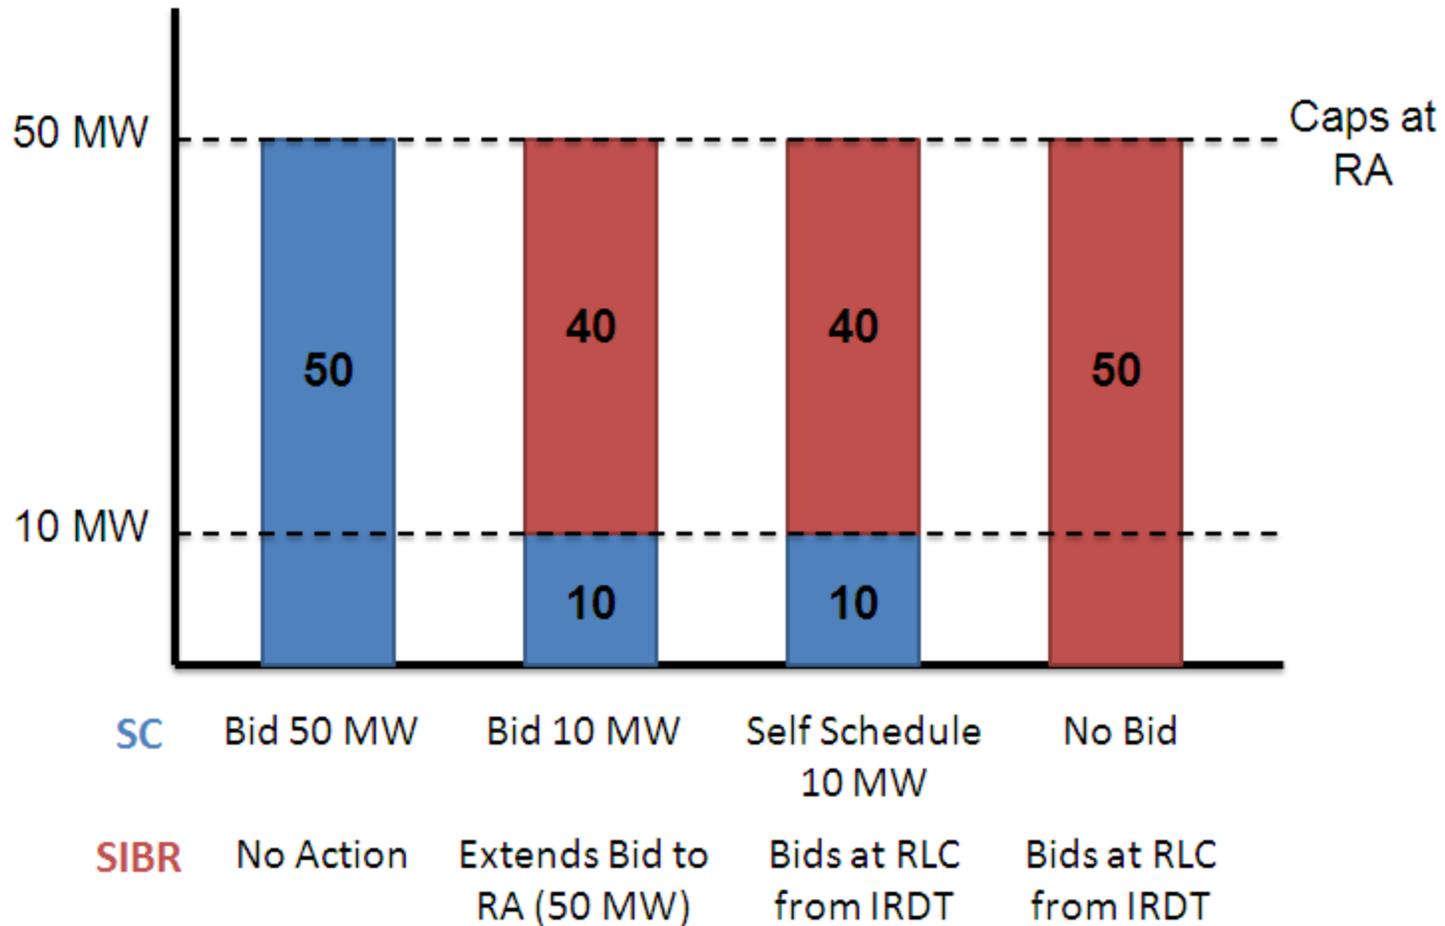

Figure 9: Example of NRS-RA SIBR Actions in Day Ahead Market with Outages.

7.3 NRS-RA SIBR Example 3: Real Time market without Outages

Figure 10 provides an example of the actions taken by SIBR in the Real Time market without outages. In this scenario, the RA capacity is 50 MW, the Availability is above 50 MW, and the RUC award is 30 MW.

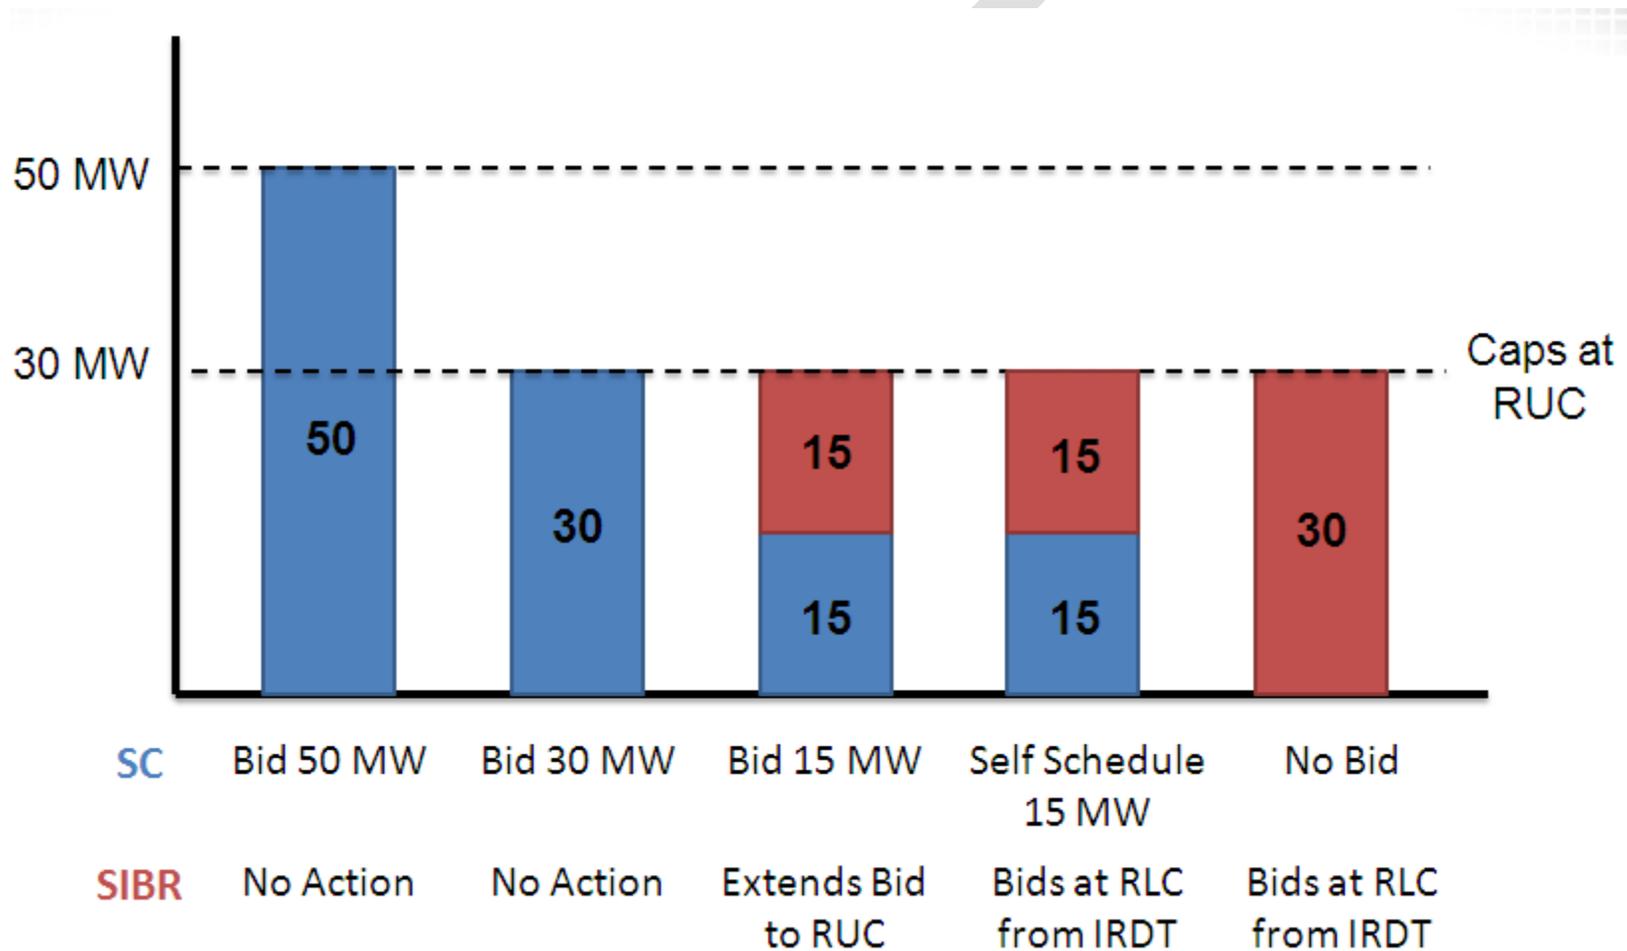

Figure 10: Example of NRS-RA SIBR Actions in Real Time Market without Outages.

7.4 NRS-RA SIBR Example 4: Real Time market with RUC award greater than RA Capacity

Figure 11 provides an example of the actions taken by SIBR in the Real Time market when the RUC award is greater than the RA capacity. In this scenario, the RA capacity is 40 MW, the Availability is above 50 MW, and the RUC award is 60 MW.

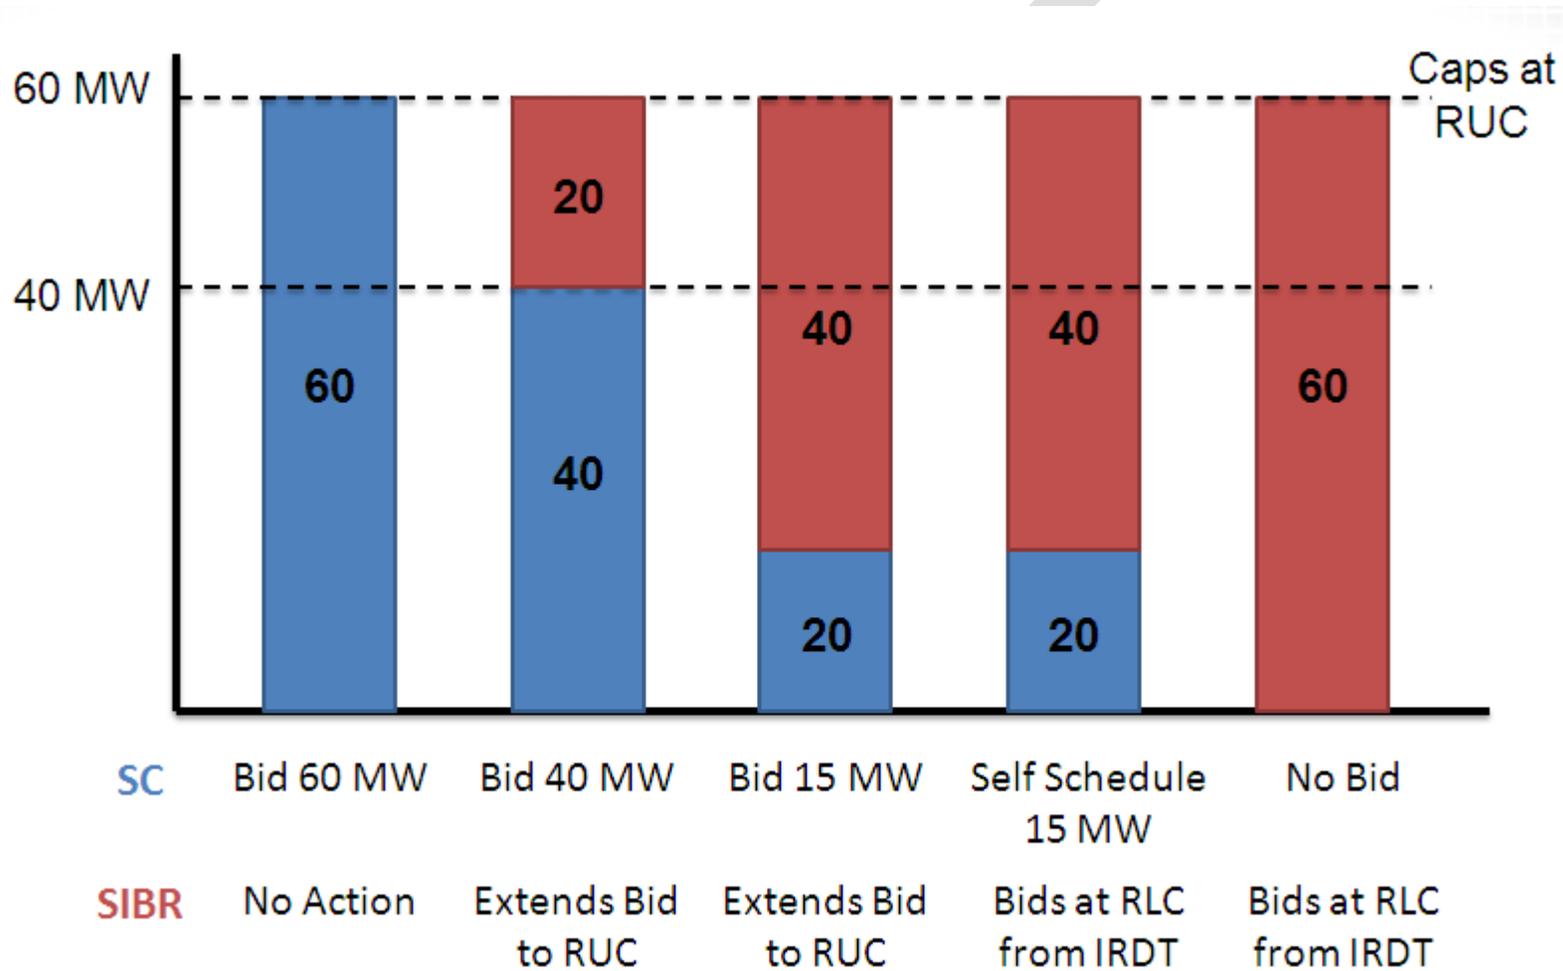

Figure 11: Example of NRS-RA SIBR Actions in Real Time Market with RUC Award greater than RA Capacity.

8. NRS-RA beginning January 1, 2012 filling out the Templates

The subsequent sections provide examples of how to complete the templates for the following types of Subset of Hours' contacts:

- One Month
- Weekdays Only
- Workweek, 6 am to 10 pm
- One Day, 10 am to 2 pm

Please note that the tables below are examples only and are not in the exact format of the actual RA and Supply templates, as columns are not represented here that are included in those templates. Special instructions are provided in the templates section of this user guide.

8.1.1 NRS-RA Template Example: One Month

Table 7 below is an example template for a resource that plans to provide the same capacity value for all hours of the full month.

Resource Capacity Contract Number	Resource ID in CAISO Master File	Resource Adequacy Capacity (MW)	Effective Start Date/Time (mm/dd/yyyy hh:mm:ss)	Effective End Date/Time (mm/dd/yyyy hh:mm:ss)
HPYCMPR	CISO_KBGKKS_I_UC_01020304	25.00	10/01/2011 00:00:00	10/31/2011 23:59:59

Table 7: Example Template for Resource Providing the Same Capacity Value for One Month.

8.1.2 NRS-RA Template Example 2: Weekdays only

Table 8 is an example template for a resource that plans to provide the same capacity for all hours during the weekdays only. The RA capacities could also vary in each time period, as shown in Table 9.

Resource Capacity Contract	Resource ID in CAISO Master File	Resource Adequacy Capacity	Effective Start Date/Time (mm/dd/yyyy hh:mm:ss)	Effective End Date/Time (mm/dd/yyyy hh:mm:ss)
HPYCMPR	CISO_KBGKKS_I_UC_01020304	50.00	10/03/2011 00:00:00	10/07/2011 23:59:59
HPYCMPR	CISO_KBGKKS_I_UC_01020304	50.00	10/10/2011 00:00:00	10/14/2011 23:59:59

DRAFT

9. Access and Permissions

The screen shot in Figure 12 displays the access levels for the ISO Reliability Requirement User Interface (IRR UI) tool. Market Participants have only one access level to the IRR Application, which allows the user to upload RA Plans and Supply Plans. CEC Digital Certificates are required to have access to upload the Peak Forecast.

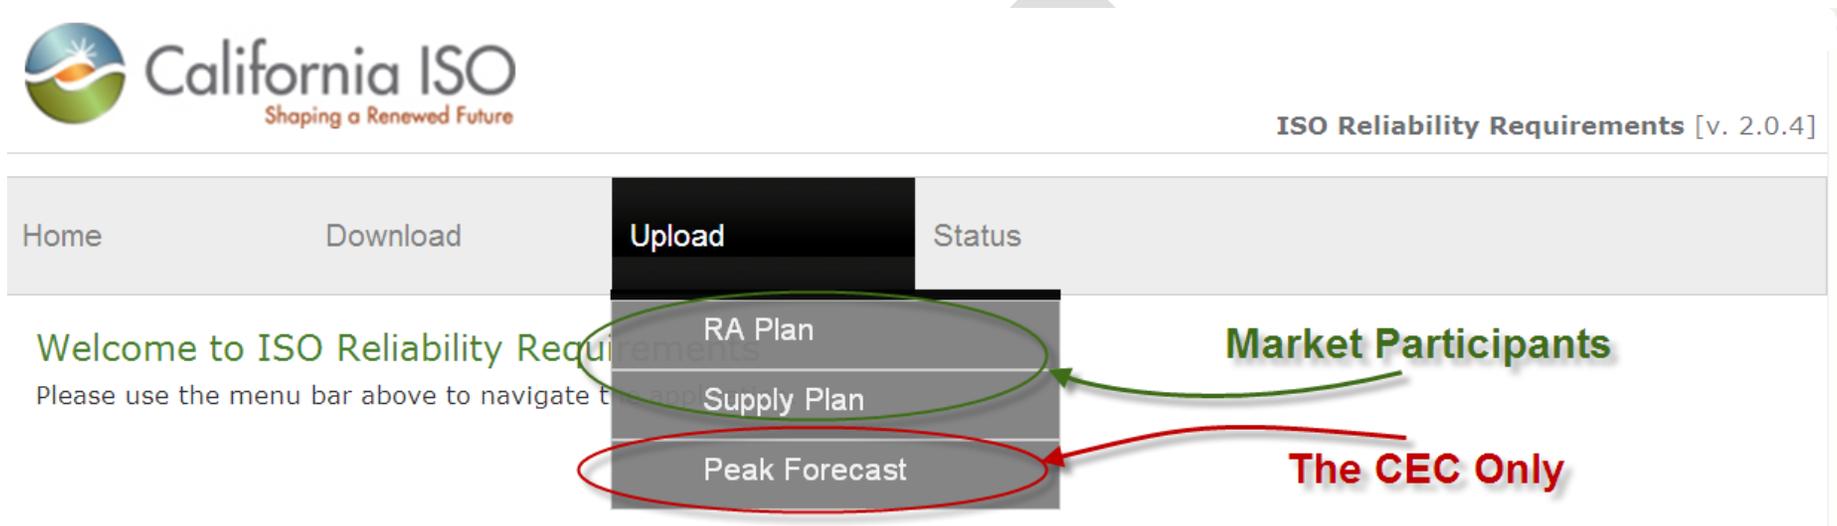

Figure 12: Access Levels for the IRR User Interface.

Table 12 below describes the access levels that are used in the application access request form (AARF) for IRR UI access. A separate AARF is required for each level of access. AARF must be submitted by your ISO point of contact.

Role	Market Participant
SC	Allows the user to Upload RA and Supply Plans, Download RA and Supply Plans, and view the Status of their plans.
CEC	Allows the user to Upload Peak Forecast, there is no other functionality associated with this role,

Table 12: Access Level Definitions for the Application Access Request Form (AARF).

10. End-to-End RA Monthly Process

Figure 13, on the following page, provides a flow diagram of the end-to-end RA monthly process, beginning with the market participants upload of the RA and the Supply plans. The decision boxes describe the different cross validation checks that are performed by the application. Failure to pass any of these validation checks will result in an error message. The status names, that can be found in bold, shows what point the user is at in the validation process when they receive a specific status. While the flow diagram provides a high level understanding of the RA monthly process, the subsequent sections will discuss the process components in more detail.

DRAFT

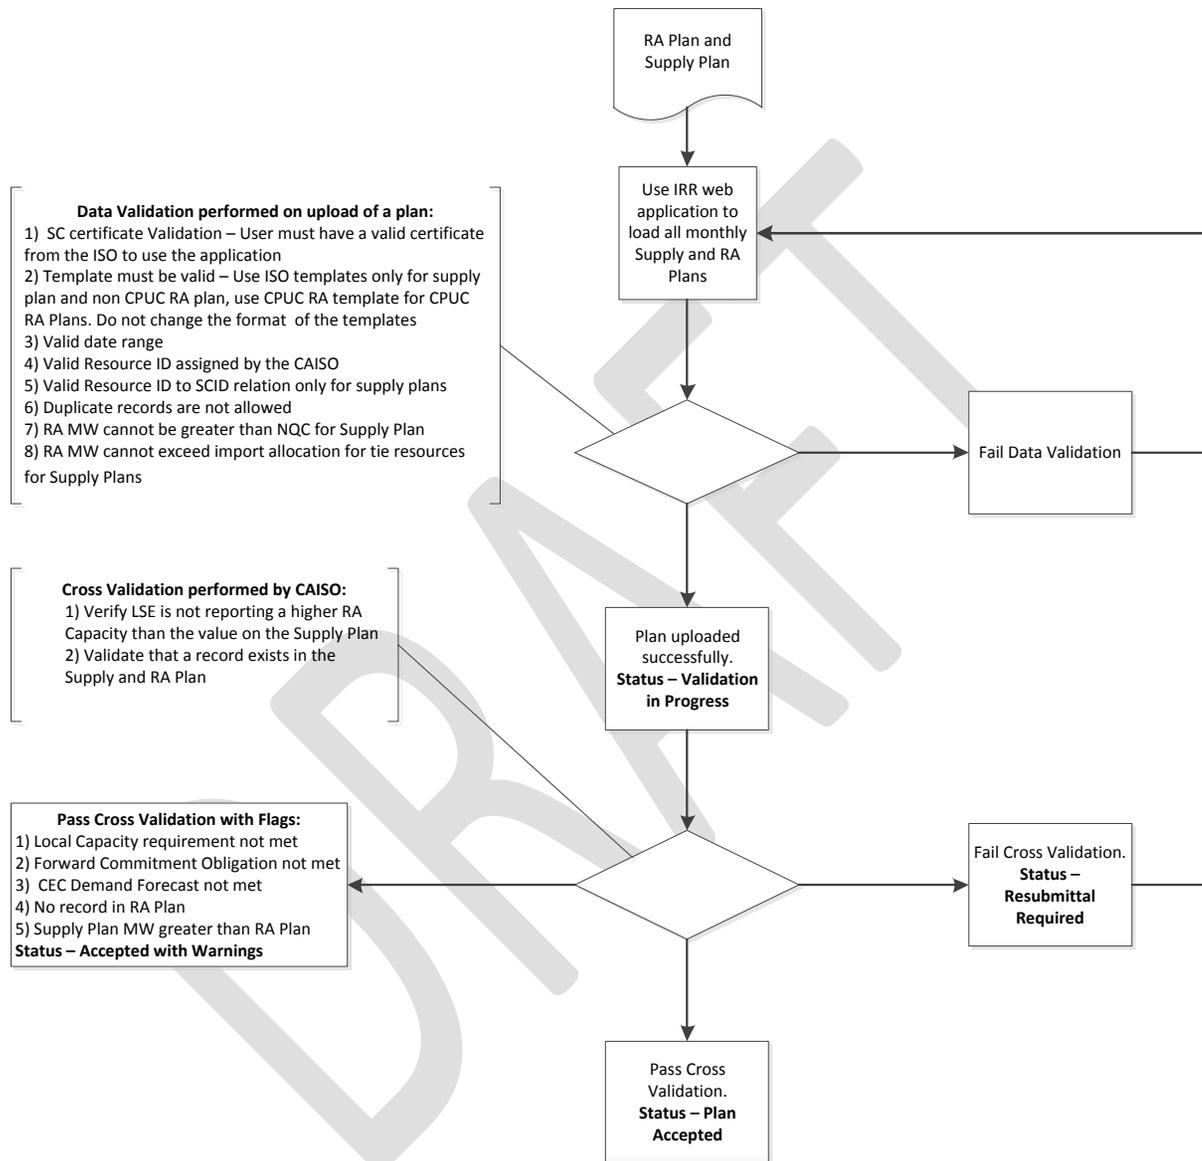

Figure 13: Flow Diagram of the End-to-End RA Monthly Process.

11. IRR User Interface: Download

The Download tab of the user interface can be used to download the templates for RA and Supply Plans, as well as previously submitted RA and Supply plans.

11.1 Downloading Templates

The steps for downloading either RA or Supply plan templates are:

1. Select Download tab,
2. Select Templates, and
3. Select either RA Plan or Supply Plan to download the respective template.

This process is depicted below in Figure 14.

Figure 14: Process for Downloading RA Plan and Supply Plan Templates.

11.2 Downloading RA Plans

The steps for downloading or viewing submitted RA Plans are:

1. Select Download tab,
2. Select RA Plan, and
3. Once on the RA Plan list, select the respective icon to either download or view the details of the submitted RA plan.

This process is depicted below in Figure 15 and Figure 16.

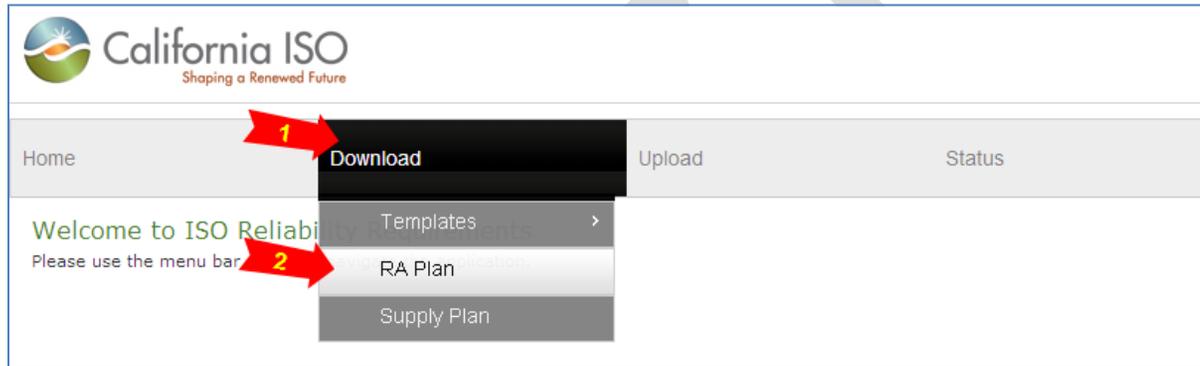

Figure 15: Process for Downloading RA Plans, Steps 1-2.

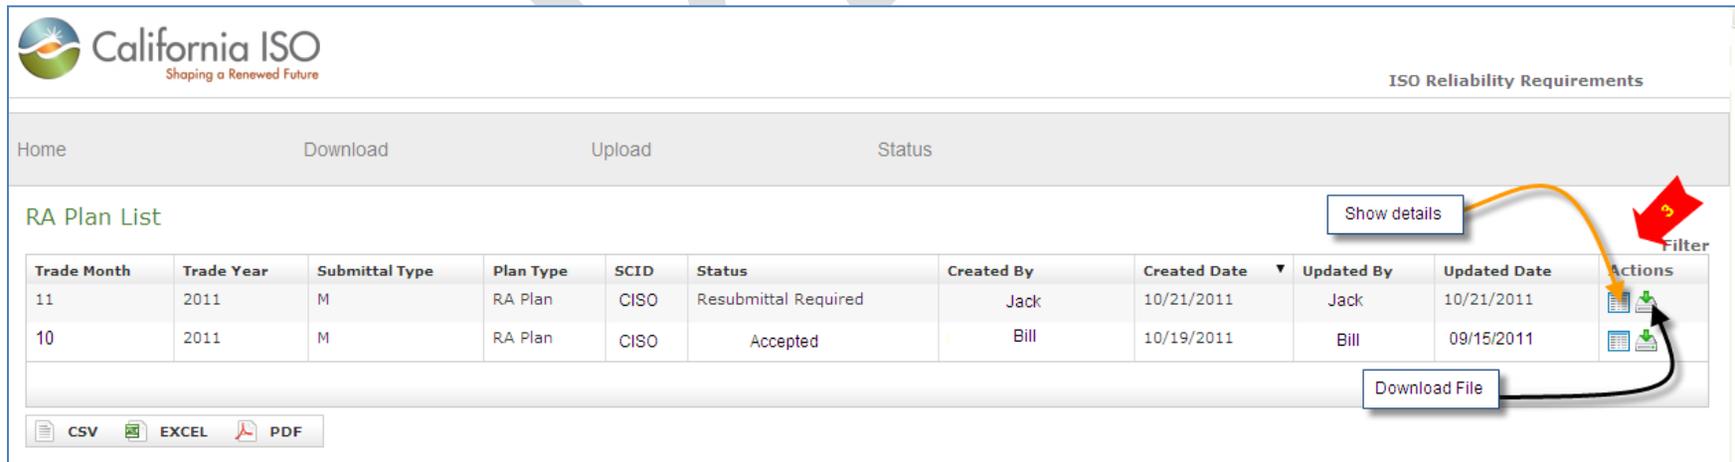

Figure 16: Process for Downloading RA Plans, Step 3.

11.3 Downloading Supply Plans

The steps for downloading or viewing submitted Supply Plans are:

1. Select Download tab,
2. Select RA Plan, and
3. Once on the Supply Plan list, select the respective icon to either download or view the details of the submitted Supply Plan.

This process is depicted below in Figure 17 and Figure 18.

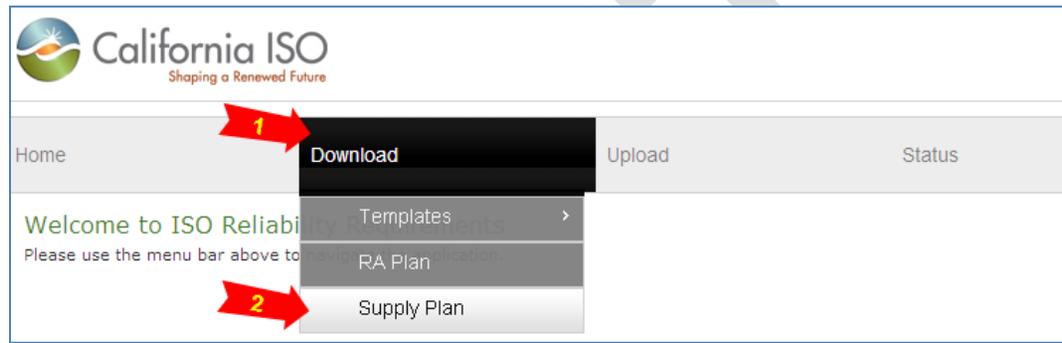

Figure 17: Process for Downloading Supply Plans, Steps 1-2.

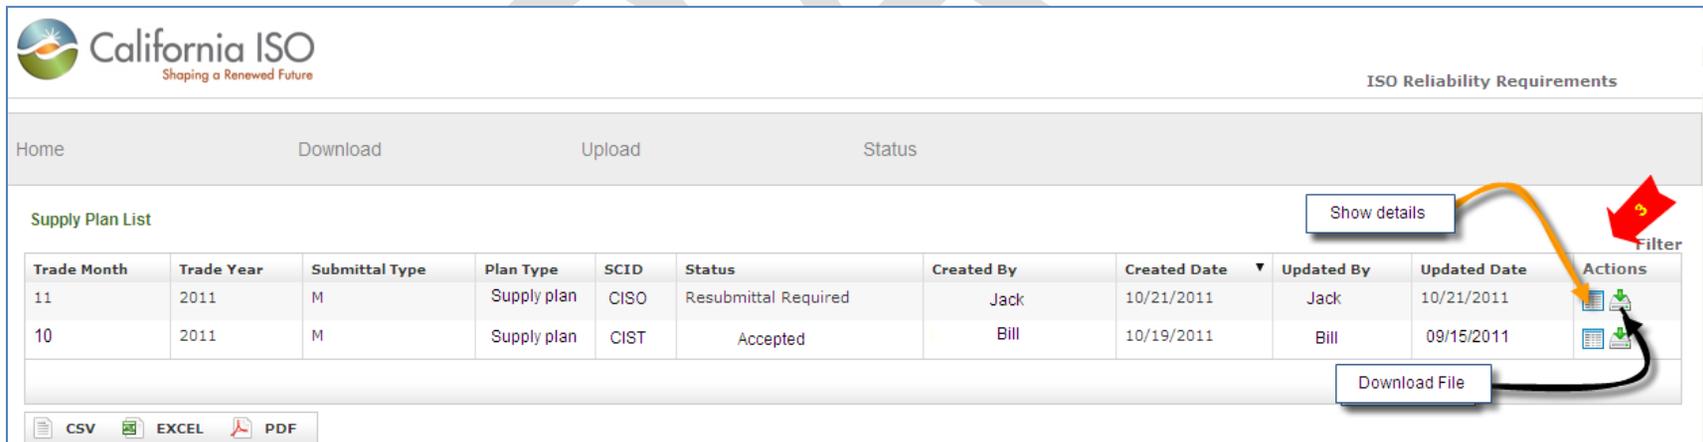

Figure 18: Process for Downloading Supply Plans, Step 3.

12. IRR User Interface: Template Details

12.1 Non CPUC RA Template

The steps to complete the various tabs of a Non CPUC RA Template will be described in the subsequent pages. Figure 19 provides an example of the Admin Info tab. The fields highlighted in blue are required to be completed for submittal; those highlighted in green are optional.

The required fields under the Admin Info tab are:

- **Name of the Load Serve Entity (LSE):** Please enter a valid LSE name
- **Name of CAISO SC:** Please enter a valid SC name
- **CAISO Scheduling Coordinator ID (“SCID”):** Please enter a valid SCID
- **Month and Year of Resource Adequacy Plan:** Please enter month and year of RA Plan, Example: Jan-2012
- Name of the person who prepared the plan, title and valid date
- Contact person details such as name, title, valid email, valid telephone, valid address, etc.

Administrative Information

Name of Load Serving Entity ("LSE")

Name of CAISO Scheduling Coordinator ("SC")

CAISO Scheduling Coordinator ID ("SCID")

Month and Year of Resource Adequacy Plan (Mon-YYYY)

Legal Notification

By submitting this Monthly Plan to the CAISO, the Load Serving Entity is confirming that the Resource Adequacy Plan has been prepared by someone with authority to do so, contains all of the information required by the CAISO to be reported in the Resource Adequacy Plan, and that all such information is true and accurate. Further, the Load Serving Entity affirms and agrees that by submitting this Monthly Plan, the CAISO is entitled to rely on the accuracy of the information provided in the Resource Adequacy Plan to perform those functions set forth in CAISO Tariff Section 40, including, but not limited to, matters that can affect the operation, dispatch and settlement treatment of resources listed in the Resource Adequacy Plan. All Resource Adequacy Plans submitted electronically as specified by the CAISO shall be deemed to originate from the Load Serving Entity referenced in the Resource Adequacy Plan; however, the Load Serving Entity will be notified of multiple submissions, discrepancies with Supply Plans, and/or other errors.

Required Fields

Figure 20: Non CPUC RA Template: Summary Tab.

Figure 21 provides an example of the I_Phys_Res_Import_RA_Res tab. The fields highlighted in blue are required to be completed for submittal.

The required fields under the I_Phys_Res_Import_RA_Res tab are:

- Resource Capacity Contract Number (cannot be blank),
- Valid CAISO Resource ID (cannot be blank),
- Valid Resource Adequacy Capacity (MW). This value must be a number with a maximum of two (2) decimal places. Zero is not accepted for the MW field. Null is not accepted.
- Local RA if it applies to Local capacity. Please enter a valid number; otherwise enter zero (0). Null is not accepted.
- RA Capacity Effective Start Date Time: Example - 10/1/2011 00:00:00
- RA Capacity Effective End Date Time: Example - 10/1/2011 23:59:59
- Minimum Hours in a Month should be a valid number; otherwise enter zero (0). Null is not accepted.

12.2 CPUC RA Plan Template

The steps to complete the various tabs of a CPUC RA Plan Template will be described in the subsequent pages. Figure 22 provides an example of the Certification tab. The fields highlighted in blue are required to be completed for submittal; those highlighted in green are optional.

The required fields under the Certification tab are:

- **Month and Year of Resource Adequacy Plan:** Please enter month and year of RA Plan, Example: Jan-2012
- **Name of the Load Serve Entity (LSE):** Please enter a valid LSE name
- **Energy Service Provider Registration Number (if applicable):** Please enter provider details
- **Date of Filing:** Please enter current date
- **CAISO Scheduling Coordinator ID:** Please enter valid SC
- Name of the person who prepared the plan, title and valid date
- Contact person details such as name, title, valid email, valid telephone, valid address, etc.

RA Compliance Period covered by this Filing:	
Name of Load Serving Entity (LSE):	
Energy Service Provider Registration Number (if applicable):	
Date of Filing	
Scheduling Coordinator:	
Certification of Information:	
Consistent with Rules 1 and 2.4 of the CPUC's Rules of Practice and Procedure, this resource adequacy compliance filing has been verified by an officer of the corporation, who shall expressly certify, under penalty of perjury, the following:	
1. I have responsibility for the activities reflected in this filing;	
2. I have reviewed, or have caused to be reviewed, this compliance filing;	
3. Based on my knowledge, information, or belief, this filing does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements made;	
4. Based on my knowledge, information, or belief, this [filing] contains all of the information required to be provided by CPUC orders, rules, and regulations.

12.3 Supply Plan Template

The steps to complete the various tabs of a Supply Plan Template will be described in the subsequent pages. Figure 25 provides an example of the Admin Info tab. The fields highlighted in blue are required to be completed for submittal; those highlighted in green are optional.

The required fields under the Admin Info tab are:

- **Name of CAISO SC:** Please enter a valid SC name
- **CAISO Scheduling Coordinator ID (“SCID”):** Please enter a valid SCID
- **Month and Year of Resource Adequacy Plan:** Please enter month and year of RA Plan, Example: Jan-2012
- Name of the person who prepared the plan, title and valid date
- Contact person details such as name, title, valid email, valid telephone, valid address, etc.

Administrative Information

Name of CAISO Scheduling Coordinator ("SC")	
CAISO Scheduling Coordinator ID ("SCID")	
Month and Year of Supply Plan (Mon-YYYY)	

Legal Notification

By submitting this Supply Plan to the CAISO, the Scheduling Coordinator is confirming that the Supply Plan has been prepared by someone with authority to do so, contains all of the information required by the CAISO to be reported in the Supply Plan, and that all such information is true and accurate. Further, the Scheduling Coordinator affirms and agrees that by submitting this Supply Plan, the CAISO is entitled to rely on the accuracy of the information provided in the Supply Plan to perform those functions set forth in CAISO Tariff Section 40, including, but not limited to, matters that can affect the operation, dispatch and settlement treatment of resources listed in the Supply Plan. All Supply Plans submitted to the appropriate electronic mailbox as specified by the CAISO shall be deemed to originate from the Scheduling Coordinator referenced in the Supply Plan; however, the Scheduling Coordinator will be notified of multiple submissions, discrepancies with Resource Adequacy Plans, and/or other errors.

Figure 26: Supply Template: Resource Tab.

13. IRR User Interface: Uploading RA Plan

The steps for getting to the RA Plan Upload screen are:

1. Select the Status tab in the application,
2. Select Supply Plan to check the status of submitted Supply Plans

This process is depicted below in Figure 27.

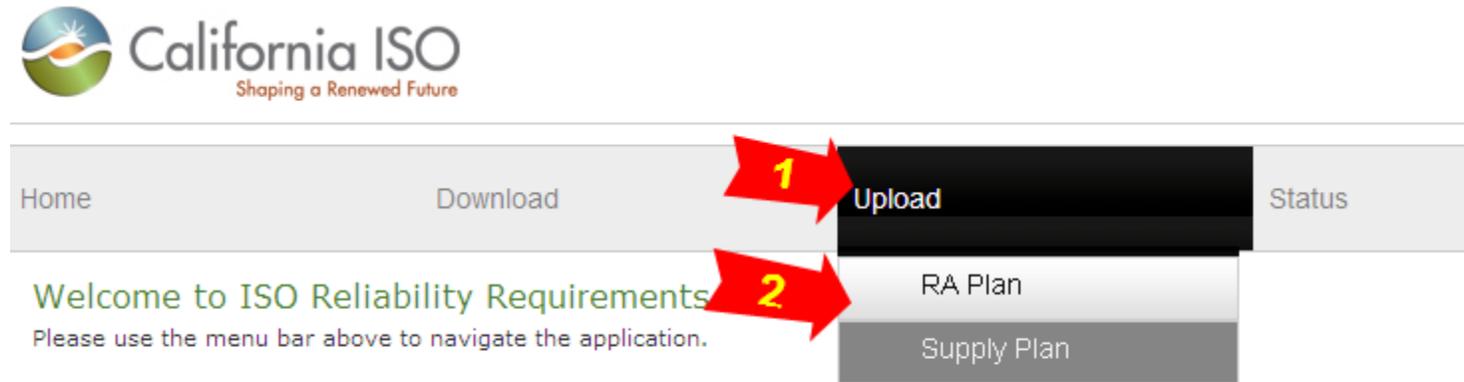

Figure 27: Process for Checking Status of a Submitted Supply Plan, Steps 1-2.

The steps for uploading an RA Plan are:

1. Select the RA Plan type (Monthly) for Submittal Type, Note: Annual is not available
2. For Target Period select trade month (Example: For January Monthly RA please select the month as January),
3. For Target Period select the year
4. Select CAISO assigned SCID from the drop down box for SCID,
5. Select RA Plan file to upload,
6. Click the Upload button, and
7. Receive message "Uploaded Successfully!"

This process is depicted below in Figure 28 and Figure 29. If the RA plan has errors on upload, the errors will be displayed on the screen and the plan cannot be uploaded. Please refer to errors section of this user guide for more details on errors.

The screenshot shows the 'Upload RA Plan' section of the California ISO website. The interface includes a navigation bar with 'Home', 'Download', 'Upload', and 'Status' tabs. The 'Upload RA Plan' form contains the following fields and controls:

- Submittal Type:** A dropdown menu with '-Select-' selected. A red arrow labeled '1' points to this dropdown.
- Target Period:** A dropdown menu with '-Select-' selected, followed by 'Month' and another dropdown with '-Select-' selected, and 'Year'. A red arrow labeled '2' points to the first dropdown, and a red arrow labeled '3' points to the second dropdown.
- SCID:** A dropdown menu with '-Select-' selected. A red arrow labeled '4' points to this dropdown.
- Upload File:** A text input field and a 'Browse...' button. A red arrow labeled '5' points to the 'Browse...' button. A 'Choose File to Upload' dialog box is open over this button, showing a file explorer with 'All Files (*.*)' selected in the 'Files of type' dropdown.
- Buttons:** 'Reset' and 'Upload' buttons. A red arrow labeled '6' points to the 'Upload' button.

Figure 29: Process for Uploading an RA Plan, Step 7.

14. IRR User Interface: Uploading Supply Plan

The steps for getting to the Supply Plan Upload screen are:

1. Select the Status tab in the application,
2. Select Supply Plan to check the status of submitted Supply Plans

This process is depicted below in Figure 30.

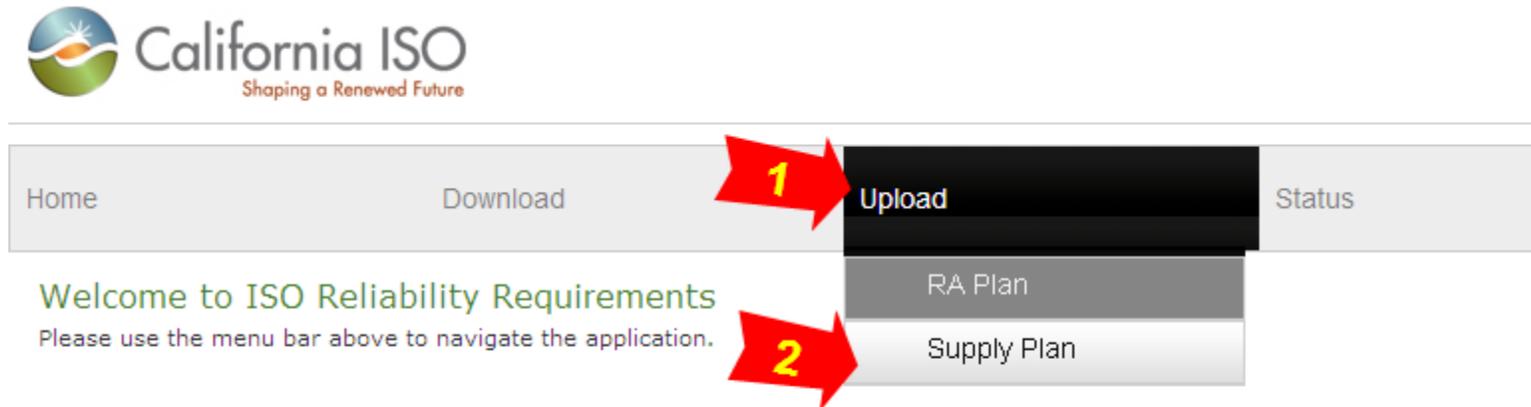

Figure 30: Process for Checking Status of a Submitted Supply Plan, Steps 1-2.

The steps for uploading a Supply Plan are:

1. Select the RA Plan type (Monthly) for Submittal Type, Note: Annual is not available
2. For Target Period select trade month (Example: For January Monthly RA please select the month as January),
3. For Target Period select the year
4. Select CAISO assigned SCID from the drop down box for SCID,
5. Select Supply Plan file to upload,
6. Click the Upload button, and
7. Receive message "Uploaded Successfully!"

This process is depicted below in Figure 31 and Figure 32. If the Supply Plan has errors on upload, the errors will be displayed on the screen and the plan cannot be uploaded. Please refer to errors section of this user guide for more details on errors.

15. IRR User Interface: Status

There are four valid statuses visible in IRR application:

1. **Validation in Progress:** All plans (RA and Supply) submitted for monthly RA processing will be set to validation in progress
2. **Re-submittal Required:** Plans that have errors resulting from cross validation will be set to re-submittal required with the list of errors and the user can resubmit the plan. On resubmission the status will change to validation in progress. Refer to error section in this guide for more details.
3. **Accepted:** Indicates the plan has no error and is accepted for the submitted trade month
4. **Accepted with Warnings:** Plans which fail one of the following validation checks will have the accepted with warnings status -
 - a. Local Capacity Requirement check
 - b. Forward Commitment Obligation check
 - c. CEC Demand Forecast not met
 - d. No record in LSE RA plan
 - e. Supply plan Capacity is greater than RA plan

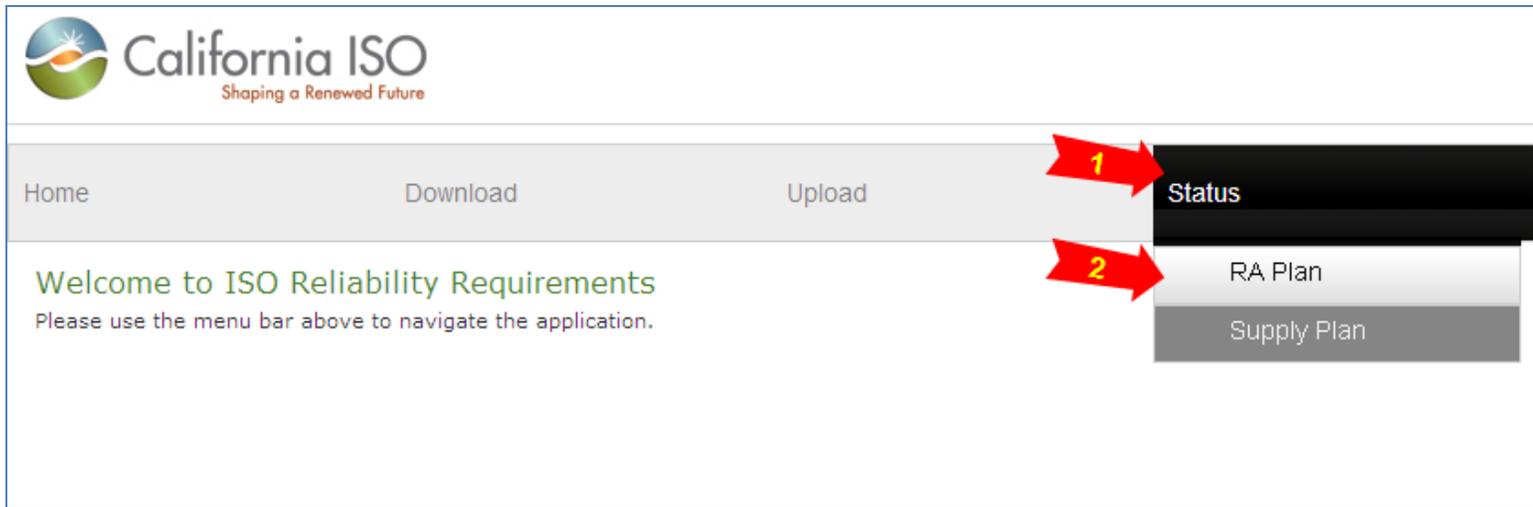

For more details please refer to the Warnings section in this guide.

15.1 Checking Status of RA Plan

The steps for checking the status of an RA Plan are:

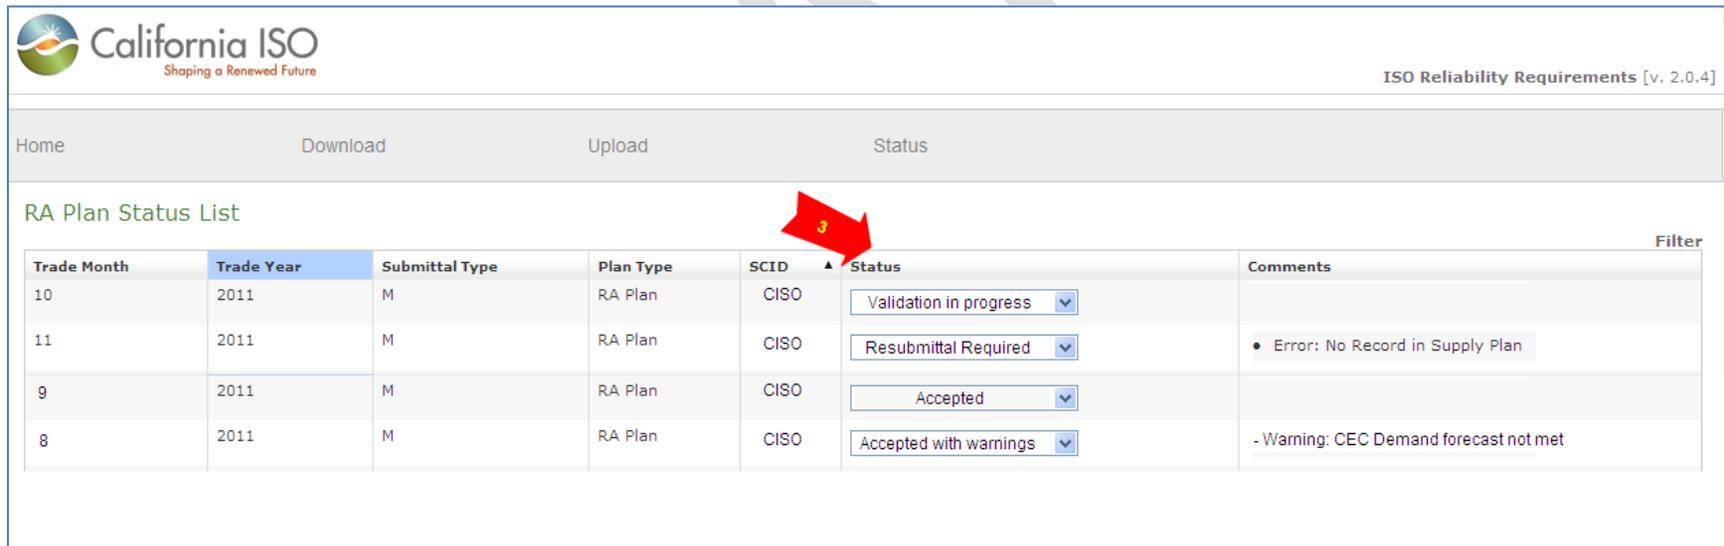

1. Select the Status tab in the application,
2. Select RA Plan to check the status of submitted RA Plans, and
3. Once on the RA Plan list, the errors or warnings can be found displayed in the comments section for each submitted plan.

This process is depicted on the following page in Figure 33 and Figure 34.

The screenshot shows the California ISO website header with the logo and tagline. Below the header is a navigation bar with links for Home, Download, Upload, and Status. A red arrow labeled '1' points to the Status link. A dropdown menu is open under Status, showing options for RA Plan and Supply Plan. A red arrow labeled '2' points to the RA Plan option. Below the navigation bar is a welcome message: "Welcome to ISO Reliability Requirements. Please use the menu bar above to navigate the application."

Figure 33: Process for Checking Status of a Submitted RA Plan, Steps 1-2.

The screenshot shows the California ISO website with the navigation bar. The 'Status' link is selected, and the page title is "ISO Reliability Requirements [v. 2.0.4]". Below the navigation bar is the "RA Plan Status List" section. A table displays the status of submitted RA Plans. A red arrow labeled '3' points to the 'Status' column of the table. The table has columns for Trade Month, Trade Year, Submittal Type, Plan Type, SCID, Status, and Comments. The Status column contains dropdown menus with values like "Validation in progress", "Resubmittal Required", "Accepted", and "Accepted with warnings". The Comments column contains error and warning messages.

Trade Month	Trade Year	Submittal Type	Plan Type	SCID	Status	Comments
10	2011	M	RA Plan	CISO	Validation in progress	
11	2011	M	RA Plan	CISO	Resubmittal Required	• Error: No Record in Supply Plan
9	2011	M	RA Plan	CISO	Accepted	
8	2011	M	RA Plan	CISO	Accepted with warnings	- Warning: CEC Demand forecast not met

Figure 34: Process for Checking Status of a Submitted RA Plan, Step 3.

15.2 Checking Status of Supply Plan

The steps for checking the status of an RA Plan are:

1. Select the Status tab in the application,
2. Select Supply Plan to check the status of submitted Supply Plans, and
3. Once on the Supply Plan list, the errors or warnings can be found displayed in the comments section for each submitted plan.

This process is depicted below in Figure 35 and Figure 36.

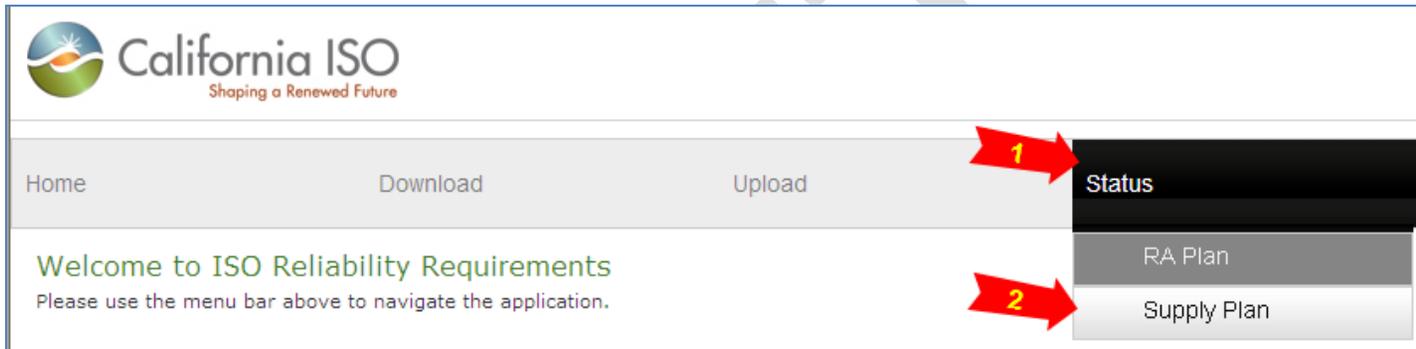

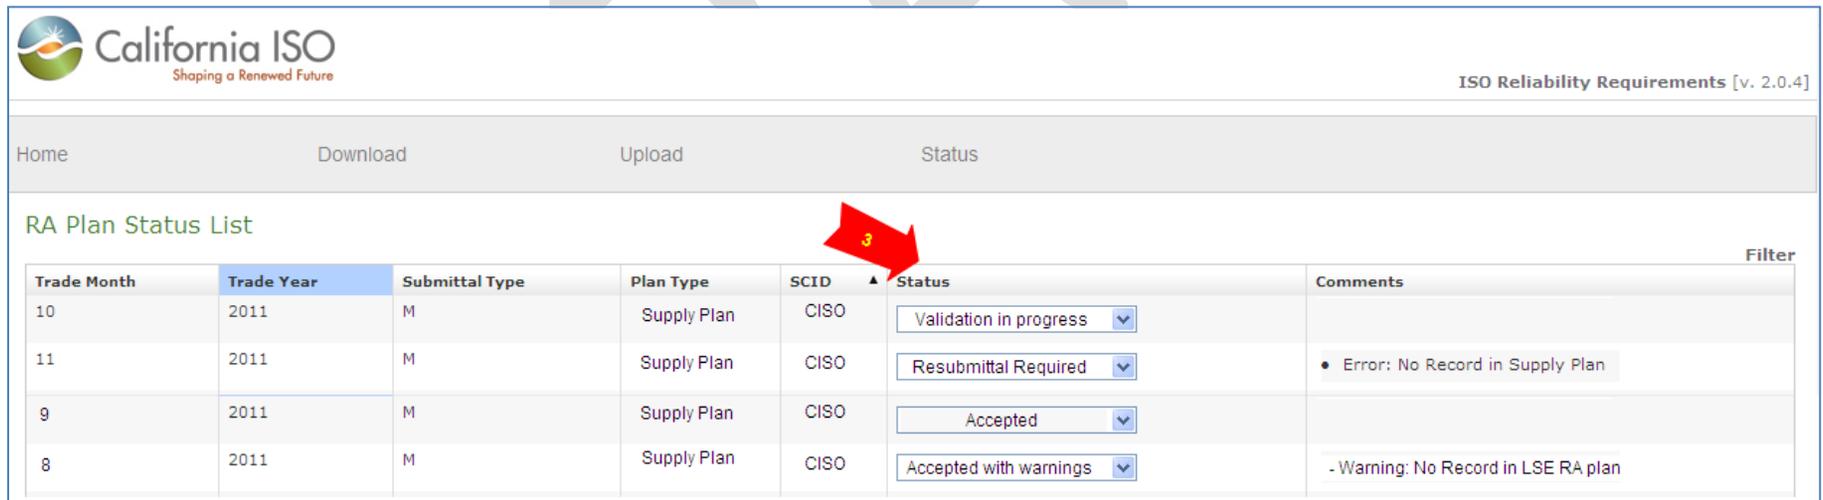

Figure 35: Process for Checking Status of a Submitted Supply Plan, Steps 1-2.

The screenshot shows the 'RA Plan Status List' table. A red arrow labeled '3' points to the 'Status' column header. The table contains four rows of data, each representing a submitted supply plan. The 'Comments' column contains error or warning messages for some plans.

Trade Month	Trade Year	Submittal Type	Plan Type	SCID	Status	Comments	Filter
10	2011	M	Supply Plan	CISO	Validation in progress		
11	2011	M	Supply Plan	CISO	Resubmittal Required	• Error: No Record in Supply Plan	
9	2011	M	Supply Plan	CISO	Accepted		
8	2011	M	Supply Plan	CISO	Accepted with warnings	- Warning: No Record in LSE RA plan	

Figure 36: Process for Checking Status of a Submitted Supply Plan, Step 3.

16. IRR User Interface: Errors

Figure 37 below displays an example of the error message “Upload failed, please try again. If problems persist, contact CAISO Support. If the upload fails because of this error, please email the template (RA or Supply) to reliabilityrequirements@caiso.com with a screenshot of the error or call ISO Help Desk.

The screenshot shows the California ISO user interface for uploading a supply plan. At the top is the California ISO logo and tagline. Below is a navigation bar with links for Home, Download, Upload, and Status. The main heading is "Upload Supply Plan". A red-bordered box highlights an error message: "Upload failed, please try again. If problems persist contact CAISO Support." Below the error message are several form fields: "Submittal Type" with a dropdown menu set to "Month Ahead"; "Target Period" with dropdowns for "October" (Month) and "2011" (Year); "SCID" with a dropdown menu; and "Upload File" with a text input field and a "Browse..." button. At the bottom of the form are "Reset" and "Upload" buttons.

Figure 37: Errors: “Upload failed, please try again. If problems persist contact CAISO Support”.

Figure 38 below displays an example of the error message “Uploaded Template has either blank sheet(s) or has invalid parameters!” A blank resources tab (Both RA and Supply) cannot be uploaded using the IRR user interface. If the user has only demand response or liquidated damages and no resources as Resource Adequacy to be submitted as a part of monthly RA filings, then please email the plan to reliabilityrequirements@caiso.com.

The screenshot shows the California ISO web interface for uploading a Resource Adequacy (RA) plan. At the top is the California ISO logo and tagline. Below is a navigation bar with links for Home, Download, Upload, and Status. The main heading is "Upload RA Plan". A red-bordered box contains the error message: "Uploaded Template has either blank sheet(s) or has invalid parameters!". Below the error message are several form fields: "Submittal Type" with a dropdown menu set to "Month Ahead"; "Target Period" with dropdowns for "November" (Month) and "2011" (Year); "SCID" with a dropdown menu; and "Upload File" with a text input field and a "Browse..." button. At the bottom of the form are "Reset" and "Upload" buttons.

Figure 38: Errors: “Uploaded Template has either blank sheet(s) or has invalid parameters!”

16.1 RA Plan Errors

16.1.1 Null or Invalid Entries in the Admin Tab

Null or invalid entries in the required fields of the RA Plan will result in an error message. Figure 39 provides an example list of error messages that would be received if the Admin Info tab of a RA Plan was blank when submitted (Figure 40).

Reviewing the first line error received in Figure 39:

1. “For Sheet: Admin Info”: This lets the user know that the error is in the Admin Info tab,
2. “C21 and Field”: This indicates the cell number where the field is creating an error,
3. “contADD, Error: The Value is null or invalid.”: This is the actual error message for the entry.

Thus, the error in this example is located in cell C21 on Admin Info tab because it is null or has an invalid entry. Similarly, all the remaining errors in Figure 39 are from a null or invalid value in the Admin Info tab. To fix these errors, please open the template and insert valid entries into the cells. Then, resubmit the template.

A complete list of invalid or null error messages, their definitions, and the fix can be found below in Table 13.

16.2.2 Not a Valid Template

Figure 44 is an example of the error message “Expected Sheet ‘I_Phys_Res_Import_RA_Res’ not found!”, which would be received due to the use of an invalid Supply Plan template. Please use the templates posted on the ISO website.

The screenshot shows the California ISO website interface for uploading a Resource Action (RA) plan. At the top is the California ISO logo and tagline. Below is a navigation bar with links for Home, Download, Upload, and Status. The main heading is "Upload RA Plan". A red-bordered box contains the error message: "Expected Sheet 'I_Phys_Res_Import_RA_Res' not found!". Below the error message are several form fields: "Submittal Type" with a dropdown menu set to "Month Ahead"; "Target Period" with dropdowns for "November" (Month) and "2011" (Year); "SCID" with a dropdown menu set to "CISO"; and "Upload File" with a text input field and a "Browse..." button. At the bottom of the form are "Reset" and "Upload" buttons.

Figure 44: Example Error Message Received Due to the Use of an Invalid Plan Template.

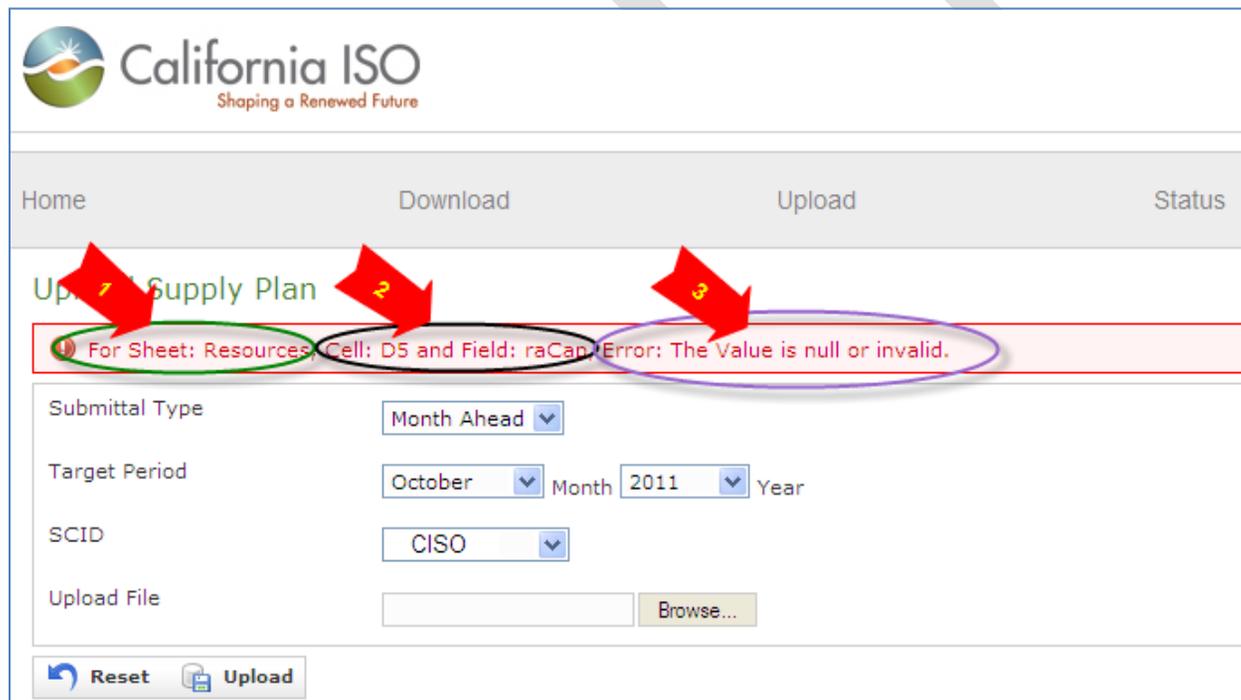

16.2.3 Invalid Resource Adequacy MW

Figure 45 provides an example of the error messages that would be received if the Resource Adequacy MW of a Supply Plan was null or invalid when submitted.

Reviewing the error received in Figure 45:

1. "For Sheet: Resources": This lets the user know that the error is in the Resource tab,
2. "D3 and Field": This indicates the cell number where the field is creating an error,
3. "recap, Error: The Value is null or invalid": This is the actual error message for the entry.

To fix this error, please enter a number for RA MW and then resubmit. Zero (0) and null are not accepted.

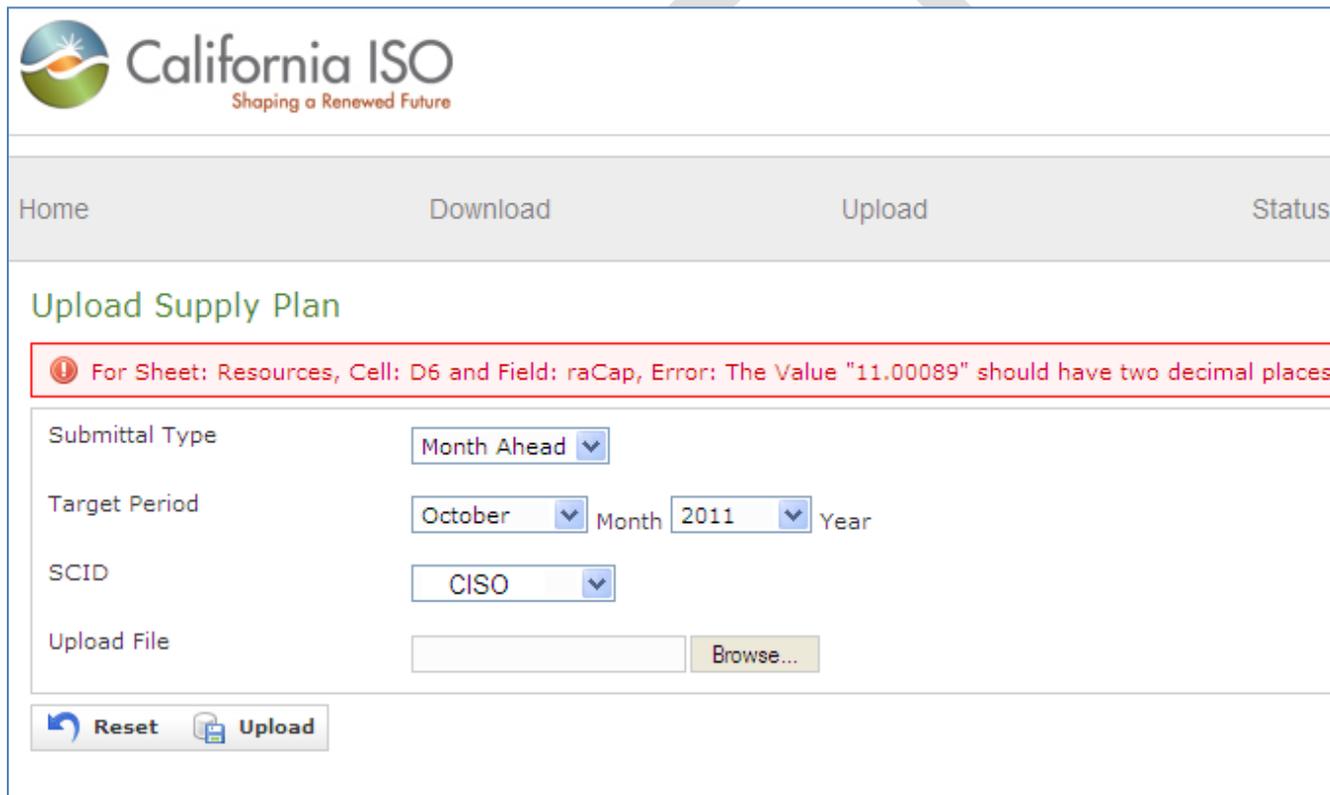

Figure 45: Example Error Message Received Due to Invalid Resource Adequacy MW.

Figure 46 provides an example of the error messages that would be received if the Resource Adequacy MW of a Supply Plan had greater than two (2) decimal places when submitted.

Reviewing the error received in Figure 46:

1. “For Sheet: Resources”: This lets the user know that the error is in the Resource tab,
2. “Cell: D3 and Field”: This indicates the cell number where the field is creating an error,
3. “recap, Error: The Value ‘11.00089’ should have two decimal places”: This is the actual error message for the entry.

To fix this error, please enter a value for RA MW with a maximum of two (2) decimal places, i.e. 11.00, and then resubmit.

The screenshot shows the California ISO web interface for uploading a supply plan. At the top is the California ISO logo and tagline. Below is a navigation bar with links for Home, Download, Upload, and Status. The main heading is "Upload Supply Plan". A red-bordered error message box contains the text: "For Sheet: Resources, Cell: D6 and Field: raCap, Error: The Value '11.00089' should have two decimal places." Below the error message are several form fields: "Submittal Type" (Month Ahead), "Target Period" (October 2011), "SCID" (CISO), and "Upload File" (Browse...). At the bottom are "Reset" and "Upload" buttons.

Figure 46: Example Error Message Received Due to Invalid Resource Adequacy MW.

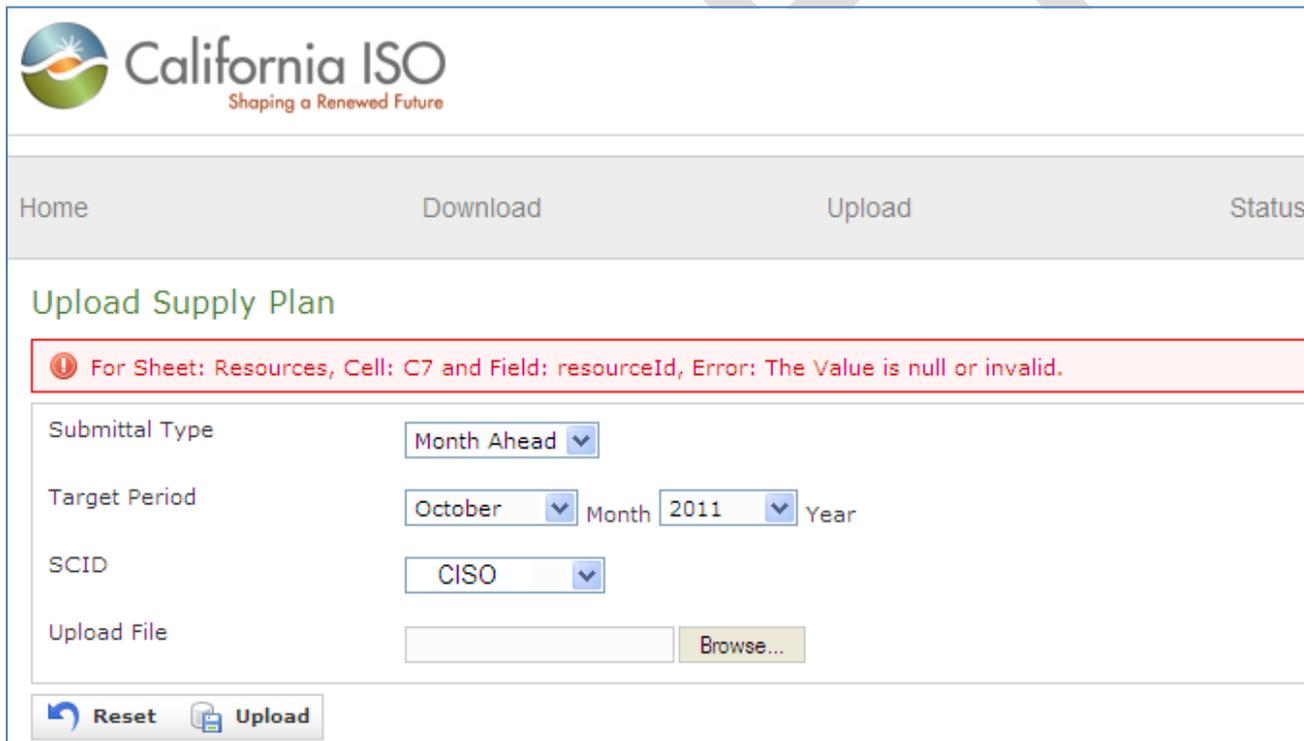

16.2.4 Invalid Resource ID

Figure 47 provides an example of the error messages that would be received if the Resource ID of a Supply Plan was invalid when submitted.

Reviewing the error received in Figure 47:

1. "For Sheet: Resources": This lets the user know that the error is in the Resource tab,
2. "Cell: C7 and Field": This indicates the cell number where the field is creating an error,
3. "resourceId, Error: The Value is null or invalid": This is the actual error message for the entry.

To fix this error, please enter a valid resource ID and then resubmit.

The screenshot shows the California ISO web interface for uploading a supply plan. At the top is the California ISO logo and tagline. Below is a navigation bar with links for Home, Download, Upload, and Status. The main heading is "Upload Supply Plan". A red-bordered error message box contains the text: "For Sheet: Resources, Cell: C7 and Field: resourceId, Error: The Value is null or invalid." Below the error message are several form fields: "Submittal Type" with a dropdown menu set to "Month Ahead"; "Target Period" with dropdowns for "October", "Month", and "2011", and a "Year" label; "SCID" with a dropdown menu set to "CISO"; and "Upload File" with a text input field and a "Browse..." button. At the bottom of the form are "Reset" and "Upload" buttons.

Figure 47: Example Error Message Received Due to Invalid Resource ID.

16.2.5 Invalid Contract Number

Figure 48 provides an example of the error messages that would be received if the Contract Number of a Supply Plan was invalid when submitted.

Reviewing the error received in Figure 48:

1. “For Sheet: Resources”: This lets the user know that the error is in the Resource tab,
2. “Cell: B7 and Field”: This indicates the cell number where the field is creating an error,
3. “resCapContryNum, Error: The Value is null or invalid”: This is the actual error message for the entry.

To fix this error, please enter a valid contract number and then resubmit. Null is not an accepted entry.

The screenshot shows the California ISO website interface for uploading a supply plan. At the top is the California ISO logo and tagline. Below is a navigation bar with links for Home, Download, Upload, and Status. The main heading is "Upload Supply Plan". A red-bordered error message box contains the text: "For Sheet: Resources, Cell: B7 and Field: resCapContrNum, Error: The Value is null or invalid." Below the error message are several form fields: "Submittal Type" with a dropdown menu set to "Month Ahead"; "Target Period" with dropdowns for "October" (Month) and "2011" (Year); "SCID" with a dropdown menu set to "CISO"; and "Upload File" with a text input field and a "Browse..." button. At the bottom of the form are "Reset" and "Upload" buttons.

Figure 48: Example Error Message Received Due to Invalid Contract Number.

16.2.6 Invalid Date

Figure 49 provides an example of the error messages that would be received if the Date of a Supply Plan was invalid when submitted.

Reviewing the first line error received in Figure 49:

1. “For Sheet: Resources”: This lets the user know that the error is in the Resource tab,
2. “Cell: F7 and Field”: This indicates the cell number where the field is creating an error,
3. “effEndDate, Error: The Value is null or invalid”: This is the actual error message for the entry.

To fix this error, please enter a valid date and then resubmit. As an example, for October month RA the effective start date can be 10/01/11 00:00:00 and the effective end date can be 10/31/2011 23:59:59.

The screenshot shows the California ISO web interface for uploading a supply plan. At the top is the California ISO logo and navigation links: Home, Download, Upload, and Status. The main heading is "Upload Supply Plan". Below this, a red-bordered box contains two error messages:

- For Sheet: Resources, Cell: F7 and Field: effEndDate, Error: The Value is null or invalid.
- For Sheet: Resources, Cell: E7 and Field: effStartDate, Error: The Value is null or invalid.

Below the error messages, the form fields are:

- Submittal Type: Month Ahead (dropdown)
- Target Period: October (dropdown), Month, 2011 (dropdown), Year
- SCID: CISO (dropdown)
- Upload File: [text input] Browse...

At the bottom of the form are "Reset" and "Upload" buttons.

Figure 49: Example Error Message Received Due to Invalid Date.

16.2.7 Invalid SCID of Load Serving Entity

Figure 50 provides an example of the error messages that would be received if the SCID of the Load Serving Entity for a Supply Plan was invalid when submitted.

Reviewing the error received in Figure 50:

1. “For Sheet: Resources”: This lets the user know that the error is in the Resource tab,
2. “Cell: G6 and Field”: This indicates the cell number where the field is creating an error,
3. “scidLse, Error: The Value is null or invalid”: This is the actual error message for the entry.

To fix this error, please enter a valid LSE SCID and then resubmit. Null is not an accepted entry.

The screenshot shows the California ISO 'Upload Supply Plan' interface. At the top is the California ISO logo and navigation links: Home, Download, Upload, and Status. The main heading is 'Upload Supply Plan'. A red-bordered error message box contains the text: 'For Sheet: Resources, Cell: G6 and Field: scidLse, Error: The Value is null or invalid.' Below the error message are the following form fields:

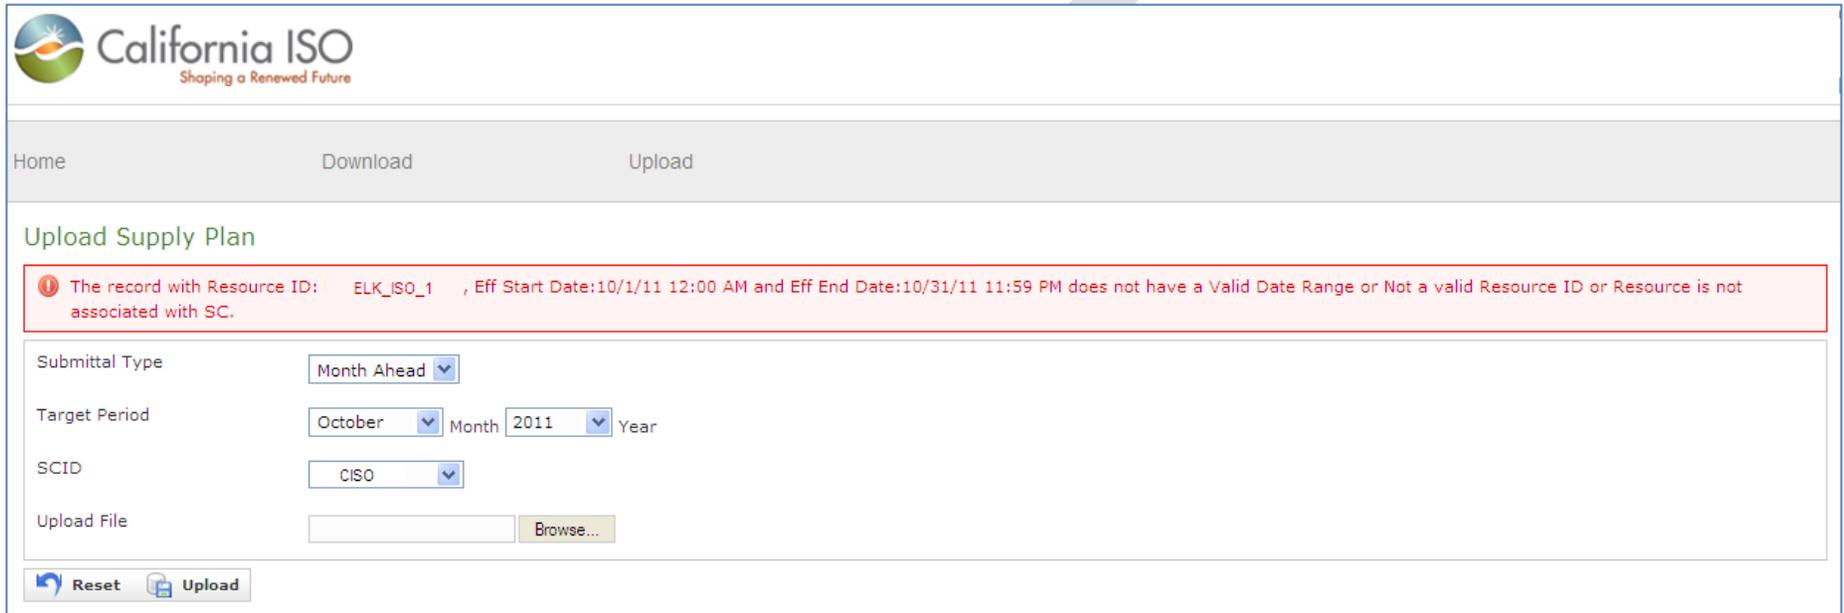

- Submittal Type: Month Ahead (dropdown)
- Target Period: October (dropdown) Month 2011 (dropdown) Year
- SCID: CISO (dropdown)
- Upload File: [text input] Browse...

At the bottom of the form are 'Reset' and 'Upload' buttons.

Figure 50: Example Error Message Received Due to Invalid SCID of Load Serving Entity.

16.2.8 Invalid Date Range, Invalid Resource ID, Resource Not Associated to SC

Figure 51 provides an example of the error messages that would be received due to an invalid resource ID or an invalid date range or the resource may not be associated to the scheduling coordinator submitting the supply plan.

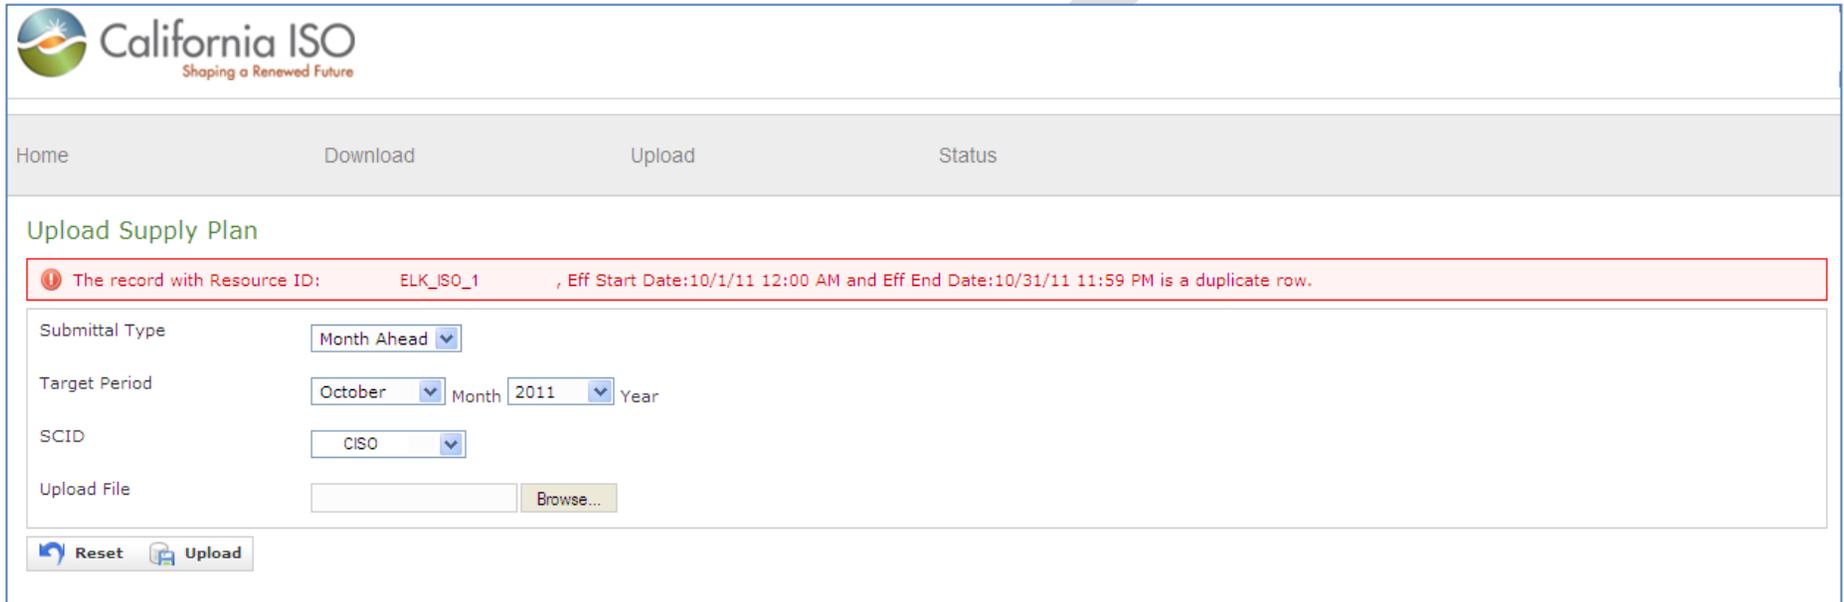

The screenshot displays the California ISO web interface for uploading a supply plan. At the top, the California ISO logo and tagline "Shaping a Renewed Future" are visible. Below the logo is a navigation bar with "Home", "Download", and "Upload" links. The main heading is "Upload Supply Plan". A red-bordered error message box contains the following text: "The record with Resource ID: ELK_ISO_1, Eff Start Date:10/1/11 12:00 AM and Eff End Date:10/31/11 11:59 PM does not have a Valid Date Range or Not a valid Resource ID or Resource is not associated with SC." Below the error message, there are several form fields: "Submittal Type" with a dropdown menu set to "Month Ahead"; "Target Period" with dropdowns for "October" (Month) and "2011" (Year); "SCID" with a dropdown menu set to "CISO"; and "Upload File" with an empty text box and a "Browse..." button. At the bottom of the form, there are "Reset" and "Upload" buttons.

Figure 51: Example Error Message Received Due to Invalid Date Range, Invalid Resource ID, and Resource Not Associated to SC.

16.2.9 Duplicate Record

Figure 52 below provides an example of the error message that would be received due to a duplicate record in the submitted supply plan. Multiple entries for the same resource ID, contract number, and date range are not allowed.

The screenshot shows the California ISO 'Upload Supply Plan' interface. At the top, there is a navigation bar with links for Home, Download, Upload, and Status. Below this, the page title is 'Upload Supply Plan'. A red-bordered error message box contains the text: 'The record with Resource ID: ELK_ISO_1, Eff Start Date:10/1/11 12:00 AM and Eff End Date:10/31/11 11:59 PM is a duplicate row.' Below the error message, the form fields are: 'Submittal Type' set to 'Month Ahead', 'Target Period' set to 'October' for the month and '2011' for the year, 'SCID' set to 'CISO', and an 'Upload File' field with a 'Browse...' button. At the bottom of the form, there are 'Reset' and 'Upload' buttons.

Figure 52: Example Error Message Received Due to Duplicate Record.

16.2.10 Invalid Net Qualifying Capacity

Figure 53 provides an example of the error messages that would be received if the Net Qualifying Capacity of a Supply Plan was invalid when submitted.

Reviewing the error received in Figure 53:

1. “For Sheet: Resources”: This lets the user know that the error is in the Resource tab,
2. “Cell: D5 and Field”: This indicates the cell number where the field is creating an error,
3. “raCap, Error: RA Capacity with value “1000.0” exceeds NQC”: This is the actual error message for the entry.

In this example, the submitted RA value is greater than the NQC. To fix this error, please enter a valid Net Qualifying Capacity and then resubmit. Please note: Resource Adequacy MW in the supply plan cannot exceed the NQC of that resource. RA should be less than or equal to the NQC value.

The screenshot shows the California ISO web interface for uploading a supply plan. At the top is the California ISO logo and navigation links: Home, Download, Upload, and Status. The main heading is "Upload Supply Plan". A red-bordered error message box contains the text: "For Sheet: Resources, Cell: D5 and Field: raCap, Error: RA Capacity with value "1000.0" exceeds NQC." Below the error message are several form fields: "Submittal Type" with a dropdown menu set to "Month Ahead"; "Target Period" with dropdowns for "October" (Month) and "2011" (Year); "SCID" with an empty dropdown menu; and "Upload File" with an empty text box and a "Browse..." button. At the bottom of the form are "Reset" and "Upload" buttons.

Figure 53: Example Error Message Received Due to Invalid Net Qualifying Capacity.

16.2.11 Invalid Import Allocation

The Resource Adequacy MW for a resource cannot exceed the Import Allocation limit. Every tie/ import resource has an allocation limit on the tie. An example of this is as follows:

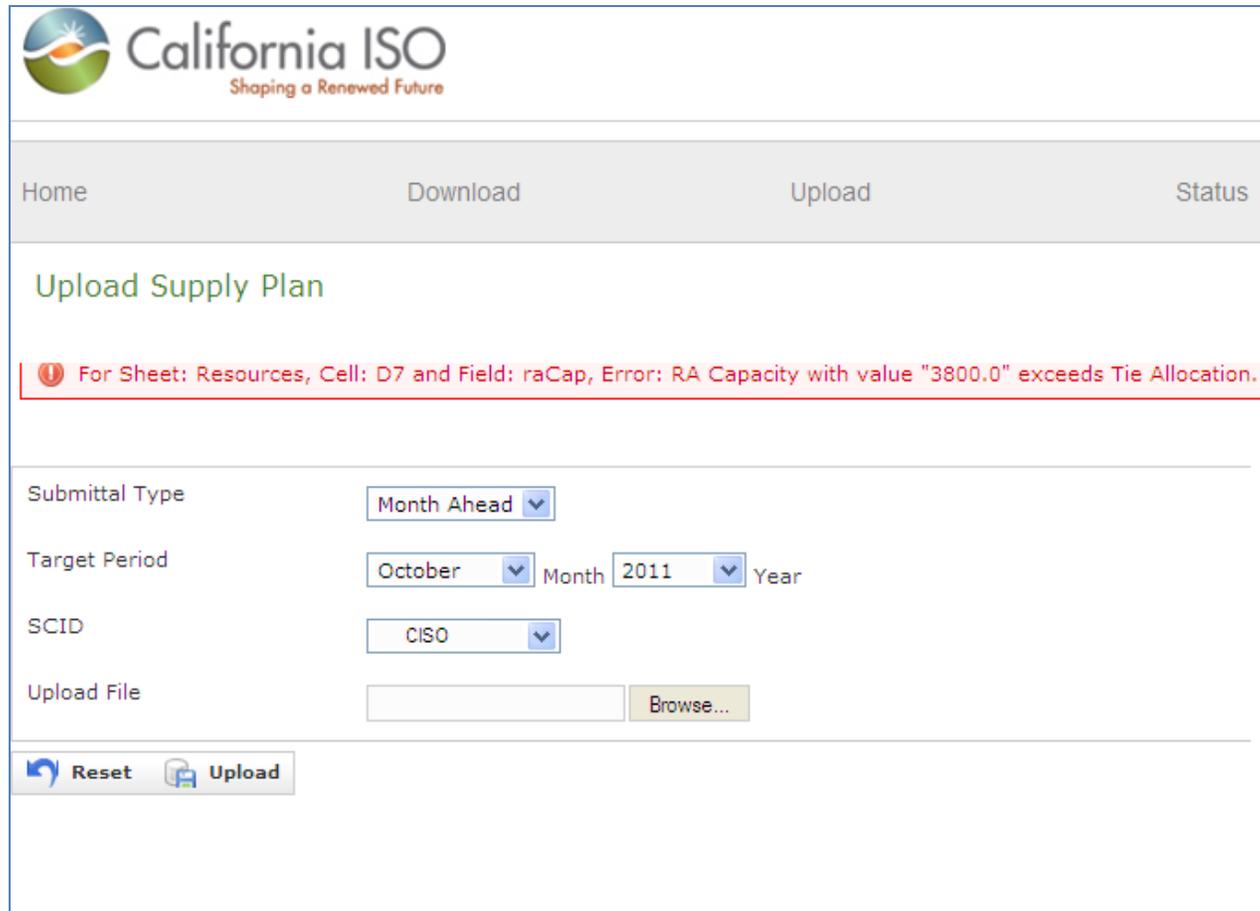

- SCID: CISO, Branch Group – Mead_MSL and tie limit on Mead_MSL is 10 MW for the SC CISO, Resources CISO_I_F_MSL1 and CISO_I_F_MSL2 share the branch group Mead_MSL,
- On the supply plan for CISO, the sum of the RA MW for resources CISO_I_F_MSL1 and CISO_I_F_MSL2 cannot exceed 10 MW,
- Therefore, RA MW should be less than or equal to the tie allocation limit.

Figure 54, on the following page, provides a visual example of the error messages that would be received if the RA MW value on the submitted Supply Plan was greater than the tie allocation limit.

Reviewing the error received in Figure 54:

1. “For Sheet: Resources”: This lets the user know that the error is in the Resource tab,
2. “Cell: D7 and Field”: This indicates the cell number where the field is creating an error,
3. “raCap, Error: RA Capacity with value ‘3800.0’ exceeds tie allocation”: This is the actual error message for the entry.

To fix this error, please enter a valid RA MW or Import Allocation value and then resubmit.

17. IRR User Interface: Warnings

17.1 RA Plans Warnings

For all RA plans there are three validation checks performed on upload of a plan. These checks serve as warnings only to provide information to the user.

The following three warnings may be seen flagged on upload:

1. Local Capacity Requirement Not Met
2. Forward Commitment Obligation Not Met
3. CEC Demand Forecast Not Met

Figure 55 below provides an example of a RA Plan upload that received all three warnings: local capacity requirement not met, forward commitment obligation not met, and CEC demand forecast not met.

The screenshot shows the California ISO website interface for uploading a Resource Adequacy (RA) Plan. At the top, the California ISO logo and tagline 'Shaping a Renewed Future' are displayed. Below the logo is a navigation bar with links for 'Home', 'Download', 'Upload', and 'Status'. The main heading is 'Upload RA Plan'. A light blue notification box indicates 'Uploaded Successfully!'. Below this, three yellow warning boxes are displayed: 'Warning: Local Capacity Requirement for 'Big Creek-Ventura' not met.', 'Warning: Forward Commitment obligation not met.', and 'Warning: Peak Demand Forecast not met'. The form fields include: 'Submittal Type' set to 'Month Ahead', 'Target Period' set to 'October' for the 'Month' and '2011' for the 'Year', an empty 'SCID' field, and an 'Upload File' field with a 'Browse...' button. At the bottom, there are 'Reset' and 'Upload' buttons.

Figure 55: Example of Possible RA Plan Warnings Received upon Upload.

17.2 Supply Plan Warnings

The Supply Plan warnings may result after every cross validation run. A cross validation compares all submitted RA plans against all submitted Supply plans.

The following two warnings may be seen flagged for the Supply Plan after a cross validation:

1. No record in LSE RA Plan
2. Supply Plan MW greater than RA Plan

As shown in Figure 56 on the following page, the warnings can be seen in the Supply Plan Status List under the Status tab. The warnings are located in the comments section of this list. Please note, a supply plan may be accepted with warnings.

18. Cross Validation

After the ISO has received all plans RA and Supply, the cross validation is triggered by the ISO. This validation is a comparison of all RA plans against the supply plans.

The following validation checks are performed during the cross validation:

1. Check MW between RA and supply for each resource,
2. Check for the resource entry in both RA and Supply,
3. Check Import allocation between RA and Supply, and
4. Check NQC for all resources.

If there are any errors after cross validation, the errors can be seen on the status tab. All errors will be displayed in the comment section and the status of the plan will be changed to “re-submittal required”. SCs need to correct the errors and resubmit plans which have status as “re-submittal required”. Plans with only warnings will have the status “accepted with warnings”. Plans with no errors or warnings will have status as “accepted”.
