DC260 Firmware Upgrade Instruction

1. Save firmware file to SD-Card or DC260 internal memory. (Please select one.)

1.1 If want to upgrade firmware from SD-Card.

Save firmware file (*.bin) to SD-Card, then insert SD-Card into card-socket of DC260.

1.2 If want to upgrade firmware from DC260 built-in memory.

Save firmware file (*.bin) to DC260 internal memory via USB cable.

2. Go to service menu to upgrade firmware.

Power on your DC260. Press "**DELETE**" then "**ZOOM**+" in sequence on the keypad (Pic 1). You will see Service menu shown on the screen. Then select ISP - Firmware Upgrade mode.(Pic 2)

| Logo Error Cade ISP | _ | |
|-----------------------|-------|-----|
| Firnware Upgrade | Enter | |
| Partation and Formate | Enter | |
| | | Pic |

3. Choose Firmware version

If you save the firmware file properly, DC260 will detect new firmware version automatically. Then select "Yes" button to upgrade firmware. (Pic 3)

Notes : If two more firmware files coexist in the SD card / internal memory, DC260 always detect the latest version.

4. Restart unit when firmware upgrade finished

After firmware upgrade is success, your will see below window and please restart your DC260. (Pic 4)

| Upgrade Success | |
