Introduction of Air Mouse

1. 2.4G wireless/wired mouse/keyboard

A. Mapping:

Press and hold the [Y] key and ["] key while the LED light is on at the keyboard, wait for 5 seconds until the LED light is off. Once the LED light of the receiver turns on, mapping is completed. Air mouse is now ready to work.

B. Usage:

You can hold the air mouse in any position or angle (it doesn't have to be kept at a horizontal position or pointed to the screen) and you can just simply move your hand to keep it working.

C. Keyboard Function:

[Power] **Power:** press the button and then the G-BOX powers off.

F1: Home

F2: Media

F3: Internet TV

F4: Browser

F5: G-Apps

F6: Apps

F7: Setting

F8: Zoom In

F9: Zoom Out

F10: Mute

F11: Volume Down

F12: Volume Up

**The rest keys functions are the same as the standard keyboard.*

Pictures and built-in software are just for your reference, please refer to the actual machine in the market.

D. Special combination keyboard function:

[Shift]+[F4] : F4	[Shift]+[F5] : F5
[Shift]+[F6] : F6	[Shift]+[F7] : F7
[Shift]+[F8] : F8	[Shift]+[F9] : F9
[Shift]+[F10] : F10	[Shift]+[F11] : F11
[Shift]+[F12] : F12	[Shift]+ESC : Initialization

Note: when the cursor is floating, please place the air mouse on a flat surface, and press ESC+G for 5 seconds, while the LED light is on. Keep pressing ESC+G when the light goes off and wait for the LED light to turn on again. The air mouse has now finished initialization.

E. Air Mouse function:

Keep pressing and holding [], the cursor will move when you move the air mouse; when you release [] and double click [], the cursor will move when the air mouse moves.

[] Left click: same function as the normal mouse.

[] Right click: same function as the normal mouse.

F. LED light status:

When the light is flashing, it means the connection failed. When the light stays on, it means that the connection is working.

When you press any key on the keyboard, if the LED light is slowly flashing 4Hz/s, it means the connection failed.

When you press any key on the keyboard, if the LED light is fast flashing 16Hz/s, it means that the battery is low and it's time to change it.

2. Operation Overview

A. Start up status

1. Initializing

2. Start up LOGO

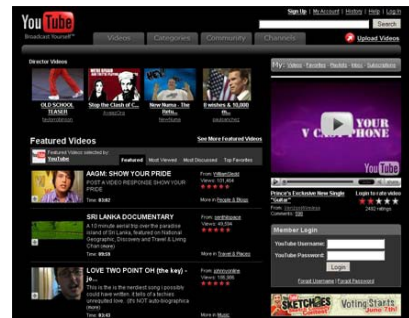

3. Main Interface

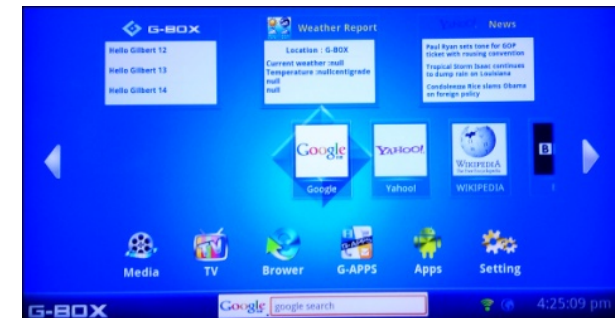

B. Working status

1. Media

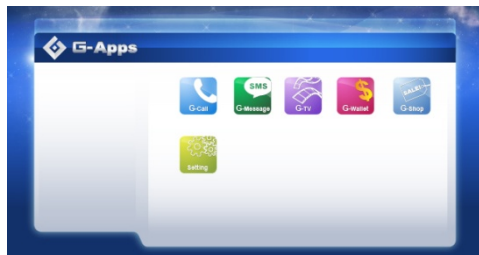

2. Internet TV

3. Browser
