FCC COMPLIANCE STATEMENT

This equipment has been tested and found to comply with the limits for a Class A digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference when the equipment is operated in a commercial environment. This equipment generates, uses, and can radiate radio frequency energy and, if not installed and used in accordance with the instruction manual, may cause harmful interference to radio communication. Operation of this equipment in a residential area is likely to cause harmful interference in which case the user will be required to correct the interference at his own expense.

Information

PCR120 Series 125KHz RFID Reader

MACHINE TYPE	FUNCTION
 **PCR120** **RS232 Interface**	125K; Single Cell LR03 / AAA; Muti-Battery NiHM / NiCd ALKALINE; F - MEM 512 KB; RS-232; 8192 REC QUEUE; BEEP; RTC; AUTO OFF; GNET VER 1.2; FMM; LCD 101 X 67
 **PCR120U** **USB Interface**	125K; Single Cell LR03 / AAA; Muti-Battery NiHM / NiCd ALKALINE; F - MEM 512 KB; USB Ver 1.1; 8192 REC QUEUE; BEEP; RTC; AUTO OFF; GNET VER 1.2; FMM; LCD 101 X 67

Read the instructions on your device before installing batteries

1. Insert batteries into your device properly, with the (+) and (-) terminals aligned correctly.
2. Discharged batteries should be removed from equipment to prevent possible damage.
3. Store the batteries in a cool and dry place. [Batteries should be stored at temperatures between 50˚F (10˚C) and 77˚F (25˚C), with relative humidity not exceeding 65 percent. Refrigeration of alkaline batteries is not necessary because of their very good capacity retention. Excessive temperature cycling and storage at temperatures greater than 77˚F (25˚C) should be avoided to maximize shelf life.]
4. Remove batteries from the electrical device if the device is not going to be used for a long time.
5. Keep battery contact surfaces and battery compartment contacts clean by rubbing them with a clean pencil eraser or a rough cloth each time you replace batteries.
6. Keep batteries away from children. If swallowed, contact a physician at once.
7. Don't recharge a battery unless it is specifically marked "rechargeable". Attempts to recharge an alkaline battery may cause an imbalance within the cell, leading to gassing and possibly explosion on either charge or discharge cycles.
8. Don't dispose of batteries in a fire—they may rupture or leak.
9. Don't carry loose batteries in a pocket or purse with metal objects like coins, paper clips, etc. This will short-circuit the battery, generating high heat.

■ MFR120 Series 13.56MHz RFID Reader

MACHINE TYPE	FUNCTION
 **MFR120** **RS232 Interface**	13.56M; Single Cell LR03 / AAA; Muti-Battery NiHM / NiCd ALKALINE; F -MEM 512 KB; RS-232; 8192 REC QUEUE; BEEP; RTC; AUTO OFF; GNET VER 1.2; FMM; LCD 101 X 67
 **MFR120U** **USB Interface**	13.56M; Single Cell LR03 / AAA; Muti-Battery NiHM / NiCd ALKALINE; F -MEM 512 KB; USB Ver 1.1; 8192 REC QUEUE; BEEP; RTC; AUTO OFF; GNET VER 1.2; FMM; LCD 101 X 67

■ Read the instructions on your device before installing batteries

1. Insert batteries into your device properly, with the (+) and (-) terminals aligned correctly.
2. Discharged batteries should be removed from equipment to prevent possible damage.

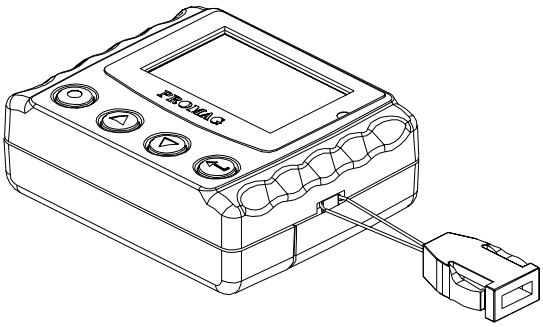
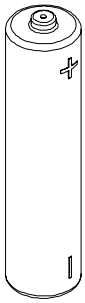
7. Don't recharge a battery unless it is specifically marked "rechargeable". Attempts to recharge an alkaline battery may cause an imbalance within the cell, leading to gassing and possibly explosion on either charge or discharge cycles.
8. Don't dispose of batteries in a fire—they may rupture or leak.
9. Don't carry loose batteries in a pocket or purse with metal objects like coins, paper clips, etc. This will short-circuit the battery, generating high heat.

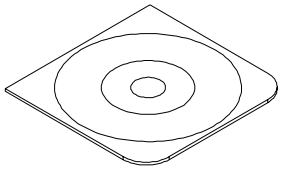
■ Standard Package



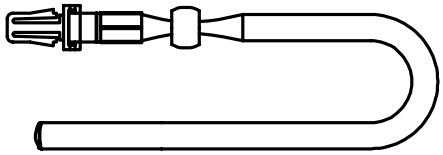
Main unit
(PCR120/MFR120)



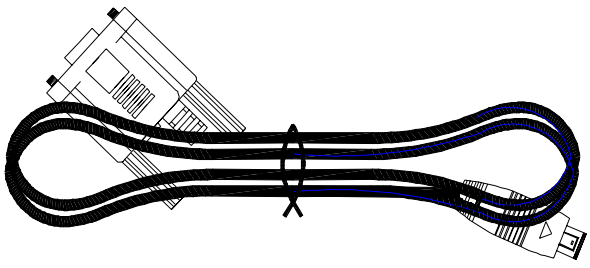
LR03-AAA ALKALINE 1.5V Battery
(BAT-T0010)



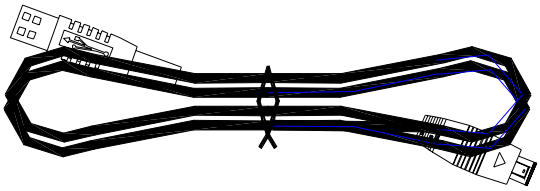
CD-ROM



Chain Sling
(TM09F1001)



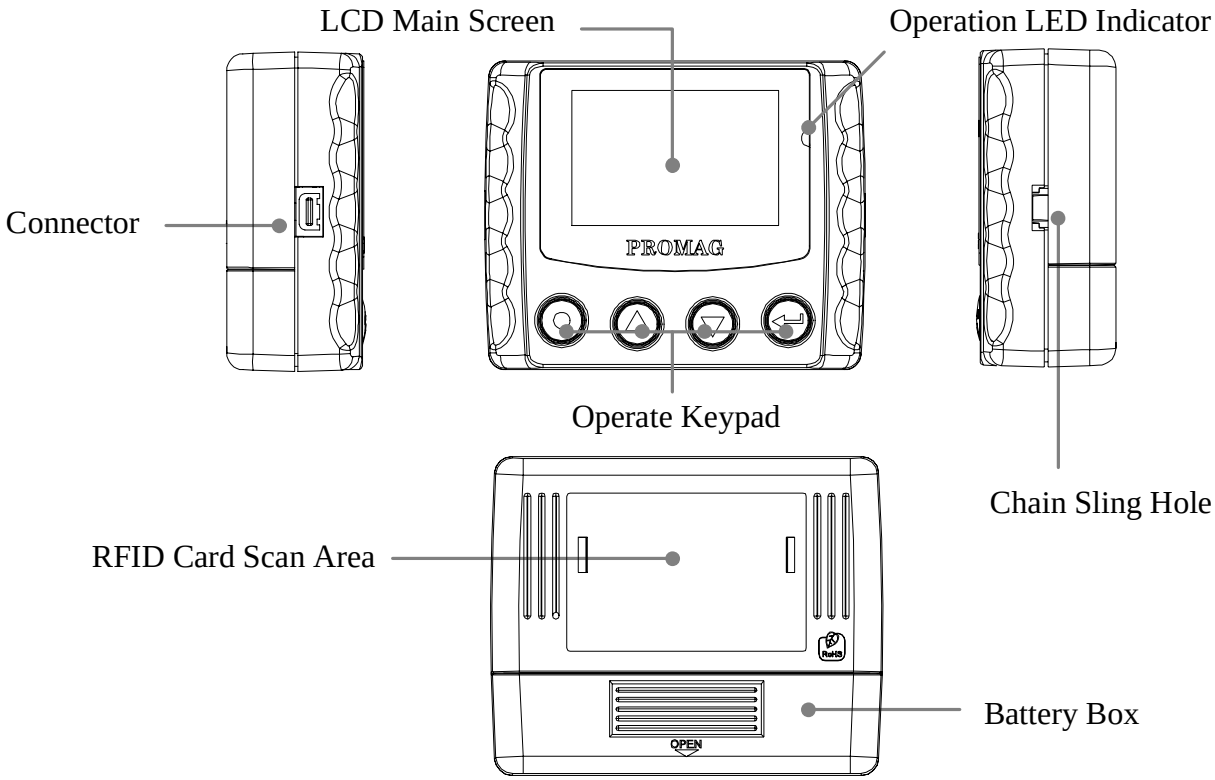
RS232 Cable for PCR120/MFR120 series
(WAS-T0017)



USB Cable for PCR120U/MFR120U series
(WAS-1571)

Technical and Operational Description

Front Panel and Operations



- **RFID Card Scan Area**
  Scan the RFID card to reader.

- **Operation LED Indicator**
  When encountering erroneous input, defective card, misread,bad memory or incorrectly encoded data and so on, the device will turn on the ERROR indicator .

- **LCD Main Screen**
  Indicating the device is ready for use low battery in operational mode.

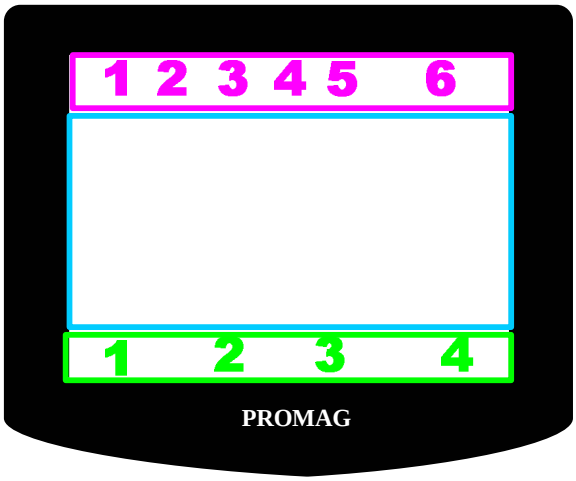
- **Connector**
  For connection to host computer and external Power .

- **Battery Box**
  Put the battery in box and hold battery .

- **Operate Keypad**
  Turn the PCR120/MFR120 on/off power and Operate.

- **Chain Sling Hole**
  Connect to chain sling.

■ LCD Display



Status Function Area

Main Display Area

Keypad Guidance Area

● Status Function Area

1. Power Status

	Battery Power Supply
	Low Battery Power Supply
	External Power Supply

2. Scan Status

／ or ＼	Scaning

3. Buzzer Status

	Buzzer ON

4. Event Status

1~9	Event

5. Decode Status

EM	EM Card Decoded
1K	Mifare 1K Card Decoded
4K	Mifare 4K Card Decoded
DS	Mifare DESFire Card Decoded
UT	Mifare Ultralight Card Decoded
FL	Felica Card Decoded

6. Guidance Number

xxxxxx	Current Record Number When Scanning or Viewing Database
x	Main Menu Item When Operating Menu
x-x	Sub-Menu Item When Operating Submenu

● Main Display Area

Display Date & Week & Time , Menu Item , Record Data , Parameter Setting , Other Information

● Keypad Guidance Area

1. Corresponding Key - 

Power /Exit / Back / Cancel / No Key Function

2. Corresponding Key - 

Up / Up scroll / Decrease/Scan Key Function

3. Corresponding Key - 

Down / Down scroll / Increase/Event Key Function

4. Corresponding Key - 

Menu / Enter / Save / Next / Yes Key Function

■ Function Menu

1. Profiles	**1-1. Machine ID**	Display Machine ID - 2 Characters Default : 00
	1-2. User Name	Display User Name - 16 Characters Max
	1-3. Display Format	Display Mode - ID Number
	1-4. View Mode	Set View Mode - Big or Small Default : Big
	1-5. Scan Mode	Set Scan Mode - Button or Continuous Default : Button
2. Setting	**2-1. BackLight**	Set Back Light Duration - 03~ 255 Seconds Default : 15 Seconds
	2-2. Auto Power Off	Set Auto Power Off Duration - 03 ~ 255 Seconds Default : 30 Seconds
	2-3. Power Mode	Set Power Mode - Switch Mode or Auto Power Off Mode Default : Switch Mode
	2-4. Sound	Set Operate Sound - ON or OFF Default : ON
	2-5. Reset	Reset Default - BackLight = 15 seconds Auto Power Off = 30 seconds Power Mode = Switch Mode Sound = ON
3. Database	**3-1. Status**	Display Memory Status - Used Space, Unused Space, Total Space
	3-2. View	Display all records in memory
4. Calendar	**4-1. Date Format**	Set Date Format Select - Year / Month / Date Date / Month / Year Month / Date / Year Default : Month / Date / Year
	4-2. Set Date/Time	Set Date - Year, Month, Date Set Time - Week, Hour, Minute, Second
5. Information	**5-1. Product Name, Product Description, Firmware Version**	

■ Display Information

Exceptional Indication

LCD Display message	Description	Counterplot
Check RTC !	The RTC is malfunctioning (After scan card)	Set Date and Time
FLASH Full !	The record already is full. (After scan card)	Download Records and Erase Records
Check FLASH !	The record can't write into the FLASH memory. (After svan card)	Contect Agent
Decode Error !	Scan Card can't decode. (After scan card)	Scah Card again or Change Card
No Record !	No Record in FLASH memory. (Enter Database -View function)	Swipe Card
Record not empty !	The FLASH memory not empty. (Enter Calendar function)	Download Records and Erase Records
ISP MODE	Enter FMM Mode (By communication command)	Update New Firmware

Status	Green LED	Red LED	Buzzer	Read Card
Power On	**Take turns blink 2 times**		**Beep. Beep.**	**X**
Auto Power Off	**Take turns blink 2 times**		**Beep. Beep.**	**X**
Ready	**Off**	**Off**	**X**	**O**
Read OK	**Blink 1 time**	**Off**	**Beep.**	**X**
Read Error	**Off**	**Blink 1 time**	**Beep. Beep. Beep.**	**X**
Firmware Management Mode	**Off**	**On**	**X**	**X**

■ Operational Description

1. Powered by Battery

For normal use, the unit is powered by battery. Push the Power Switch Button "⊙" for about 2 seconds to turn on the unit. Also push the Power Switch Button "⊙" for about 2 seconds to turn off the unit at Switch Mode. After the unit is turned on, the power would be turned off automatically if there is no scanning a card on the unit in 30 seconds (default) at Auto Power Off Mode. This means the unit would be turned off if no scanning a card again in every 30 seconds (default) after every card scanning. It would have Low Battery Detect/Warning indication when the unit is powered by battery.

2. Powered by Cable

When PCR120/MFR120 is connected/disconnected to external power adapter by the WAS-T0017 RS232 cable or USB port by the WAS-1571 USB cable,, it would be turned On/Off automatically. When the unit is connected with the PC through the communication Cable (WAS-T0017 or WAS-1571) and the PC is running PCR120/MFR120 software and the unit is turned on. Then you can do the unit Setting, Configuration or data downloading. When the device is powered by cable from PC, the Power Switch "⊙" would have no function and the unit would have no Low Battery Detect/ Warning function.

3. Real Time Clock Setting

Before start using the unit, you must set the Real Time Clock (RTC) inside the unit to your local time. If there is no battery for quite a while or it is powered by cable for quite a while this would cause Real Time clock (RTC) malfunctioned due to no power supply. When put on the battery to turn on the unit and the Red/Green LED take turns to blinks, this means the RTC is malfunctioning and you must do the RTC time setting before you use the unit.

4. Low Battery Detect

When the device is powered by battery, it would have Low Battery Detect function. When the battery goes low, the LCD would display " ▭ " and you must change battery immediately ; otherwise, the unit would shut down any time without pre-warning.

5. Scan RFID Card

When PCR120/MFR120 is showing the status of any function on the screen, after presenting a RFID card to PCR120/ MFR120 reader, PCR120/MFR120 is displaying card ID and record(s) information on the screen immediately. When PCR120/MFR120 is not working for next card scan , PCR120/MFR120 reader will back to default screen automatically.

6. Operate for Calendar

Before setting calendar function, please delete remaining records from PCR120/MFR120 reader, if there are records in the memory of PCR120/MFR120 , your operate setting for Calendar, PCR120/MFR120 reader will display " Record no empty" on the screen.

7. Memory Full Warning

Log database memory is full. You are not able to add any new records. Free the log database memory by uploading the data to the PC.

8. Communication by WAS-T0017 (RS232 cable)

You must use external power when the PC connect to PCR120/MFR120 by WAS-T0017 RS232 cable, or else the communication is not action. You should press any key on PCR120/MFR120 until the communication is finished, if you don't use external power.

9. Firmware Management Mode (FMM)

FMM allows you to quickly upgrade your PCR120/MFR120 internal firmware via com port and also check validity of currently loaded firmware. Contact your dealer for most recent firmware upgrade files.

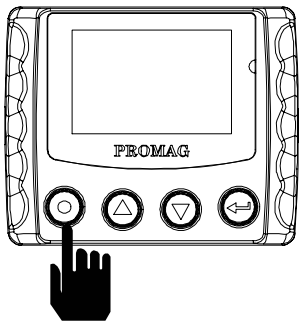
10. Database in memory

The PCR120/MFR120 allows you to manage database by software . The Logical Erase Database will logically clean the database. The Recovery Database will recover the previous erase and not yet covered database. The record pointer will return to the top of the database after any erase.

■ Replace Battery

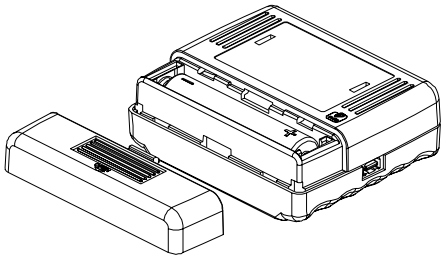
Note:

1. Read the instructions on your device before replace new battery.
2. PCR120/MFR120 can used Single-cell alkaline, nickel-cadmium (NiCd), or nickel-metal hydride
   (NiMH) Battery

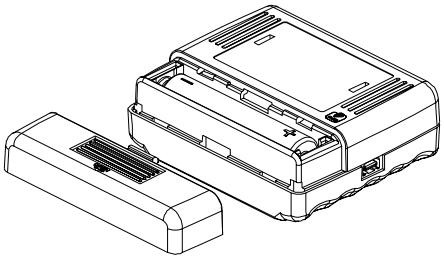


1. Power turn off

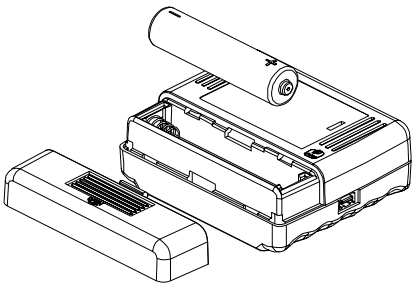
4. Take new battery



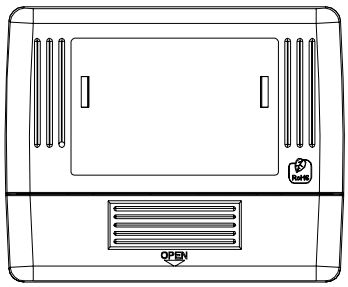
2. Take the cover away



5. Put new battery in



3. Take the battery away



6. Fix the battery cover

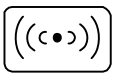
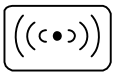
Specifications



125KHz RFID Card for PCR120

EM compatible64 bits, ASK Manchester coding.
Reading distance 10~50mm (depends on card).



13.56MHz RFID Card for MFR120

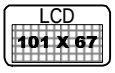
Compatible ISO 14443A, ISO 18092.
Reading distance 10~40mm (depends on card).

RS232 Interface

RS232 , Half-Duplex , 8N1 , 19200 bps

USB Interface

Full compliance with the USB Specification V 1.1
The device uses a Virtual Serial Port Driver, making it appear to have the software like a standard RS232 Serial Port.



LCD Display

LCD type : FSTN
Dot arrangement :101 x 67 Dots Matrix LCD Module
Viewing direction : 6 O'clock

Communication Protocol :

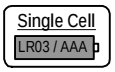
Version 1.2 (GNET V1.2)

CLOCK

Real Time Clock (RTC) module and back-up capacitor

Memory Size for Storing Data

CMOS Serial Flash Memory 512K bytes
Up to 8192 records (32 Bytes / Record)

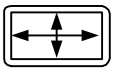


Battery Power

Single-cell alkaline, nickel-cadmium (NiCd), or nickel-metal hydride (NiMH) battery .

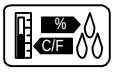
Power Supply from Cable

DC 5V , 200mA (for RS-232) or USB Powered



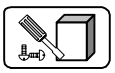
Dimensions

L 58 x W 20 x H 47 mm



Environment

Operating Temp : 0 ~ +55℃
Storage Temp : -10 ~ +60℃
Humidity : 10 ~ 90 % relative



Mounting

Portable or Any surface

Communication Protocol

Handshaking

PCR120/MFR120 Terminal has an extensive list of Commands that allow manipulating its internal database, setting functional parameters and getting data on its current status.

There are 2 levels of access to the PCR120/MFR120 : User and Supervisor. Supervisor level is protected by a Password. Sensitive data can be downloaded or altered only on the Supervisor level. General Terminal data is available on the User level as well.

Command Index Table

Topic	Command		Contents	Description
Access Security Command				
ACCESS	U	L	4 Characters for Login(0000)	Login

Access Security Commands

LOGIN : (for Supervisor Access Level)

STX	L	PASSWORD	CR

STX	A or D or I	CR

PASSWORD	4 Characters for Login. 0000=Initial value

EXAMPLE

02	L	0000	0d

02	A	0d

Login password : 0000

02	D	0d

Login password command is not executed.

02	I	0d

Invalid password.

LOGOUT :

STX	O	CR

STX	A	CR

EXAMPLE

02	O	0d

02	A	0d

Logout

SET PASSWORD :

STX	P	PASSWORD	CR

STX	A or D or I	CR

PASSWORD	New four characters password

EXAMPLE

02	P	1234	0d

02	A	0d

Set new password : 1234

02	D	0d

Set new password is not executed.

02	I	0d

Invalid password

GET NUMBER OF RECORD :

STX	N	CR

STX	A	NUMBER	CR

NUMBER	Record Count . 4 Bytes Width (0000h ~ 0800h)

EXAMPLE

02	N	0d

02	A	000C	0d

The total of record count : 12

READ RECORD BY NUMBER :

STX	G	CR

STX	A	DATE	TIME	SP	WEEK	EVENT	DATA	CR

STX	E or D or F	CR

EXAMPLE

02	G	0d

02	A	20070531	103923	20	4	1	ABCDEFGHIJ	0d

Record data : ABCDEFGHIJ

02	E	0d

Database is empty.

ERASE ALL RECORD :

STX	E	CR

* (Erase Duration : < 60 seconds)

STX	A or D	CR

EXAMPLE

02	E	0d

02	A	0d

Erase all records.

02	D	0d

Erase command is not executed.

ROLLBACK DATABASE READOUT TRANSACTION :

STX	R	CR

STX	A or D	CR

EXAMPLE

02	R	0d

02	A	0d

Database is rollback.

02	D	0d

Command is not executed.

RECOVERY ALL DATABASE READOUT TRANSACTION :

STX	M	CR

STX	A or I	CR

EXAMPLE

02	M	0d

02	A	0d

Database is recovery.

02	I	0d

Invalid command .

GET PRODUCT VERSION :

STX	F	CR

STX	A	ROM No.	VERSION	CR

ROM No.	ROM-Txxxx , xxxx : Rom serial number
VERSION	Vx.xxRm , Vx.xx : Firmware version x.xx , Rm : Modify m times

EXAMPLE

02	F	0d

02	A	ROM-T0571	,	V1.03R0	0d

ROM serial number = ROM-T0571
Firmware version = 1.03
Modify times = 0

SET DATE AND TIME :

STX	S	YYYYMMDDhhmmssw	CR

STX	A or I or D	CR

YYYY	Year (2000 - 20xx)
MM	Month (01 - 12)
DD	Date (01 - 31)
hh	Hour (00 - 23)
mm	Minute (00 - 59)
ss	Second (00 - 59)
w	Week (0~6)

EXAMPLE

02	S	200005061230006	0d

02	A	0d

Set Date = 2000 / 5 / 6
Set Time = 12 : 30 : 00 , Saturday

02	I	0d

Invalid Date/Time

02	D	0d

Set Date/Time is not executed.

GET DATE AND TIME:

STX	T	CR

STX	A	YYYYMMDDhhmmssw	CR

EXAMPLE

02	T	0d

02	A	200005061230006	0d

Get Date = 2000 / 5 / 6
Get Time = 12 : 30 : 00 , Saturday

02	F	0d

Get Date/Time is not set or invalid.

SET MACHINE ID:

STX	J	00~255	CR

STX	A or I or D	CR

EXAMPLE

02	J	00	0d

02	A	0d

Set Machine ID : 00

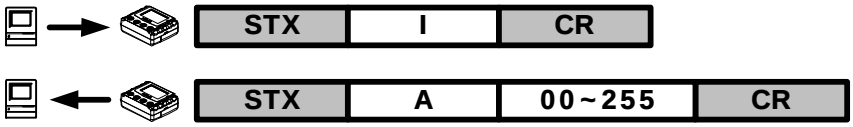
02	I	0d

Invalid command or data.

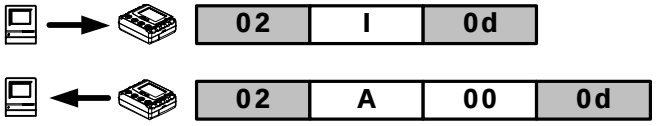
02	D	0d

Set Machine ID is not executed.

GET MACHINE :



EXAMPLE



Get Machine ID : 00

Get Identification is not set or otherwise invalid.

ENTER FIRMWARE MANAGEMENT MODE :
